OUR COVER :

The Microscope, a storyteller of the invisible world and a metaphor for innovation, displays the dazzling dance of life at the cellular level.

Through the microscope, HiMedia not just peers into the strange world of tiny microbes and cellular parts… It also tries to decipher an order in their chaos, a logic in their absurdness.

Through the microscope, HiMedia focuses not just on DNA and specific biomolecules… It also thinks beyond mere business & profit and reflects on its social responsibilities.

Through the microscope, HiMedia studies not just genetic editing and cloning… It also ponders upon the moral and ethical implications of such Biotechnological advancements.

And when HiMedia looks at the World outside the microscope and into the future in Time… It is fascinated by a Futurist World created by HiMedia's breakthrough research, its sophisticated instruments, and its pioneering products!

OUR QUALITY POLICY

- We all at HiMedia are firmly committed to design, develop and manufacture products like Dehydrated Culture Media, Ready Prepared Media, Culture Media Bases, Antimicrobial Susceptibility Discs, Bacteriological Differentiation Aids, Products used in Animal Cell Culture, Plant Tissue Culture, Molecular Biology, Diagnostic reagents & Kits, Diagnostic instruments, Medical devices and Marketing of Laboratory Chemicals that meet requirements of customers, interested parties, legal, Statutory and Regulatory requirements and enhance their satisfaction through effective implementation & improvement of Quality Management System including QMS & QMS for medical devices, providing worldwide technical service.
- We strive to achieve this through up-gradation of technical knowledge of all employees, their involvement & setting up quality objectives.

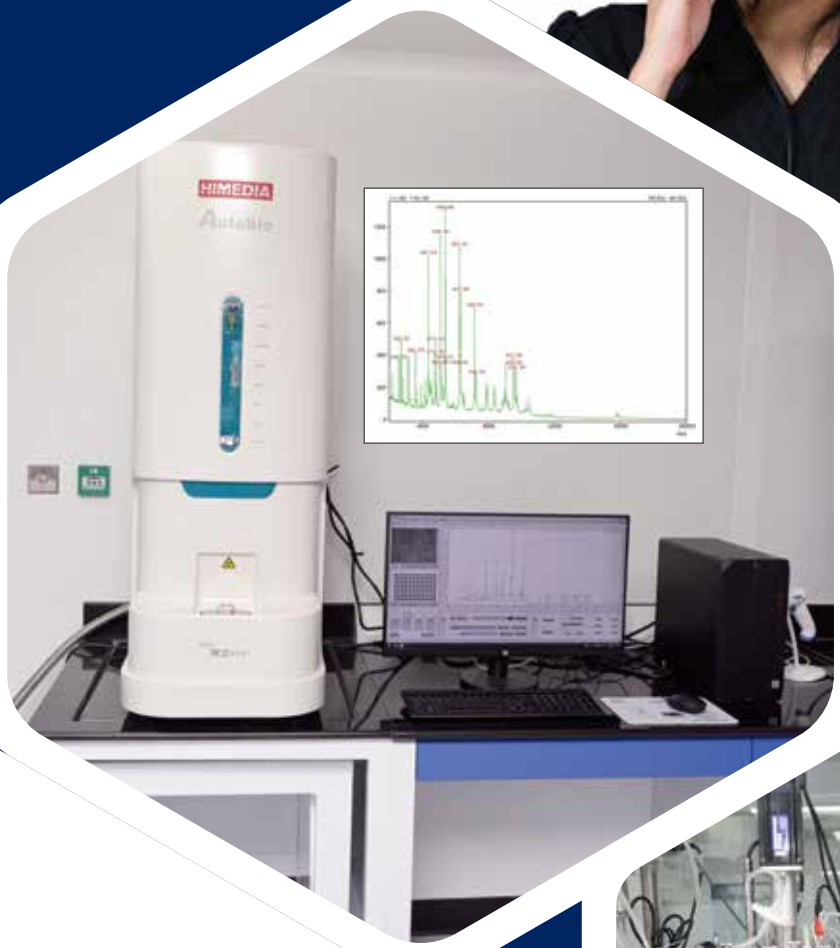
OUR QUALITY OBJECTIVE

- Continually assess and enhance customer satisfaction by constant interaction with the customers to achieve a minimum customer satisfaction index of 85%.
- Make constant efforts for innovation through Research and Development activity for increasing the range of HiMedia products by developing 20 new products and up-gradation of products every year.
- To develop culture of commitment to quality by up-gradation of skills and improvement in work methods to restrict the rejection level below 0.4%.

MiCroBiology™
Understanding Microbes

Microbiology Services

Welcome to HiMedia



Microbiological services

- Microbial strains preservation and supply
- Bacterial & Fungal identification in a polyphasic approach: Microscopy, Biochemical and MALDI-TOF
- Disinfectant qualification efficacy testing
- Antimicrobial susceptibility testing (In-vitro)
- Customized disc/MIC strips/MIC plates preparation in bulk
- Customized media development and providing up to 5 tons per batch
- Strain specific fermentation media development

We provide Accurate identity of your Microbe

Testing services & Training courses

- Microbial fermentation yield or strain improvement from the tube, shaker to the lab scale fermentation level
- Bacterial endotoxin test
- Sterility testing for the absence of viable forms of microorganisms in or on products

OUR QUALITY COMMITMENT

CERTIFICATE

Certificate of Registration

This is to certify that

Himedia Laboratories Pvt. Ltd.

B/4-6, M.I.D.C Palkhed, Nashik 422 202, Maharashtra. India.
Registered Office: Plot No. C-40, Road No. 21/Y, MIDC, Wagle Industrial Area. Thane (W) - 400 604. Maharashtra. India.

has been independently assessed and is compliant with the requirement of

WHO-GMP

Assessment done against codex Alimentarius Commission CAC/RCP 1-1969, Rev 4 (2003): Recommended International code of Practice - General Principles of Food Hygiene.

This certificate is applicable to the following scope:

Manufacture and Supply of Bioscience Products for Applications In Microbiology (Includes Dehydrated Culture Media, Culture Media Base, Antimicrobial Susceptibility System & Bacteriological Differentiation Aids), Animal Cell Culture, Plant Tissue Culture and Molecular Biology,

This certificate is issued under the following conditions:

1. It applies only to the quality system maintained in the manufacture of above referenced model products.
2. The certificate remains valid until the manufacturing conditions or the quality systems are changed and is subject to continuous surveillance according to the WHO-GMP Standard.
3. The certificate validity is conditioned by positive results or surveillance audits.

Signed for and behalf of QVR

Registration No. : DAAS-HIL-00036

This certificate is valid from 13-Jan-2023 until 12-Jan-2026
Re-certification due date 12-Jan-2026

Directorate of Accreditation for Assessment Services
973 Elizabeth St. Strathmore Alberta - T0C Canada
www.daasaccreditation.org / www.qvrcerts.com

To verify the validity of this unaccredited certificate please visit www.daasaccreditation.org or scan QR code. Surveillance audit shall be conducted at least once a calendar year. This is to certify that the management system of this company has been found to confirm to the above. If the certified client does not allow surveillance, re-certification audits, certificate would be return to Quality Verification Registrar. This certificate remain the property of Directorate of Accreditation for Assessment Services (DAAS) and this certificate is recognized by Directorate of Accreditation for Assessment Services (DAAS).

MEETING YOUR NEEDS

Celebrating 50 years of dedicated service to the scientific community, HiMedia Laboratories continues its mission of 'BioSciences in the service of Humankind.' From its inception, we have been unwaveringly committed to producing innovative products for global markets, proudly aligning ourselves with the 'Make in India' initiative. Despite facing numerous challenges, HiMedia has consistently held its position as a leading Indian Bio-supplier. Our commitment to delivering quality products at affordable prices resonates with our vision of 'Delivering excellence to your doorstep,' a pursuit evident across all our business verticals.

Introducing our 'Lab Super Mart,' a carefully crafted platform providing a comprehensive view of our diverse product range. This platform simplifies the process of selecting the right product from the extensive list of SKUs in various BioScience categories. In response to the scientific community's demands, we continue to expand our product offerings with diligence and dedication.

Quality, the Backbone

Since our establishment, HiMedia has embraced the principle of 'Quality First.' As a globally recognized brand, we have diligently acquired all essential Quality Certifications. Our commitment to excellence is reflected in the amalgamation of our global production expertise, unwavering commitment to perfection, and dedicated technical service for the scientific community. Serving customers in over 150 countries, we deliver world-class quality products amidst rigorous international competition. Despite seaweed shortages, we take pride in consistently supplying our valued patrons with high-quality agar media.

Product Leadership

Recognized as a premier brand with substantial global demand for innovative products such as HiCynth™ and HiVeg™, HiMedia stands unrivaled worldwide. The extensive popularity of over 1500 TSE/BSE-free HiVeg™ Culture Media underscores their significance, particularly in light of concerns about mad cow disease, swine flu, and bird flu epidemics. Eliminating TSE/BSE and intricate raw materials, HiMedia now offers a portfolio of more than 70 Chemically Defined Media to ensure consistent results. Both product lines prioritize environmental friendliness, reflecting our commitment to environmental conservation. As pioneers of technological advancements on a global scale from India, HiMedia has consistently earned the trust and loyalty of our patrons. With each passing year, we are dedicated to enhancing our service to you.

Multilingual Labels

To enhance communication with our global users, we employ descriptive multilingual labels on our product packaging. These labels are provided in English, German, Spanish, French and Portuguese to cater to a diverse international audience.

Multilingual Safety Data Sheets

While the terms 'safety data sheet' or 'SDS' are internationally recognized, the content requirements for these documents vary among different countries. In our commitment to meeting global standards, we are advancing by utilizing CHEMDOX to provide safety data sheets in multiple languages. This contemporary software ensures classification and documentation compliance with current chemical and transportation laws, adhering to diverse national and international regulations. Substance and mixture classification is based on various regulatory laws globally, including harmonized rules such as the GHS (Purple Book) or the UN Model Regulations for transport law (Orange Book). Compliance with the latest version of the REACH regulation is mandatory for all SDS intended

"Science knows no country, because knowledge belongs to humanity, and is the torch which illuminates the world.

~ *LOUIS PASTEUR*

for European countries. Additionally, CHEMDOX offers regulatory information on the status of the substance or mixture, including its ingredients, under relevant safety, health, and environmental regulations.

Microbiome Zone

Typical products for Microbiome Research are marked as MZ in this catalogue for easy search as below.

BHI Agar (Brain Heart Infusion Agar) (Special Infusion Agar) for cultivation of fastidious pathogenic bacteria, yeasts and moulds. Gms/Lit : 52.00 9.62 Lit/500G Penicillin - 20 units/ml Streptomycin - 40 µg/ml ➤	M211-100G M211-500G MZ	100gm 500gm

Product Range

Within our broad spectrum of products, you will find numerous innovative offerings catering to Microbiology, Cell Biology, Plant Tissue Culture, Molecular Biology (inclusive of kits and reagents), Hydroponics, and more.

Furthermore, we produce a comprehensive array of culture media bases derived from both animal and plant sources. These bases serve as essential microbiological components for media preparation or act as raw materials for industries involved in fermentation processes.

MEETING YOUR NEEDS

Microbiology Services : Your Need our Expertise

HiMedia is a pioneering organization in Biosciences and one of the world leaders in microbiological media.Our core expertise and skills in the various areas of Microbiology and needs of our esteemed patrons motivated us to initiate a service wing to assist all our Microbiology professionals, research institutes, students, and Industrial partners. We are delighted to share a list of some of the current services we offer. Any other services than these will also be considered based on your discussions with our R&D team. For further details, do not hesitate to contact us at micro.service@himedialabs.com.

Our Microbiology services include:

- Bacterial & Fungal identification by MALDI-TOF MS
- Preservation and Supply of Microbial strains
- Antimicrobial susceptibility testing (in vitro)
- Bulk preparation of Customized disc/MIC strips/MIC plates
- Customized media development (providing up to 5 tons per batch)
- Qualification and efficacy testing of disinfectants
- Strain-specific fermentation media development
- Microbial fermentation yield or strain improvement (from pilot scale to lab scale)
- Bacterial endotoxin test
- Sterility testing for a product's inherent contents and surfaces
- Gamma Irradiation Services

Gamma Irradiation Services

HiMedia now also offers sterilization services through its in-house gamma irradiation facility at N-46, Ambernath. We are now equipped to sterilize a vast range of media and apparatus in bulk (processing limit: 50kg per drum/box). With a radiation capacity of 3 x 106 Curie and many certifications (B.R.I.T.; ISO; WHO-GMP & A.E.R.B.). The efficiently calculated radiation doses inflicted are in the range of 6-35 kGy (higher doses available in multiples of 25). This facility is open for our patrons to utilize for their particular research or industrial needs. All of our Ready Prepared Media product range is sterilized by this facility.

HiCynth® Chemically Defined Media

The 5th generation of Dehydrated Culture Media named as HiCynth® is a unique technology introduced in 2015, where animal and plant peptones are completely replaced with chemically defined peptones. The entire revolutionary range of products of this advanced generation of media is TSE/BSE/GMO risk-free and environment friendly as it minimizes the carbon footprint. They are more stable as they reduce the variability in the raw material sources and give consistent results. This will efficiently cater to the future demands of technological advancements in Microbiology.

Granulated Form

HiMedia is one of the leading manufacturers of media in granulated form using ultra-modern technology. These are safer, easily soluble, reliable, free-flowing, uniform and dust-free. This makes them highly convenient to use as compared to traditional powdered media. Granulated media have been prominently appreciated across the world, especially by our aerosol-sensitive users.

Powder Form

We still manufacture the majority of our Dehydrated Culture Media in powdered form using advanced manufacturing facilities to serve our longstanding users.

Culture Media Bases *pp* : 241-248

Dehydrated Culture Media Bases of sustained high quality have been our forte for the past quarter century. This includes a comprehensive range of products such as peptones of both conventional animal-based and animal-free types, enzyme hydrolysates of various

proteins, extracts, infusion powders, bile salts, etc. Intermediate, and Resistance zone sizes is as per CLSI & EUCAST guidelines.

Ready Prepared Media

pp : 3-74

Ready-to-use, prepared, cultured media available in a choice of plates, tubes, bottles, etc for the identification of microorganisms are referred to as Ready Prepared Media products. They are time and cost-saving, convenient to use, and provide consistent high quality. They find wide applications in clinical, food, water, pharmaceutical, dairy, and textile industries. In this product range, HiMedia offers Ready prepared plates, Scored plates, Ready prepared liquid medium, Ready prepared Solid Medium, Ready prepared slants, Ready prepared transport swabs, Ready prepared Liquid transport medium with swabs, Tuberculosis Identification Slants, Rapid UTI Diagnostic Tests, Biochemical Identification test kits, HiBio-ID test kits, HiDip™ Slides, Multifunctional HiTouch™ Flexi plates, Drifilter Membrane Nutrient Pad media, Air Sampler Strips, Mono phasic and Dual HiCombi™ HiSafe™ Blood Culturing system, Surface sampling kits, etc.

Lockable and/or Barcoded Ready Prepared Plates EM-CULT ENLOCK™

Conventional ready prepared plates pose certain problems during operation and transport: there are chances of their lids getting opened or displaced. Recently launched EM-cult Enlock™ has an innovative locking system to avoid accidental opening of the plates during handling and to ensure integrity of results. For the convenience of our patrons for documentation, we also provide these plates with barcodes.

HiVibrio Trap Kit

Unique chromogenic application for testing of water samples in the plate for detection, enumeration, and differentiation of Vibrio species.

HiEnviro-Sponge®

High quality Environmental Monitoring Sponges and Sponge Sticks have been introduced. They are available in Dry and Hydrated Format with various media/buffers. These are durable sponges for sampling all types of environmental surfaces with no impact on recovery/ viability of organisms.

HiPetriSlim™

Compact, convenient ready prepared thin layered agar gel formats have been developed. It finds application in testing of water, food & cosmetics. They are meant for determination of total counts of bacteria, yeast & mold or pathogens.

BioChemical Kits

BioChemical Identification Test Kits for bacterial identification, Epidemiology Screening, Niacin Detection, Pyrazinamidase Testing, Nitrate Reduction Test and Catalase Test for confirmation of *Mycobacterium tuberculosis* are a part of this section. We provide a range of biochemical kits including motility kits in miniature form for rapid detection of organisms. We have developed biochemical kits for detection of *V. cholerae, V. parahaemolyticus, Salmonella & Shigella species* in alignment with fifteen specifications. We also provide services for customized kit development.

Antimicrobial Susceptibility System

pp : 249-340

To overcome the tedious broth micro dilution method, we have introduced HiMIC™ Plate Kit. This is developed for determining MIC using Micro dilution Method using an indicator-based system. It has 12-well detachable strips, diluent, HiMIC reading card, and separate incubation tray. The wells are coated with the growth medium and are deposited with exact gradient of the test antibiotic. It does not require any instrumentation. MIC breakpoint can be determined visually using the reading card. Interpretation for Antibiotic Sensitive, Intermediate, and Resistance zone sizes is as per CLSI & EUCAST guidelines.

Introductory The newly introduced HiComb™ Strip-Modified is gradient based method for determination of Minimum Inhibitory Concentration (MIC). It covers 15 two-fold dilutions in a single strip having highest concentration at the top and lowest concentration at the bottom. Quantitative analysis as per EUCAST and CLSI guidelines.

Apart from these, HiMedia's regular array of products

MEETING YOUR NEEDS

under the umbrella of Antimicrobial Susceptibility Systems include Sensitivity disc (Single), Multi disc (Hexa disc, Octo Disc, Dodeca Disc, Icosa Disc) for disc diffusion method, and Ezy MIC™ Strips and HiComb™ Strip for determination of Minimum Inhibitory Concentration (MIC).

Stains, Indicators & Reagents

pp : 341-355

These include most of the commonly used, readymade Stains, Indicators and Reagents as solutions and kits suitable for morphological characterization in bacteriology, mycology, parasitology, hematology, cytology and histology.

Rapid Culturing System

Routine culture tests takes about 3 to 5 days for confirmation. Our novel HiDtect® Rapid Culturing System does this in a single day, thus reducing the time frame. This has proven instrumental for testing in clinical diagnostics, food, water, dairy, environment, pharmaceuticals, etc.

Food Testing Kits

HiFast™ Food Pathogen Detection Kit aids in early detection of food pathogens such as *E.coli* (0157:H7 and other toxicogenic strains), and other genera like *Salmonella, Listeria, Staphylococcus* and *Clostridium.*

Water Testing Kits

pp : 1202-1210

A comprehensive range of kits for various chemical parameters of water as well as a variety of microbial testing kits suited to match every need for water testing of potable or processed water.

We have also introduced HiEcoli™ Test Kit (K092) for detection and enumeration of E.coli by MPN technique using compartment bags. HiFast™ Water Testing (HiColinella Fast™ Test-K096) Kit to detect presence of E.coli within 5 hours while, Salmonella & Citrobacter are detected in 6-7 hours, in heavily contaminated water.

Endotoxin Assay Kits, BET

pp : 391-394

Complete range of Bacterial Endotoxin Testing (BET) kits and accessories with Amoebocyte lysates having minimal detection limit for endotoxin ranging from 0.03 to 0.5 EU/ml. We aim to suit your needs for assay of endotoxins from pharmaceuticals, biological products, radioactive medicine, medical devices and associated raw materials.

Diagnosing the Superbugs

The Superbug threat looms larger and uglier over our heads with each passing day. Fortifying ourselves with appropriate means to tackle these drug-resistant bacteria has become a dire necessity today. HiMedia delivers the first line measures in this respect; with efficient detection of these bugs through range of media variations including Multi-drug Resistant Candida auris Selective Media Base, HiCrome® ESBL (Extended Spectrum β-Lactamase) Agar Base, HiCrome® CarbaResist Agar Base (Carbapenem Resistant Enterobacteriaceae), HiCrome® Rapid MRSA (Methicillin Resistant *Staphylococcus aureus*) Agar Base, HiCrome® VRE (Vancomycin Resistant Enterococci) Agar Base.

Cell Biology

pp : 395-676

Cell Biology Media

HiMedia's core expertise lies in manufacturing ready-to-use cell biology media (RPM), both in powdered as well as liquid formulations, for mammalian and insect cell lines. Comprehensive design of experiments, rigorous raw material qualification and media production with no manual intervention using automated liquid handling platform and automatic filling line are our strengths that enable us to provide the widest range of cell biology media.

HiGlutaXL™ media in our catalog contains L-Alanyl-L-Glutamine (stabilized dipeptide form of L-Glutamine) which provides thermostability to media and reduces toxicity due to ammonia build up in cell cultures.

We offer LoSera™ media to counter the problems of differentiation of primary cells, protein interference in bioassays or difficulty in purification of cell biology products due to high serum content. This range of media contains low percentage of serum with parallel supplementation of nutrients which helps in improving reproducibility as well as considerable cost reduction.

HybridoXL™ media are specially formulated to support propagation and rapid growth of hybridoma cells. HiTransfect™ media have been designed for efficient transfection of various mammalian cell lines in serum-free and reduced serum formulations.

CryoXL™ cryopreservation media are ready-to-use freezing media optimized for effective cryopreservation of your cells. Introducing FREEZEin1™ Universal Freezing medium is a one solution for freezing cell lines, primary and stem cells and serum free cells. We have introduced CryoLITE™, DMSO free formulation for cryopreservation of your most precious cells.

Customized Media

It has been our endeavor to help researchers with specific requirements related to media and cell biology reagents. We provide customized products as per the unique requirements of the clients in terms of media formulations, packaging, labeling, documentation (e.g. certificates of origin, BSE/ TSE risk statements) and additional QC testing (e.g. virus testing, mycoplasma detection, amino acid profiling).

We are firmly committed to maintain the confidentiality of your project and we sign a confidentiality agreement to ensure that the integrity of your project is not compromised.

We produce over 1200 metric tons of common as well as specialized media per annum. For Powdered media, our manufacturing facility is equipped to take production in lot sizes varying from 1kg to lots as large as 5000kg. We have the capability to manufacture sterile liquid media in lot sizes starting from 5L to larger volumes.

Cell Culture Platform

pp : 463-494

The introduction of cell culture methodology to the biological sciences ushered in a new era of rapid and exciting advances in the fields of virology, cytology, drug discovery, toxicology, cancer and stem cell research and therapy. HiMedia's comprehensive portfolio includes cell culture platform (media, sera and reagents), cell analysis and detection solutions, cell culture tested chemicals, cell culture systems, stem cells and primary cells, filtration solutions and also skill development modules to enable scientists to achieve milestones in their research endeavors.

Sera

pp : 500-512

HiMedia provides a wide range of quality assured serum over decades that helps achieving consistency in cell growth. Our product listing includes sera from bovine fetus, adult bovine, newborn calf and other animals and specialty sera including charcoal treated, dialyzed, tetracycline negative and ES cell tested sera. All lots of the sera undergo comprehensive quality control testing that include sterility testing against mycoplasma, viruses and bacteria, antibody testing, analysis of growth promotion capacity, protein profiling, endotoxin content and physicochemical analysis.

Research Grade, Fetal Bovine Sera : An economical alternative for your research!

HiMedia's Research Grade FBS Sera provides exceptional value and quality for everyday applications. This serum helps to meet your research needs and budget requirements, offering the best value for basic cell culture, specialty research, and specific assays.

Sure Fetal Bovine Sera- : Certified serum for commercial applications

Sure Fetal Bovine Sera are manufactured from countries with negligible BSE risk zones following stringent manufacturing and quality control procedures. Suitable for many cell culture applications, this serum is comprehensively tested for performance and quality assurance.

NuSera™ is a semi-defined Serum Replacement Solution designed to replace fetal bovine serum in cell culture. It has been optimized to support long term in vitro growth of multiple cells lines irrespective of the species and the tissue from which they have been originated. NuSera™ is suitable for adherent as well as suspension cultures. 10 % of NuSera™ is equivalent to 10% Fetal Bovine Serum in the basal medium at 30% cost reduction.

Serum-free Platform

To counter the batch-to-batch variation and contamination issues related to use of serum in culture, the formulations of media excluding sera are

MEETING YOUR NEEDS

being favored by worldwide researchers. Serum-free media have a defined composition, resulting in a high reproducibility, accuracy, precision and consistency in results. HiMedia currently supplies serum-free media for CHO, Vero, MDCK and BHK cell lines that are most widely used for industrial production of recombinant proteins and vaccine.

Bio Process *pp* : 407-426

With our Animal Component Free, Chemically Defined CHOin1™ Media & Universal feeds supplement, we provide a comprehensive range of clone-specific serum-free, protein free media and feed supplements and Bio-Production services

Viral Vaccine Media *pp* : 440-446

Accelerate Your Viral Vaccine Development with our host specific media for virus production. Our wide range of vaccine production media include Human viral vaccine media (CELLin1™ and HEKin1™), FMD Vaccine media (BHKin1™) and Avian Vaccine media (PrimaVac™).

Cultivated Meat Media

We offer a wide range of media formulations for cultivated meat.

Specialty Platforms

For the specialized segments of cell biology such as cytogenetics, transfection, hybridoma technology, IVF, viral transport, separation of different types of WBCs, HiMedia offers complete range of media and cell biology reagents.

Cytogenetics platform *pp* : 489-494

HiKaryoXL™ media are a series of ready-to-use media developed for short term in vitro culture of peripheral blood lymphocytes for cytogenetic studies.

HiMarrowXL™ Karyotyping Medium is a karyotyping medium recommended for short term in vitro culture of primary bone marrow cells for cytogenetic studies

HiAmnioXL™ Amniocyte Karyotyping Medium is developed specifically for the in vitro prenatal diagnostic testing of human amniotic fluid and CVS specimens and designed for ease of handling

Stem Cells & Media *pp* : 514-526

HiMedia provides HiFi™ Mesenchymal Stem Cells isolated from three sources- Wharton's Jelly, Adipose tissue and dental pulp. For successful culture of these cells, we offer specialized media in the form of classical, reduced serum and serum-free formulations along with HiDiff™ differentiation media for differentiation into specific lineages and EZstain™ staining kits.

Our Stem cell culture medias are specialized solutions designed to support the proliferation, differentiation, growth, and cryopreservation of stem cells and other cells. We have introduced a Complete, Defined, Serum free (SF), Xeno-free (XF) system for in vitro culture of human mesenchymal stem cells called Stemin1™

Primary Cells & Media *pp* : 527-529

HiMedia provides Primary cells including endothelial cells from human umbilical vein and artery; Fibroblast cells, Keratinocytes and Melanocytes from Human adult skin and juvenile foreskin, Peripheral Blood Mononuclear Cells from human blood and human Mammary Epithelial Cells.

Cytokines and growth factors *pp* : 530-538

Cytokines and growth factors are critical cell culture media components, particularly when serum-and animal-free conditions or defined media are required. We offer hundreds of purified, recombinant growth factors and cytokines for proliferation, differentiation, angiogenesis studies, and more. We offer over 100 gold-standard antibodies for all your electron microscopy imaging needs. The Antibodies can be used in several scientific applications, including Flow Cytometry, Western Blot, ELISA, Immunohistochemistry and Immunohistochemistry.

Cell Analysis & Detection Solutions *pp* : 541-550

The broad range of cell based assays offered by HiMedia gives researchers a tool to study the aspects of cytotoxicity, cell cycle, enzymology and cell signaling extensively.

We provide accurate, sensitive and reliable detection methods and robust and successful elimination methods for mycoplasma contamination in cell biology.

Our catalog includes a number of stains and indicators dyes including nuclear and cytoplasmic stains, DNA/RNA-binding stains, viability stains or stains specific to any cell organelle used in cell biology on routine basis for particular applications.

Cell Biology Tested Chemicals ***pp* : 553-582**

HiMedia is one of the leading suppliers of comprehensive range of chemicals and specialty chemicals including amino acids, antibiotics, growth factors, biochemicals, cell dissociation and cryopreservation reagents used in cell culture. These chemicals apart from the analytical testing undergo cell culture test to verify their suitability in cell biology application.

In view of the challenges that some companies face in responding to an increasingly complex regulatory compliance, our multi-compendial grade chemicals, comply with guidelines of multiple pharmacopoeia-JP (Japanese Pharmacopoeia), BP (British Pharmacopoeia), IP, USP, and EP (European Pharmacopoeia) in order to follow complex regulatory protocols and criteria. Every lot released for supply is provided with a detailed Certificate of Analysis (COA) defining the product specifications.

Cell Culture Plasticware ***pp* : 584-604**

Cell biology is incomplete without a unique combination of culture vessels, liquid handling systems, storage bottles and pipetting aids. Committed to provide best quality, HiMedia supplies the quality grade of cell culture tested lab ware to maintain excellent growth conditions and high viability of the cell cultures.

Our PET and PETG are ideal for storage and sampling of media, biologicals and other aqueous solutions. Polyethylene terephthalate (PET) bottles are ideal for storage and sampling of media, biologicals, and other aqueous solutions. The PET resin makes the bottle lightweight, break resistant and as transparent as glass. We also offer plasticwares like Roller bottle, HiFactory and Erlenmeyer flasks for scaleup of viral vaccine production.

Filtration Systems ***pp* : 606-638**

HiMedia's product offering includes a broad range of filters, membranes, filter holders, funnels, vacuum-driven filters and related filtration devices. Filtration membranes and syringe driven filters are available with different membranes of Cellulose nitrate, Nylon-66, PVDF, PES, PTFE or MCE to help users select required pore size and membrane, correct membrane area and best filter design to suit their application.

Maximize your workspace environment by eliminating the need for separate manifold, vacuum pump and excess tubing and improve operation time with our HiFlo™ Pump.

Instrumentation ***pp* : 640-656**

Enhance your cell culture experiments with reliable, high-quality equipment designed for precision and efficiency. From **CO_2 incubators, biohazard cabinets, and standard centrifuges to Cellax™ laboratory refrigeration and Freezers, automated cell counters, and advanced cell imaging technology,** we provide everything you need for a seamless workflow.

Take your research to the next level with **CERO,** our innovative benchtop **Incubator & Bioreactor**. Designed for versatility, **CERO** supports the growth of **spheroids, organoids, iPS cells,** and **primary cells**, ensuring optimal conditions for breakthrough discoveries.

For precise, label-free cell analysis, **CASY** delivers exceptional accuracy and reproducibility. It provides real-time insights into **cell viability, size, and aggregation,** all with **ultra-low running costs**, making it an indispensable tool for researchers.

Bringing the future of **3D bioprinting** to India, our **TRIVIMA** 3D bioprinter—developed by **NBIL**—is tailored for **pharmaceutical companies, research institutes, and educational institutions** exploring tissue engineering. Recognizing the diverse needs of the Indian scientific community, **TRIVIMA** is designed for complete customization, empowering researchers to push the boundaries of biomedical innovation.

Equip your lab with technology that drives **precision,**

MEETING YOUR NEEDS

efficiency, and groundbreaking discoveries. Let's redefine what's possible in cell culture and regenerative medicine—together.

Molecular Biology *pp* : 677-834

The diagnostics industry is at the heart of healthcare transformation. The post-pandemic era has further underscored the need for robust diagnostic systems, bringing unprecedented opportunities for growth and innovation. Innovation distinguishes between a leader and a follower. Innovations such as point-of-care testing and lab automation are enabling timely intervention and efficient care.

This new year, HiGenoMB® has ventured into In-vitro transcription. We have introduced a few transcription-based products such as the T7 Polymerase and In-vitro Transcription Kit, respectively. **T7 RNA Polymerase** is a top-tier enzyme that generates RNA transcripts from DNA templates containing the T7 promoter. With high purity and activity, this polymerase ensures efficient RNA synthesis for mRNA production, RNA probe generation, and gene expression studies. **T7 In Vitro Transcription Kit (Low dsRNA)** provides an efficient method for RNA transcription while minimizing the creation of double-stranded RNA (dsRNA) byproducts. The alternative **T7 In Vitro Transcription Kit (N1-Me-pUTP)** aids in the incorporation of N1-methylpseudouridine (N1-Me-pUTP) into the RNA transcripts and enhances RNA stability and translation efficiency. This optimized kit includes all necessary components, such as high-performance T7 RNA polymerase, buffers, and nucleotide mix.

The availability of automated systems for nucleic acid extraction has created a buzz in the Biotechnology market. The advancement is evident in the gradual shift from column-based methods to magnetic bead-based automated extraction that has significantly improved the quality of extracted nucleic acid whilst reducing the time required for extraction. HiGenoMB®'s range of **Insta NX® Mag Automated Extractors** – The **Insta NX®Mag16^{Plus}, Insta NX® Mag24 and Insta NX®Mag32^{Plus}** have left no stone unturned.

With the HiPurA® pre-filled plates and cartridges, one can process even higher sample volumes and get the best quality of nucleic acid for applications in PCR, library screening, sequencing, etc. The pre-filled individual cartridges provide the flexibility of processing even a single sample on the Mag series and ensure a streamlined, reliable workflow. Pre-filled kits for extraction of **Nucleic Acid from Bacteria, Soil, Water, Plant, Seed, Nematodes, Insect, Stool, Urine, Yeast, and Fungus** can be helpful in vigorous microbiome research studies. HiGenoMB® has also developed pre-filled extraction kits for **MTB DNA along with Tissue, Blood, Body Fluids, Bone,** and other clinically important samples. **Plasmid DNA** extraction performed using the Insta NX® Mag series has shown promising results. **HiPurA® Pre-filled Cartridges for Endotoxin-Free Plasmid DNA Purification** provide a rapid, efficient solution for minimizing the level of endotoxin contamination in purified plasmid DNA, making it ideal for sensitive applications like transfection, cell culture, and gene therapy. **HiPurA® Pre-filled Cartridges for Plasmid DNA Purification kits are available in Miniprep, Midiprep & Maxiprep** formats.

A novel product, **HiPurA® Pre-filled Cartridges for PCR Product and Gel Purification Combo Kit** - offers a simplified and convenient two-in-one automated solution for purifying PCR products and DNA fragments from agarose gels eliminating the need for multiple kits.

Addressing the various industrial needs, HiGenoMB® has also developed pre-filled kits for **Nucleic acid purification from paraffin-embedded tissue (FFPE) samples, Wastewater Nucleic Acid Purification,** etc. Automation significantly reduces human intervention and the TAT without hampering the quality & purity of Nucleic acid.

To make it more interesting, our scientists have also explored the possibility of Protein Purification on the Insta NX® Mag series. The CE-IVDR & ANVISA approved Mag16^{Plus}, Mag32^{Plus} and Mag24 instruments can now be used for efficient purification of recombinant proteins. **HiPurA® HIS-tagged Protein Purification Kit (Magnetic Bead Based)**, available in both formats, currently offers

a simplified and streamlined solution for the purification of 6XHis-Tagged proteins, thereby eliminating the need for traditional column chromatography. This technology ensures high yields of pure HIS-tagged protein, ideal for downstream applications. One can now rely completely on automated extraction systems for hassle-free DNA, RNA, and Protein purification (Recombinant).

While the quality of nucleic acid depends on the method of extraction, it is largely dependent upon the sample collection and transportation conditions. At HiGenoMB®, we emphasize following the right methods and devices for sample collection and transportation so as to maintain the integrity of nucleic acid. Our existing range of reagents and devices for sample collection and transportation includes **RNA Liv™, Microbiome Liv, Insta DNA® Cards, cfDNA Tube, Cervical Swab collection Kit, Human DNA Free Swab,** etc. The newly introduced **HiPer® SaliSure Kit** provides an easy, non-invasive method for the detection of saliva samples for further forensic analysis. **HiPer® SaliFind Kit** is designed for rapid mapping of saliva traces for forensic purposes.

Our recently launched **Insta-Q96® AG series of Real-Time PCR** system has a modern look with a classy and compact design has a few notable features including an in-built touch screen and software, top-based detection, and 6-zone independent temperature control enabling refined uniformity, better sensitivity, fast & accurate fluorescence quantitative analysis. It is **CE-IVDR certified** and has **21 CFR Compliance. CE approved, Prima Flexi® Series - PCR Thermal Cycler** boasts of 5 interchangeable block formats for seamless sample processing and rapid thermal cycling. **WHY SWAP MACHINE? SWAP BLOCKS!** With its flexibility to accommodate diverse blocks, tube, and plate formats, it's the ideal solution for various PCR applications in research and diagnostics. To our exclusive range of PCR consumables, we have added the **384-well full-skirted PCR plate.** It is compatible with Prima Flexi® 384 well block and also various sealing methods.

For quick diagnosis of acute febrile illnesses, we have launched the **Hi-PCR® Acute Fever Panel Kit**. This two-tube Real-time PCR assay can detect and differentiate between the eight most commonly observed infections - Dengue, Chikungunya, Zika, Typhoid, Leptospirosis, Malaria, and Scrub typhus that present clinically overlapping symptoms.

Protein Standard (2mg/ml) offers a dependable reference for protein quantification and analysis. This precisely formulated standard delivers accurate, reproducible results across various protein estimation assays, namely Bradford, Folin Lowry methods, BCA, ELISA, etc. With a 2mg/ml concentration, it provides a convenient starting point for generating standard curves, saving you valuable time.

After receiving **NABL accreditation** for microbial identification services and upgrading to the Illumina platform, we have added a few more services to our Hi-Gx360® portfolio. A significant bottleneck in NGS includes the complex and cumbersome library preparation that starts with fragmented DNA resulting in amplified and barcoded DNA with sequencing adapters. In order to tackle this, HiGenoMB® has introduced the **Hi-Gx360® DNA Library Preparation Kit for Illumina® Sequencing** for preparing high-quality DNA libraries. Optimized for various DNA input amounts, the Hi-Gx360® kit delivers consistent results, suitable for whole-genome sequencing, targeted sequencing, and metagenomics. Its user-friendly protocol and robust performance make it an ideal choice for generating high-quality sequencing data.

The **Hi-Gx360® WES Panel** offers an efficient solution for Whole Exome Sequencing (WES) on Illumina by capturing and enriching the protein-coding regions that are critical for studying genetic variations linked to diseases. **Hi-Gx360® Targeted Capture & Enrichment solution** facilitates precise enrichment of specific DNA regions for NGS on Illumina platforms, thus reducing sequencing costs and analysis time. Hi-Gx360® provides flexibility in target selection and compatibility with various library preparation methods, making it suitable for exome sequencing, targeted gene panels, etc.

Our innovative product portfolio reflects our commitment to meeting customer needs with exceptional quality. By combining cutting-edge technology and design, we ensure every product exceeds expectations. We remain dedicated to delivering

excellence in both products and services, fostering lasting relationships with our customers.

Plant Tissue Culture *pp* : 835-890

HiMedia serves plant researchers at every stage of the research process and provides a complete end-to-end solution for their problems. We provide an extensive range of classical and crop-specific media and their respective supplements in both powdered and liquid forms. Our products include a well-formulated range of varied MS media compositions along with specific media for commercially important crops like banana, orchid, gerbera, carnation and many more.

Plant Growth Promoters

We are the first Indian establishment to have introduced various classes of plant growth regulators as our products. They include all the major classes of plant growth regulators: Auxins, Gibberellins, Polyamines and Abscisic acid. Besides these, we also offer other hormones like Jasmonic Acid, elicitors like Chitosan, herbicides like Picloram, etc. which induce stimulatory responses in plants.

Plant Tissue Culture Tested Chemicals

HiMedia offers a comprehensive range of plant tissue culture tested chemicals including macroelements, microelements, amino acids, carbohydrates, vitamins, organic supplements, gelling agents, plant growth regulators, antibiotics for plant researchers and horticulturists to solve their toughest problems in plant biotechnology. All our products undergo stringent quality control required to maintain consistency and quality. This complete range is assessed analytically for physiochemical parameters; along with plant response tests to verify their suitability for specific applications.

Agro Sciences

For Agro-testing laboratories, this section offers a comprehensive range of Soil Testing Kits, Water Testing Kits and Training Schemes. For agricultural purposes, Kits for assessing Milk Adulteration and Mastitis Field Test have also been developed.

Higronics® *pp* : 891-908

HiMedia ventured into Hydroponics with a mission of bringing about a much-needed change in the Agriculture sector for the benefit of all. Keeping our promise to serve better with quality products, we have begun the beautiful journey of BHU-Vision (Rapid Automated Soil Analysis Apparatus)- an automated soil analysis system for use in agriculture that is designed to test soil nutrient content and generate a customized fertilizer recommendation on the go. The accuracy of BHU-Vision is found to be nearly 95% accurate in comparison with conventional methods.

Higronics is also actively working towards Commercial Farming Systems, Urban Farming Systems, Hydroponic Nutrient Technology, Hydroponic Accessories, Water testing services, Agronomy Services, Education and Training programs, and Project feasibility studies serving as One Point Solutions (OPS) for all scales of hydroponics applications. Our collaboration with Autogrow Systems has enabled Higronics to reach new heights.

Professional Care Products *pp* : 1221-1242

This highly specialized range includes state-of-the-art products for maintaining a high degree of sterility in the medical and surgical professions. This section includes hand washes and gels, instrument sterilizers, floor & surface sanitizers, environment & laundry sterilizers, etc. All of these products aim to reduce the bioburden and answer most of the sophisticated needs of our Indian patrons.

Hospital Disinfectants

Narrow as well as broad spectrum Hospital Disinfectants of world-class quality are available in this section.

For Quality-Conscious Users

There is no alternative to Quality' is the noble belief that HiMedia follows. Many international brands are now available in the Indian market. However, our comparative-research showed that some of these global brands lack deeper understanding of tropical diseases.

* Warkem contact : 022-2500 0746 / 0653

*The technology and the brand HiFoliar™ have been purchased by M/s. Warkem Biotech Pvt. Ltd. Our Patrons may contact them on the number given at the bottom of this page.

Hence, these brands are ill-suited for Indian conditions. Moreover, these brands are shrewdly trying to substitute quality by selling their products for cheaper rates. However, it must be remembered that in Microbiology, product consistency is very crucial reference point for in vitro testing and diagnostics. In the absence of product consistency, qualitative testing fails to acquire any meaning. Hence, our esteemed patrons have always agreed with our motto 'Quality has no substitute' and have always appreciated the quality products that we provide them

Validation

We welcome you to browse through this catalogue and are hopeful that we have everything that you need. Please do not hesitate to ask us about products that you do not find here. We will happily address your queries since we always strive to meet your needs.

Invitation to Browse

We welcome you to browse through this catalogue and are hopeful that we got everything that you need. Please do not hesitate to ask us about products that you do not find here. We will happily address your queries since we always strive to MEET YOUR NEEDS.

Caution

B E W A R E !

Some of the other brands have unethically imitated our bottles, labels, description and style of presentation to mislead our quality conscious users. Your intelligent decisions will help you to stay away from pitfalls.

Changes to Product Labeling with regard to MRP

The Legal Metrology (Packaged Commodity) rules 2011 stipulate that the requirement for Maximum Retail Price (MRP) labeling does not apply to packaged commodities intended for **Industrial or Institutional** consumers.

Industrial Consumer : *A consumer who purchases packaged commodities directly from the manufacturer, importer, or wholesale dealer for use in that industry. Such packages will bear the declaration* ***"Not for retail sale"***

Institutional Consumer : *An Institution that purchases packaged commodities, bearing the declaration* ***"Not for retail sale",*** *directly from the manufacturer, importer, or wholesale dealer for use by that institution and not for commercial or trade purposes.*

In accordance with these regulations, and to ensure uniformity in our labeling process across HiMedia Products the following changes will be implemented.

HiMedia Products : *The label will now display* ***"Not for retail sale",*** *in place of the Maximum Retail Price (MRP).*

ISO 9001-2015 CERTIFIED · WHO GMP CERTIFIED · CE · ISO 13485-2016 CERTIFIED

Dehydrated Culture Media, Bases and Supplements 75-340

GMV1494I	Buffered HiVeg® Peptone water, Granulated
M843I	Cefsulodin, Irgasan™ (Triclosan) & Novobiocin (CIN) Agar
M2176I	Default Dilution Solution
M1000F	Dichloran Rose Bengal Chloramphenicol
M2177I	Diluting Solution for feed
M2192	Fastidious Anaerobic Agar Base (FAA)
M2191I	Lactose egg-yolk neomycin Agar base (LENA)
M2189	Leeming-Notman Agar (Modified) (Twin Pack)
M1343	MUD SF Broth Base
M2185I	Peptone Saline Solution
M2184I	Phosphate Buffer Solution
M2187I	Preston Broth Base
M085I	Pseudomonas Agar Base (CN Agar)
M2178	Pyridoxine Y Medium
M2186I	Ringer Solution, Quarter Strength
M2181	SCDA w/0.5% Soya Lecithin & 4% Polysorbate 80 (Twin Pack)
M2182	SDS Broth Base (Sodium Dodecyl Sulphate Polymyxin Sucrose Broth Base)
M2183I	Tryptose Sulphite Agar
FD368	NA Selective Supplement II

FD148	NAT Selective Supplement
FD003A	PolyB Selective Supplement, Modified
MPK153	Ceftazidime/Avibactam
MPK021	Co-Trimoxazole
MPK088	Daptomycin
MPK032	Minocycline
MPK144	Clotrimazole
MPK074	Ketoconazole
MPK910	Dodecafungi 1
MPK911	Dodecabact 1
EM161	Aztreonam
EM162	Aztreonam/ Avibactam
EM168	Cefepime
EM169	Colistin
EM165	Fosfomycin
EM164	Imipenem
EM160	Meropenem
EM166	Piperacillin/ Tazobactam
EM163	Rifampicin
EM167	Tobramycin
SD312E	Ceftazidime/Avibactam

Bacteriological Differentiation Aids 341-355

R100	Legionella Acid Buffer
R101	Marquis Reagent

Culture 367-390

01066P	Saccharomyces cerevisiae ATCC® 18824™
01270A	Burkholderia multivorans ATCC® BAA-247™

INTRODUCING New

CELL BIOLOGY

SFM048AP	CHO Pro (AC) Medium Serum-free, Chemically defined and Animal Component Free Serum-free CHO production medium
SFF048P	"CHO Pro (AC) Feed Animal Component Free, Chemically Defined"
SFM047P	BHK-210 Pro (AD)
TCL741	DMSO (55%) USP and Dextran-40 (5%) USP Mixture
CF123	Human Recombinant Interleukin-12 (IL-12)
TC510	Gentian Violet
TC031U	Neomycin sulfate, Low Endotoxin
TC775	Guanidine thiocyanate
TC849	Bentonite
TC003	Copper (II) sulphate pentahydrate
TC844	Nickel (II) sulphate hexahydrate
TC848	Permethrin (25:75)
TC850U	L-(+)-Tartaric acid
TC833	Dextran, T-500
TC609M	Copper(II) sulphate anhydrous
TC003M	Copper (II) sulphate pentahydrate
TC836M	D-(+)-Galactose anhydrous
TC834M	Sodium Metabisulfite
TC838M	Starch Potato
SF155LD	Syringe-driven Filters
TCL206	STEMin1™ Xeno-free Attachment Solution"
TCL208	STEMin1™ Xeno-free, Recombinant Dissociation Solution
TCL209	STEMin1™ Xeno-free Neutralizer
TC775	Guanidine thiocyanate
TC844	Nickel (II) sulphate hexahydrate
TC833	Dextran, T-500
BI001(A)	Hi-GelMA™, Gelatin Methacryloyl, Lyophilizate, Photo crosslinking, High bloom, 80- 90% DOS, Porcine
BI001(B)	Hi-GelMA™, Gelatin Methacryloyl, Lyophilizate, Photo crosslinking, High bloom, ~ 60% DOS, Porcine
BI001(C)	Hi-GelMA™, Gelatin Methacryloyl, Lyophilizate, Photo crosslinking, High bloom, ~ 40% DOS, Porcine
BI001(D)	Hi-GelMA™, Gelatin Methacryloyl, Lyophilizate, Photo crosslinking, Low bloom, ~ 60% DOS"
BI001 (E)	Hi-GelMA™, Gelatin Methacryloyl, Lyophilizate, Photo crosslinking, Medium bloom, ~ 60% DOS
BI001(F)	Hi-GelMA™, Gelatin Methacryloyl, Lyophilizate, Photo crosslinking, High bloom, ~ 80% DOS, Bovine
BI002	Hi-Silk™, Silk Fibroin, Bombyx mori, Lyophilizate, water soluble
BI003	Hi-SilkMA™, Silk Fibroin Methacryloyl, Photo crosslinking, Lyophilizate
BI004	Hi-ColMA™, Collagen Methacrylate, Lyophilizate, Photo crosslinking
BI005(A)	Hi-AlgiMa™, Alginate Methacrylate, High viscosity, Lyophilizate, Photo crosslinking
BI005(B)	Hi-AlgiMa™, Alginate Methacrylate, Medium viscosity, Lyophilizate, Photo crosslinking
BI006	Hi-ChiMa™, Chitosan Methacrylate, Lyophilizate, Photo crosslinking
BI007(A)	Hi-dECM™, Adipose tissue, (AdECM), Thermal crosslinking, Lyophilizate
BI007(B)	Hi-dECM™, Skin tissue, (SkdECM), Thermal crosslinking, Lyophilizate
BI007 (C)	Hi-dECM™, Cartilage tissue, (CdECM), Thermal crosslinking, Lyophilizate
BI007(D)	Hi-dECM™, Heart tissue, (HdECM), Thermal crosslinking, Lyophilizate
BI007 (E)	"Hi-dECMTM, Liver tissue, (LdECM), Thermal crosslinking, Lyophilizate"
BI008	Pluronic, P407 (PF-127), Powder

INTRODUCING New

Plant Tissue Culture (PTC) 835-890

PCT0702	Tris, Ultra Pure
PPW001	Sterile Disposable Petri Plates for Arabidopsis thaliana
K160A	Kit for Quick Detection of Adulteration in Milk by Strip Method (Detergent)
K160B	Kit for Quick Detection of Adulteration in Milk by Strip Method (Hydrogen Peroxide)
K160C	Kit for Quick Detection of Adulteration in Milk by Strip Method (Urea)
K160E	Kit for Quick Detection of Adulteration in Milk by Strip Method (Neutralizers)
PLA010	PhytaSter™
PLA010A	PhytaBeads™

HIGRONICS 891-908

HGVN018	HiGro® Vertical NFT 18 planter
HGVN036	HiGro® Vertical NFT 36 planter
HGDWC003	DWC system for 3 planter
HGDWC005	DWC system for 5 planter
HG-BHU-STM-01	BHU-Vision Krishi-RASTAA Soil Testing Device
HG-BSNA-100	BHU Vision Soil Nutrient analysis cartridge 100 tests
HG-BSNA-25	BHU Vision Soil Nutrient analysis cartridge 25 tests

Molecular Biology 677-834

PR29	384 well Full-skirt White plate
PR30	384 well Full-skirt White plate with clear wells
MBLA040	Empty Tip box, 1ml
MBLA041	Barrier Tips, 900µl, Blue
MBF001	Filter Paper for Blotting
MBLA042	HiPurA® Human DNA Free Swab
MBLA043	HiPurA® Stool CST Kit
ML254	HiPer® SaliSure Kit
ML255	HiPer® SaliFind Kit
ML252	HiPer® Canine DNA Test Kit
MBM026	HiFiBloE™ PVDF Membrane for Blotting
MBM027	HiFiBloE™ PVDF Membrane for Blotting
G2119	Luria Bertani Broth, Miller pH 7.0
MBIVT001	T7 RNA polymerase
MBT205	pUC19 DNA
MBT207	T4 DNA Ligase (600U/µl)
MBT208	Hi-Temp Multiplex Chrom PCR MasterMix
MBT209	T4 DNA Ligase (400U/µl)
MBIVT002	HiPer® T7 in vitro transcription kit (low dsRNA)
MBIVT003	HiPer® T7 in vitro transcription kit (N1-Me-pUTP)
ML250	RNase T1, Recombinant
MBT206	Protein Standard (2mg/ml)
MBT210	Prestained Protein Ladder (10 to 180 kDa)
ML248	Blocking Buffer (3% BSA in 1X PBS)
ML253	HiPurA® Molecular Biology Grade Water (for forensic applications)
ML256	1XTE Buffer, pH 8.0 (sequencing grade)
ML257	1M Potassium chloride
ML258	Coomassie® Brilliant Blue R250 Staining Solution
ML259	HiSensiFlour™ ECL Substrate (Western Blotting)
ML260	10% Tween® 20 Solution
MB383	Sodium ethylmercurithiosalicylate
MB384	2-Bromoethylamine hydrobromide
MB385	N,N,N',N'-Tetramethyl-p-phenylenediamine dihydrochloride
MB387	Trichostatin A, from Streptomyces sp,
MB388	Sodium deoxycholate
MB389	Cesium chloride
MB396	1-Cyano-4-dimethylaminopyridinium tetrafluoroborate

MBPP002M	HiPurA® Mag16 HIS-tagged Protein Purification Kit (Magnetic Bead Based)
MBPP003M	HiPurA® Mag32 HIS-tagged Protein Purification Kit (Magnetic Bead Based)
MBPCR063	Hi-PCR® GMO (Genetically Modified Organism) SYBr PCR Kit
MBPCR089	Installation Kit for ECO 96/Prima Series/Wee Series of Thermal Cyclers
MBPCR090	Installation Kit for InstaQ Real Time PCR System
MBPCR104	Hi-PCR® Leptospira Probe PCR Kit
MBPCR106	Hi-PCR® Hepatitis C Virus (HCV) Detection Probe PCR Kit
MBPCR126	Hi-PCR® Newcastle Disease Virus (NDV) SYBr PCR Kit
MBPCR149	Hi-PCR® Hepatitis B Virus (HBV) Probe PCR Kit
MBPCR172	Hi-PCR® MTB/NTM Probe PCR Kit
MBPCR181	Hi-PCR® Hepatitis B Virus (HBV) Detection and Quantitation Probe PCR Kit
MBPCR182	Hi-PCR® Hepatitis C Virus (HCV) Detection and Quantitation Probe PCR Kit
MBPCR184	Hi-PCR® Cow Detection Kit (Real-Time Probe Based PCR)
MBPCR185	Hi-PCR® Buffalo Detection Kit (Real-Time Probe Based PCR)
MBPCR186	Hi-PCR® Cattle Sex Determination Kit (Real-Time Probe Based PCR)
MBPCR190	Zika Detection Kit (Real-time probe based PCR Kit)
MBPCR206	Hi-PCR Astrovirus Probe PCR Kit
MBPCR210	Hi-PCR® Cow-Buffalo Detection Kit (Real-Time Probe Based PCR)
MBPCR221	Hi-PCR® Hepatitis E Virus Probe PCR Kit
MBPCR227	Hi-PCR® Carbapenemase Gene Quantification Probe PCR Kit
MBPCR252	Hi-PCR® Protozoan Parasite Multiplex Probe PCR Kit
MBPCR271	Hi-PCR® Scrub typhus Detection Probe PCR Ki
MBPCR272	Hi-PCR® Adenovirus Probe PCR Kit
MBPCR276	Hi-PCR® Dengue Serotyping-Chikungunya-Zika Multiplex Probe PCR Kit
MBPCR277	Hi-PCR® Human Y DNA Quantification Kit
MBPCR278	Hi-PCR® Acute Fever Panel Kit
MBPCR279	Hi-PCR® Cytomegalovirus (CMV) Probe PCR Kit
MBPCR280	Hi-PCR® H5N1 Flu Probe PCR Kit
MBPCR281	Hi-PCR® HMPV Real-Time PCR Kit
MBSTR001	Hi-PCR® MatchFinder Autosomal 25ID Kit
MBSTR002	Hi-PCR® MatchFinder Autosomal 33ID Kit
MBSTR003	Hi-PCR® MatchFinder Y-43ID Kit
MBSTR004	Hi-PCR® MatchFinder Autosomal Mini25ID Kit
MBNGS001	Hi-Gx360® DNA Library Preparation Kit for Illumina® Sequencing Platform
MBNGS002	Hi-Gx360® Targeted Capture & Enrichment of DNA libraries
MBNGS003	Hi-Gx360® WES Panel
ML251	C-Stabilizer
MBRE018A	Bgl II
MBRE022A	Pvu II
MBRE014A	Sph I
LA1104B	Barrier Tips, 100µl
MBLA030	Insta NX® Mag96 Plus
MBLA045	Hi-PCR® Workstation 1.0
MBLA046	Hi-PCR® Workstation 2.0
MBLA047	HiPer® Mini Vortexer
MBPCR248	Hi-PCR® Canine Viral Probe PCR Kit
MBEK002	HiPurA® Avian Influenza Antibody Detection ELISA Kit

Important :

Please mention order reference no. & date in each email order (send preferably by text, doc, or excel files).

Please help us to serve you better by providing all the information asked for in this format while ordering on your letterhead for speedy execution of the order

PRODUCT FOCUS

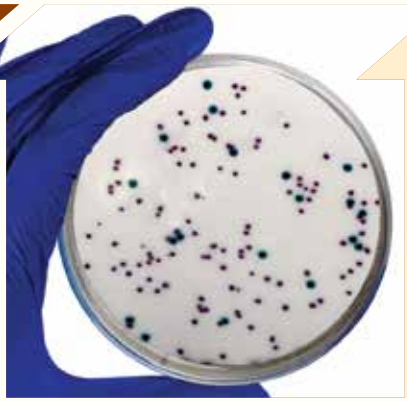
Code no. : HPS001-HPS010
Refer Page : 73

HiPetriSlim™ Product Range

- Ready-to-use medium in dry and concise form
- Widespread Industrial application (Water, Food & Cosmetics)
- Compact packing reduces storage space
- No Preparation time
- User-friendly ready-to-use products
- Available in wide range of products that can be customized as per requirement

Code no. : K156
Refer Page : 74

Ready™ PREPARED HIMEDIA



K156 HiVibri-O-Trap Kit

- Highly nutritious medium, supports the growth of desired microorganisms - *Vibrio* sp
- Chromogenic technology imparts distinct colours making identification easier
- Selective medium helps to inhibit the unwanted microbial flora
- Enumeration and differentiation are easier
- Disinfectant tablet provided to ensure safe disposal

Code no. : **MS5448GT, MS5575GT, MS5576GT**
Refer Page : 57

EM-CULT® Pre-wetted Swabs

- Convenient, flexible, ready to use and easy to handle EM-CULT® Swabs
- The qualitative test for monitoring microbial contamination
- A single tube containing pre- wetted swabs and medium within itself, separated by flexible breakable snap valve, that allows to flow through tube and wet swabs
- Applicable in Pharmaceutical, food and beverages industries wherein, surface monitoring of uneven surfaces or difficult accessible area can be carried out

Refer Page : 40, 47

Liquid media in polycarbonate Bottles

- Ready prepared liquid media available in Polycarbonate bottles.
- Easy to handle
- Same quality assured
- Any media can be customized
- Final packing has less weight
- Presently available for HiSafe Blood Culturing System
- Liquid media with 200 ml media

PRODUCT FOCUS

HiCFU Counter™ C New

- Instrument with camera for the automated determination of the colony count or CFU (Colony forming unit) on Agar plate
- Automated system for determination of colony count or CFU (Colony forming unit) on Agar plate
- Accurate and time saving
- Avoids manual errors
- Widespread application in all industrial sectors including pharma, food, water, dairy and research institutes
- Finds application in CFU determination while performing GPT (Growth Promotion Test)
- Economical

Code no. : **LA1143**

Refer Page : 983

HiMEDIA® HiCFU Counter C™ COLONY COUNTER

HiEnviro-Sponge® for Sample Collection

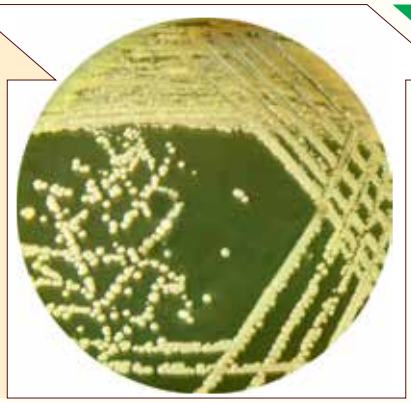
- Biocide free sponges with no impact on recovery/viability of organisms
- Durable sponge for all types of environmental surfaces
- Available in Dry format and Hydrated with various media/buffers
- Sponge stick version allows to reach difficult to reach areas
- Sponges & sponge stick in completely sealed sampling bags and gamma irradiated providing assurance of sterility

Refer Page : 71-72

Ready™ PREPARED HIMEDIA

Leeming Notman Agar Modified (Twin Pack)

- Modified culture medium for the isolation and subculture of *Malassezia furfur*.
- Recommended by ATCC – ATCC Medium 2737 for culture revival of *Malassezia furfur* and other *Malassezia* species.
- The medium is available as twin pack
- Literature reveals that it gives better recovery of *Malassezia* species



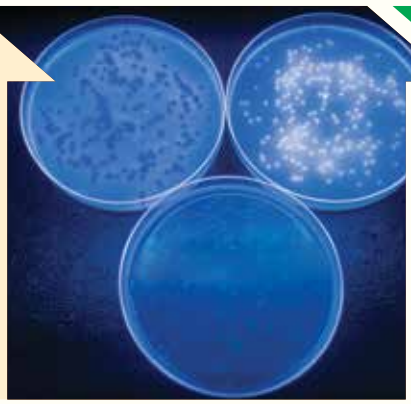
Code no. : **M2189**

Refer Page : 147

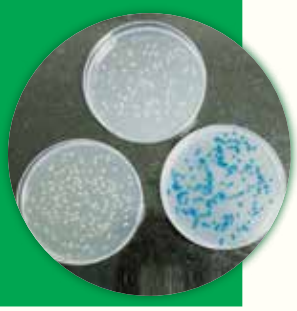
HiMedia DCM™ Dehydrated Culture Media & Media Bases

HiCrome® MI Agar

- Recommended for the simultaneous detection of *E.coli,* coliforms and non-coliforms from water sample by membrane filtration method
- The medium is based on chromogenic and flurogenic method
- *E.coli,* gives blue coloured colonies. Coliforms gives colourless colonies *E.coli* and coliforms shows fluorescence under uv light and non coliforms produce colourless colonies
- Gram positive organisms are inhibited.

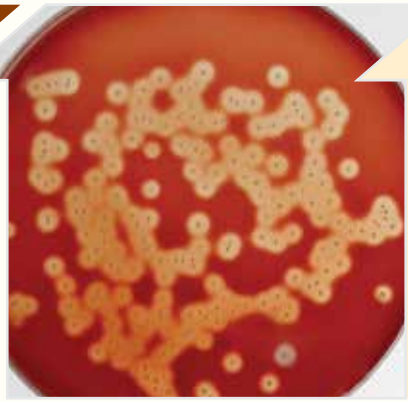


Code no. : **M2194**



PRODUCT FOCUS

Code no. : **MP2192HB**
Refer Page : 6



Ready Prepared Plates with Horse Blood

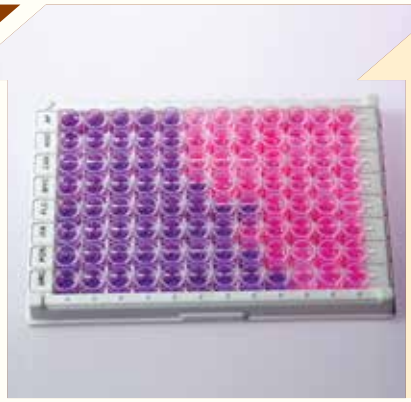
- Recommended for Isolation & cultivation of fastidious & anaerobic organisms.
- Mueller Hinton Agar w/ 5% Horse Blood & 20 mg/L NAD - Recommended for Antimicrobial Susceptibility detection of fastidious organisms.
- User friendly Ready to Use Product
- No Preparation Time and Quality Assured.
- Can be Customized as per requirement.

Code no. : **MPK Series**
Refer Page : 251-253

HiMIC™ Plate Kit

- A breakthrough in the evaluation of MIC with ease & accuracy
- Easy breakpoint-based visual evaluation
- Interpretation for Sensitive, Intermediate and Resistance as per CLSI & EUCAST guidelines
- 7 concentrations in a single strip covering breakpoint scale
- 12 tests per kit with detachable strips inclusive of HiMIC™ diluent, HiMIC™ reading card & HiMIC™ incubation tray
- No instrumentation required

Code no. : **MPK901 / MPK910 / MPK911**
Refer Page : 253



Multi HiMIC™ Plate Kit

- A single plate to determine antibacterial/ antifungal profile
- **Dodecafungi :** Twelve antibacterial/antifungal agents in a single plate with 7 concentrations
- **Octofungi :** Eight antifungal agents with 11 concentrations in a single plate
- User friendly substitute of traditional broth micro dilution method.
- As per CLSI & EUCAST guidelines
- Recommended for Bacteria, Yeast and Fungi

Octofungi 1 HiMIC™ Plate Kit (MPK901)

Eight Antifungal Agents

Amphotericin (AP) (0.008 -8 mcg/ml)
Anidulafungin (AND) (0.008 - 8 mcg/ml)
Caspofungin (CAS) (0.008 - 8 mcg/ml)
Micafungin (MYC) (0.008 - 8 mcg/ml)
Fluconazole (FLC) (0.25 - 256 mcg/ml)
Itraconazole (ITR) (0.016 - 16 mcg/ml)
Posaconazole (POS) (0.008 - 8 mcg/ml)
Voriconazole (VRC) (0.008 - 8 mcg/ml)

Code no. : **EM series**
Refer Page : 254-272

Ezy MIC™ Strips

- Ezy MIC™ Strips are gradient technology and based on concept of dilution and diffusion principles for susceptibility testing.
- Recommended for determination of Minimum Inhibitory Concentration and phenotypic detection of microorganism.
- The gradient covers a continuous concentration range across 15 two-fold dilutions of a conventional MIC method.
- MIC values are printed on both the sides likewise, hence easy to read from either side of the plate.
- Compliance as per CLSI & EUCAST guidelines
- Available in Individual strip packing and bulk pack of 10/30/60/90/120/150 strips per pack.

PRODUCT FOCUS

PET & PETG Bottles

- Leakability Test as per ASTM Standard D4991-07
- Leachability Test adhering to USP <1663> & USP <1664>
- Extractability Test adhering to USP <1663> & USP <661.1>
- Sterility Test -Assurance Level (SAL) of 10-6 as per ANSI/AAMI/ISO11137

Refer Page : **597-599**
Code no. : **TCP318 & TCP334**

NuSera™

- Achieves FBS-equivalent performance with 30% cost savings.
- Ensures batch-to-batch consistency with a semi-defined formulation.
- Seamlessly supports both anchorage & suspension cultures without adaptation.
- Reduces reliance on animal-derived products, helping save two fetuses per use.

Refer Page : **501-505**
Code no. : **TCL280**

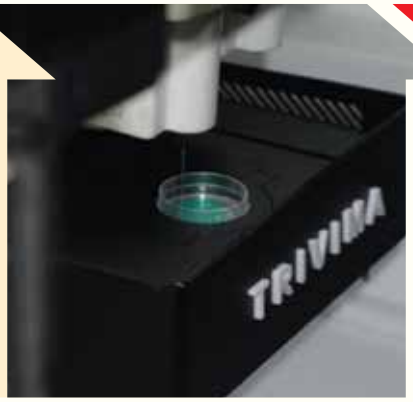
DMSO-Dextran Solution

- Designed for cord blood stem cells, offering superior cryopreservation efficiency.
- Manufactured with WFI-grade water and filled in USP Type I glass vials for sterility.
- Enhances post-thaw cell recovery by Dextran-40 which reduces osmotic stress, improving post-thaw survival.
- Ensures maximum cell viability with 55% DMSO USP and 5% Dextran-40.

Refer Page : 486
Code no. : **TCL741**

TRIVIMA 3D Bioprinter

- TRIVIMA Basic: 2 printhead, RT-60°C Temperature range printbed.
- TRIVIMA Advanced: 3 printhead slots, 4-60°C Temperature range printbed, upgradable.
- TRIVIMA PRO 4-6 printhead slots, 4-80°C Temperature range printbed, provision for inkjet, thermoplastics/melt extruder, motor driven syringe print head, upgradable



Refer Page : 449-450

Clean Room Garments & Accessories

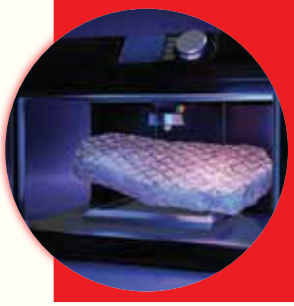
- Antistatic and Lint Free Autoclavable and washable garments
- Disposable Garments
- Lint Free Wipes
- Available in Various Sizes S to 5XL
- Available Colours

Refer Page : 630-631
Code no.:**SF190 series**

Disposable Filtration Funnel

- **Sterile & Ready :** Pre-sterilized, individually packaged, and disposable for immediate use.
- **Fast & Easy :** Skip autoclaving and enjoy quick membrane changes.
- **Reliable Results :** Ensures accurate and contamination-free filtration.
- **Versatile Options :** Available with a variety of filter membranes.
- **Save Time & Effort :** Streamlined process for efficient filtration

Refer Page : 458



Cultivated Meat:Funnel

Serum Free Media Optimization and Bioprocessing Services for Customer Cells

- Powdered & Liquid formulations as per customer demand.
- Serum free media optimization & bioprocessing services
- Customized media as per customer requirments in terms of formulation optimization & scale up.
- Food safe chemicals & reagents meeting quality & regulatory requirements of customers

Refer Page : 651
Code no. : **AI0037**

Cellax™ Laboratory & Biomedical Refrigerator

- Temperature range +2 to +8^{0}C
- Ultra-quiet operation
- Available sizes from 200L to 1000L
- Alerts for temperature, power loss and open doors
- Eco-friendly refrigerants
- Auto-Defrost

PRODUCT FOCUS

Elevate Your NGS Research with Hi-Gx360® Library Preparation Kits (MBNGS001/MBNGS002/MBNGS003)

- Compatible with Illumina Platform
- Efficient Library Preparation
- Target Capture & Enrichment
- Whole Genome Sequencing
- AMR/Whole Exome/Clinical/Pan-Cancer Panel

Urban Farming systems

- Innovative and dynamic systems termed as 'Home farm series' gives the opportunity to have your own garden.
- Right from the kids to adults, the whole family can indulge in hydroponic farming.
- Compared to traditional soil cultivation, requires less water and less space and produces more yield.
- Extremely simple to assemble and use; Great for beginners! No experience required; It is easy to take care, no arable land, no weeds, saving time and energy.

Refer Page : 899

higronics ideas to grow

Nutrients

- The hydroponic nutrient solution is the sole source of nutrients to the plant.
- The advanced manufacturing technology used in the process results in perfect homogenized blend of nutrients.
- Unique blend of macro and micro nutrients designed specifically enhance all stages of plant growth

Refer Page : 907

higronics ideas to grow

Automation-GrowEasy

- Climate Control: Regulates temperature, humidity, light and CO_2 for optimal plant growth.
- Nutrient Management: Automated dosing system ensures precision in Delivering nutrients.
- Water Management: Smart irrigation controls and sensors reduce water wastage.
- Farm Management platform: Manage operations seamlessly through a web and mobile app.
- Sensor driven: 13+ sensors for data driven operation.

Premium Plant Tissue Culture Media

Our culture media delivers essential nutrients, vitamins, and growth hormones to support plant cell growth. Available in ready-to-use and custom formulations to match your required needs.

Lab-Tested Chemicals for Tissue Culture

We supply high-purity chemicals to ensure contamination-free experiments and high success rates.

Refer Page : 869-878

Refer Page : 852-856

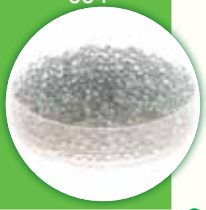
Gelling Agents

Achieve the perfect gel consistency for your plant tissue culture experiments with our premium gelling agents.

Glass Bead Sterilizer - Go Flame-Free!

Modern sterilization solutions ensure efficiency and contamination control without open flame risks for upgrading to Safe & Efficient Sterilization. The Glass Bead Sterilizer rapidly sterilizes forceps, scalpels, and small lab tools at high temperatures.

Refer Page : 884



Refer Page : 884

Powerful Disinfection for Your Lab

The Fogger Jet Sterilizer ensures a contamination-free workspace by dispersing a fine mist of disinfectant for complete decontamination. With 360° coverage, it thoroughly sterilizes surfaces and air spaces.

Advanced Lab Accessories & Teaching Kit

Equip your lab with high-precision accessories for efficient plant tissue culture. The Tissue Culture Teaching Kit offers hands-on learning, perfect for beginners and educators to perform experiments with ease.

RESEARCH INTERFACE

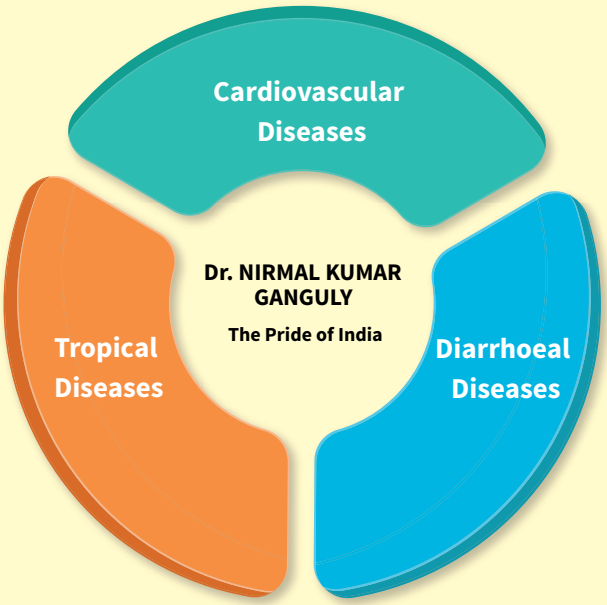
Celebrating Scientific Research

Dr. NIRMAL KUMAR GANGULY- The Pride of India

INTRO

Padma Bhushan Dr. Nirmal Kumar Ganguly, former Director-General, of the Indian Council of Medical Research (ICMR) is a renowned Indian Medical Microbiologist.

As a researcher, he has worked extensively on **Tropical Diseases, Cardiovascular Diseases, and Diarrhoeal Diseases** and is credited with the development of many invaluable vaccines, diagnostics sets, and drugs like Miltefosin (against aala Azar). As an administrator, he has played a major role in the eradication of polio from India and his leadership & vision have led ICMR to fetch more patents in one year than in the past 30 years! Described as a 'Walking encyclopedia in disease research', Dr. Ganguly, has produced 775 research papers and supervised 130 Ph.D. thesis. His pioneering research on the pathogenesis, immunology, and mechanisms of **tropical diseases** has improved our understanding of them, while his deep dive into the mechanisms of **cardiovascular conditions** have contributed to deciphering the nuances of rheumatic fever and rheumatic heart disease. His in-depth studies on the root cause and machinery of **diarrheal diseases** have led to the reduction of morbidity and mortality associated with these diseases. Precise knowledge of the mechanisms of these diseases has also helped in the drafting of effective **'Prevention & Treatment Strategies'** to counter them.



Fellow, Member, President, Director, Chairman, and Advisor of many prestigious institutes, both Indian and International, Dr. Ganguly has been bestowed with 118 Awards (7 International & 111 National Awards)!

Tropical diseases : Understanding the intricacies of the host-parasite interactions of the *Leishmania parasite* & repurposing Miltefosine, an anti-cancer drug, to treat visceral leishmaniasis are some of

Dr. Ganguly's biggest breakthroughs. His other commendable achievements are understanding the pathogenesis of the Filarial parasite clearly, applying combination drugs like diethylcarbamazine (DEC), albendazole, and ivermectin against lymphatic filariasis, etc. He has done remarkable work by investigating the factors contributing to the spread and endemicity of cholera & by planning the oral cholera vaccination, besides emphasizing WASH (water, sanitation, and hygiene) for public health.

Cardiovascular diseases : Dr. Ganguly has extensively studied lymphocyte subset alterations, and oxygen free radicals, and has provided knowledgeable immunological insights on cardiovascular diseases. He has carried out impressive surveillance of streptococcal pharyngitis, rheumatic fever (RF), and rheumatic heart disease (RHD) for eight long years, which has led to the establishment of an effective Surveillance System.

Diarrheal diseases : Dr. Ganguly has played a key role in identifying malnutrition, poor sanitation, low literacy levels, etc. as the main factors for diarrheal diseases. He has proposed WASH programs to fight diarrheal diseases and more importantly, integrated them with the Swachh Bharat Mission. He has also proposed vaccination programs to fight rotavirus, typhoid, cholera, etc., and has propagated the pivotal role of breastfeeding and balanced nutrition in developing immunity against diarrheal pathogens.

COVID-19 : An expert in infectious diseases, his opinion on India's future course of treatment against coronavirus was one of the most sought-after, during the Covid-19 Pandemic. He advised the Government to harmonize a single Regulatory framework in such an unprecedented situation, explained his Smart Testing Techniques, and emphasized the importance of tracing and tracking affected people. The Smart Testing Technique was drafted to cover India's massive population. It advocated the application of appropriate combinations of testing techniques like RT-PCR, and Rapid Antigen.

Public Health : The World Health Organization estimates that, without action, Antimicrobial Resistance (AMR) could cause around 10 million deaths by 2050! To tackle AMR, Dr. Ganguly has proposed a more holistic approach involving the interconnected human, animal, and environmental ecosystems & has strongly advocated the implementation of a National Action Plan on Antimicrobial Resistance (NAP-AMR), containing five strategic objectives, which are aligned with the Global Action Plan based on National needs and priorities. Three key objectives of these, which are of operational importance, are : To improve awareness and understanding of AMR, to strengthen knowledge and evidence through surveillance, and to optimize the use of antimicrobial agents in health, animal, and food sectors.

Realizing that having authentic surveillance data can be a valuable weapon to counter diseases, Dr. Ganguly firmly believes that India needs to gather its surveillance data to better understand the emergence and mitigation of drug-resistant hotspots.

From studying exosomes as nature's nanocarriers to working on CRISPR-Cas9 for cancer research and therapy, Dr. Ganguly has accomplished a huge amount of trailblazing fundamental research. Moreover, studying the intricate mechanisms of many deadly diseases that threaten Indians and working out 'The Prevention & Treatment Strategies' to counter them, has truly made Dr. Nirmal Ganguly, 'The Pride of India'.

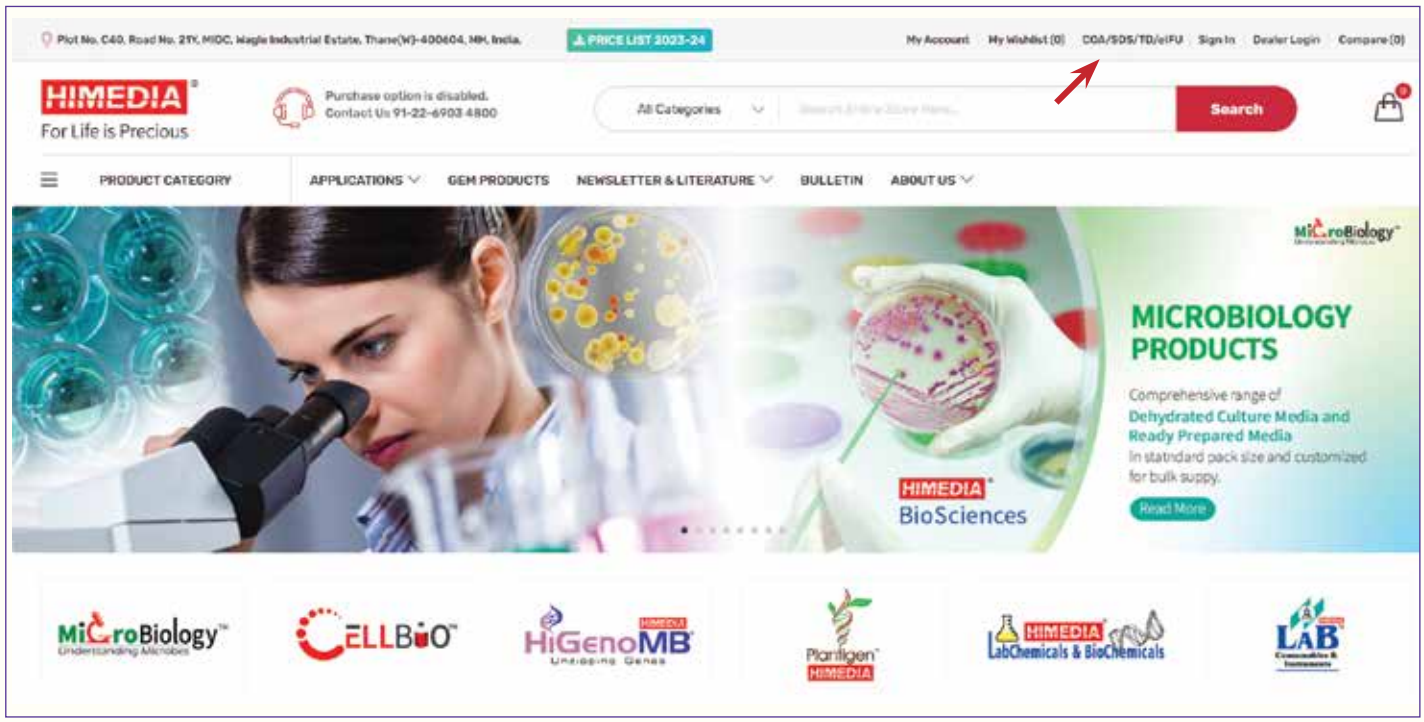
COA & SDS

HiMedia Laboratories website – www.himedialabs.com provides you the service to download Certificate of Analysis (COA) and Multilingual Safety Data Sheet (SDS) from the website.

Follow the highlighted steps to download the Certificate of Analysis (COA) and Safety Data Sheet (SDS).

To Access this Option -

Open any browser viz, Internet Explorer, Mozilla Firefox and Google Chrome. Type the URL- www.himedialabs.com. This will take you to the home page of HiMedia Laboratories as shown in the screenshot here. Then click on the COA/SDS/TD/eIFU link on top right of the home page to download COA/SDS, as seen in the screen 1.1.

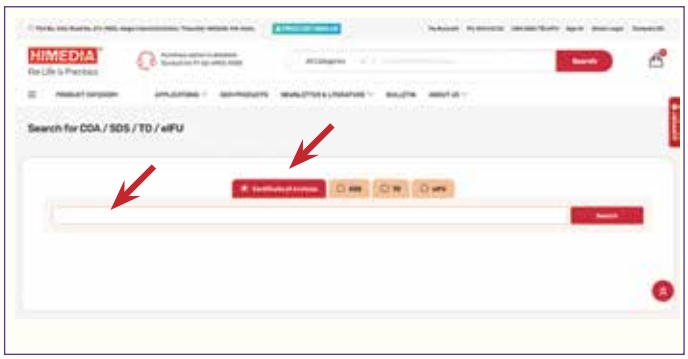


Screen 1.1

A. Certificate of Analysis (COA) :

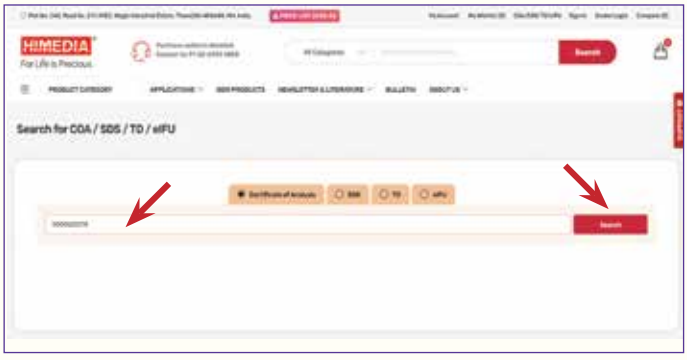
This will open up the COA/SDS/TD/eIFU page as seen in screen 1.2. Here you have to select the option of Certificate of Analysis.

Once you select Certificate of Analysis, it will show an area where you have to enter Lot No. or Batch No.



Screen 1.2

The same is seen as under the screen 1.3 below.

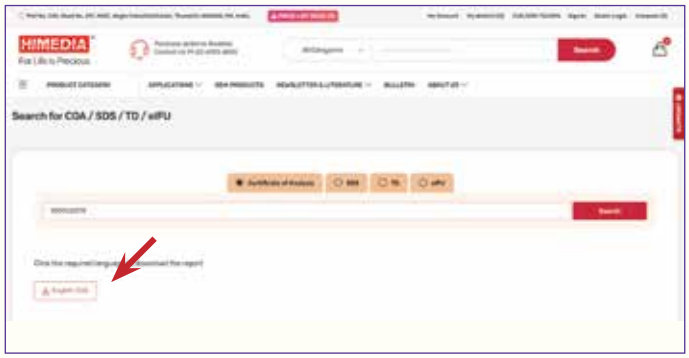


Screen 1.3

INSTRUCTIONS FOR DOWNLOADING COA & SDS

Press "Search" Key :

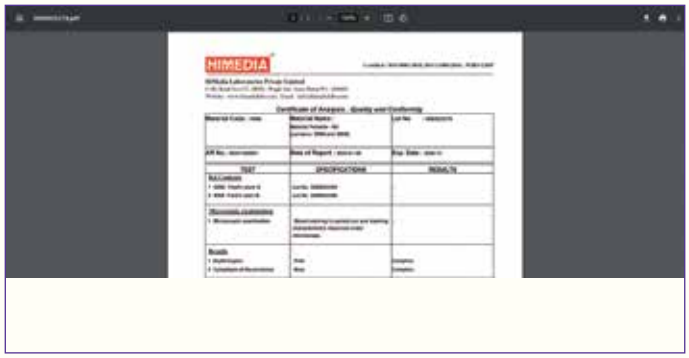
After you enter the Lot No. and select the option of Certificate of Analysis, this will process and show the link to the file with multi-languages for Certificate of Analysis as shown in screen 1.4. Click on the link to view the COA in pdf format.



Screen 1.4

This Opens the COA in pdf Format :

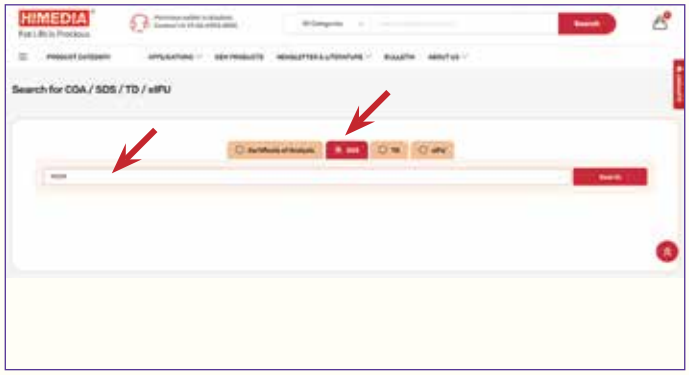
Now the COA pdf format is open, you can download or print it. As shown on the screen 1.5.



Screen 1.5

B. Safety Data Sheet (SDS) :

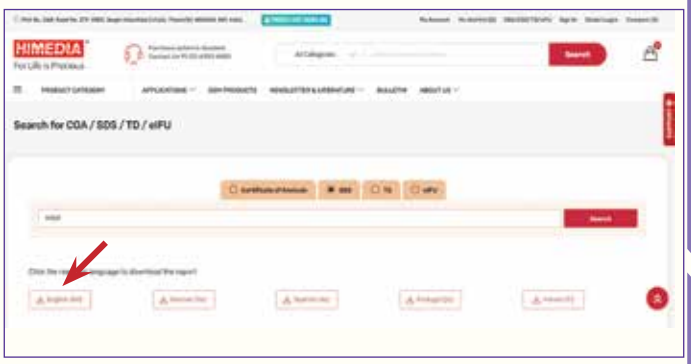
Select the option SDS to view the Safety Data Sheet. Enter the Product Code No. as seen in screen 2.1.



Screen 2.1

Press “Search” key to search for SDS :

This process will show the file link with multi-languages for SDS as shown in the screen 2.2. Click on the link to view the SDS in pdf format.



Screen 2.2

This Opens the SDS in pdf Format.

Now the SDS pdf format is open, you can download or print it. As shown on the screen 2.3.

PROCEDURE TO DOWNLOAD TECHNICAL DATA on HiMedia Laboratories

Technical Data of products is available on HiMedia Laboratories website - www.himedialabs.com

You can view or download TD from following ways :

A. Search Option

B. Product Detail Page

Follow the highlighted steps to download the Technical Data (TD) :

To Access this Option -

Open any browser viz, Internet Explorer, Mozilla Firefox, Google Chrome. Type the URL - www.himedialabs.com this will take you to the home page of HiMedia Laboratories as shown in the below image. Click on the COA/SDS/TD/eIFU link on the home page to download TD, as seen in the screen 3.1.

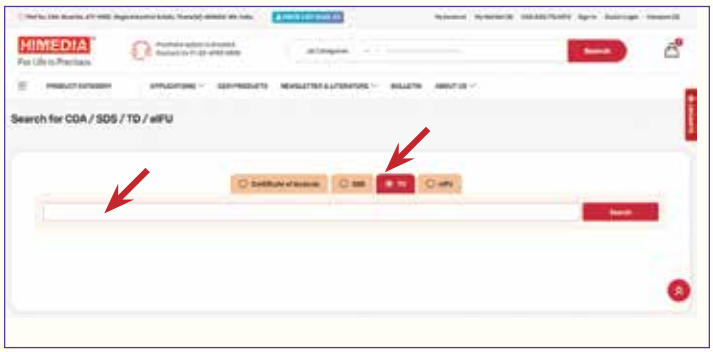
Screen 3.1

A. Search Option

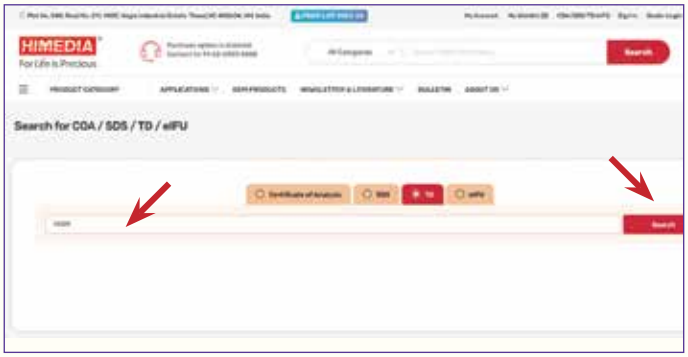
This will open up the TD page as seen in screen 3.2. Here you have to select the option of Techinical Data (TD).

Once you select Techinical Data (TD), it will show an area where you have to enter Product Code.

The same is seen as under the screen 3.3 below.



Screen 3.2

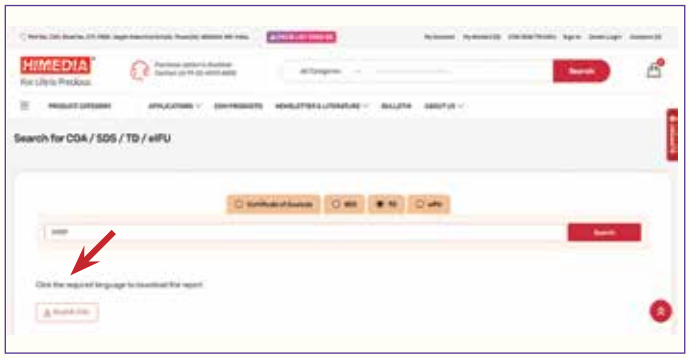


Screen 3.3

INSTRUCTIONS FOR DOWNLOADING TD

Press "Search" Key :

After you enter the Product Code. Select the option Techinical Data (TD), this will show the link of the file for Techinical Data (TD) as shown in screen 3.4. Click on the link to view the (TD) in pdf format.



Screen 3.4

This Opens the TD in pdf Format :

You can download or print the TD from here as shown in screen 3.5

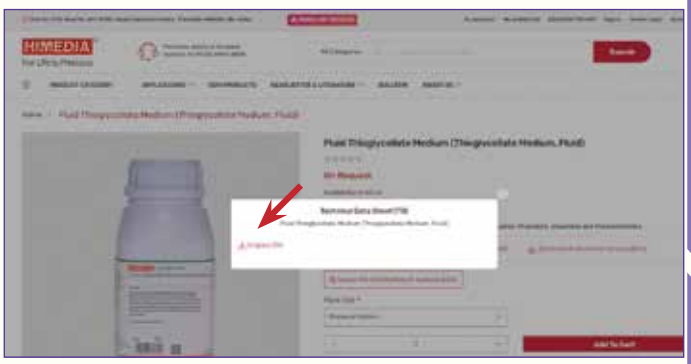
Screen 3.5

B. Product Detail Page :

We can view the Technical data from the Product Details page. Click on the link to view the Technical Data.

Screen 4.1

After clicking on TD link, It will show a popup link of the Techinical Data (TD) file as shown in screen 4.2. Click on the link to view the (TD) in pdf format.



Screen 4.2

This Opens the TD in pdf Format.

You can download or print the TD from here as shown in screen 4.3

Screen 4.3

PROCEDURE TO DOWNLOAD Electronic Instructions for Use (eIFU) on HiMedia Laboratories

eIFU of products is available on HiMedia Laboratories website - www.himedialabs.com

You can view or download eIFU from following ways :

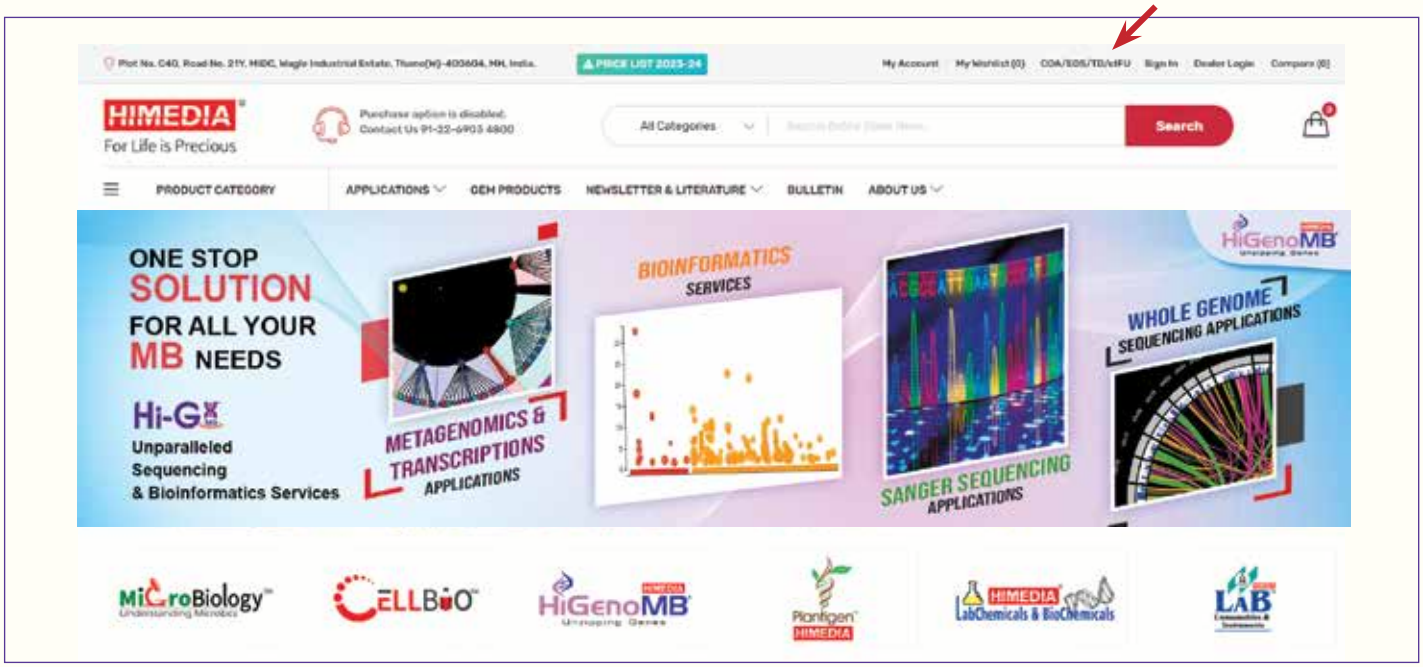
A. Search Option

B. Product Detail Page

Follow the highlighted steps to download the eIFU :

To Access this Option -

Open any browser viz, Internet Explorer, Mozilla Firefox, Google Chrome. Type the URL - www.himedialabs.com. This will take you to the home page of HiMedia Laboratories as shown in the below image. Click on the COA/SDS/TD/eIFU link on the home page to download eIFU, as seen in the screen 5.1.



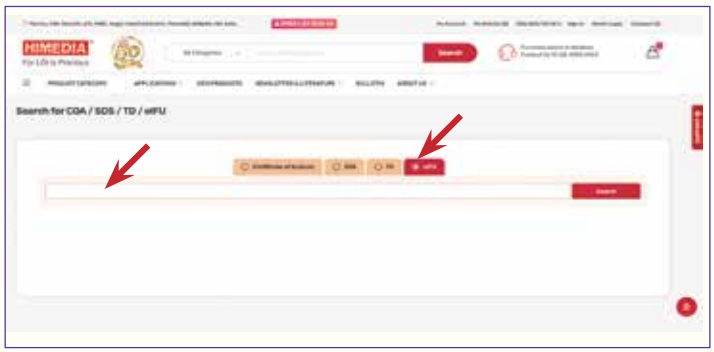
Screen 5.1

A. Search Option

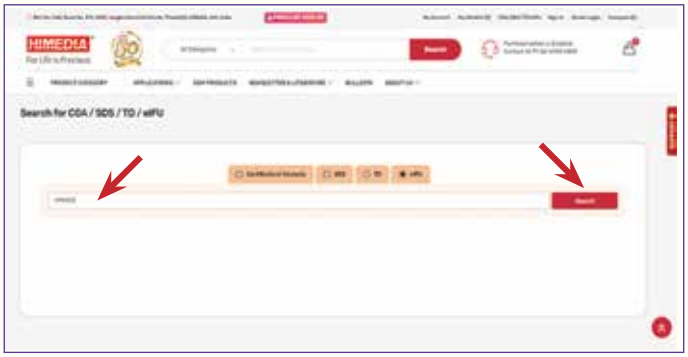
This will open up the eIFU page as seen in screen 5.2. Here you have to select the option of eIFU.

Once you select eIFU, it will show a search bar where you have to enter Product Code.

The same is seen as under the screen 5.3 below.



Screen 5.2

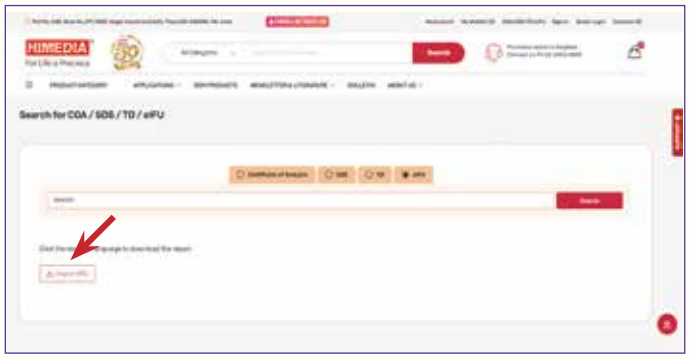


Screen 5.3

INSTRUCTIONS FOR DOWNLOADING eIFU

Press "Search" Key :

After you enter the Product Code, select the option of eIFU and click on the search button. It will show the link of eIFU, as shown in screen 5.4. Click on the link to view the eIFU in pdf format.



Screen 5.4

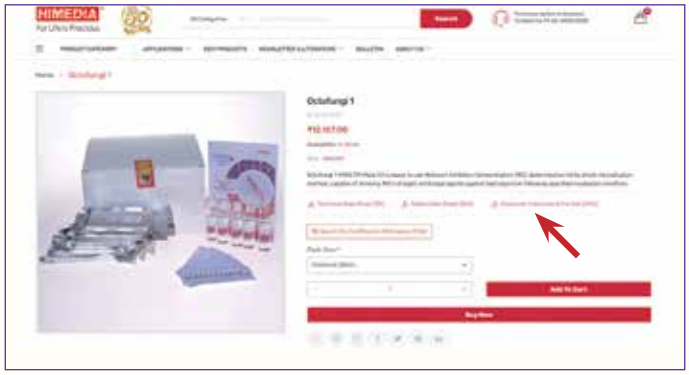
This Opens the eIFU in pdf Format :

Now, you can download or print the eIFU as shown in the screen 5.5

Screen 5.5

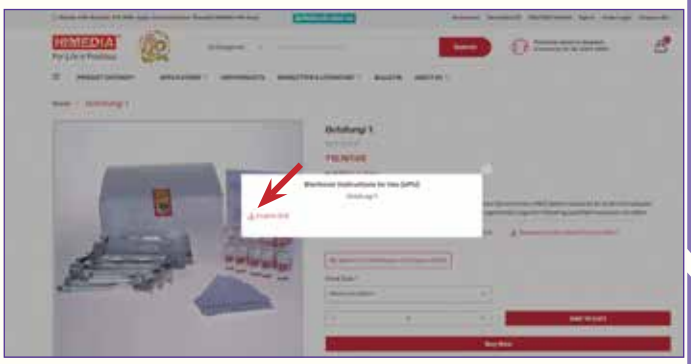
B. Product Detail Page :

We can view the eIFU from the Product Details page. Click on the link to view eIFU.



Screen 6.1

After clicking on eIFU link, It will show the popup link of the eIFU file as shown in screen 6.2. Click on the link to view the eIFU in pdf format.



Screen 6.2

This Opens the eIFU in pdf Format.

Now, you can download or print the eIFU as shown in the screen 6.3

Screen 6.3

GENERAL INSTRUCTIONS TO THE USERS

PRELIMINARY PRECAUTIONS TO BE OBSERVED

The Dehydrated Culture Media are highly hygroscopic and must be stored in a cool, dry place away from bright light. These media are meant for laboratory use only.

Carefully read the instructions given on the label. Note the ingredients, directions and use. Also note the expiry date and Lot number. Ensure before use that the medium is not deteriorated physically.

Refer to hazard and precaution statement on the product label if any. Information for use can also be referred on website www.himedialabs.com

Culture Media have a tendency to form lumps due to following conditions :

(i) High humidity during storage

(ii) Container left open for too long

(iii) Container not tightly sealed after every use

(iv) Medium is too old and not recommended to use after alloted shelf life

Reconstitution of Dehydrated Media

For rehydration, use clean, undamaged glassware and distilled or deionized water that meets the specifications for purified water - U.S.P./I.P./E.P./B.P./J.P. Place appropriately weighed amount of the medium in a clean dry flask, 2-3 times larger than the final volume of the prepared medium. Add part of the required amount of distilled water and swirl to dissolve. Now gradually add the remaining water from the side of container. Majority of broth media are clear and dissolve at this stage. For completely dissolving, heat using an open flame, hot plate or boiling water bath taking care to avoid excessive heating or scorching of the medium.

Microwave oven can also be used for dissolving the medium completely by boiling. After initial boiling in the microwave oven, remove the medium and gently stir. Return the medium to the oven for repeated heating of short time periods. Continue until complete dissolution of Agar particles (approximately 2-3 minutes of total heating time).

pH Adjustment

The pH value of the reconstituted Dehydrated Culture Media in distilled or deionised or purified water (as specified) shall produce the equivalent value prescribed on the label at a temperature of 25°C. If old material is being used, it is recommended to check the pH and correct if necessary before use.

pH measurement and correction of the pH should be carried out at 25°C for liquid culture media and reconstituted solid (Powder / Granulated) culture media. Also pH is verified at 40°C for solid (Powder/Granulated) culture media in molten state. For liquid culture media, pH measurement after sterilization cycle should be carried out by cooling the medium to 25°C. An aliquot of liquid medium is taken aseptically and measured for pH. In case of solid (Powder/Granulated) culture media, an aliquot of solid medium cooled to 40°C is taken aseptically and measured for pH. The temperature knob should be adjusted to 40°C. pH for solid media can also be measured after sterilization at 25°C as specified in different pharmacopoeias by use of surface electrode. The pH should be checked for value specified. It is corrected by adding 1N or 0.1N hydrochloric acid or sodium hydroxide solution to a sample of known volume taken from the reconstituted culture medium (e.g. 50 to 100ml). Finally after calculation, the required acid or alkali can be added in the remaining prepared culture medium.

STERILIZATION

Moist Heat Sterilization

Moist heat in the form of pressurized steam is regarded as the most dependable method for the destruction of all forms of life, including bacterial spores. The autoclave is used to sterilize bacteriological media, glasswares and metal wares (19).

Dispense the dissolved medium and sterilize as directed on the label. Generally sterilization is done at 121°C (15 lbs pressure) minutes using an autoclave. Some media require sterilization temperature of 115°C or 118°C depending on the media composition which corresponds to 10 lbs or 12 lbs pressure

GENERAL INSTRUCTIONS TO THE USERS

respectively. Temperature pressure relation is listed in Table 1.

Pressure	Temperature	
PSI	Celsius	Fahrenheit
5 lbs	108	226.4
10 lbs	116	240.8
15 lbs	121	249.8
20 lbs	127	260.6
25 lbs	131	267.8
30 lbs	134	273.2

*lbs - pounds per square inch

Efficiency of autoclaving should be ascertained from time to time. Temperature conditions inside autoclaves are not uniform. This can be tested by putting 2 bottles containing 2% w/v glucose in 2% w/v disodium phosphate in the autoclave at different places. Heat produces browning of solution. Bottle near steam inlet will be more brown than the one away from it. It is highly recommended that the users strictly follow the directions on the label.

When heat labile enrichments or supplements are to be added, the sterile media should be cooled before the additions. Additions are made aseptically to liquid media cooled to room temperature and to agar media cooled to 45-50°C as directed on the label. Some bile salt containing media such as XLD (Xylose Lysine Deoxycholate Agar (M031/ GM031), Hektoen Enteric Agar (M467/ GM467), Violet Red Bile Agar (M049/ GM049) should not be autoclaved. Heating the medium to boiling (100°C for 30 minutes) suffices. It is important to follow label directions.

Sterilization Check

It is recommended to check all the autoclaves regularly to ensure that their performance is effective and efficient. Physical measurements should be made of temperature and pressure readings. The quality of the steam must be checked including the steam and safety valves. The desired temperature must reach all parts of the load. Do not overload the autoclave chamber, and place contents such that there is a free flow of steam around the contents. While sterilizing media, plug tubes or flasks of liquids with nonabsorbent cotton or cap loosely (19). In certain cases, biological indicators are compulsory to demonstrate ability of the autoclave for sterilization. Chemical indicators will demonstrate the temperature attained or exceeded and some will indicate the time held at the specified temperature.

Fractional Sterilization

Before the development of the autoclave, liquids and other objects were sterilized by exposure to free flowing steam at 100°C for 30 minutes on each of 3 successive days with incubation periods between the steaming. This method is called as fractional sterilization because a fraction was accomplished on each day. Fractional sterilization has assumed renewed importance in modern microbiology with the development of high technology instrumentation and new chemical substances.

Boiling Water Bath

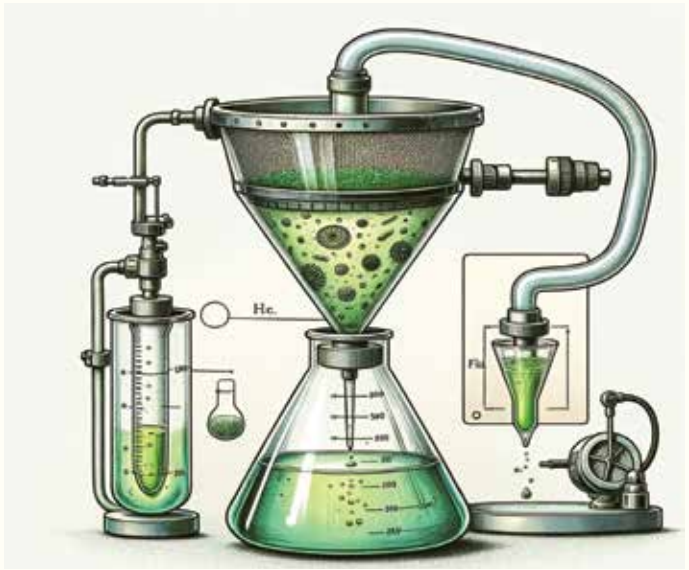
Moist heat kills microorganisms by denaturing their proteins. Immersion in boiling water is the first of several moist heat methods. Culture media containing agar or gelatin must be heated, in order to dissolve the media completely. However boiling water is not considered as a sterilizing agent.

Pasteurization

It is not the same as sterilization. Its purpose is to reduce the bacterial population of a liquid such as milk and to destroy organisms that may cause spoilage and human disease. Spores are not affected by pasteurization.

Sterilization by Filtration

Although heat is a valuable physical agent for controlling microorganisms, sometimes it is impractical to use it. Filters came into prominent use in microbiology as interest in viruses grew during the 1890's. The filter is a mechanical device for removing microorganisms from a solution. Sterilization by filtration can be performed under vacuum. As fluid passes through filter, organisms are trapped in the pores of the filter. Several types



GENERAL INSTRUCTIONS TO THE USERS

of filters are available e.g. Inorganic filters, Organic filters and Membrane filter is a third type of filter that has received broad acceptance. In Culture Media preparation membrane filters are widely used with a pore size of 0.22µ and 0.45µ.

Air can also be filtered to remove microorganisms. The filter generally used is a HEPA filter (High Efficiency Particulate Air). This can remove over 99% of all particles, including microorganisms with a diameter larger than 0.3 µm.

Dry Heat Sterilization

The dry heat sterilization time is 120 minutes at 160°C. It is employed for materials such as glassware's, metal instruments which can withstand higher temperatures.

The Direct Flame

The most rapid sterilization method is the use of direct flame in the process of incineration. The flame of Bunsen burner is employed for few seconds to sterilize the bacteriological loop before removing a sample from a culture tube and after inoculation (19).

HiLoop Electric Sterilizer

Incineration can also be done using an Electric loop steriliser (LA832) and is recommended for upto contact of 10-15 seconds.

Gamma Irradiation

Gamma irradiation requires many hours of exposure for sterilization. Gamma rays are generated by radioactive isotopes, Cobalt 60. The risk of mycoplasma always lurks in the raw materials used. Moreover mycoplasma can move through 0.2µm filters and reach high titers without producing pH changes or media turbidity providing itself as an invisible threat. In such cases a prudent step ahead to provide maximum quality assurance is to provide gamma irradiated material. Gamma irradiation does not affect product performance and results in contaminant free materials, this has been evaluated by comparative studies on growth performance.

New

LA1152 LA1151

Chemical Disinfection

Chemical agents are effectively used to control the growth of microorganisms even though they do not achieve sterilization. Most disinfectants have some toxic effects therefore using protection is mandatory. Equipments and lab rooms can be decontaminated by fumigation with formaldehyde gas or UV radiation.

Effects of Overheating

High temperature and prolonged heating is a common cause of pH drift, darkening of medium, precipitation, poor gel strength and deterioration in the quality of the culture medium.

It is suggested that all the Culture Media should be in solution before sterilization otherwise there are chances of darkening of the medium (Maillard type reaction). Pouring of Sterilized media into the Petri plates.

(a) Pouring of Sterilized Media

Sterile agar media should be poured into plates at about 45-50°C (in molten stage) to avoid the formation of condensed water in the lids of the Petri plate. The medium should be evenly mixed without bubble formation and aseptically poured into sterile Petri plates. A volume of 18-20 ml molten agar medium is poured into Petri plates so that an agar layer thickness of atleast 2-3 mm is obtained. Before inoculation, ensure that the agar surface is dry to avoid microbial swarming. This can be done by drying at 30-40°C in an incubator for 15-20 minutes. Do not overdry agar plates.

(b) Addition of Supplements

Supplements may contain hazardous and toxic agents. Follow the instructions on the label/ inserts and rehydrate the supplement by adding the reconstitution fluid. Suspend the contents of vial by gently swirling. Check for complete dissolution, most of the supplements contain antibiotics or antibiotic mixtures. On rehydration and subsequent storage at 2-8°C, the performance of the supplement may not be at par with the freshly rehydrated supplements. Therefore it is advisable to use a freshly rehydrated supplement for optimum performance.

(c) Addition of Blood

Defibrinated blood is recommended for the preparation of blood agar media rather than blood containing an anticoagulant. It is preferable to use blood as fresh as possible. If stored blood (2-8°C, not frozen) is used, warm the blood in an incubator to about 35-37°C before adding to sterile cooled molten agar base (45-50°C).

GENERAL INSTRUCTIONS TO THE USERS

Storage of Prepared Media

If the medium is not used on the same day of preparation, it should be stored properly in moisture proof containers to prevent drying of the medium. It is important to note that unless the stability of the prepared medium is known it should not be stored for longer periods. Similarly agar containing media should not be held at higher temperatures (40-50°C) for longer time as agar tends to clump. It is recommended to use fresh media than stored media. Media containing labile beta-lactam selective agents have very short active lives and therefore should be used within a few days of preparation.

Agar plates should be stored at 2-8°C in sealed conditions in containers to avoid loss of moisture. Liquid media in test tubes or flasks should also be provided with airtight seals. Loss of water can result in precipitation and crystallisation of certain substances in the Culture Media. The stability of prepared Culture Media is limited and it varies considerably.

If not otherwise specified under controlled conditions, media can be stored at 12 to 15°C for several months. Media should not be stored below 0°C as it destroys their gel structures. Before inoculation, plates should be carefully examined for contamination, uneven filling or bubbles on surface of agar, colour changes, haemolysis and cracks due to shrinking and loss of volume. Discard such defective plates or tubes.

Quality Control

A new lot of culture medium is always tested in parallel with previously approved lot of the same culture medium. For cultural response serially dilute the cell suspension in normal saline so as to obtain 50 to 100 CFU per plate. Media used for sterility testing or for special application should be checked for GPT in accordance with respective Pharmacopoeias.

Quality Control Strains

If a culture medium is being subjected to quality control testing, quality control organisms are included. Microorganisms should be obtained from American Type Culture Collection (ATCC) or other commercial sources. While using commercial stock cultures, follow the manufacturer's recommendation for growth and maintenance.

The Pharmacopoeias, ISO 11133-2014, Standard Methods for the Examination of water and wastewater recommend specific test organisms to be used. The quality control of Culture Media is conducted with working cultures which are subcultures from strain. Working cultures may be stored at 2-8°C for up to 4 weeks.

Disposal of Prepared Media

(i) Laboratory Environment

The microbiology laboratory poses many hazards to unsuspecting and untrained people, therefore, access should be limited to those who have been informed of which actions they can perform safely. The environment in which microbiological cultures are handled must also be taken into account. Most countries have laid down their standards for handling microorganisms and

accordingly categorised the laboratories to handle cultures. For the most dangerous organisms a totally contained and highly protected environment is specified. Violations of these rules and regulations may be considered as a criminal offence.

(ii) Personnel Practices

Handling of infectious materials and inoculated media should be done only by qualified personnel who has been trained in microbiological products. All specimens and cultures should be handled properly and should not be disposed without autoclaving. User should ensure that any machinery or apparatus used and by chance contaminated must be safely disinfected or sterilized. Cultures in reusable glass vessels (e.g. conical flasks, culture test tubes, glass Petri Plates) must first be destroyed in the autoclave (approximately 30 minutes at 121°C). Autoclave used to sterilize Culture Media or other material should not used for disposal of material.

(iii) Biological Safety

It should be recognized that inoculation of Culture Media with organisms, deliberately or accidently leads to great numbers of organisms being produced. Such high concentration of any organisms are potentially dangerous and infectious, therefore, must be disposed off safely by approved methods. National guidelines for transport and storages of microbiological samples must be strictly followed. Contaminated as well as unused media must be disposed according to the local or national guidelines.

Handling of Dehydrated Culture Media

All the dehydrated Culture Media are supplied in fine powder or granulated form. These products are meant for carrying out bacteriological work in the laboratory as specified under the use of individual medium and should not be used for human or animal consumption directly or indirectly.

Culture Media should not be inhaled because irritation of the upper respiratory tract may occur. If skin rashes occur, avoid prolonged contact with these. Ensure that excessive dust is not produced while using powder media. Any residue should be washed off with ample cold water.

To prevent the risk of inhaling fine dust, it is recommended to use approved masks while handling dehydrated media.

GENERAL INSTRUCTIONS TO THE USERS

Safety Data Sheets are available for individual products. Refer www.himedialabs.com

HANDLING OF HAZARDOUS AND TOXIC PRODUCTS

A number of Culture Media may contain toxic substances as the constituents of the medium and therefore must be used in accordance with product specific 'Material Safety Data Sheet'. The product label specifies such relevant Risk and Phrases, if any toxic substances are present in the material.

Sodium Azide

Generally, when sodium azide is used in any medium, the concentration is less than 1% which has low toxicity. However, some persons are sensitive to this substance and therefore precautions must be taken to prevent ingestions or inhalation of the dust. Sodium azide has a property to react with many metals, particularly copper and lead which produce explosive metal azides. It is recommended to observe strict regulation of local and national legislation of disposal. Sufficient water should be used to prevent the powder from remaining in contact with pipe line and drains. Such precautions are required to be observed in the case of any biological solution which contains sodium azide as a preservative.

Lithium Chloride

Lithium chloride is harmful. Avoid bodily contact and inhalation of vapours. On contact with skin immediately wash with plenty of water.

Basic Fuchsin

Basic Fuchsin is a potential carcinogen and care should be taken to avoid inhalation of the powdered dye and contact with the skin.

Sodium Hydrogen Selenite

Sodium Hydrogen Selenite is a highly toxic, teratogenic, corrosive agent. Hence it should be handled with great care. If there is skin contact wash immediately with plenty of water.

First Aid Measures

The following First Aid procedures should be followed in cases of accident while handling any of the toxic or hazardous products.

Inhalation

Person should be removed from the area of exposure. Should rest and keep warm and if required seek medical advice.

Skin Contact

It is suggested to remove all the contaminated clothings immediately and wash the affected area thoroughly with soap and water. After completing this procedure, if any symptoms occur, seek medical advice.

Ingestion

In case of ingestion of material, wash the mouth thoroughly with plenty of water. One pint of water should be drunk immediately and if any symptoms occur, seek medical advice.

Eye Contact

Eyes should be washed thoroughly with plenty of water. If required, seek medical advice.

Spillage

Following precautions must be observed if material is spilled.

For Large Quantities

Wear protective overalls, gloves, eye protection and face mask. Material should be collected in suitable container and then properly sealed. Disposal of such material is to be carried out according to local regulations. Wash away the residue with plenty of water.

For Small Quantities

By using protective gloves, wash away the material with large volumes of running water.

SOME CARE NEEDED WHILE USING POWDER AND GRANULATED CULTURE MEDIA

Faults		Causes
Drift in pH	:	Overheating, incomplete mixing, prolonged sterilization, overheating of media containing carbohydrates, use of alkaline glass, impure water, repeated remelting, hydrolysis of ingredients, prolonged storage at high temperature.
Incomplete solubility	:	Inadequate heating of agar media, incomplete mixing, too small container, (Occasionally a precipitate can be an essential part of medium as in Bismuth Sulphite Agar).
Darkening	:	Overheating of the medium, excess amount of dehydrated powder, improper mixing.
Soft gel	:	Agar not in solution, incomplete reconstitution of dehydrated medium, acid hydrolysis of agar, failure to compensate for dilution of agar by the inoculum.
Loss of growth promoting property	:	Repeated remelting, excessive heating, incomplete mixing, failure to compensate for dilution of ingredients, disturbance in the formula by the inoculum carriers, etc.
Abnormal colour of medium	:	Deteriorated Dehydrated Medium, improperly washed glassware, impure water, overheating.
Toxicity of medium	:	Improperly washed glassware, impure water, burning or scorching of medium.
Contamination	:	Improper/ Insufficient sterilization, poor technique in adding enrichments and pouring plates.

Safety Check List

Handling and Use

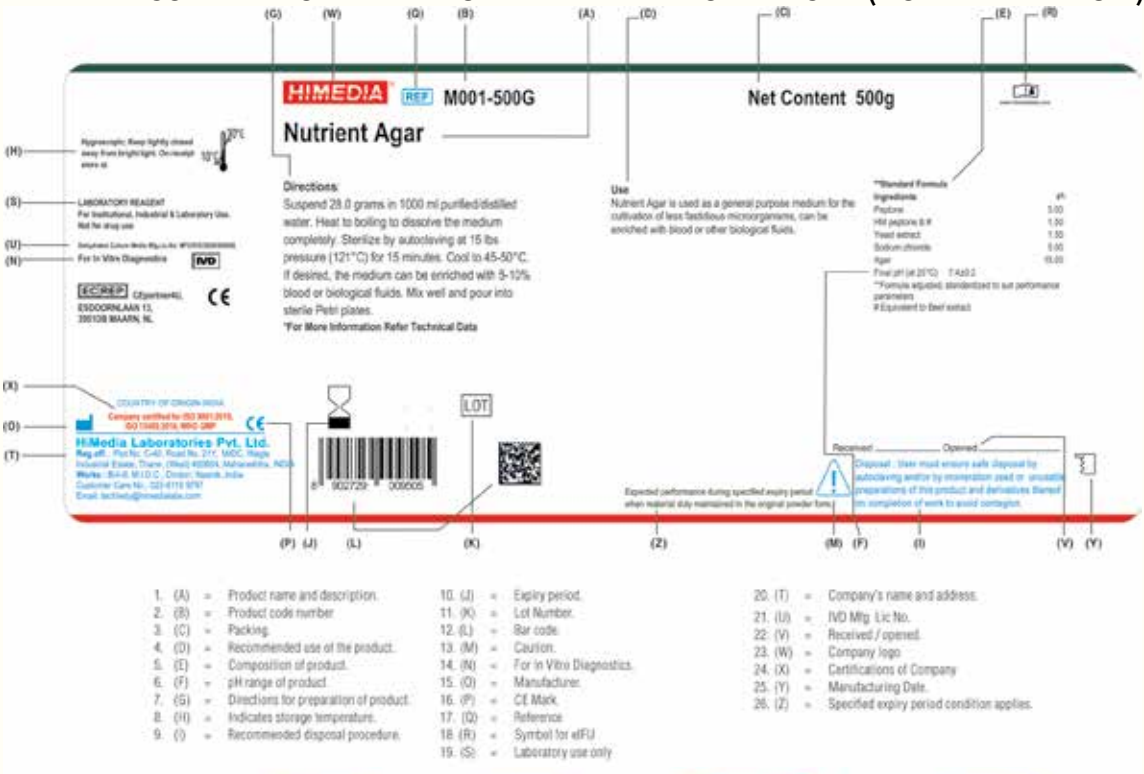
1. Read the label before opening the container.
2. Check that the product is the one required.
3. Consider the hazards including violent reactions between chemicals. Wear protective clothing and equipment.
4. Open container carefully in well ventilated area.
5. Take care while extracting and using hazardous chemicals and use methods which reduce the risk of inhalation, ingestion and contact with skin, eyes and clothing.
6. Avoid using contaminated apparatus and instruments.
7. Seal the container tightly after use.
8. Do not eat, drink or smoke while handling and using chemicals.
9. Wash hands and exposed areas thoroughly and change contaminated clothing.
10. Deal with spillages using precautions and methods appropriate to the hazards.
11. Seek medical attention immediately if affected by chemicals and use appropriate first aid until medical attention is available.

Storage

1. Preferable storage temperature has been mentioned (as indicated on the label) for some items wherever required. All other products to be stored below 30°C.
2. Store in dry ventilated area protected from extremes of temperature and sources of ignition.
3. On opening, product should be properly stored dry, after tightly capping the bottle in order to prevent lump formation due to the hygroscopic nature of the product. Improper storage of the product may lead to lump formation. In such cases no liability is accepted by the Company.
4. Secure chemicals from unauthorized use.
5. Segregate stock to reduce hazards.
6. Inspect stocks from time to time and dispose off deteriorated materials.
7. Do not smoke where flammable chemicals are stored.
8. Take care in handling containers with hazardous residues.
9. It should be used by trained personnel only.

Typical Identities for HiMedia Bottles

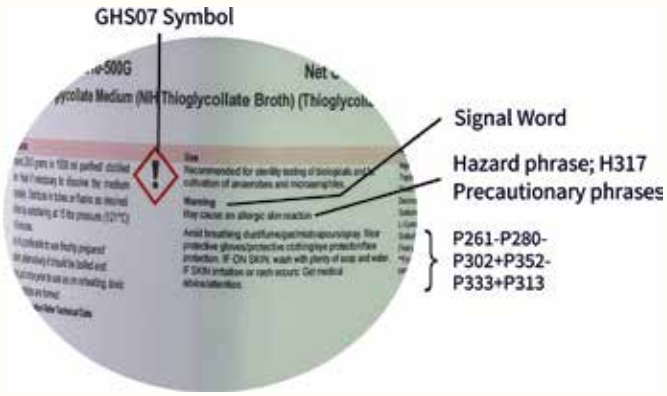
CONVENTIONAL MEDIUM LABEL AND BOTTLE CAP (POWDER MEDIUM)



Powder (General) | HiVeg® | Harmonized | Granulated® | HiCynth®

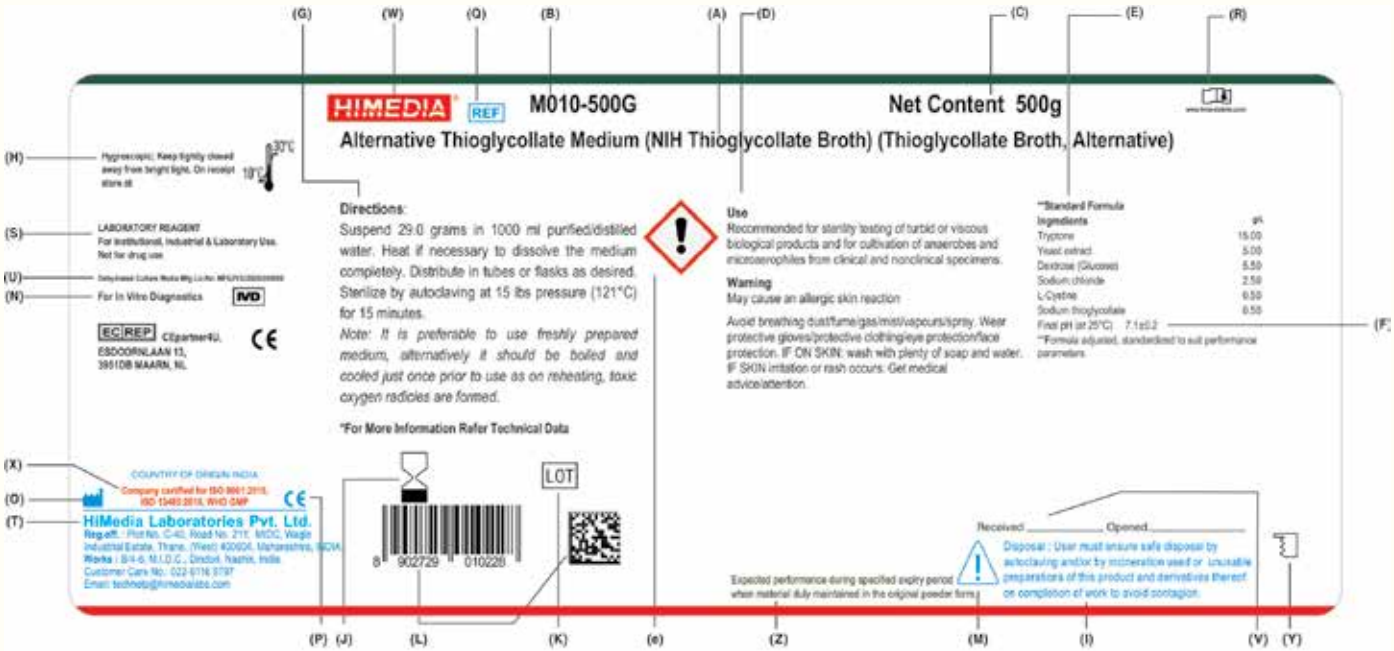
Different Media Bottle Cap Colours for Easy Differentiation of Media Categories

Typical Hazard Label with GHS Elements



MULTI-LINGUAL LABELS

We have introduced for your convenience, our product labels with the following languages in every label English, German, Spanish, French, Czech, Ukrainian, Russian and Portuguese



1. (A) = Product name and description.
2. (B) = Product code number.
3. (C) = Packing.
4. (D) = Recommended use of the product.
5. (E) = Composition of product.
6. (e) = GHS Symbol Signal word, Hazard & Precautionary phrases.
7. (F) = pH range of product.
8. (G) = Directions for preparation of product.
9. (H) = Indicates storage temperature.
10. (I) = Recommended disposal procedure.
11. (J) = Expiry period.
12. (K) = Lot Number.
13. (L) = Bar code.
14. (M) = Caution.
15. (N) = For In Vitro Diagnostics.
16. (O) = Manufacturer.
17. (P) = CE Mark.
18. (Q) = Reference
19. (R) = Symbol for eIFU
20. (S) = For Laboratory Use only.
21. (T) = Company's name and address.
22. (U) = IVD Mfg. Lic No.
23. (V) = Received / opened.
24. (W) = Company logo.
25. (X) = Certifications of Company
26. (Y) = Manufacturing Date.
27. (Z) = Specified expiry period condition applies.

Troubleshooting (Commonly Encountered Problems While Using Dehydrated Culture Media)

Abnormalities	Possible Causes	Troubleshooting Tips
Drift in pH	1. Overheating 2. Prolonged sterilization 3. Use of alkaline glass, residues in containers, impure water 4. Repeated remelting, hydrolysis of ingredients 5. Prolonged storage at high temperature 6. pH measured at a temperature above 25˚C 7. Initial pH of distilled water	1. Do not overheat 2. Sterilization should be carried out according to the specified time and temperature 3. Check pH of the glassware 4. Reconstitute only the required amount of medium and avoid re-melting multiple times. Avoid preparing excess medium. 5. Store the media in a dry ventilated room protected from extremes of temperature 6. pH of carbohydrate containing media drastically changes on overheating 7. pH of distilled water should be preferably between 6.0-7.0. Therefore sterilization should be strictly done as per stipulated instructions. For media in which carbohydrate has to be externally added, sterilize the medium add carbohydrate separately and mix before dispensing.
	  1 2	1. M031-XLD Agar Standard colour of Medium - Red and Clear 2. M031-XLD Agar Haziness of the Medium due to acidic pH of distilled water
Incomplete Solubility	1. Inadequate heating of agar media, lack of homogenization 2. pH measured at a temperature above 25°C 3. Use of too small container. (Occasionally a precipitate can be a essential part of medium like Bismuth Sulphite Agar). 4. Residues in containers or use of alkaline glass	1. Boil the medium prior to sterilization 2. Check pH of the distilled water. The pH should be between 6.0 - 7.0. 3. Use sufficiently big containers 4. Check the pH of glass ware
	  1 2	1. M173 Mueller Hinton Agar-Non Homogeneous Medium 2. M173 Mueller Hinton Agar-Homogeneous Medium
Darkening	1. Overheating of the medium 2. Incorrect weighing of the medium, excess amount of dehydrated powder 3. Incorrect pH 4. Repeated remelting 5. The culture medium is expired or deteriorated	1. Do not overheat 2. Do not use excess powder. Reconstitute the medium powder, as per the gms/ litre. 3. Check pH of the distilled water. pH of the water should be 6.0-7.0. 4. Avoid remelting and preparation of medium 5. Use the culture medium within its expiry period
	 1 2	1. M011 SCDM Standard colour Light Yellow 2. M011 SCDM Amber colour due to over heating

Troubleshooting

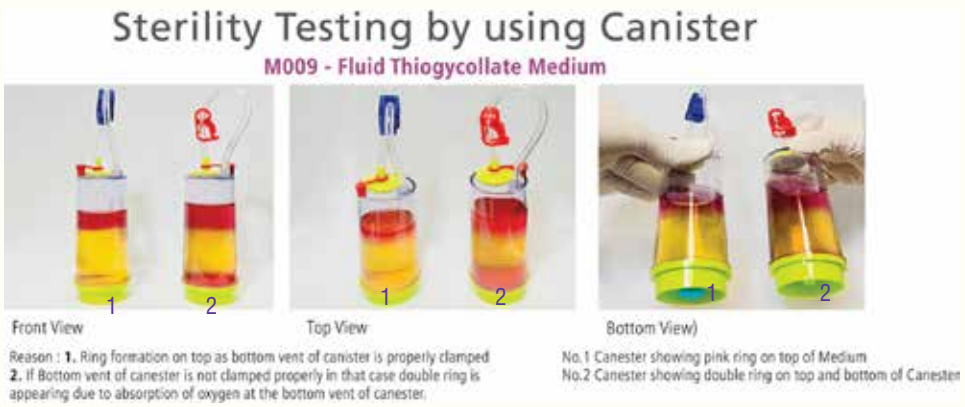
Abnormalities	Possible Causes	Troubleshooting Tips
Soft gel	1. Agar not in solution, incomplete reconstitution of dehydrated medium 2. Acid hydrolysis of agar 3. Failure to compensate for dilution of agar by the inoculums carriers, etc.	1. Check pH of distilled water. pH of distilled water should be between 6.0-7.0 2. Acidic pH of distilled water leads to hydrolysis of agar resulting incomplete solubility 3. Sterilization should be strictly done as per stipulated instructions. Avoid over sterilization which may lead to soft gel formation.
	  1 2	1. M091-Plate Count Agar Improper gelling 2. M091-Plate Count Agar Proper gelling
Loss of Growth	DUE TO THE CULTURE MEDIA : 1. Repeated re-melting 2. Excessive heating 3. Incomplete mixing 4. Failure to compensate differentiating properties for dilution of ingredients 5. The culture medium is expired or deteriorated 6. Incorrect formulation used	1. Avoid repeated re-melting. Reconstitute only the required amount of medium at a given time. 2. Do not overheat 3. Ensure proper homogenization 4. Use of appropriate amount of inoculum at proper dilution. Do not use the medium past its expiry date. 5. Use the culture medium within its expiry period 6. Use the appropriate amount of medium as per the direction on the label of the respective medium
	 1 2	1. M290-Soyabean Casein Digest Agar - Good recovery, use of media within the expiry period 2. M290-Soyabean Casein Digest Agar - Poor recovery, use of media beyond the expiry period
	DUE TO THE SUPPLEMENTS : 1. The supplement is expired or deteriorated 2. Poor reconstitution of the supplement. Adding a concentration lower than required. Supplements added incorrectly. E.g. when medium is too hot or at wrong concentration. 3. Poor homogenization of the supplement with the Culture Medium	1. Use the supplement before the expiry period 2. Reconstitute the proper amount of supplement in appropriate concentration as per the directions on the label 3. Ensure proper homogenization of the supplement with the culture medium
	 1 2	1. M043-Baird Parker Agar - Good recovery, use of supplements withtin the expiry period 2. M043-Baird Parker Agar - Poor recovery, use of supplements beyond the expiry period

Troubleshooting

Abnormalities	Possible Causes	Troubleshooting Tips
Change in Colour of Medium on Preparation [indicator containing medium]	If pH of medium before and after sterilization is not in specified standard limits	1. Check pH of water used for preparation of distilled water. pH of distilled water should be preferably between 6.0-7.0 2. In case of drift in pH, the pH of medium before and after sterilization may be adjusted using 0.1 N HCl / 0.1 N NaOH as desired to obtain pH in specified range.
	 pH 6.8 pH 7.0 pH 7.1	1. M099 Simmons Citrate Agar Standard pH 6.8±0.2 I Colour variation due to pH
Precipitation of Medium	Generally found in case of Inorganic salts containing medium	1. Distilled water is recommended to be used for reconstitution. Purified water can also be used. 2. Overheating or over-sterilization of medium other than recommended, can cause precipitation 3. This is observed generally in case of medium containing phosphate salts. Compatibility test of water for its suitability should be performed.
	 1 2	1. Initial distilled water use for preparation of medium free of phosphate salts, clear 2. Haziness occured due to impurities of phosphate salts in distilled water
Darkening of Prepared Medium on Storage	In case if media contains high concentration of sugars and is exposed to continual heating. Storage of media at high temperatures.	1. Do not overheat 2. Sterilization should be carried out according to the recommended time and temperature. Overheating of medium should be avoided. 3. Avoid continual remelting of prepared medium 4. Avoid exposure of prepared medium at high temperature above 50°C for long durations
	 1 2	1. M033 - Sabouraud Dextrose Broth standard colour of medium, light yellow 2. M033 - Sabouraud Dextrose Broth darkening of medium due to storage at high temperatures
Inconsistent & Distorted Ring Formation in Fluid Thioglycollate Medium FTM (M009)	1.Improper digestion of agar 2. Insufficient boiling	1. Undigested agar particles 2. Ensure complete digestion of agar particle prior to autoclaving to avoid insufficient percentage of agar which leads to phase separation. 3. Compact ring is formed on correct digestion, autoclaving and cooling if left undisturbed

Troubleshooting

Abnormalities	Possible Causes	Troubleshooting Tips
	 1 2	1. Appearance of medium due to insufficient boiling and improper digestion of agar, no ring observed 2. Compact ring due to proper boiling and proper digestion of Agar, autoclaving and cooling
Flaccid Ring in Prepared FTM (M009)	Disturbance of prepared medium	While handling, ring may loose its compactness which can be restored on reheating in free flowing steam if required and allowing the medium to cool down
	 1 2	1. Flaccid ring due to disturbance of medium 2. Restoration of ring on reheating and cooling
Double Ring Formation in FTM (M009) when used in Canesters while Sterility Testing	Due to absorption of oxygen	Ensure that bottom vent is properly clamped. If loose, absorption of atmospheric oxygen will lead to a double ring formation.
Double Zones in SD Testing & Interpretation	 1.Culture may not be pure or would be of mixed strains SD028 Penicillin-G P 10 units	1. Confirm the purity of culture. 2. Retest in duplicate to rule out the possibility 3. Measure the inner zone
Fuzzy Zones or zones with blurr edges in SD Testing & Interpretation	 1.It is encountered with some strains of Staphylococci due to absence of beta lactamase SD041 Cefoxitin (Cephoxitin) CX 30 mcg	1.To read correctly, tilt the plate at acute angle i.e 45^{0}C until the clear zone edge is observed. *Also mentioned in CLSI M02 & CLSI M100 34th edition*



Storage of HiMedia Products

It is essential to store all the HiMedia products at specified conditions to achieve optimum performance. Products should not be stored beyond the allocated shelf-life. The storage conditions and expiry is provided on product label, container or product insert. It is recommended that products should be used in order of their lot/ batch numbers.

Environmental conditions that can influence stability of products are:

- **Light**

It is preferable that all the prepared culture media should be stored away from light and exposure to direct sunlight at all times.

- **Humidity and Temperature**

It is important not to leave bottles open to atmosphere since dehydrated powder will be affected by high humidity. Hot media preparation rooms are not suitable to store containers of culture media, particularly containers which are frequently opened and closed.

Recommended Storage Temperature and Time

Temperature sensitive materials are transported using cold ice packs"Blue Ice". Upon receipt, the material should be stored at temperatures specified on labels.

Ready Prepared Media / Ready Prepared Plates

General storage : Ready Prepared Media at 2-8^{0}C. Ready Prepared Liquid Media at 15-30^{0}C. Ready Prepared Plates at 20-30^{0}C.
Refer individual product label & specifications

Dehydrated Media (M)/(MV)/(G)/(GM)/(GMV)/MCD

Dehydrated media stored unopened under optimal conditions have a shelf-life of 1½ to 5 years. HiMedia's dehydrated powder & granulated media are supplied in opaque, waterproof, screw-cap HDPE plastic bottles, with an internal lid which eliminates the need for an intermediate seal. The lid should be replaced quickly after media has been taken out and the cap should be closed tightly. Sealed, unopened containers should be stored at temperature below 8 or 30°C as specified on individual product label. When a container is opened for the first time the date should be noted on the container.

Selective Supplements (FD)

Store at 2-8°C except Horse serum RM1239, FD100, FD214, FD227

Proper Storage Conditions | Improper Storage Conditions

A — Homogeneous free flowing powder
B — Soft Lumps
C — Hard Lumps

at -20°C. Shelf-life 1 to 2½ years.

Antimicrobial Susceptibility Discs, MIC Determination Strips & Kits (SD, HX, OD, IC, DE, MD, MDM, Ezy MIC, MPK)

Store at -20 to 8^{0}C but keep working stock at 2-8^{0}C
For long term storage store at -20^{0}C.

Media Bases (RM)

Sealed, unopened containers should be stored below 30°C. Shelf-life 3 to 5 years.

Bacteriological Differentiation Aids (DD)

Store at 2 to 8°C or below 30°C as specified
Carbohydrate discs below 30°C. Shelf-life 9 months to 2 years.

Animal and Insect Cell Culture Products

Temperature sensitive materials are transported using cold ice packs For storage conditions upon receipt of material please refer to the table below :

Sr. No.	Storage temperature	Products
1.	-20°C	Serum, Antibiotics, L-Glutamine, Trypsin, Vitamin concentrates.
2.	2 - 8°C	Powdered animal, plant and insect culture media & diets. Animal and Insect liquid cell culture media. Powdered and liquid balanced salt solutions. Amino acid concentrates (powder), Sodium pyruvate.
3.	15 - 30°C	Sodium bicarbonate, Tissue/Molecular biology grade water, Sodium hydroxide and hydrochloric acid solutions, Phenol Red and Trypan blue solutions.

Plant Tissue Culture Products

Sr. No.	Storage temperature	Products
1	2-8°C	Powdered plant tissue culture media, balance salt, vitamins, antibiotics, antiviral, indicators, plant growth regulators, Liquid balanced salt, vitamins, phycology media
2	Below 30°C	Macroelements, microelements, vitamins, amino acids, organic supplements, organic acids, carbohydrates, buffer, gelling agent, adsorbent
3	-20°C	Liquid antibiotics solution.

Molecular Biology Products

Sr. No.	Storage temperature	Products
1.	10-30°C	Molecular Biology Growth Media, Chemicals for Molecular Biology
2.	15-25°C	HiPurA® Kits, Molecular Biology Buffers & Reagents, HiPer® Teaching Kits, Hematology Kits, InstaDNA™ Kit, InstaDNA™ Cards, Protein Crystallography, Molecular Biology Accessories
3.	2-8°C	Protein Purification, HiPer® Teaching kits, Molecular Biology Buffers & Reagents, Chemicals for Molecular Biology, PCR Enhancers, Hematology Kits, Latex Agglutination Test Kits
4.	-20°C	HiPer® Teaching Kits, Restriction Enzymes, PCR Kits for Pathogen Detection, Food Pathogen Detection Combo kits, HiPurA® Competent cells, Molecular Biology Buffers & Reagents, Chemicals for Molecular Biology, Hematology Kits, dNTP Solutions, PCR Master Mixes, DNA Polymerases, Reverse Transcriptases, PCR & Reverse Transcription PCR Kits, Modifying Enzymes, Ladders, Positive Controls for PCR

"QUALITY IS NO ACCIDENT"

In HiMedia, we believe that customer deserves the best quality. We feel responsible for giving our valued customers the best service at an affordable price. We cater to the massive needs of big industrial set-ups like the fermentation pharma sector as well as to the smallest labs and various educational institutions .

At HiMedia, we have made 'Quality' possible by maintaining consistent Quality systems in the Design as well as Production phase. Further to enhance production facilities since last 3 years we have introduced WHO GMP at every stage to ensure "Quality" of products manufactured. Our motto "in the service of mankind" has remained the same since our establishment in 1976. Constant quest for innovation and an eye for perfection has made us the world leader in the field of Dehydrated Culture Media. Predominantly known as a Culture Media company, we soon expanded our product range to the allied applications like Antimicrobial Susceptibility Systems, Ready to use Media and Kits, Bacteriological Differentiation Aids etc. Our first chromogenic medium was introduced in 1997. Looking at the immense advantage of chromogenics in today's microbiological diagnostics, we stepped up our R&D. Today, we boast of having one of the widest range of chromogenic media in the world. We have also introduced products in molecular biology field such as Kits for latex agglutination, Genomic isolation and Lymphocyte separation.

At HiMedia, we believe in rising up to needs of today and preparing for the needs of tomorrow. The biological threat of BSE/TSE prompted us to launch the wide range of vegetable peptones which are free from animal origin products. Realising the diverse need of the users and today's industrial sector, we were successful in developing full range of vegetable peptones, which now replaces all animal derived peptones, the first of its kind in the entire world. Coming out with animal origin free Culture Media, was the next natural step. Today, with the introduction of more than 1500 vegetable peptone based media, we are about to start a green revolution in the field of microbiology. We take pride in calling ourselves the pioneers in the field of vegetable peptones and finished media.

Our recent launch HiCynth™, Chemically Defined Media have been introduced to take care of regulatory requirements while export where media containing animal based peptones are restricted.

Be it chromogenic media or HiVeg Media containing vegetable peptones or Chemically Defined Media, Quality is our priority.

Our Quality Systems are :

ISO 9001:2015, ISO 13485:2016, WHO GMP and CE compliant. In order to meet the high quality standards, all the raw materials and the finished goods must pass the extensive quality control testing. The production processes are also streamlined and are monitored to ensure lot-to-lot consistency.

We maintain an annual maintenance plan of the key production equipment wherein the details of preventive and day to day maintenance is clearly chalked out. All other equipments used for production as well as quality control are validated/ calibrated as per the ISO guidelines and meets WHO-GMP norms.

... Brands May Come And Brands May Go

But Quality Goes On Forever .

QUALITY ASSURANCE PROGRAMME

HiMedia offers a very broad range of media formulations; standard media and customer specified media in dehydrated form for use in different fields; clinical, food, environment, cosmetic, dairy, water, pharmaceutical industries etc. This also includes media specified by various pharmacopoeias recommended for different applications as sterility testing, microbial examination of nonsterile products (formerly microbial limit tests) etc (1, 2, 3, 4, 5) and recommended iso standards.

OUR QUALITY ASSURANCE

Program is broadly divided into three sub-categories :

1. Raw material testing
2. Inprocess sample testing
3. Finished product testing

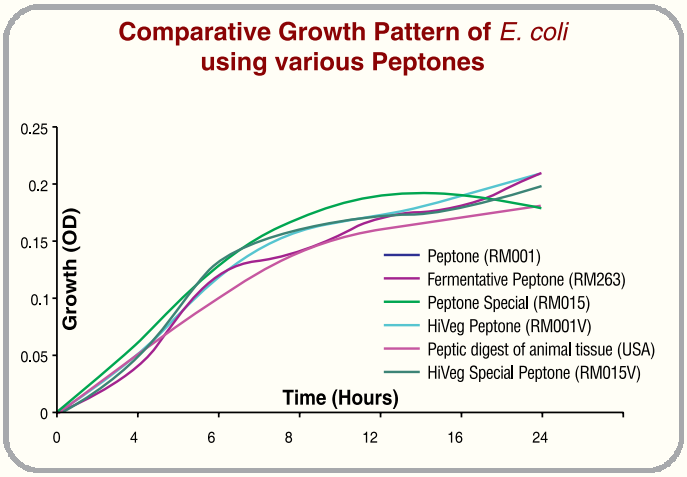
Raw Materials

The design of Microbiological Culture Media requires statistical evaluation of each ingredient and measurement of the interaction of each ingredient with the other. Awareness of this is of vital importance and accordingly various quality control measures are adopted by HiMedia prior to and during the manufacturing processes so that; desired end products with predictable reproducible results are obtained.

Only the highest quality raw materials are used in the making of HiMedia products. The raw materials are bought only from approved vendors who meet all the acceptance standards. Each raw material is analysed for grade, quality and purity as per the standards specified in various pharmacopoiea (1, 4, 5) and recommended ISO standards. For the raw materials and chemicals whose standards are not specified, we have our own in-house standards set by our quality assurance department.

Various raw materials incorporated in Dehydrated Culture Media are :

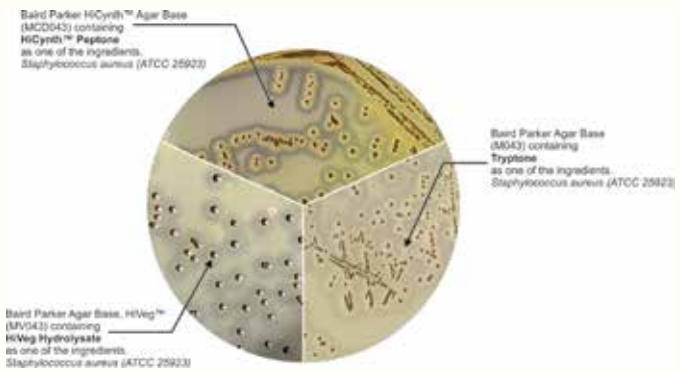
1. Peptones, HiVeg™ Peptones and HiCynth™ Peptones, HM Peptone B (Equivalent to Beef Extract) or hydrolysates as nitrogen source
2. Carbohydrates as carbon source
3. Minerals (Metals and inorganic salts)
4. Selective Agents
5. Dyes and pH Indicators
6. Solidifying Agent
7. Vitamins
8. Chromogenic Substances



1. Peptones (HM Peptone B, M Protein, Soyabean, Gelatin, Yeast), HiVeg™ Peptones and HiCynth™ Peptones :

The degradation products of protein hydrolysis, commonly called peptones, are mixtures of polypeptides, oligopeptides, amino acids, organic nitrogen bases, salts and trace elements. The variety of peptones produced reflects the differing demands of microorganisms for amino acids and peptides. Depending on the protein substrate (casein, meat or soya) and the type of hydrolysis, enzyme (trypsin, pepsin or papain) hydrolysis or acid hydrolysis, the characteristic of the peptone changes.

HiCynth™ Peptones are chemically defined peptones providing nitrogeneous nutrient sources at par with any other animal or



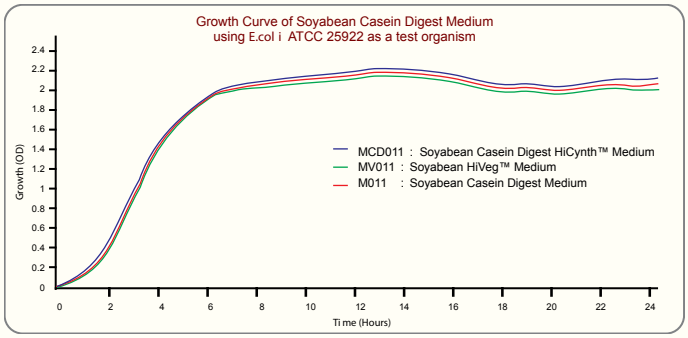
QUALITY ASSURANCE PROGRAMME

vegetable peptones.

Besides HiMedia's own specifications, in general, peptones are analysed as specified in USP (1) under the title "Peptic Digest of Animal Tissue", similar criteria for "Pancreatic Digest of Casein".

2. Carbohydrates

Some organisms utilize a very wide range of carbohydrates while others are much more selective or have definite preference to certain carbohydrates. These latter organisms can be identified by their fermentative or oxidative assimilation of test carbohydrates added to the medium. A large number of media formulations in which specific carbohydrates and an indicator are included to detect the specific enzyme reactions are particularly adopted in



diagnostic bacteriology (6, 7, 8, 9, 10, 11, 12, 13, 14 and 15).

Carbohydrates used in Culture Media are tested to ensure their identity and purity from adulterants (1, 16).

Growth supportive properties of carbohydrates are tested by preparing liquid and solid Culture Media alongwith known standard carbohydrates. On solid media, colony characteristics on reference and test carbohydrate media are compared after sufficient incubation period for size, colour, shape and enzyme reaction with indicators.

3. Minerals and Chemicals

Some inorganic mineral salts are essential for the growth and metabolism of all living cells. Most bacterial requirements are met by the addition of sodium, potassium, magnesium, manganese,

1 2 3 4

MV378 MIO HiVeg™ Medium (Motility Indole Ornithine HiVeg™ Medium)

1. Control
2. *Escherichia coli* (ATCC 25922)
3. *Klebsiella pneumoniae* (ATCC 13883)
4. *Proteus mirabilis* (ATCC 25933)

ferrous or ferric ions in the form of their chlorides, phosphates and sulphates to the Culture Media.

4. Selective Agents (Bile Salts and Bile Salts Mixture)

Bile derivatives are selective agents used to differentiate between those bacteria which have the capacity to survive in the gut and those which cannot live in that environment. By increasing the concentration of bile or bile derivative(s), selective media are prepared for bacteria which are differentiated on the basis of bile tolerance.

Bile Salts are analysed chemically as described in National Formulary for Sodium deoxycholate, Sodium cholate and Sodium taurocholate (1, 4). Following criteria are used for passing bile salts. When bile salts are incorporated into Culture Media they should not affect the colour of the indicator dye(s) or

7. *Pseudomonas aeruginosa* (ATCC 9027)
8. *Salmonella* Typhi (ATCC 6539)
9. *Shigella flexneri* (ATCC 12022)

QUALITY ASSURANCE PROGRAMME

their subsequent change in colour as desired in the medium. It should not form a surface scum or deposit in the medium after storage. Further, bile functional test is carried out, using standard bile salts as controls. Also recovery test of bacteria is carried out with *E. coli* as one of the test organism when a bile salt of known performance is used as a control. Solid media prepared with different bile salts are tested by the Miles-Misra (17) surface drop test. The growth recovery of various Enterobacteriaceae is recorded for each medium.

5. Dyes and pH Indicators

Dyes added to Culture Media also function as selective agents or as pH or Eh indicators. When used as selective agents, interaction may occur between dye and other components in the formulation. Thus, the same sample of brilliant green may show different inhibition titers against *E. coli* when tested in different Peptone solutions. Bile Salts interact with brilliant green and reduce the toxicity of the dye and therefore toxic level of such dyes are ascertained by adding to Bile Salts Medium. Aniline dyes are more toxic when fully oxidised and therefore a change in it's toxicity is possible as reduction of the dye takes place when it is sterilized in the presence of Peptone or Tryptone. Also if Agar used in Culture Media is high in minerals, incompatibility with the media constituents may occur.

Therefore, we analyse the dyes used in our Culture Media as specified by H.J. Conn's (18). Besides ascertaining chemical purity of dyes, microbiological suitability is carried out by adding dyes in Culture Media. These are then tested with various test organisms and compared with standard known dyes.

6. Solidifying Agent

The primary purpose of agar in Culture Media is to form a solid gel. The clarity of agar gel in Culture Media is an important characteristic. Ideally, the molten solution should be crystal clear without any haziness or deposit. Haziness in agar is due to mineral incompatibilities or minute fragments of debris which have passed through the filters during manufacturing. Another characteristic of agar is it's ability to allow diffusion of compounds while locking water into a rigid gel. This property is exploited in microbiological assay of certain vitamins and antibiotics. Here the diffusion from a central reservoir of antibiotic results in proportionate killing of the test organism while in the case of vitamins yields proportionate zone of growth referred to as zone of exhibition.

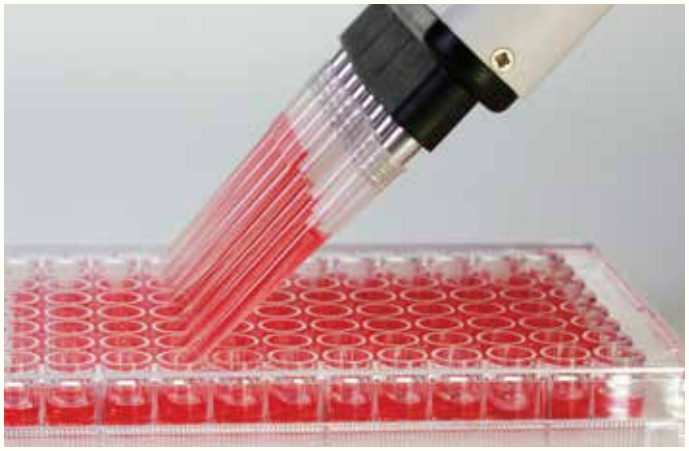
M1938 HiCrome™ Acinetobacter Agar Base

Various chemical impurities are analysed while testing agar for bacteriological purpose.

Besides above tests, toxicity test is carried out to ascertain the presence of toxic and inhibitory substances. This is done by growing fastidious organisms on Culture Media where agar is incorporated and the growth, colony size, shape, pigments, etc. are compared with known standard agar.

7. Vitamins

Vitamins and Biochemicals are analysed as per the U.S. Pharmacopoeia (1) and Food Chemical Codex, U.S.A. (6) for chemical purity and other tests specified under the monograms. Beside the chemical analysis, potency is further confirmed by microbiological methods specified as in A.O.A.C. (19).



8. Chromogenic Substances

The HiCrome™ range of Culture Media have chromogenic substances as an ingredient. It is often added as mixture of two chromogens. The chromogens serves as substrate that is cleaved by specific enzymes produced by growing bacteria and / or fungi. The resulting chromophores colours the colony that can be differentiated on basis of different colour reaction. For example : X-glucoronide is cleaved by the enzyme-glucoronidase produced by *E. coli* strains to yield glucuronic acid, that imparts a bluish green coloration to the colonies of *E. coli.*

In Process Sample

A sample lot is prepared from tested and approved components and analysed in parallel with a previously approved reference lot of complete medium. After ascertaining all the specifications like colour, clarity, pH, solubility, gelling and cultural characteristics of the sample lot including compatibility of component

QUALITY ASSURANCE PROGRAMME

ingredients, large scale lot is approved for manufacturing. While manufacturing, very close attention is paid to each stage by observing good manufacturing practice (GMP). Samples are withdrawn at intermediate stages and forwarded to quality control laboratory for microbiological evaluation and purity as per HiMedia's own specifications. Lot in process is continuously recorded under controlled conditions of temperature, moisture, humidity, etc. The manufacturing process is carried out by using equipment of stainless steel or glass taking care to avoid product contamination with toxic metals. Validated Cleaning procedures for the equipments are in place to avoid any sort of carry over or left over residues from previously processed lots.

Finished Product

Each HiMedia product has defined product specifications. The specification includes validated release criteria which stipulate the finished part inspection necessary for acceptability and release of each lot of finished product. The final product must meet the following criteria :

Physicochemical Parameters

Appearance
Colour
Odour
Moisture
Solubility
Clarity
Gelling temperature (where agar is used)
pH

Biological Parameters

Growth Promotion
Differentiation
Biochemical Performance
Recovery of Small Inocula
Selectivity
Microbial Load

In addition, we also have unique in house criteria developed specifically to zero down any batch to batch variation that may arise due to the interplay of biological materials.

Traceability

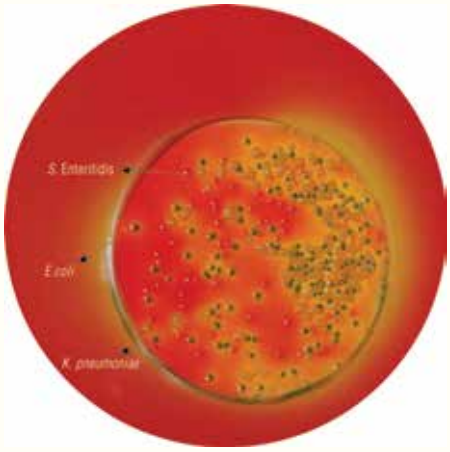
Being a ISO/CE certified company, traceability is an important criterion on which our quality systems are based. Each raw material used and each production process is meticulously documented. Approved final product samples and various records generated during manufacturing process are retained for future reference.

Validation

User intending to use any of our medium listed in our published list for any specific purpose beyond the claim made in our COA/ TD/ Manual, such intent if not timely shared would obviate our liability in the matter. With such intent it is advisable to validate the medium and the test procedure in your own laboratory. HiMedia is your reliable partner to help in the process with relevance of the media used in testing validation.

Stability Study

Stability studies are carried on representative lot to determine the shelf-life of new products and also to verify the efficacy of the existing product. As per testing schedule, representative lot are retested intermittently at defined time intervals for its quality parameters. The ICH guidelines are followed to verify the stability of products by comparing with reference product.



M1569 HiCrome™ M-Lauryl Sulphate Agar

Certificate of Analysis

Every lot released is provided with a detailed Certificate of Analysis which defines the product specifications and the test results. Hard copies of Certificate of Analysis are provided on request or can be directly downloaded from our website - www.himedialabs.com.

Thiamine Assay Medium

HiMedia's Groundbreaking "Thiamine Assay Medium" Sets a New Standard and a Game-Changer

Unavailable Elsewhere but AVAILABLE ONLY AT HiMedia!

Thiamine Assay Medium measures thiamine levels via microbiological assay with *Lactobacillus fermentum* ATCC 9338 as a test organism.

Best choice for food and pharma industries

Features:

- Storage : 2-8°C.
- Gms/litre : g/100ml: 8.5.
- Litres /100g : 1.176 lites.
- Packing : M2179-100G.
- Selective growth conditions for thiamine-dependent microorganisms.
- Use of indicator organisms like *Lactobacillus fermentum*.
- The medium is devoid of thiamine for the enhanced detection sensitivity.
- Growth-based detection method.
- Quantification through thiamine standards.
- Rigorous quality control measures.
- The assay can detect as little as 3 ng L^{-1} thiamine.

Thiamine Assay Medium M2179

TERMS AND CONDITIONS

Prices

Prices mentioned in the Price List are Consumer Prices ruling at the time of printing of the Price List and are subject to change without prior notice. Tax Invoices will be made on the basis of prices ruling on the date of dispatch/delivery of goods.

PAYMENTS

Payments are to be made through :

1. RTGS / NEFT / BT in favor of "HiMedia Laboratories Pvt. Limited", Bank Account No. : 30291668992, Bank : State Bank of India, Commercial Branch, Mumbai, Mumbai - 400023. IFS Code : SBIN0006070.
2. RTGS / NEFT / BT in favor of "HiMedia Laboratories Pvt. Limited", Bank Account No. : 57500000042325, Bank : HDFC Bank Ltd., Ghatkopar (West), Branch, Mumbai - 400086. IFS Code : HDFC0000406.
3. RTGS / NEFT / BT in favor of "HiMedia Laboratories Pvt. Limited", Bank Account No. : 811200227872, Bank : DBS Bank India Limited., Nariman Point, Branch, Mumbai - 400021. IFS Code : DBSS0IN0811.
4. Demand Draft drawn in favor of "HiMedia Laboratories Pvt. Limited" payable at Mumbai crossed *Account Payee only.*

Payees responsibility to intimate bank as per postive pay or other system / law in force.

Unless specifically committed by us, full payments are to be made in advance against Proforma Invoice.

Taxes and Duties

The prices quoted here are exclusive of GST. Other taxes and levies if any applicable will be charged extra as and when applicable. In case states levies paid by Courier Service/ Transporter that amount along with taxes if any, has to be paid to the concerned Courier Service/ Transporter in cash, while taking delivery of the consignment.

Road/ Entry Permit

Road/ Entry Permit Form or any Form, wherever applicable should be sent along with each order. Orders sent without applicable Road/ Entry Permit Form or any Form will be held-up, until applicable Road/ Entry Permit is sent to us.

E-way Bill

E-way bill sent alongwith tax invoice wherever applicable at the time of dispatch of goods as per prevailing GST Law in force.

Dispatch/ Delivery

1. Dispatches will be made within 30 days from the date of receipt of firm and correct order.
2. Orders above Rs. 5000/- value will be supplied on F.O.R. **CUSTOMERS CITY/TOWN BASIS** by the company approved mode of transport upto the transporter's godown. Carrying the material from transporter's godown to customer's site will be customer's responsibility.

Damage or Loss in Transit

Materials are packed with utmost care under expert supervision. Our responsibility will cease after a consignment is accepted by the Transporters/ Courier/ Post Office in good condition and no responsibility is taken by the company for any damage or loss in transit. Customers should arrange for Transit Insurance themselves.

Discount

1. Unless otherwise quoted, listed prices mentioned in the Price List will be applied on the Tax Invoice.
2. Discount if any allowed, will be calculated on the list prices only.
3. Enquiries for bulk quantities are solicited from the Actual users and for which Special prices can be quoted.

Product Usage

1. Chemicals/ Reagents supplied by us are not to be considered as reference standards, unless wherever specified.
2. Our products are meant for Diagnostic and Laboratory purpose only unless wherever specified for industrial use. We do not undertake any responsibility if they are used for any other (including but not limited to, Medical, Food, Cosmetic or Pharmaceutical) applications.
3. User intending to use any of our medium listed in our published list for any specific purpose beyond the claim made in our COA / TD / Manual, such intent if not timely shared would obviate our liability in the matter. With such intent it is advisable to validate the medium and the test procedure in your own laboratory. HiMedia is your reliable partner to help in the process with relevance of the media used in testing validation.

Special Note

1. No liability is accepted for accidents arising in handling or use.
2. No responsibility shall be accepted for any incidental, consequential or special damages claimed of any sort implied from use or failure of the products supplied. The amount of damages claimed shall not in any event exceed the actual unit price of the product supplied.
3. No amendment or cancellation of order will be accepted once the goods are dispatched.
4. Subject to Thane / Mumbai, Maharashtra Jurisdiction.
5. **FORCE MAJEURE** - We shall not be responsible for any delay in delivery, or in the event of our inability to supply the material order to you in case of Acts of God or India's enemies, war revolution, embargo, riots, Lockdown, civil commotions or political disturbance, strikes, lockouts, stoppage of labour through any cause, go slow policy of labour, shortage of power, non-availability of essential raw material, etc. or any other cause beyond our control or that of our suppliers/ sub-contractors as the case may be, and such delay shall not entitle the customer either to cancel the order or claim compensation.

If any error is found through printing oversight or otherwise the final arbiter should be HiMedia in correcting the same.

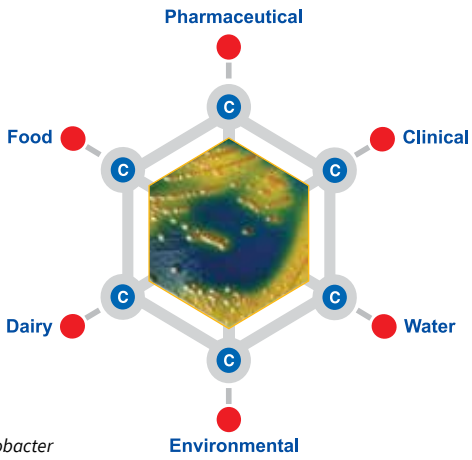
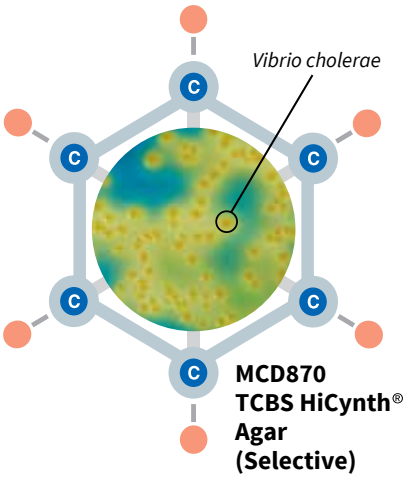
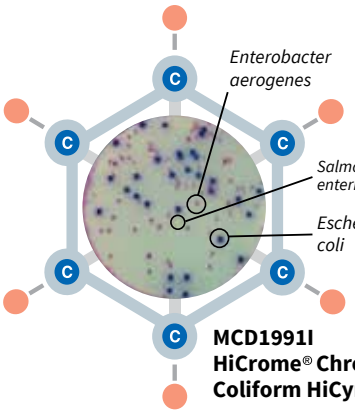
CHEMICALLY DEFINED MEDIA

What if your choice can mitigate the safety risks of animal and plant hydrolysates using defined chemical components and ensure consistency.

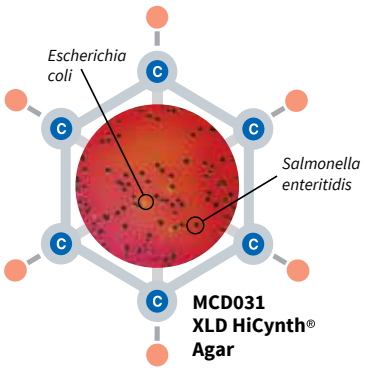




MCD870
TCBS HiCynth® Agar
(Selective)



MCD1991I
HiCrome® Chromogenic Coliform HiCynth® Agar



MCD031
XLD HiCynth® Agar

With newer challenges posed by regulatory bodies, the highly controlled Pharma and Biopharma industry direct their focus on the more defined chemical ingredients. The ***component variability*** in animal and plant hydrolysates can be overcome by the ***component consistency*** of synthetic ingredients. To meet the need of the hour, we have introduced HiCynth®, a complete range of Chemically Defined Microbiology Media.

HiCynth® MEDIA

- Free from Plant and Animal Derivatives
- No worry of KOSHER / HALAL
- Reduced Risk
- Improved Reproducibility
- Increased Consistency
- Comparable Productivity

Understanding Microbes

Lockable Plates

READY PREPARED MEDIA

- Highest level of quality performance
- Consistent quality
- Time and cost saving
- Economical

PREPARED PLATES

- Assured sterility by γ-irradiation sterilization process
- Sterile gamma irradiated, triple wrapped, water impermeable packaging
- Primary packing impermeable to H_2O_2
- Lockable plates available
- Barcoded Plates available

FACILITIES

- State-of-the-Art manufacturing facility
- WHO GMP Compliant Clean Zones
- Quality Management Systems ISO 9001:2015, ISO 13485:2016
- Production capacity 1,50,000 plates per day

Ready Prepared Media in Polystyrene Plates

- Ready to use sterile poured plates
- Saves preparation and sterilization time
- Wide range of media in prepared form, to cover needs of microbiologists and pathologists
- Ready to use prepared medium in 90 mm, 100 mm, 120 mm, 150 mm & 200 mm plates - pack of 5 plates
- If required any medium can be available in Triple pack and γ irradiated
- Customization of media available

Product	Code	Per Pack	Price in ₹
Anaerobic Agar (Brewer) Plate for the isolation and sensitivity testing of anaerobic and microaerophilic organisms and study of colonial morphology.	MP491-50PT	50plts	3545
***#Anaerobic Blood Agar Plate** for cultivation of anaerobic microorganisms including very fastidious organisms from clinical specimens.	MP975A-20PT MP975A-50PT	20plts 50plts	2060 4345
***#Anaerobic Blood Agar Plate w/ Neomycin** for isolation and cultivation of Group A and Group B Streptococci from throat cultures and other clinical samples.	MP1345-10PT MP1345-50PT	10plts 50plts	1030 4355
***Baird Parker Agar Plate** for the isolation and enumeration of coagulase positive Staphylococci from food and clinical sample.	MP043-20PT MP043-50PT	20plts 50plts	1775 3995
***Baird Parker Agar Plate (150mm plate)** ◆ for usage refer MP043	MP043CL-20PT	20plts	7660
***BCYE Agar Plate** for selective isolation and cultivation of *Legionella* species from cooling towers, clinical and other materials. The composition and performance criteria of this medium are as per the specifications laid down in ISO 11731:2017.	MP813I-50PT	50plts	3950
***BCYE Agar Plate w/ GVPC** for selective isolation and cultivation of *Legionella* species from cooling towers, water samples and other materials. The composition and performance criteria of this medium are as per the specifications laid down in ISO 11731-2017.	MP813IA-20PT MP813IA-50PT	20plts 50plts	2060 4645
***BCYE Selective Agar Plate** for selective isolation and cultivation of *Legionella*.	MP5383-10PT MP5383-50PT	10plts 50plts	910 3950
BHI Agar Plate MZ for cultivation of fastidious pathogenic bacteria, yeasts and moulds.	MP211-20PT MP211-50PT	20plts 50plts	1415 2865
***#BHI Agar Plate w/ Blood** for cultivation of fastidious pathogenic bacteria requiring blood for growth.	MP5380-10PT MP5380-50PT	10plts 50plts	1025 4625
***BHI Agar Plate w/ Vancomycin** for selective isolation of vancomycin resistant enterococci.	MP5381-10PT MP5381-50PT	10plts 50plts	845 3060

Product	Code	Per Pack	Price in ₹
***#BHI Blood Agar Plate w/ Vancomycin** for selective isolation of fastidious Vancomycin Resistant Enterococcus (VRE) species.	MP5382-10PT MP5382-50PT	10plts 50plts	1115 4675
Bile Esculin Agar Plate for differential isolation and presumptive identification of group D Streptococci in food and pharmaceutical products.	MP972-10PT MP972-50PT	10plts 50plts	910 4295
Bile Esculin Azide Agar Plate selective medium used for isolation and presumptive identification of faecal Streptococci.	MP493-50PT	50plts	3995
Bi.G.G.Y Agar Plate (Nickerson Agar Plate) for detection, selective isolation, differentiation and presumptive identification of *Candida albicans* and *Candida tropicalis*.	MP217-20PT MP217-50PT	20plts 50plts	1850 3880
***#Blood Agar Plate w/ Gentamicin (5mcg/plate)** for selective isolation of *Streptococcus pneumoniae*.	MP5304-20PT MP5304-50PT	20plts 50plts	1830 3835
***#Blood Agar Plate for Listeria** recommended for isolation and confirmation of *Listeria* species based on haemolysis and CAMP test from food samples. The composition and performance criteria of this medium are as per the specifications laid down in ISO 11290-2-2017(E).	MP2096I-20PT MP2096I-50PT	20plts 50plts	2140 4710
***#Bordet Gengou Agar Plate w/ 25% Sheep Blood** for detection and isolation of *Bordetella pertussis* and *Bordetella parapertussis*.	MP175SB-10PT MP175SB-50PT	10plts 50plts	1500 6875
***Brilliant Green Agar Modified Plate** for selective isolation of *Salmonellae* other than *Salmonella* Typhi from faeces, food, dairy products.	MP016-10PT MP016-50PT	10plts 50plts	885 3805
***Brucella Agar Plate** for selective isolation and cultivation of *Brucella* or *Campylobacter* species from clinical and non clinical specimens.	MP074-10PT MP074-50PT	10plts 50plts	1025 4315
***#Brucella Agar Plate with Hemin & Vitamin K1** used for the isolation and cultivation of *Brucella* species.	MP1039-20PT MP1039-50PT	20plts 50plts	2270 5095
***Burkholderia cepacia Agar Plate** for selective isolation of *Burkholderia cepacia* from clinical sample.	MP1640-20PT MP1640-50PT	20plts 50plts	2445 5325

Ready Prepared Media

Product	Code	Per Pack	Price in ₹
***Burkholderia cepacia Selective Agar Plate** for isolation of *Burkholderia cepacia* from the respiratory secretions of patients with cystic fibrosis and other non-clinical specimens in accordance with USP.	MP2089-20PT MP2089-50PT	20plts 50plts	2745 5775
C.L.E.D. Agar w/ Bromothymol Blue Plate for isolation and differentiation of urinary pathogens on the basis of lactose fermentation.	MP792-20PT MP792-50PT	20plts 50plts	1620 3655
***#CNA Agar Plate with 5% Sheep Blood** for selective isolation of pathogenic Gram positive cocci from clinical and non clinical specimens.	MP5208-50PT	50plts	3500
***#Campylobacter Agar Plate** for selective isolation of *Campylobacter* species from faecal specimens, food and environmental specimens.	MP994-20PT MP994-50PT	20plts 50plts	2270 5095
Candida Selective Agar Plate recommended for the selective isolation of *Candida* species (appears as white coloured) from clinical samples.	MP5477-20PT MP5477-50PT	20plts 50plts	2415 5285
Cetrimide Agar Plate for selective isolation of *Pseudomonas aeruginosa* from clinical specimens.	MP024-20PT MP024-50PT	20plts 50plts	1695 3805
Cetrimide Agar Plate for the selection and subculture of *Pseudomonas aeruginosa* in accordance with the harmonized method of USP/EP/BP/JP/IP.	MPH024-20PT MPH024-50PT	20plts 50plts	1775 3995
Cetrimide Agar Plate (Triple Pack) for usage refer MPH024	MPH024T-20PT	20plts	1830
Cetrimide Agar Plate (γ-irradiated, Triple pack) for usage refer MPH024	MPH024GT-20PT MPH024GT-50PT	20plts 50plts	1865 4390
***Chocolate Agar Plate** for isolation of *Neisseria gonorrhoeae* from chronic and acute cases of gonococcal infections.	MP103-20PT MP103-50PT	20plts 50plts	2225 4895
***Citrate Azide Tween Carbonate Agar Plate** recommended for the identification of Enterococci in meat, meat products, dairy products and other foodstuffs.	MP1618-20PT MP1618-50PT	20plts 50plts	1960 4310
***Chocolate Agar Plate w/ Bacitracin** for selective isolation of *Neisseria gonorrhoeae* from chronic and acute cases of gonococcal infections.	MP5333-50PT	50plts	4965
Columbia Agar Plate for the selection and subculture of *Clostridium sporogenes* in accordance with the harmonized method of USP/EP/BP/JP/IP.	MPH144-20PT MPH144-50PT	20plts 50plts	1775 3995
Columbia Agar Plate (γ-irradiated, Triple pack) for usage refer MPH144	MPH144GT-20PT MPH144GT-50PT	20plts 50plts	1865 4390
***#Columbia 5% Sheep Blood Agar Plate** for isolation and cultivation of fastidious organisms.	MP144-20PT MP144-50PT	20plts 50plts	2060 4640
Crystal Violet, Neutral Red, Bile Agar with Glucose for detection and enumeration of *Enterobacteriaeceae* in accordance with BP	MP1684B-50PT	50plts	3995

Product	Code	Per Pack	Price in ₹
D.C.L.S. Agar a selective medium used to detect and isolate *Salmonella* and *Shigella* species. Also useful for isolation of *Vibrio cholerae*.	MP160-10PT MP160-50PT	10plts 50plts	965 3805
***DNase Test Agar Plate w/ Methyl green** for detection of deoxyribonuclease activity of bacteria and fungi and especially for identification of pathogenic Staphylococci.	MP1419-10PT	10plts	3125
***DNase Test Agar Plate w/ Toluidine Blue** for detection of deoxyribonuclease activity of microorganisms.	MP1041-10PT	10plts	2765
***D.T.M Agar Plate** for selective isolation of dermatophytes.	MP188-10PT MP188-50PT	10plts 50plts	965 3805
Deoxycholate Citrate Agar Plate selective medium for the isolation of enteric pathogens particularly *Salmonella* and *Shigella* species.	MP065-10PT MP065-50PT	10plts 50plts	910 3735
❖Dey Engley Neutralizing Agar Plate in disinfectant testing where neutralization of the chemical is important for determining its bactericidal activity.	MP186-50PT	50plts	3805
❖Dey Engley Neutralizing Agar Plate (γ-irradiated, Triple Pack) for usage refer MP186	MP186GT-50PT	50plts	4385
Dichloran Rose Bengal Chloramphenicol (DRBC) Agar Plate (100mm plate) for selective isolation of fungi-yeasts and moulds of significance in food spoilage. The composition and performance criteria are in accordance with ISO 21527-1:2008.	MP1881C-20PT MP1881C-50PT	20plts 50plts	1870 4190
EMB Agar Plate for differential isolation of Gram-negative enteric bacilli from clinical and non clinical specimens.	MP317-20PT MP317-50PT	20plts 50plts	2115 4760
EMB Agar, Levine Plate for isolation, enumeration and differentiation of members of *Enterobacteriaceae*.	MP022-20PT MP022-50PT	20plts 50plts	2115 4760
***Endo Agar Plate** for the confirmation of the presumptive test for members of the coliform group.	MP029-20PT	20plts	1775
Environmental Testing Agar Plate recommended for the monitoring of environmental samples.	MP5414-20PT MP5414-50PT	20plts 50plts	2270 5035
***#Fastidious Anaerobic Agar Plate (FAA) w/ 5% Horse blood** New recommended for growth of fastidious anaerobic microorganisms.	MP2192HB-20PT MP2192HB-50PT	20plts 50plts	3950 8890
***#GBS Agar Plate** for rapid detection of group B Streptococci from clinical specimens.	MP5384-10PT MP5384-50PT	10plts 50plts	930 3905
***GC Agar Plate** for selective isolation and cultivation of Gonococci.	MP434-20PT MP434-50PT	20plts 50plts	1875 4125
***G.Vaginalis Selective Agar Plate** for qualitative isolation and differentiation of *Gardnerella vaginalis* from clinical specimens.	MP1057-10PT MP1057-50PT	10plts 50plts	1185 4820
***#Haemophilus Test Agar Plate** for the susceptibility testing of *Haemophilus influenzae*.	MP1259-10PT	10plts	1065

On receipt, all the above products to be stored between 20-30°C
* On receipt, all the above products to be stored between 2-8°C
# Due to short shelf life this product will be directly supplied to the customer
❖ This plates are trademarked as EM-CULT® and can be used for environmental monitoring

Product	Code	Per Pack	Price in ₹
Hektoen Enteric Agar Plate for differential and selective isolation of *Salmonella* and *Shigella* species from enteric pathological specimens.	MP467-10PT MP467-50PT	10plts 50plts	965 3805
***#Helicobacter pylori Selective Agar Plate** for detection of *Helicobacter pylori* in clinical specimens.	MP5390-10PT MP5390-50PT	10plts 50plts	1335 5465
***HiCrome® Bacillus Agar Plate** for isolation and differentiation between various species of *Bacillus* from a mixed culture.	MP1651-20PT MP1651-50PT	20plts 50plts	2560 6040
***HiCrome® Candida Differential Agar Plate** for rapid isolation and identification of *Candida* species from mixed cultures.	MP1297A-20PT MP1297A-50PT	20plts 50plts	2445 5325
***HiCrome® Chromogenic Coliform Agar Plate (CCA Plate)** for detection of *Escherichia coli* and coliforms in water samples. The composition and performance criteria of this medium are as per the specifications laid down in ISO 9308-1:2014.	MP1991I-20PT MP1991I-50PT	20plts 50plts	2330 5230
***HiCrome® Coliform Agar Plate, Modified** recommended for the simultaneous detection of *Escherichia coli* and total coliforms in water and food samples.	MP1832-20PT MP1832-50PT	20plts 50plts	2085 4640
***HiCrome® E.coli Agar Plate** for the detection and enumeration of *Escherichia coli* in foods without further confirmation on membrane filtration or by indole reagent.	MP1295-20PT MP1295-50PT	20plts 50plts	2195 4615
***HiCrome® E. coli Agar Plate** for the detection and enumeration of *Escherichia coli* in food without further confirmation on membrane filtration or by indole reagent. The composition and performance criteria of this medium are as per the specifications laid down in ISO 16649-1:2018.	MP1295I-20PT MP1295I-50PT	20plts 50plts	2445 5370
***HiCrome® ECO157 : H7 Selective Agar Plate, Modified** for selective isolation and easy detection of *Escherichia coli* O157 : H7 from food samples.	MP1575A-10PT MP1575A-50PT	10plts 50plts	1255 5320
***HiCrome® ESBL Agar Plate** for the detection of Extended Spectrum β-Lactamase-producing organisms from clinical & environmental samples.	MP1829-10PT MP1829-50PT	10plts 50plts	1400 5870
***HiCrome® KPC Agar Plate** for detection of Gram-negative bacteria with a reduced susceptibility to carbapenem agents from clinical samples.	MP1831-20PT MP1831-50PT	20plts 50plts	2445 5870
***HiCrome® Listeria Agar Plate** for rapid and direct identification of Listeria species in accordance with FDA BAM, 2022.	MP1417F-50PT	50plts	5230
***HiCrome® Listeria Ottaviani Agosti Agar Plate** recommended for the selective and differential isolation of *Listeria monocytogenes*. The composition and performance criteria of this media is as per the specification laid down in ISO 11290-1:2017 and ISO 11290-2:2017.	MP1540I-20PT	20plts	6000
***HiCrome® MDR Acinetobacter Agar Plate** for selective isolation of resistant *Acinetobacter* species from environmental and clinical samples.	MP1938-50PT	50plts	7950

Product	Code	Per Pack	Price in ₹
***HiCrome® MeReSa Agar Plate** for isolation and selective identification of Methicillin Resistant *Staphylococcus aureus* (MRSA) from clinical specimens.	MP1674-20PT MP1674-50PT	20plts 50plts	2445 5325
***HiCrome® Rapid MRSA Agar Plate** for rapid isolation and identification of Methicillin Resistant *Staphylococcus aureus* (MRSA) from clinical specimens.	MP1974-20PT MP1974-50PT	20plts 50plts	2560 5760
***HiCrome® Salmonella Agar Plate** for the isolation and differentiation of *Salmonella* species from coliforms by chromogenic method.	MP1296-10PT MP1296-50PT	10plts 50plts	1890 7950
***HiCrome® Staph Agar Plate, Modified** selective medium for the isolation and enumeration of *Staphylococcus aureus*.	MP1837-20PT MP1837-50PT	20plts 50plts	2465 5485
***HiCrome® Strep B Selective Agar Plate** for selective isolation of Group B streptococci from clinical sample.	MP1966-10PT MP1966-50PT	10plts 50plts	1350 5700
***HiCrome® UTI Agar Plate** for presumptive identification of microorganisms mainly causing urinary tract infections.	MP1353-20PT MP1353-50PT	20plts 50plts	2225 4840
***HiCrome® Universal Agar Plate** for presumptive identification of microorganisms from clinical & non clinical specimens.	MP1600-20PT	20plts	2445
***HiCrome® VRE Agar Plate** for selective isolation and differentiation of Vancomycin Resistant *Enterococcus faecalis* and *Enterococcus faecium* from clinical samples.	MP1925-10PT MP1925-50PT	10plts 50plts	1160 4840
HiCrome® Yersinia Agar Plate New recommended for detection and isolation of pathogenic *Yersinia* enterocolitica from clinical specimens and food samples.	MP2025-20PT MP2025-50PT	20plts 50plts	3200 6720
***Hoyles Media Plate with supplements** for selective isolation and differentiation of *Corynebacterium diphtheria* types.	MP015-50PT	50plts	3805
Lead Acetate Agar Plate for detection of hydrogen sulphide producing enteric bacteria.	MP180-20PT	20plts	1795
Luria Bertani Agar Plate for the cultivation and maintenance of recombinant strains of *E.coli* for genetic and molecular studies; may be used for routine isolation, cultivation of not particularly fastidious microorganisms.	MP1151-20PT MP1151-50PT	20plts 50plts	1695 3805
***Luria Bertani Agar Plate w/100µg/ml Ampicillin** for the cultivation and maintenance of recombinant strains of *E.coli* for genetic and molecular biology studies.	MP1151A-20PT MP1151A-50PT	20plts 50plts	1780 4270
Luria Bertani Agar Plate w/50µg/ml Chloramphenicol ◆ for usage refer MP1151A	MP1151CH-20PT MP1151CH-50PT	20plts 50plts	1765 4225
***Luria Bertani Agar Plate w/ IPTG** for usage refer MP1151A	MP1151I-20PT MP1151I-50PT	20plts 50plts	1875 4500

MZ Ready Prepared Media for microbiome research studies

Product	Code	Per Pack	Price in ₹
Mueller Hinton Agar No. 2 Plate MZ for testing susceptibility of common and rapidly growing bacteria using antimicrobial discs by the Kirby-Bauer Method.	MP1084-20PT MP1084-50PT	20plts 50plts	1530 3170
Mueller Hinton Agar Plate w/ 2% Glucose recommended for performing Antifungal Disk Diffusion Susceptibility of yeasts.	MP1825-50PT	50plts	3215
Mueller Hinton Agar Plate w/ 2% NaCl recommended for determination of susceptibility of oxacillin against *Staphylococcus* species from clinical samples.	MP5389-10PT MP5389-50PT	10plts 50plts	845 3515
***#Mueller Hinton Agar Plate w/ 5% Sheep Blood** MZ for determination of susceptibility of *Streptococcus* species to antimicrobial agents.	MP1806-20PT MP1806-50PT	20plts 50plts	1830 3865
***#Mueller Hinton Agar Plate w/ 5% Sheep Blood (150mm plate)** recommended for determination of susceptibility of *Streptococcus* species to antimicrobial agents.	MP1806CL-50PT	50plts	6355
***Mueller Tellurite Agar Plate** recommended for isolation, cultivation and differentiation of *Corynebacterium diphtheriae*.	MP1202-50PT	50plts	3995
Nutrient Agar Plate MZ a general purpose medium used for cultivation of wide variety of microorganisms.	MP001-20PT MP001-50PT	20plts 50plts	1435 2905
Nutrient Agar (γ-irradiated, Triple pack) MZ for usage refer MP001	MP001GT-20PT MP001GT-50PT	20plts 50plts	1685 3525
Nutrient Agar Plate (150mm plate) ◆ for usage refer MP001	MP001CL-20PT	20plts	2565
***OFBL Agar Plate (Oxidation Fermentation Polymyxin Bacitracin Lactose Agar Plate)** recommended for the selective isolation of *Burkholderia cepacia* from clinical specimens as well as non-clinical samples.	MP1811-20PT MP1811-50PT	20plts 50plts	1870 4010
***Oxytetracycline Glucose Yeast Agar Plate** for selective isolation and enumeration of yeasts and moulds in food.	MP639-50PT	50plts	4005
***Perfringens Agar Plate** for selective isolation and enumeration of *Clostridium perfringens* in food.	MP579-50PT	50plts	3765
***#Phenyl Blood Agar Plate w/ 5% Sheep Blood** used for cultivation of fastidious anaerobic bacteria.	MP540-20PT MP540-50PT	20plts 50plts	2140 4390
Plate Count Agar Plate for determination of plate counts of microorganisms in foods, water and waste water.	MP091-20PT MP091-50PT	20plts 50plts	1415 2865
Plate Count Agar Plate (γ-irradiated, Triple pack) for usage refer MP091	MP091GT-20PT MP091GT-50PT	20plts 50plts	1500 3255

Product	Code	Per Pack	Price in ₹
Plate Count Agar Plates w/ 0.15% TTC New for total bacterial detection and enumeration with added growth indicator.	MP5601-20PT MP5601-50PT	20plts 50plts	1510 3115
Potato Dextrose Agar Plate for the subculture of fungi in accordance with the harmonized method of USP/EP/BP/JP.	MPH096-20PT MPH096-50PT	20plts 50plts	1485 2995
Potato Dextrose Agar Plate for isolation and enumeration of yeasts and moulds from dairy and other food products.	MP096-20PT MP096-50PT	20plts 50plts	1415 2865
***Potato Dextrose Agar Plate w/ Tetracycline and Chloramphenicol** for selective cultivation of yeasts and moulds.	MP5431-50PT	50plts	3990
Pseudomonas Fluorescein Agar Plate for detection of fluorescein production by *Pseudomonas* species.	MP120-20PT MP120-50PT	20plts 50plts	1415 2865
Pseudomonas Isolation Agar Plate for selective isolation and identification of *Pseudomonas aeruginosa* from clinical and non clinical specimens.	MP406-10PT MP406-50PT	10plts 50plts	685 2865
Pseudomonas Pyocyanin Agar Plate for detection of pyocyanin production by *Pseudomonas* species.	MP119-50PT	50plts	2865
R-2A Agar Plate for heterotrophic plate count of treated potable water, using longer incubation period.	MP962-20PT MP962-50PT	20plts 50plts	1695 3805
R-2A Agar Plate (γ-irradiated, Triple Pack) for usage refer MP962	MP962GT-20PT MP962GT-50PT	20plts 50plts	1880 4230
R2A Agar Plate, Modified New recommended for the enumeration and cultivation of bacteria from potable water.	MP1743-20PT MP1743-50PT	20plts 50plts	1700 3825
R2A Agar Plate, Modified (γ-irradiated, Triple Pack) New recommended for the enumeration and cultivation of bacteria from potable water.	MP1743GT-20PT MP1743GT-50PT	20plts 50plts	2025 4540
***Reinforced Clostridial Agar Plate** for the cultivation and enumeration of Clostridia and other anaerobes.	MP154-20PT MP154-50PT	20plts 50plts	1930 4040
Rose Bengal Chloramphenicol Agar Plate for selective isolation and enumeration of yeasts and moulds from foods and environmental materials.	MP640-20PT MP640-50PT	20plts 50plts	1695 3805
❖SCDA Plate w/ sodium pyruvate, yeast extract & LTHTh (γ-irradiated, Triple pack) for determining efficiency of sanitization of containers, equipment surfaces, water miscible cosmetics etc. It can also be used to enumerate the organisms from water insoluble products & fatty products containing preservatives or antimicrobials.	MP2112GT-20PT MP2112GT-50PT	20plts 50plts	2740 6175

HiCFU Counter™ C LA1143

Revolutionizing Colony Counting – Fast, Accurate & Automated!

Introducing the HiCFU Counter™ C LA1143

The next-generation automated system for rapid & precise CFU (Colony Forming Unit) determination on agar plates.

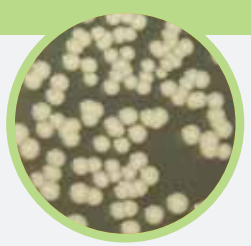
Why Choose HiCFU Counter™ C?

- Automated & High Precision – Eliminates manual counting errors
- Time-Saving & Efficient – Delivers quick & accurate results
- Wide Industry Applications – Ideal for Pharma, Food, Water, Dairy, and Research
- Cost-Effective – Reduces labor costs while increasing reliability
- Essential for Growth Promotion Test (GPT) – Ensures accurate CFU determination in microbiological studies

Upgrade to Automation Today!

- Eliminate manual errors & enhance efficiency
- Improve lab productivity with cutting-edge technology
- Get precise results with minimal effort

Book a Demo & Experience the Difference!



Join the Future of Microbiological Analysis with HiCFU Counter™ C!

On receipt, all the above products to be stored between 20-30°C

Ready Prepared Media in 55 mm Surface Monitoring Plates

55mm Equivalent to RODAC Plate
For Environmental Sampling (Triple Pack, γ irradiated)

Scored Prepared Plates Also available Triple pack, γ irradiated

- 55 mm Scored Polystyrene Petri plate equivalent to RODAC Plate
- Scored Polystyrene Petri plates (Triple Pack, γ irradiated)
- For Environmental Sampling, sterility testing etc.,
- Grid molded for easy colony counting

Ready Prepared Media in Polystyrene Plates with β Lactamase

Ready prepared β-lactamase plates

- Sterile ready to use agar plates w/ β Lactamase available in 90mm plates & 55mm Scored Plates
- The beta lactamases can efficiently inactivate a range of antibiotics as per their activity, thus finding applications such as,
  1. Inactivation of Penicillin, Cephalosporin of first, second, third & fourth generation and give true bioburden count during environmental studies.
  2. Environmental studies in facilities where presence of Beta lactam antibiotics is suspected.

Ready Prepared Media in Polystyrene BiPlates

- Unique combination of two media on a single biplate
- Ready to use sterile poured biplates
- Saves preparation and sterilization time
- Wide range of media in prepared form to cater to the needs of microbiologists and pathologists
- If required any medium can be made available in different combinations as per users convenience

DriFilter™ Membrane Nutrient Pad Media

- For testing Water, Brewery, Dairy, Food, Pharmaceutical and Cosmetic products
- Sterile ready prepared medium absorbed and dried on 50 mm filter pads
- Wide range of media nutrient pads to cover water and fluids testing
- Reduces time and labour of media preparation and easy to handle
- Rehydrate with sterile distilled water, place membrane filter used for filtration of sample on nutrient pad and incubate
- Interpretation of results directly by counting the CFUs, also quantitates the microbial load present

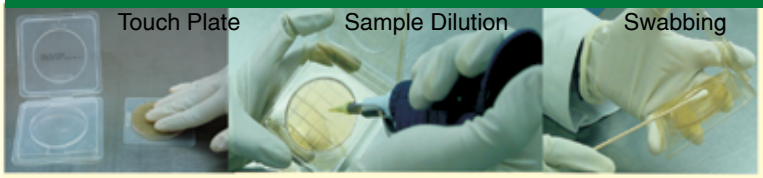
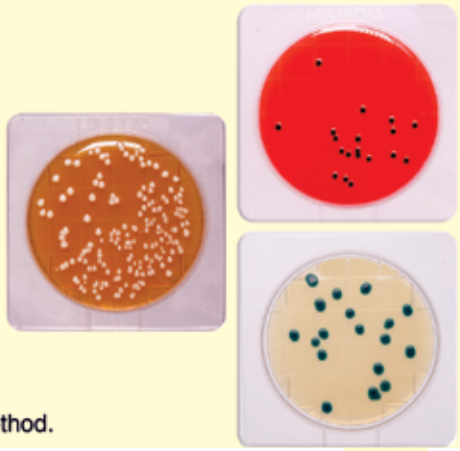
HiTouch® Flexi Plate® series





- Available in 55mm plate size
- Wide range of Flexi plates available for coliforms, Staphylococci, *Pseudomonas, Salmonella*, lactic acid bacteria, yeasts and moulds.
- Saves media preparation and sterilization time.
- Easy for direct enumeration, determines exact count of microorganisms.
- Occupies less storage space.
- No additional addition of reagent required.
- Multifunctional use for contact method, sample dilution and moistened swab method.

Product	Code	Per Pack	Price in ₹ #
HiTouch® Aerobic Count *Flexi* Plate® for enumeration (count) of aerobic microorganisms.	FL001-50PT#	50plts	4280
HiTouch® E.coli/Coliform Count *Flexi* Plate® for enumeration (count) of all coliforms along with differential count of *E.coli*.	FL002-50PT#	50plts	5380
HiTouch® Coliform Count *Flexi* Plate® for enumeration (count) of coliform bacteria.	FL003-50PT#	50plts	4455
HiTouch® High Sensitivity Coliform Count *Flexi* Plate® for enumeration (count) of coliform bacteria.	FL004-50PT#	50plts	4455
HiTouch® Rapid Coliform Count *Flexi* Plate® for enumeration (count) of coliform bacteria.	FL005-50PT#	50plts	4620
HiTouch® Yeast and Mould Count *Flexi* Plate® for enumeration (count) of yeast and mould (fungal) population.	FL006-50PT#	50plts	4555
HiTouch® Rapid S. aureus Count *Flexi* Plate® for enumeration (count) of *S. aureus*.	FL007-50PT#	50plts	5895
HiTouch® Lactic Acid Count *Flexi* Plate® for enumeration (count) of lactic acid bacteria.	FL008-50PT#	50plts	4620
HiTouch® Enviromental Testing Flexi Plate® for enumeration (count) of environmental organisms.	FL009-50PT#	50plts	6175

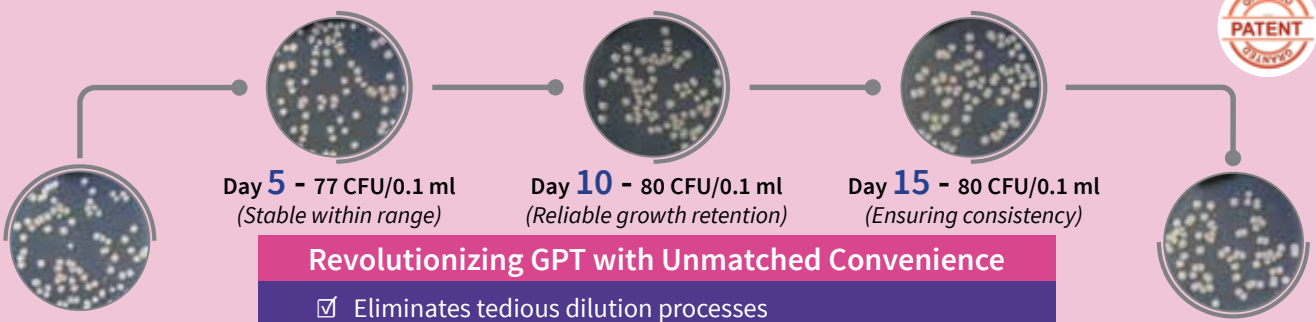
Rehydration Fluid for GPT (Bacteria) – LQ254IX

AQUINO® REHYDROL-B

- **Ensuring Stability & Accuracy for Up to 20 Days**
- **Consistent & ReliableBacterial Growth Over Time**

PATENT GRANTED



Day 0 - Initial count: **82 CFU/0.1 ml** *(Range: 41-164 CFU/0.1 ml)*

Day 5 - 77 CFU/0.1 ml *(Stable within range)*

Day 10 - 80 CFU/0.1 ml *(Reliable growth retention)*

Day 15 - 80 CFU/0.1 ml *(Ensuring consistency)*

Day 20 - 75 CFU/0.1 ml *(Proven long-term viability)*

Revolutionizing GPT with Unmatched Convenience

- ☑ Eliminates tedious dilution processes
- ☑ Reduces preparation time for inoculum
- ☑ Maintains microbial stability for up to 20 days
- ☑ Cost-effective alternative to commercial CFU preparations
- ☑ Also available: Aquino® Rehydrol F for fungal applications

Experience freedom from time-consuming GPT workflows. Choose LQ254IX for effortless, accurate, and reliable growth promotion testing!

On receipt all the above products to be stored between 2-8°C.
*On receipt all the above products to be stored between 15-30°C.

#Friss Liquid Medium New recommended for the detection of non-avian *Mycoplasma* in pharmaceutical products in accordance with European pharmacopoeia.	LQ587IX-25X9ML LQ587IX-50X9ML	25X9ml 50X9ml	12070 22960
Gelatin Liquefication recommended for determining gelatin liquefaction.	*LQ300X-25x10ML *LQ300X-50X10ML	25X10ml 50X10ml	2375 3895
Hugh Leifson Medium recommended for detecting aerobic and anaerobic breakdown of glucose.	*LQ296X-25X10ML *LQ296X-50X10ML	25X10ml 50X10ml	1780 2850
Indole Nitrate Broth for identification of microorganisms by means of nitrate reduction and indole production.	LQ081-25X5ML	25X5ml	1035
Iron Reducing Broth New for the isolation of iron reducing bacteria (Available in crimp packing)	LQ590XV-25X10ML LQ590XV-50X10ML	25X10ml 50X10ml	1880 3195
#Kirchner Medium Base for cultivation of *Mycobacterium tuberculosis* Poctri supplement (Containing Polymyxin B, Amphotericin B, Carbenicillin & Trimethoprim for LQ105).	LQ105-25X4ML FD241-5VL	25X4ml 5vl	1035 625
Koser's Citrate Medium to differentiate *Escherichia coli* and *Klebsiella aerogenes* on the basis of citrate utilization.	LQ091-25X5ML	25X5ml	1035
Letheen Broth recommended for screening cosmetic products for microbial contamination	*LQ108IX-25X9ML *LQ108IX-50X9ML	25X9ml 50X9ml	1685 2700
Luria Bertani Broth for the cultivation and maintenance of recombinant strains of *Escherichia coli* and may be used for routine cultivation of not particularly fastidious microorganisms.	LQ118-25X10ML LQ118-50X10ML	25X10ml 50X10ml	1150 1865
⦿Luria Bertani HiVeg® Broth for the cultivation and maintenance of recombinant strains of *Escherichia coli* and may be used for routine cultivation of not particularly fastidious microorganisms.	LQ127-50X10ML⦿	50X10ml	2080
#Lysine-Ornithine -Arginine Kit for differentiation of bacteria based on their ability to decarboxylate amino acids. One Kit contains 24 tubes (8 tubes each of **LQ015**- Moeller Decarboxylase Broth w/ Ornithine HCl; **LQ016**- Moeller Decarboxylase Broth w/ Lysine HCl; **LQ017**- Moeller Decarboxylase Broth w/ Arginine HCl).	K093-1KT	1kit	1140
M10 Medium (Motility Indole Ornithine Medium) recommended for the identification of *Enterobacteriaceae* on the basis of motility, indole production and ornithine decarboxylase activity.	*LQ295V-25x5ML	25x5ml	1320

*For customer's convenience, suffix has been added to the different packings of one code
All the above products to be stored between 15-30°C.
On receipt, all the above products to be stored between 2-8°C
⦿The animal based peptones in this medium have been fully replaced by TSE/BSE and GMO free Vegetable peptones

Product	Code	Per Pack	Price in ₹
M-Broth for detecting *Salmonella* in food and feeds by the accelerated enrichment serology procedures.	*LQ216X-25X10ML	25X10ml	1055
#MIU Medium for detection of motility, urease and indole production.	LQ092-25X10ML LQ092-50X10ML	25X10ml 50X10ml	1525 2470
MR-VP Broth (Glucose Phosphate Broth) for performance of Methyl Red and Voges Proskauer tests in differentiation of coli-aerogenes group.	LQ082-25X5ML LQ082-50X5ML	25X5ml 50X5ml	1035 1655
MacConkey Broth for the selective enrichment of *Escherichia coli* in accordance with harmonized methods of USP, EP, BP & JP.	LQ115-50X10ML	50X10ml	2720
Mannitol Salt Broth for selective enrichment of presumptive pathogenic Staphylococci.	*LQ181V-25X5ML *LQ181V-50X5ML	25X5ml 50X5ml	1210 1935
#Mannitol Selenite Broth for selective enrichment of Salmonellae from clinical specimens.	LQ146-50X10ML	50X10ml	2805
Medium 11. GN Broth recommended for the enrichment of *Shigella* from pharmaceutical products in accordance with IP 2018.	LQ151-50X10ML	50X10ml	3595
#Middlebrook 7H9 Broth w/ Glycerol for cultivation and sensitivity testing of *Mycobacterium tuberculosis*.	*LQ372X-50X10ML	50X10ml	5690
Modified Postgate Medium B for enumeration of Sulphate Reducing bacteria in water samples. (Available in crimp vial packing)	*LQ369X-25X10ML *LQ369X-50X10ML	25X10ml 50X10ml	1700 2720
Modified Soyabean Casein Digest Medium w/ BTB designed to be utilized in conjunction with BIS containing *Bacillus atrophaeus* to monitor Ethylene Oxide (EWO), Dry Heat, Vaporized Hydrogen Peroxide (VH_2O_2), Chlorine Dioxide (ClO_2) processes.	LQ201-25X4ML LQ201-50X4ML	25X4ml 50X4ml	1510 2880
Modified Soyabean Casein Digest Medium w/ BCP designed to be utilized in conjunction with BIS containing *Bacillus stearothermophilus* to monitor steam at 121°C to 134°C, Vaporized Hydrogen Peroxide (VH_2O_2), Chlorine Dioxide (ClO_2) processes, Chemiclave and Formaldehyde processes.	LQ202-25X4ML LQ202-50X4ML	25X4ml 50X4ml	1510 2880
#Moeller Decarboxylase Broth w/ Arginine Hydrochloride for differentiation of bacteria on the basis of their ability to decarboxylate L-Arginine hydrochloride.	LQ017-50X5ML	50X5ml	1620
#Moeller Decarboxylase Broth w/ Lysine Hydrochloride for differentiation of bacteria on the basis of their ability to decarboxylate L-Lysine hydrochloride.	LQ016-25X5ML LQ016-50X5ML	25X5ml 50X5ml	1020 1620
#Moeller Decarboxylase Broth w/ Ornithine Hydrochloride for differentiation of bacteria on the basis of their ability to decarboxylate L-Ornithine hydrochloride.	LQ015-25X5ML LQ015-50X5ML	25X5ml 50X5ml	1020 1620

Product	Code	Per Pack	Price in ₹
Mueller Hinton Broth to determine the susceptibility of bacteria to sulphonamides by the tube dilution method.	*LQ182V-25X5ML *LQ182V-50X5ML	25X5ml 50X5ml	1110 1785
7.5% NaCl, Sterile recommended for the enrichment of halophilic organisms.	*LQ548X-50X10ML	50X10ml	2745
1 N HCL, sterile recommended as a solvent.	*LQ334X-25X10ML	25X10ml	730
1 N NaOH, sterile recommended as a solvent.	*LQ335X-25X10ML	25X10ml	1000
Nitrate Broth for detection of nitrate reduction by bacteria.	LQ083-25X5ML LQ083-50X5ML	25X5ml 50X5ml	1035 1655
Nutrient Broth for general cultivation of less fastidious microorganisms.	LQ071-25X5ML LQ071-50X5ML	25X5ml 50X5ml	1035 1655
#OF Medium w/ Dextrose for differentiation of Gram-negative bacteria on the basis of fermentative and oxidative metabolism of Dextrose.	LQ018-25X5ML LQ018-50X5ML	25X5ml 50X5ml	1035 1655
0.1% Peptone used as a growth medium and as a base for carbohydrate fermentation media.	*LQ172X-25X10ML *LQ172X-50X10ML *LQ172X3-10X30ML	25X10ml 50X10ml 10X30ml	1475 2445 1185
Peptone Water all purpose growth medium and as a base for carbohydrate fermentation media.	LQ089-25X5ML LQ089-50X5ML *LQ089X-25X10ML *LQ089X-50X10ML	25X5ml 50X5ml 25X10ml 50X10ml	1035 1655 1245 2115
#Phenol Red Broth Base as a base for carbohydrate fermentation reaction study of pure cultures of microorganisms.	LQ173-25X5ML LQ173-50X5ML	25X5ml 50X5ml	1035 1655
Phenol Red Dextrose Broth, pH 7.00 (AFB Media) for Dextrose fermentation studies of acid producing bacteria. (Available in crimp vial packing)	*LQ370X-25X10ML *LQ370X-50X10ML	25X10ml 50X10ml	1505 2410
Phosphate Buffer pH 7.0 used as a diluent as recommended by United States Pharmacopoeia.	LQ164-25X9ML LQ164-50X9ML	25X9ml 50X9ml	1615 2610
Phosphate Buffer pH 7.2 used as a diluent as recommended by FDA BAM.	LQ165-25X9ML LQ165-50X9ML	25X9ml 50X9ml	1615 2610
Phosphate Buffer, pH 7.2 with glass beads for usage refer LQ165.	*LQ165B-50X9ML	50X9ml	2715
Phosphate Buffer, pH 7.2 (1:800 Dilution) used as a diluent as recommended by FDA BAM and USP.	*LQ379IX-25X9ML *LQ379IX-50X9ML	25X9ml 50X9ml	1615 2610

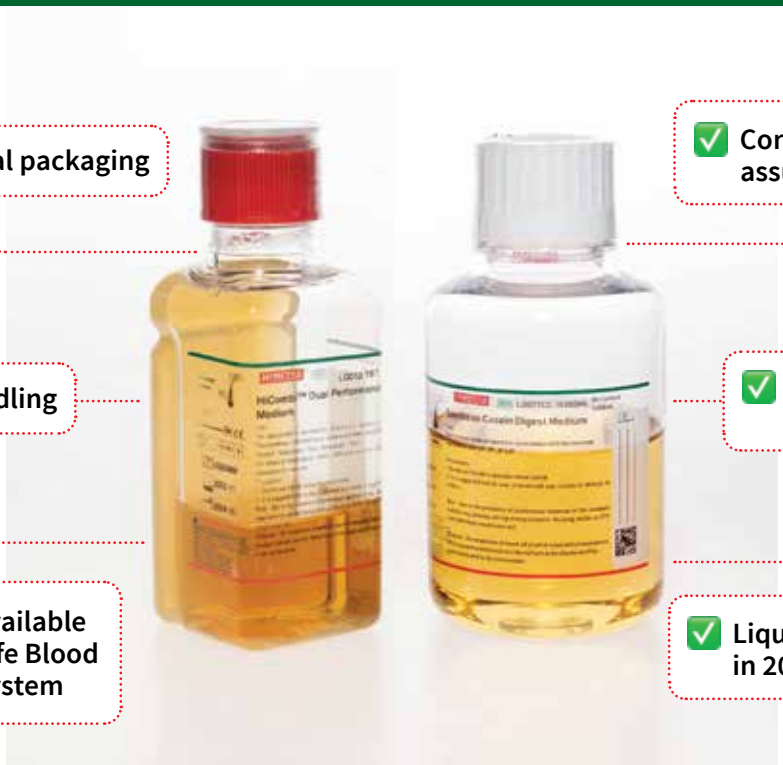
Liquid media in
Polycarbonate Bottles

- ✅ Lighter final packaging
- ✅ Consistent quality assured
- ✅ Convenient handling
- ✅ Customizable media options available
- ✅ Currently available for the HiSafe Blood Culturing System
- ✅ Liquid media available in 200 mL bottles



*For customer's convenience, suffix has been added to the different packings of one code
All the above products to be stored between 15-30°C.
On receipt, all the above products to be stored between 2-8°C

Ready Prepared Liquid Medium in Glass Bottles

- **Ready prepared liquid medium in glass bottles available for general cultivation**
- **Sterility test media also available for easy detection of aerobes, anaerobes and fungi**
- **Medium available for Microbial Limit test in accordance with harmonized methods of USP/EP/BP/JP/IP**

Eugonic LT100 Broth for cultivation of fastidious organisms.	*LQ208L-5X50ML	5X50ml	2225
	*LQ208CCL-5X250ML	5X250ml	9200
Fluid Thioglycollate Medium w/ 0.5% Soya Lecithin and 4% Tween 20 recommended as sterility test medium also used for cultivation of wide variety of microorganisms and for determining efficiency of sanitization of containers, equipment surfaces, water miscible cosmetics etc.	*LQ288C3S-5X300ML	5X300ml	5585
Fluid Thioglycollate Medium w 0.5% Soya Lecithin & 4% Tween 80 sterility test medium for determining efficiency of sanitization of containers, equipment surfaces, water miscible cosmetics etc.	*LQ270C3-5X300ML	5X300ml	5655
	*LQ270CD-5X400ML	5X400ml	6360

Product	Code	Per Pack	Price in ₹
Fluid Thioglycollate Medium w/ 1% Tween 80 recommended for sterility testing of biologics and for cultivation of aerobes, anaerobes and microaerophiles.	*LQ281C-10X100ML	10X100ml	2890
Fluid thioglycolate Medium w/ 3% Polysorbate 80 New recommended for sterility testing of biologics and for cultivation of aerobes, anaerobes and microaerophiles.	LQ387CD-5X400ML	5X400ml	5800
Fluid Thioglycollate Medium w/0.5% Tween 80 and 0.5% Soya Lecithin sterility test medium also used for cultivation of wide variety of microorganisms and for determining efficiency of sanitization of containers, equipment surfaces, water miscible cosmetics etc.	*LQ553D-5X500ML	5X500ml	6240
#Frey Mycoplasma Broth New recommended for the cultivation of avian *Mycoplasma*.	LQ588C-10X100ML	10X100ml	20590
#Friss Liquid Medium New recommended for the detection of non-avian *Mycoplasma* in pharmaceutical products in accordance with European pharmacopoeia.	LQ587C-10X100ML	10X100ml	40960
GN Broth, Hajna for the selective enrichment of Gram negative organisms of the enteric group from clinical & non clinical sample.	LQ157-5X100ML	5X100ml	3785
#Hayflick medium New recommended for the detection of *Mycoplasma* in Pharmaceutical products, vaccines, cell banks and virus cultures in accordance with EP.	LQ159-5X100ML	5X100ml	8150
0.3% Lecithin & 3% Tween 80 recommended as a surfactant and emulsifier.	*LQ279C-5X100ML	5X100ml	3925
Lactose Broth for the detection of coliform bacteria in water, foods, dairy products as per standard methods.	*LQ212D-5X500ML	5X500ML	4595
Letheen Broth for determination of bacterial activity of quarternary ammonium compounds using *Escherichia coli* or *Staphylococcus aureus*.	LQ108-5X100ML	5X100ml	1185
Letheen Broth Modified for determination of bacterial activity of quarternary ammonium compounds using *Escherichia coli* or *Staphylococcus aureus*.	*LQ131C-5X100ML	5X100ml	1185
	*LQ131C3-5X300ML	5X300ml	3030
	*LQ131D-5X500ML	5X500ml	4715

*For customer's convenience, suffix has been added to the different packings of one code
All the above products to be stored between 15-30°C.
On receipt, all the above products to be stored between 2-8°C

Ready Prepared Media

Product	Code	Per Pack	Price in ₹
Letheen Broth Modified (w/Tween 80) for screening cosmetic products for microbial contamination.	*LQ133C-5X100ML *LQ133C3-5X300ML *LQ133D-5X500ML	5X100ml 5X300ml 5X500ml	1420 3030 5260
Luria Bertani Broth for the cultivation and maintenance of recombinant strains of *Escherichia coli* and may be used for routine cultivation of not particularly fastidious microorganisms.	*LQ118D-5X500ML	5X500ml	5775
Malt Extract Broth recommended for detection and enumeration of yeasts, moulds and aciduric microorganisms.	*LQ311C-10X100ML	10X100ml	2580
Medium 11.GN Broth for the enrichment of *Shigella* from pharmaceutical products in accordance with IP 2014.	*LQ151C-5X100ML	5X100ml	3935
Mueller Hinton Broth No. 2 Control Cations recommended to be used in quantitative procedures for susceptibility testing of rapidly growing aerobic and facultatively anaerobic bacteria	*LQ377CCL-5X250ML	5X250ml	5500
Neutralizing Fluid New This medium is recommended for neutralizing the activity of antimicrobial agents in accordance with EP & BP.	LQ124C-10X100ML LQ124-5X300ML	10X100ml 5X300ml	2545 3845
Neutralizing fluid with 0.3% Soya Lecithin & 3% Polysorbate 80 recommended to be used in disinfectant testing where neutralizaton of antiseptics and disinfectants is important for determining its bactericidal activity.	*LQ381C-5X100ML	5X100ml	5705
0.1% Peptone Water used as a growth medium and as a base for carbohydrate fermentation media.	*LQ172C-5X100ML *LQ172D-5X500ML	5X100ml 5X500ml	1185 4715
0.1% Peptone Water w/ 0.1% Tween 80 used as a growth medium and for determining efficiency of sanitization of containers, equipment surfaces, water miscible cosmetics etc.	*LQ253C-5X100ML	5X100ml	2040
0.1% Peptone w/1% Tween 80 recommended as a growth medium.	*LQ579CS-5X100ML	5X100ml	2110
0.1% Peptone w/0.07% Soya Lecithin and 4% Tween 20 used as a growth medium and for determining efficiency of sanitization of containers, equipment surfaces, water miscible cosmetics etc.	LQ580CS-10X100ML	10X100ml	4215
0.1% Peptone Water w/ 0.5% Soya Lecithin and 4% Tween 80 used as a growth medium and for determining efficiency of sanitization of containers, equipment surfaces, water miscible cosmetics etc.	*LQ268C-10X100ml	10X100ml	4115
0.1% Peptone Water w/ 0.5% Soya Lecithin and 4% Tween 20 used as a growth medium and for determining efficiency of sanitization of containers, equipment surfaces, water miscible cosmetics etc.	*LQ269C-10X100ml	10X100ml	4115

Product	Code	Per Pack	Price in ₹
0.1% Peptone w/ 0.3% Lecithin & 1% Tween 80 New used as a growth medium and for determining efficiency of sanitization of containers, equipment surfaces, water miscible cosmetics etc.	LQ280CC-5X200ML LQ280D-5X500ML	5X200ml 5X500ml	2900 4750
0.1% Peptone w/0.5% Tween 80 & 0.05% Soya Lecithin recommended as a growth medium and for determining efficiency of sanitization of containers, equipment surfaces, water miscible cosmetics etc.	*LQ316C-10X100ML	10X100ml	3925
PA Broth (Triple Strength) New for the detection of presence & absence of coliform bacteria in water from treatment plants or distribution systems.	LQ390L-5X50ML	5X50ml	3040
Peptone water w/ 1% Tween 80 & 0.1% Lecithin used as a growth medium and for determining efficiency of sanitization of containers, equipment surfaces, water miscible cosmetics etc.	*LQ355C-10X100ML	10X100ml	4090
Phosphate Buffer pH 7.00 used as a diluent as recommended by United States Pharmacopeia.	*LQ164C-10X100ML	10X100ml	2565
Phosphate Buffer pH 7.00 w/0.5% Soya Lecithin and 4% Tween 80 as a diluent and for determining efficiency of sanitization of containers,equipment surfaces, water miscible cosmetics etc.	*LQ195C-10X100ML	10X100ml	4085
Phosphate Buffer, pH 7.2 used as a diluent as recommended by FDA BAM.	*LQ165C-10X100ML	10X100ml	2565
Phosphate Buffer, pH 7.2 (1:800 Dilution) Used as a diluent as recommended by FDA BAM and USP.	*LQ379C-10X100ML	10X100ml	2620
Phosphate Buffer pH 7.2 w/0.1% Soya Lecithin and 4% Tween 20 recommended as a diluent and for determining efficiency of sanitization of containers,equipment surfaces, water miscible cosmetics etc.	*LQ557XC-10X90ML	10X90ml	4115
Phosphate Buffer pH 8.00 used as a diluent as recommended by USP.	*LQ519CXC-5X190ML	5X190ML	2390
R2A Broth for cultivation and maintenance of heterotrophic bacteria from potable waters.	*LQ251C-5X100ML	5X100ml	2675
R2A Broth (Double Strength) for cultivation and maintenance of heterotrophic bacteria from potable waters.	*LQ571C-5X100ML	5X100ml	3875
⊙Reinforced HiVeg® Medium for Clostridia for the enrichment of Clostridia from pharmaceutical products in accordance with the microbial limit testing.	*LQV130C-5X100ML ⊙ HiVeg	5X100ml	1185

Ready Prepared Dual Media for Blood Specimens in Glass Bottles

- Two in One step procedure involving inoculation and simultaneous isolation on solid surface
- *Available in two sizes :* 1) Solid phase (7 ml) and Liquid (20 ml) medium & 2) Solid phase (20 ml) and Liquid (40 ml) medium

Product	Code	Per Pack	Price in ₹
#HiCombi Dual® Performance Medium for rapid growth of *Enterobacteria*, *Pseudomonas*, Staphylococci and *Candida*. Combination of solid (20 ml) and liquid (40 ml) media in single bottle.	LQ012-10BT	10bottles	3300
#HiCombi Dual® Performance Medium for rapid growth of *Enterobacteria*, *Pseudomonas*, Staphylococci and *Candida*. Combination of solid (7 ml) and liquid (20 ml) media in single bottle.	LQ033-10BT	10bottles	2455
HiCombi Dual® Performance Fungal Medium Kit for the detection of yeasts and moulds from pathological specimens. Combination of solid (7 ml) and liquid (20 ml) media in single bottle. For fungal selectivity, CC supplement, Modified (FD169B) is recommended. **(Kit contains 10 bottles and 10 vials of CC Supplement, Modified (FD169B))**.	LQ034-KT	Kit	3025
HiCombi Dual® Performance Fungal Medium Kit for the detection of yeasts and moulds from pathological specimens. Combination of solid (20 ml) and liquid (40 ml) media in single bottle. For fungal selectivity, CC supplement, Modified (FD169A) is recommended. **(Kit contains 10 bottles and 10 vials of CC Supplement, Modified (FD169A))**.	*LQ034A-KT	Kit	6450
HiCombi Dual® Performance Fungal Medium, Modified for the detection of yeasts and moulds from pathological specimens. Combination of solid (20 ml) and liquid (40 ml) media in single bottle.	LQ188-10BT	10bottles	5530
HiCombi Dual® Performance Salmonella Medium - SS a qualitative test for rapid growth and confirmation of *Salmonella*. Combination of solid (7 ml) and liquid (20 ml) media in single bottle.	LQ029-10BT	10bottles	1945
HiCombi Dual® Performance Salmonella Medium - SS a qualitative test for rapid growth and confirmation of *Salmonella*. Combination of solid (20 ml) and liquid (40 ml) media in single bottle.	*LQ029A-10BT	10bottles	2745
HiCombi Dual® Performance Salmonella Medium - XLD a qualitative test for rapid growth and confirmation of *Salmonella*. Combination of solid (7 ml) and liquid (20 ml) media in single bottle.	LQ030-10BT	10bottles	1895

Product	Code	Per Pack	Price in ₹
HiCombi Dual® Performance Salmonella Medium - DCA a qualitative test for rapid growth and confirmation of *Salmonella*. Combination of solid (7 ml) and liquid (20 ml) media in single bottle.	LQ031-10BT	10bottles	1895
HiCombi Dual® Performance Salmonella Medium - DCA a qualitative test for rapid growth and confirmation of *Salmonella*. Combination of solid (20 ml) and liquid (40 ml) media in single bottle.	*LQ031A-10BT	10bottles	2690
HiCombi Dual® Performance Selective Medium - HEA a qualitative test for rapid growth and confirmation of *Salmonella*. Combination of solid (7 ml) and liquid (20 ml) media in single bottle.	LQ035-10BT	10bottles	1805
HiCombi Dual® Performance Selective Medium - HEA a qualitative test for rapid growth and confirmation of *Salmonella*. Combination of solid (20 ml) and liquid (40 ml) media in single bottle.	*LQ035A-10BT	10bottles	2570
HiCombi Dual® Performance Selective Medium - SS a qualitative test for rapid growth and confirmation of *Salmonella*. Combination of solid (7 ml) and liquid (20 ml) media in single bottle.	LQ036-10BT	10bottles	1945
HiCombi Dual® Performance Selective Medium - SS a qualitative test for rapid growth and confirmation of *Salmonella*. Combination of solid (20 ml) and liquid (40 ml) media in single bottle.	*LQ036A-10BT	10bottles	2745

Ready Prepared Dual Media for Other Clinical specimens

HiCombi Dual® Performance Trans Isolate Medium for primary culturing and transport of *Neisseria meningitidis, Streptococcus pneumoniae* and *Haemophilus influenzae*. Combination of solid (7 ml) and liquid (20 ml) media in single bottle.	LQ109-10BT	10bottles	3595

Ready Prepared Dual Media for Salmonella from Food specimens

HiCombi Dual® Performance Salmonella Medium for selective enrichment and isolation of Salmonellae from chicken legs, meat products or other food samples. Combination of solid (7 ml) and liquid (20 ml) media in single bottle.	LQ073-10BT	10bottles	1805

Ready Prepared Solid Media in Glass Bottles▲

- Wide range of media available to meet the needs of microbiologists and pathologists
- On request other media can also be made available as ready to use sterile solid media ▲
- Ready to use sterile solid media in glass bottles
- No sterilization required, just melt and pour into plates
- Economical and saves preparation time

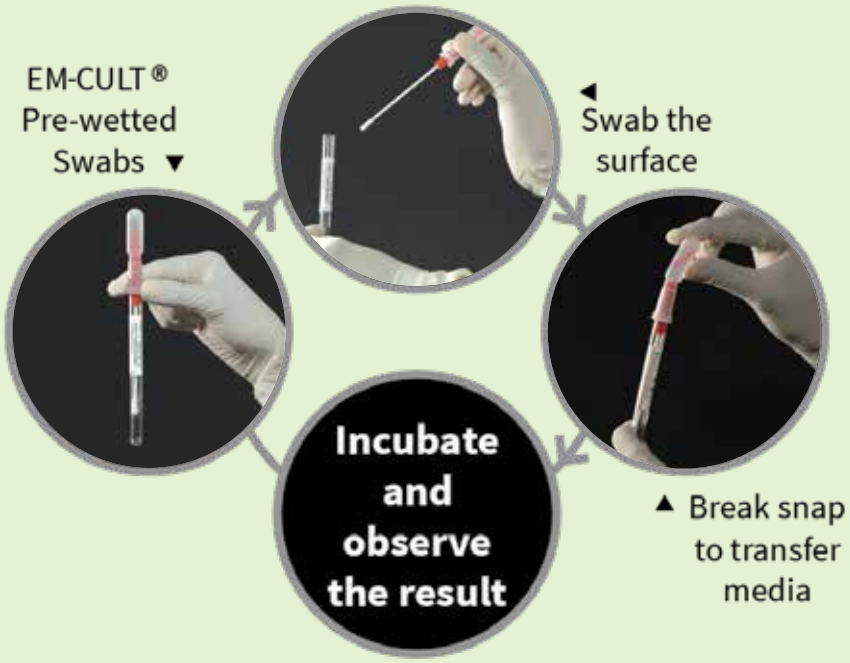
EM-CULT® Pre-wetted Swabs



- Convenient, flexible, ready to use and easy to handle EM-CULT® Swabs
- The qualitative test for monitoring microbial contamination
- A single tube containing pre- wetted swabs and medium within itself, separated by flexible breakable snap valve, that allows to flow through tube and wet swabs
- Applicable in Pharmaceutical and food and beverages industries wherein, surface monitoring of uneven surfaces or difficult accessible area can be carried out

Product	Code	Per Pack	Price in ₹

EZ-Rapid Shot Kit

EZ-Rapid Shot - Simplify your Growth Promotion Testing

- Ready to use format of lyophilized cultures and fixed volume of Rehydration fluid
- Time saving and convenient to use, avoid cumbersome steps such serial dilutions
- With Lyophilized cultures in a ready to use format one can avoid extensive culture maintenance activities
- Proven results for recovery on selective media

EZ-Rapid Shot kit include below mentioned based on the pack size

- 10 or 20 vials of a single quantitated microorganism (1 lyophilized pellet per vial)
- 10 or 20 vials of hydrating fluid (1.2 mL in each vial)

On receipt, all the above products to be stored between 2-8°C

Ready Prepared L. J. Media Slant / Kits

- **Ready to use L.J. Media slants for cultivation of *Mycobacterium***
- **Saves tedious preparation time**
- **Convenient testing of susceptibility and resistance**
- **Assorted antibiotic slants as per requirement can be supplied**
- **Enhanced growth of *Mycobacterium* on SL001 within 12-15 days**

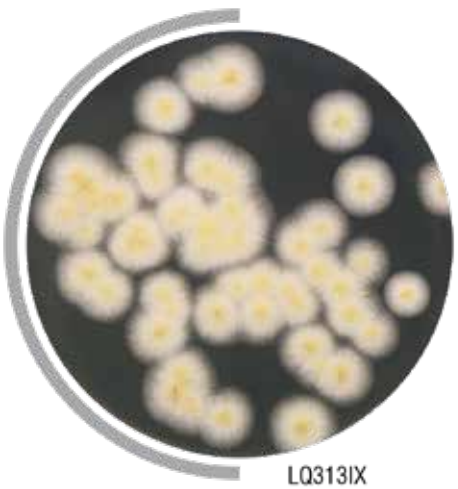
LQ313IX Rehydration Fluid for GPT (Fungus)



LQ313IX

- Growth Promotion Tests (GPT), described in various pharmacopoeias (USP, BP, EP, JP, IP) is carried out to determine suitability of test medium for growth of specified microorganisms.
- Dilution methods for GPT are tedious while commercial cfu preparations are expensive.
- Aquino™ Rehydrol F for fungus.
- Culture preparations in this fluid can be stored upto 20 days
- Reduces overall time taken for inoculum preparation.
- Overcomes tedious dilutions preparations.
- Cost effective.

Product	Code	Per Pack	Price in ₹
Ecopathology Uro Kit - I (One kit is sufficient for 5 samples) for diagnosis of Urinary Tract Infection and subsequent antibiotic susceptibility testing. Very economical and rapid diagnostic kit. Kit contains : a) HiCrome® UTI Agar (SM1353) -1x100ml, b)Mueller Hinton Agar (SM173) - 2x100ml, c)Sterile Petri plates(Empty 90 mm) - 15 Nos, d)Octodiscs OD066R - 5 Nos, OD067R - 5 Nos, (Each OD is a combination of 8 different antibiotics), e) Sterile Uricol - 5 Nos.	**K084A-1KT** **K084A-2KT**	**1kit** **2kits**	**1625** **2865**
Ecopathology Uro Kit- I, Modified for isolation and differentiation of Urinary pathogens on the basis of Lactose fermentation subsequent antibiotic susceptibility testing Very economical and rapid diagnostic kit. Kit contains : a) C.L.E.D. Agar w/ Bromothymol Blue (SM792) - 1X100ml, b) Mueller Hinton Agar (SM173) - 2x100ml, c)Sterile Petri plates(Empty 90 mm) - 15 Nos. d)Octodiscs OD066R - 5 Nos, OD067R - 5 Nos, (Each OD is a combination of 8 different antibiotics), e) Sterile Uricol - 5 Nos.	**K084B-1KT** **K084B-2KT**	**1kit** **2kit**	**1580** **2775**
Ecopathology Uro Kit - 2 (One kit is sufficient for 5 samples) for diagnosis of Urinary Tract Infection and subsequent antibiotic susceptibility testing. Very economical and rapid diagnostic kit. Kit contains : a) HiCrome® UTI Agar (SM1353) -1x100ml, b)Mueller Hinton Agar (SM173) - 3x100ml, c)Sterile Petri plates (Empty 90 mm) - 5 Nos, (for SM1353) & 120 mm-10Nos for (SM173) d)Octodiscs OD066 - 5 Nos, OD067- 5 Nos, (Each OD is a combination of 8 different antibiotics), e) Sterile Uricol - 5 Nos.	**K085A-1KT** **K085A-2KT**	**1kit** **2kits**	**2180** **3815**

Product	Code	Per Pack	Price in ₹
Ecopathology Uro Kit -3 (One kit is sufficient for 5 samples) for diagnosis of Urinary Tract Infection and subsequent antibiotic susceptibility testing. Very economical and rapid diagnostic kit. Kit contains : a)HiCrome® UTI Agar (SM1353) -1x100ml, b)Mueller Hinton Agar (SM173) - 2x100ml, c)Sterile Petri plates(Empty 90 mm) - 15 Nos, d)Octodiscs OD022/R - 5 Nos, OD021/R - 5 Nos, (Each OD is a combination of 8 different antibiotics) small size, e) Sterile Uricol - 5 Nos.	**K089-2KT**	**2kits**	**2865**
Ecopathology Uro Kit -4 (One kit is sufficient for 5 samples) for diagnosis of Urinary Tract Infection and subsequent antibiotic susceptibility testing. Very economical and rapid diagnostic kit. Kit contains : a)HiCrome® UTI Agar (SM1353) -1x100ml, b)Mueller Hinton Agar (SM173) - 3x100ml, c)Sterile Petri plates: 90 mm - 5 Nos (for SM1353) and 120mm - 10 Nos for (SM173) d)Octodiscs: OD022 - 5 Nos, OD021 - 5 Nos, (Each OD is a combination of 8 different antibiotics) e) Sterile Uricol - 5 Nos.	**K090-2KT**	**2kits**	**3815**

On receipt, all the above products to be stored between 2-8°C

Biochemical Test Kit

Biochemical Kits in accordance with Indian Specifications (IS)

- **Kits designed for identification of Bacterial food pathogens based on biochemical profile**

  Vibrio cholerae and *Vibrio parahaemolyticus* IS 5887 Part V
  Shigella species IS 5887 Part VII
  Salmonella species IS 15187 : 2002 & ISO 6340 : 1995

- **Ready to use, easy to perform biochemicals in the form of biochemical Motility strip, liquid media and slants**

Product	Code	Per Pack	Price in ₹
Biochemical Test Kit for Vibrio cholerae **Kit contains Part A:** HiMotility™ Biochemical kit for *V. cholerae* (KBM004) : A combination of 12 biochemical tests for the confirmation of *V.cholerae* based on motility and other biochemical tests. (Kit contains sterile media for motility in first two wells followed by Voges Proskauer's, Arginine utilization, Ornithine utilization, Lysine utilization, Catalase, H_2S production and 4 different Carbohydrate utilization tests - Mannitol, Sucrose, Glucose and Inositol ***Reagents** : Barritt Reagent A (R029) and Barritt Reagent B (R030) **Part B :** Biochemical test for *Vibrio cholerae* (in tubes) (K138B) Biochemical tests to detect 1)Aerobic fermentation 2) Anaerobic fermentation 3)Growth in Tryptone Broth w/o NaCl 4)Growth in Tryptone Broth w/8% NaCl 5)Growth in Tryptone Broth w/10% NaCl 6) Oxidase discs.	**K138-5KT** **K138-10KT**	**5kits** **10kits**	**4570** **8680**
Biochemical Test Kit for Vibrio parahaemolyticus **Kit contains Part A:** HiMotility™ Biochemical kit for *V. parahaemolyticus* (KBM005) A combination of 12 biochemical tests for the confirmation of *V.parahaemolyticus* based on motility and other biochemical tests. (Kit contains sterile media for motility in first two wells followed by Voges Proskauer, Arginine utilization, Ornithine utilization, Lysine utilization, Catalase, H_2S production and 4 different Carbohydrate utilization tests - Mannitol, Sucrose, Glucose and Inositol ***Reagents** : Barritt Reagent A (R029) and Barritt Reagent B (R030) **Part B :** Biochemical test for *V.parahaemolyticus* (in tubes) (K139B) Biochemical tests to detect 1) Aerobic fermentation 2) Anaerobic fermentation 3) Growth in Tryptone Broth w/o NaCl 4) Growth in Tryptone Broth w/8% NaCl 5) Growth in Tryptone Broth w/10% NaCl 6) Oxidase discs.	**K139-5KT** **K139-10KT**	**5kits** **10kits**	**4590** **8705**

Product	Code	Per Pack	Price in ₹
Biochemical Test Kit for Shigella **Kit contains Part A:** HiMotility™ Biochemical kit for *Shigella* (KBM006) : A combination of 12 biochemical tests for the confirmation of *Shigella* based on motility and other biochemical tests. (Kit contains sterile media for motility in first two wells followed by Indole, Voges Proskauer's, Citrate, Malonate and 6 different Carbohydrate utilization tests - Glucose, Lactose, Mannitol, Sucrose, Salicin and Dulcitol, TDA Reagent (R036) ***Reagents :** Kovacs Reagent (R008), Barritt Reagent A (R029) and Barritt Reagent B (R030) **Part B :** Biochemical test for *Shigella* (in tubes) (K140B) Biochemical tests to detect 1) Aerobic fermentation 2) Anaerobic fermentation 3) Arginine utilization 4) Ornithine utilization 5) Lysine utilization 6) Urease 7) Catalase 8) H_2S 9) Gelatin liquefaction 10)Oxidase discs 11) Phenylalanine Agar Slant.	**K140-5KT** **K140-10KT**	**5kits** **10kits**	**6645** **11965**
Biochemical Test Kit for Salmonella **Kit contains** 1) SL045 - Triple Sugar Iron Agar Slant 2) SL035 - Urea Agar Slant 3) LQ016 - Moeller Decarboxylase Broth w/ L-Lysine hydrochloride.	**K141-5KT** **K141-10KT**	**5kits** **10kits**	**1310** **2350**

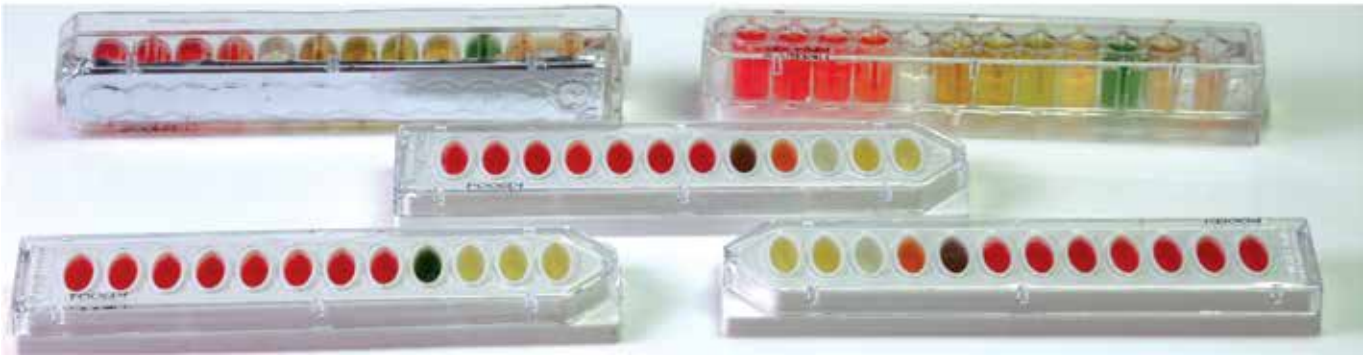
On receipt, all the above products to be stored between 2-8°C
* Quantity of reagents supplied is sufficient for respective packs

Ready Prepared Biochemical Identification Test Kits

Rapid identification of bacteria upto species level

Inoculate on to the strip, incubate and get the identity of the unknown organism

- Rapid detection of pathogens from food, water and clinical samples
- High degree of accuracy and automation
- Saves labor, time, and minimises manual error



Product	Code	Per Pack	Price in ₹
HiIMViC™ Biochemical Test Kit **a combination of 12 tests for differentiation of *Enterobacteriaceae* species.** (Kit contains sterile media for Indole, Methyl red, Voges Proskauer's, Citrate utilization tests and 8 different carbohydrates- Glucose, Adonitol, Arabinose, Lactose, Sorbitol, Mannitol, Rhamnose, Sucrose).***Reagents supplied with kit :** Kovac's Reagent (R008) for Indole Test, Methyl Red Indicator (I007), Barritt Reagent A (R029) and Barritt Reagent B (R030) for VP Test.	**KB001-5KT** **KB001-10KT** **KB001-20KT**	**5Kits** **10Kits** **20Kits**	**3890** **6620** **9455**
HiAssorted® Biochemical Test Kit **a combination of 12 tests for identification of Gram-negative rods.** (Kit contains sterile media for Citrate utilization, Lysine utilization and Ornithine utilization, Urease detection, Phenylalanine deamination (TDA), Nitrate reduction, H_2S production test and 5 different carbohydrates for utilization test - Glucose, Adonitol, Lactose, Arabinose, Sorbitol). ***Reagents supplied with kit :** TDA Reagent (R036), Nitrate Reagents : α - Naphthylamine Solution (R009) and Sulphanilic Acid 0.8% (R015).	**KB002-5KT** **KB002-10KT** **KB002-20KT**	**5Kits** **10Kits** **20Kits**	**4225** **7180** **10265**

Product	Code	Per Pack	Price in ₹
Hi25™ Enterobacteriaceae Identification **a combination of 25 tests for identification of *Enterobacteriaceae* species.** (Kit contains discs for oxidase test and sterile media for ONPG, Lysine utilization, Ornithine utilization, Urease detection, Phenylalanine deamination (TDA), Nitrate reduction, H_2S production, Citrate utilization,Voges Proskauer's, Methyl red, Indole, Malonate, Esculin hydrolysis tests and 11 different carbohydrates utilization test - Arabinose, Xylose, Adonitol, Rhamnose, Cellobiose, Melibiose, Saccharose, Raffinose, Trehalose, Glucose, Lactose). ***Reagents supplied with kit :** TDA Reagent (R036), Nitrate Reagents : - α Naphthylamine Solution (R009) and Sulphanilic Acid 0.8% (R015), Barritt Reagent A (R029) and Barritt Reagent B (R030) for VP Test, Methyl Red Indicator (I007), Kovac's Reagent (R008) for Indole Test.	**KB003-5KT** **KB003-10KT** **KB003-20KT**	**5Kits** **10Kits** **20Kits**	**7265** **12340** **17615**
HiStaph™ Identification Kit **a combination of 12 tests for identification of *Staphylococcus* species.** (Kit contains sterile media for Voges Proskauer's, Phosphatase, ONPG, Urease production, Arginine utilization tests and 7 different carbohydrates utilization tests - Mannitol, Sucrose, Lactose, Arabinose, Raffinose,Trehalose, Maltose). ***Reagents supplied with kit :** Barritt Reagent A (R029) and Barritt Reagent B (R030) for VP Test.	**KB004-5KT** **KB004-10KT** **KB004-20KT**	**5Kits** **10Kits** **20Kits**	**4225** **7180** **10265**
HiStrep® Identification Kit **a combination of 12 tests for identification of *Streptococcus* species.** (Kit contains sterile media for Voges Proskauer's, Esculin hydrolysis, PYR, ONPG, Arginine utilization tests and 7 different carbohydrates utilization tests - Glucose, Lactose, Arabinose, Sucrose, Sorbitol, Mannitol, Raffinose). ***Reagents supplied with kit :** Barritt Reagent A (R029) and Barritt Reagent B (R030) for VP Test, PYR Reagent (R043).	**KB005A-5KT** **KB005A-10KT** **KB005A-20KT**	**5kits** **10kits** **20kits**	**4225** **7180** **10265**

On receipt, all the above products to be stored between 2-8°C
* Quantity of reagents supplied is sufficient for respective packs

Ready Prepared Media

Product	Code	Per Pack	Price in ₹
HiCandida® Identification Kit **a combination of 12 tests for identification of *Candida* species.** (Kit contains sterile media for Urease production and 11 different carbohydrates utilization tests - Melibiose, Lactose, Maltose, Sucrose, Galactose, Cellobiose, Inositol, Xylose, Dulcitol, Raffinose, Trehalose).	**KB006-5KT** **KB006-10KT** **KB006-20KT**	**5kits** **10kits** **20kits**	**3890** **6620** **9455**
HiVibrio® Identification Kit **a combination of 12 tests for identification of *Vibrio* species.** (Kit contains sterile media for Voges Proskauer's, Arginine utilization, Salt tolerance, ONPG, Citrate utilization, Ornithine utilization and 6 different carbohydrates utilization tests - Mannitol, Arabinose, Sucrose, Glucose, Salicin, Cellobiose). ***Reagents supplied with kit :** Barritt Reagent A (R029) and Barritt Reagent B (R030) for VP Test.	**KB007-5KT** **KB007-10KT** **KB007-20KT**	**5kits** **10kits** **20kits**	**3890** **6620** **9455**
HiNeisseria® Identification Kit **a combination of 12 tests for identification of *Neisseria* species.** (Kit contains sterile media for Urease production, ONPG, Voges Proskauer's, Oxidase, Catalase, Nitrate reduction test and 6 different carbohydrates utilization tests - Glucose, Maltose, Lactose, Sucrose, Fructose, Mannose). ***Reagents supplied with kit :** Barritt Reagent A (R029) and Barritt Reagent B (R030) for VP Test, Gordon-McLeod Reagent (Oxidase Reagent) (R026), Nitrate Reagents : α - Naphthylamine Solution (R009) and Sulphanilic Acid 0.8% (R015).	**KB008-5KT** **KB008-10KT** **KB008-20KT**	**5kits** **10kits** **20kits**	**4225** **7180** **10265**
HiCarbo™ Kit **a combination of 35 tests for utilization of carbohydrate tests.** Kit contains Part A, Part B each having 12 carbohydrates utilization tests and Part C containing 11 sugar and 1 control.	**KB009-5KT** **KB009-10KT** **KB009-20KT**	**5kits** **10kits** **20kits**	**5465** **10265** **16055**
HiCarbo™ Kit- Part A Lactose, Xylose, Maltose, Fructose, Dextrose, Galactose, Raffinose, Trehalose, Melibiose, Sucrose, L-Arabinose, Mannose.	**KB009A-5KT** **KB009A-10KT** **KB009A-20KT**	**5kits** **10kits** **20kits**	**2750** **4680** **8900**
HiCarbo™ Kit- Part B Inulin, Sodium gluconate, Glycerol, Salicin, Dulcitol, Inositol, Sorbitol, Mannitol, Adonitol, Arabitol, Erythritol, α-Methyl-D-glucoside.	**KB009B1-5KT** **KB009B1-10KT** **KB009B1-20KT**	**5kits** **10kits** **20kits**	**2750** **4680** **8900**
HiCarbo™ Kit- Part C Rhamnose, Cellobiose, Melezitose, α-Methyl-D-Mannoside, Xylitol, ONPG, Esculin, D-Arabinose, Citrate, Malonate, Sorbose and 1 control. **Note : KB009 is available as a total kit and also individually as Part A, Part B and Part C**	**KB009C-5KT** **KB009C-10KT** **KB009C-20KT**	**5kits** **10kits** **20kits**	**3300** **5620** **10675**
HiE. coli® Identification Kit **a combination of 12 tests for identification of *E. coli*.** (Kit contains sterile media for MR test, Voges Proskauer's, Citrate utilization, Indole, Glucuronidase, Nitrate reduction, ONPG, Lysine utilization tests and 4 different carbohydrates utilization tests - Lactose, Glucose, Sucrose, Sorbitol).***Reagents supplied with kit :** Methyl Red Indicator (I007), Barritt Reagent A (R029) and Barritt Reagent B (R030) for VP Test, Kovac's Reagent (R008) for Indole Test, Nitrate Reagents : α-Naphthylamine Solution(R009) and Sulphanilic Acid 0.8% (R015).	**KB010-5KT** **KB010-10KT** **KB010-20KT**	**5kits** **10kits** **20kits**	**4225** **7180** **10265**

Product	Code	Per Pack	Price in ₹
HiSalmonella® Identification Kit **a combination of 12 tests for identification of *Salmonella* species.** (Kit contains sterile media for MR test, Voges Proskauer's test, Urease production, H_2S production, Citrate utilization, Lysine utilization, ONPG tests and 5 different carbohydrate utilization tests - Lactose, Arabinose, Maltose,Sorbitol, Dulcitol). ***Reagents supplied with kit :** Methyl Red Indicator (I007), Barritt Reagent A (R029) and Barritt Reagent B (R030) for VP Test.	**KB011-5KT** **KB011-10KT** **KB011-20KT**	**5kits** **10kits** **20kits**	**4225** **7180** **10265**
HiListeria® Identification Kit **a combination of 12 tests for identification of *Listeria* species.** (Kit contains sterile media for Catalase, Nitrate reduction, Esculin, Voges Proskauer's, Methyl red, and 7 different carbohydrates utilization tests - Xylose, Lactose, Glucose, α-Methyl-D-Mannoside, Rhamnose, Sucrose, Mannitol). ***Reagents supplied with kit :** Nitrate Reagents : - α-Naphthylamine Solution (R009) and Sulphanilic Acid 0.8% (R015), Methyl Red Indicator (I007), Barritt Reagent A (R029) and Barritt Reagent B (R030) for VP Test.	**KB012A-5KT** **KB012A-10KT** **KB012A-20KT**	**5kits** **10kits** **20kits**	**4225** **7180** **10265**
HiBacillus™ Identification Kit **a combination of 12 tests for identification of *Bacillus* species.** (Kit contains sterile media for Malonate, Voges Proskauer's, Citrate, ONPG, Nitrate reduction, Catalase, Arginine utilization and 5 different carbohydrates utilization tests - Sucrose, Mannitol, Glucose, Arabinose, Trehalose). ***Reagents supplied with kit :** Nitrate Reagents : - α Naphthylamine Solution (R009) and Sulphanilic Acid 0.8% (R015), Barritt Reagent A (R029) and Barritt Reagent B (R030) for VP Test.	**KB013-5KT** **KB013-10KT** **KB013-20KT**	**5kits** **10kits** **20kits**	**4225** **7180** **10265**
HiAcinetobacter™ Identification Kit **a combination of 24 test for the identification of *Acinetobacter* species** (Kit contains sterile medium in Strip1 for Indole, Voges Proskauer's, Citrate utilization, Lysine utilization, Ornithine utilization, Arginine utilization, Nitrate reduction, Malonate, Urease, Phenylalanine deamination (TDA), H_2S production and ONPG; and Strip 2 for 12 carbohydrate utilization tests- Glucose, Mannitol, Xylose, Inositol, Sorbitol, Rhamnose, Sucrose, Lactose, Arabinose, Adonitol, Raffinose and Salicin. ***** **Reagents supplied with kit :** TDA Reagent (R036), Nitrate Reagents: α-Naphthylamine Solution (R009) and Sulphanilic acid , 0.8% (R015), Barrit Reagent A (R029) and Baritt Reagent B (R030) for VP test, Kovac's Reagent (R008) for Indole test).	**KB014-5KT** **KB014-10KT** **KB014-20KT**	**5kits** **10kits** **20kits**	**7265** **12340** **17615**
Hi24™ Enterobacteriaceae Identification Kit, Modified **a combination of 24 test for the identification of *Enterobacteriaceae* species** (Kit contains sterile medium in Strip1 for ONPG, Lysine utilization, Ornithine utilization, Urease detection, Phenylalanine deamination (TDA), Voges- Proskauer's, Methyl red, Indole, PYR, β- Glucuronidase, α- Galactosidase, β-Xylosidase and Strip 2 for Esculin hydrolysis and 11 different carbohydrates utilization test - Sucrose, Sorbitol, Trehalose, Glucose, Cellobiose, Melibiose, Salicin, Mannose, Maltose, Raffinose, Lactose ***Reagents supplied with kit :** TDA Reagent (R036) Barritt Reagent A (R029), Barritt Reagent B (R030), Methyl Red Indicator (I007), Kovac's Reagent (R008), PYR Reagent (R043).	**KB016-5KT** **KB016-10KT** **KB016-20KT**	**5kits** **10kits** **20kits**	**8340** **14190** **20260**

On receipt, all the above products to be stored between 2-8°C
* Quantity of reagents supplied is sufficient for respective packs

Product	Code	Per Pack	Price in ₹
Hi24™ Nonfermenters Identification Kit A combination of 24 tests for the identification of non fermenters (Kit contains sterile medium in Strip 1 for Indole, Esculin hydrolysis, Citrate utilization, Arginine utilization, Nitrate reduction, ONPG, Alkaline phosphatase, Phenylalanine deamination, Urease, Cetrimide tolerance, Lysine utilization, Oxidase and Strip 2 for 12 different carbohydrate utilization test (Lactose, Maltose, Mannitol, Trehalose, Sucrose, Arabinose, Cellobiose, Fructose, Galactose, Glucose, Inositol, Xylose).	**KB019-5KT** **KB019-10KT** **KB019-20KT**	**5kits** **10kits** **20kits**	**7265** **12340** **17615**

Product	Code	Per Pack	Price in ₹
HiLacto™ Identification Kit A combination of 12 tests for differentiation of *Lactobacillus* species.Kit contains sterile material for Esculin hydrolysis, Catalase and 10 different carbohydrates utilization tests- Xylose, Cellobiose, Arabinose, Maltose, Galactose, Mannose, Mellibiose, Raffinose, Sucrose and Trehalose.	**KB020-10KT** **KB020-20KT**	**10kits** **20kits**	**8325** **14690**
HiBifido™ Identification Kit A combination of 12 tests for differentiation of *Bifidobacterium* species. Kit contains sterile material for Catalase and 11 different carbohydrates utilization tests - Arabinose, Cellobiose, Fructose, Lactose, Maltose, Mannose, Melibiose, Raffinose, Sucrose, Xylose and Salicin.	**KB021-10KT** **KB021-20KT**	**10kits** **20kits**	**8325** **14680**

Ready Prepared Motility and Biochemical Test Kits

RPM

Product	Code	Per Pack	Price in ₹
HiMotility™ Biochemical Kit for E.coli **a combination of 12 tests for confirmation of *E. coli* based on motility and other biochemical tests.** (Kit contains sterile media for Motility test in first 2 wells followed by Indole, Citrate utilization, Glucuronidase, Nitrate reduction, ONPG, Lysine utilization tests and 4 different carbohydrates utilization tests - Lactose, Glucose, Sucrose, Sorbitol). ***Reagents supplied with kit :** Kovac's Reagent (R008) for Indole Test, Nitrate Reagents : α - Naphthylamine Solution (R009) and Sulphanilic Acid 0.8% (R015).	**KBM001-10KT** **KBM001-20KT**	**10kits** **20kits**	**6555** **9375**
HiMotility™ Biochemical Kit for Salmonella **a combination of 12 tests for confirmation of *Salmonella* based on motility and other biochemical tests.** (Kit contains sterile media for Motility test in first 2 wells followed by Citrate utilization, Urease production, Arginine utilization, Lysine utilization, H_2S production, ONPG tests and 4 different carbohydrates utilization tests - Arabinose, Lactose, Maltose, Trehalose).	**KBM002-5KT** **KBM002-10KT** **KBM002-20KT**	**5kits** **10kits** **20kits**	**3850** **6555** **9375**
HiMotility™ Biochemical Kit for Listeria **a combination of 12 tests for confirmation of *Listeria* based on motility and other biochemical tests.** (Kit contains sterile media for Motility test in first 2 wells (Motility + Esculin), followed by Catalase, Nitrate reduction, Voges Proskauer's, Methyl red and 6 different carbohydrates utilization tests -Xylose, Lactose, α - Methyl-D-Mannoside, Rhamnose, Glucose, Mannitol).***Reagents supplied with kit :** Nitrate Reagents : α - Naphthylamine Solution (R009) and Sulphanilic Acid 0.8% (R015), Barritt Reagent A (R029) and Barritt Reagent B (R030) for VP Test, Methyl Red Indicator (I007).	**KBM003A-5KT** **KBM003A-10KT** **KBM003A-20KT**	**5kits** **10kits** **20kits**	**3850** **6555** **9375**

Product	Code	Per Pack	Price in ₹
HiMotility™ Biochemical Kit for Vibrio cholerae A combination of 12 biochemical tests for the confirmation of *V.cholerae* based on motility and other biochemical tests. (Kit contains sterile media for motility in first two wells followed by Voges Proskauer, Arginine utilization, Ornithine utilization, Lysine utilization, Catalase, H_2S production and 4 different Carbohydrate utilization tests - Mannitol, Sucrose, Glucose and Inositol. ***Reagents supplied with kit :** Barritt Reagent A (R029) and Barritt Reagent B (R030).	**KBM004-5KT** **KBM004-10KT** **KBM004-20KT**	**5kits** **10kits** **20kits**	**3705** **6305** **9015**
HiMotility™ Biochemical Kit for Vibrio parahaemolyticus A combination of 12 biochemical tests for the confirmation of *V.parahaemolyticus* based on motility and other biochemical tests. (Kit contains sterile media for motility in first two wells followed by Voges Proskauer, Arginine utilization, Ornithine utilization, Lysine utilization, Catalase, H_2S production and 4 different Carbohydrate utilization tests - Mannitol, Sucrose, Glucose and Inositol ***Reagents supplied with kit :** Barritt Reagent A (R029) and Barritt Reagent B (R030).	**KBM005-5KT** **KBM005-10KT** **KBM005-20KT**	**5kits** **10kits** **20kits**	**3705** **6305** **9015**
HiMotility™ Biochemical Kit for Shigella A combination of 12 biochemical tests for the confirmation of *Shigella* based on motility and other biochemical tests. (Kit contains sterile media for motility in first two wells followed by Indole, Voges Proskauer's, Citrate, Malonate and 6 different Carbohydrate utilization tests - Glucose, Lactose, Mannitol, Sucrose, Salicin and Dulcitol ***Reagents supplied with kit :** Kovacs Reagent (R008), Barritt Reagent A (R029) and Barritt Reagent B (R030).	**KBM006-5KT** **KBM006-10KT** **KBM006-20KT**	**5kits** **10kits** **20kits**	**3705** **6310** **9015**

Surface Sampling Kits

Product	Code	Per Pack	Price in ₹
Carcass-Sponge-Kit (Sponge Sampling Method) for Sampling of Animal Carcasses in Microbiological tests Kit Contains : a) 1 Sterile, non inhibitory, sponge with a dimensions of 3.8 x 7.6 x 1.5 cm enclosed in a Whirl-Pack bag. b)1 bottle with 25 ml sterile diluent (M1494I) Buffered peptone Water) c)1 Sterile disposable square template 100cm² (10x10 cm) in a zip lock bag.	**K080-20KT**	**20kits**	**29980**
Carcass-Swab -Kit (Wet & Dry Swab Method) for Sampling of Animal Carcasses in Microbiological tests Kit Contains : a) 2 Sterile swabs individually packed. b)1 Bottle with 10 ml sterile diluent (M1494I)Buffered peptone Water) c)1 Sterile disposable square template 100cm² (10x10 cm) in a zip lock bag.	**K081-20KT**	**20kits**	**29980**

Product	Code	Per Pack	Price in ₹
Surface-Sponge-Kit (Sponge Sampling Method) Surface Sampling Kit for Microbiological control in slaughter houses and meat processing plants Kit Contains : a) 1 Sterile, non inhibitory, sponge with a dimensions of 3.8 x 7.6 x 1.5 cm enclosed in a Whirl-Pack bag. b)1 bottle with 40ml sterile diluent (M1062) Dey-Engley Neutralizing Broth). c)1 Sterile disposable square template of 20cm² (5x 4cm) in a zip lock bag.	**K082-20KT**	**20kits**	**35630**
Surface-Swab-Kit (Wet & Dry Swab Method) Surface Sampling Kit for Microbiological control in slaughter houses and meat processing plants Kit Contains : a) 1 Sterile swab individually packed. b)1 bottle with 40ml sterile diluent (M1062) Dey-Engley Neutralizing Broth) c)1 Sterile disposable square template 20cm² (5x4 cm) in a zip lock bag.	**K083-20KT**	**20kits**	**35630**

Media Fill Validation Kit

- γ irradiated sterile powders from 3 different manufacturing lots
- Each lot is tested for GPT, sterility and filterability for the evaluation of sterility of manufacturing process
- Each lot is provided with certificate of analysis

Product	Code	Per Pack	Price in ₹
#Soyabean Casein Digest Medium, Sterile Powder (Tryptone Soya Broth, Sterile Powder) γ-irradiated sterile powders from 3 different manufacturing lots. Each lot is tested for GPT, Sterility & Filterability for the evaluation of sterility of manufacturing process. g/L : **30** **16.67 Lit/500G**	**VM011G-3x500G**	**3x500 gm**	**8540**

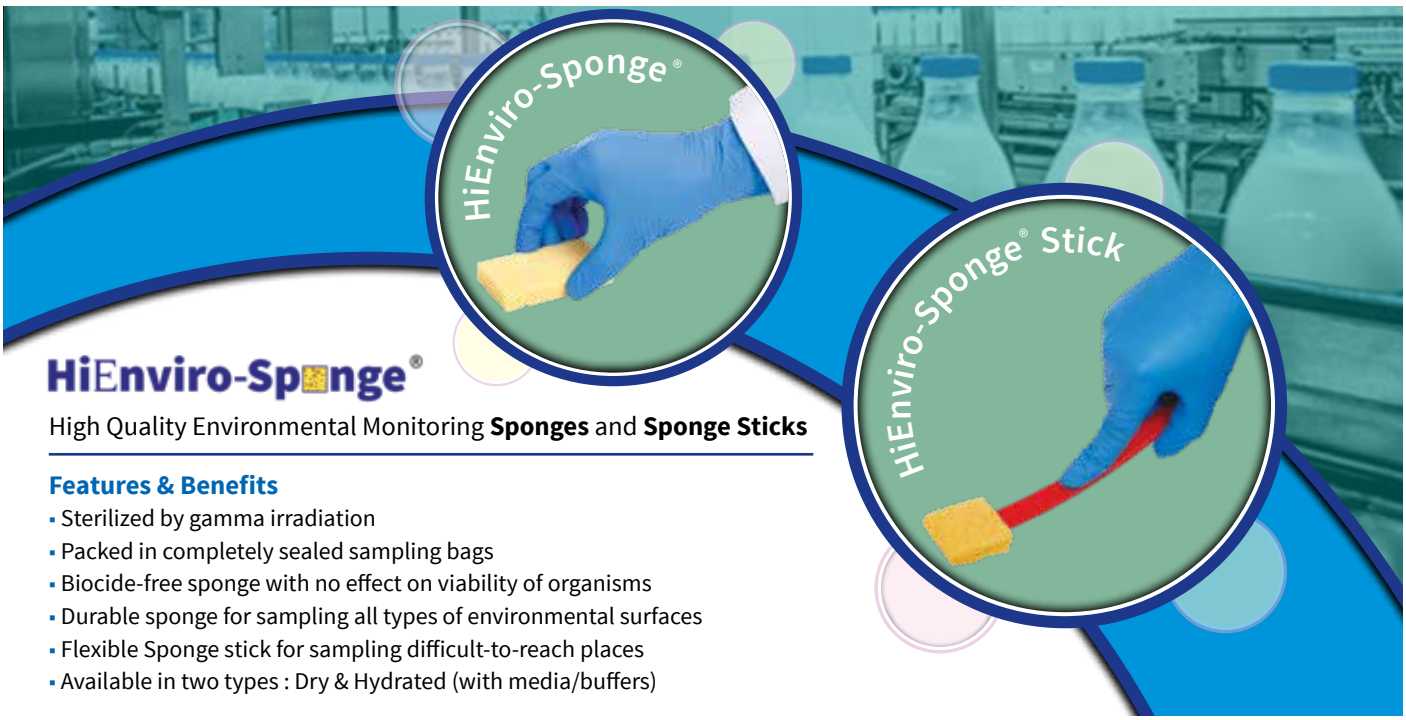
HiEnviro-Sponge® Hydrated for Sample Collection



HiEnviro-Sponge®

High Quality Environmental Monitoring **Sponges** and **Sponge Sticks**

Features & Benefits

- Sterilized by gamma irradiation
- Packed in completely sealed sampling bags
- Biocide-free sponge with no effect on viability of organisms
- Durable sponge for sampling all types of environmental surfaces
- Flexible Sponge stick for sampling difficult-to-reach places
- Available in two types : Dry & Hydrated (with media/buffers)

HiPetri Slim™ Plate

Salient features :

- Ready-to-use medium in dry and concise form
- Recommended for testing liquid samples
- Widespread Industrial application (Water, Food & Cosmetics)
- Compact packing reduces storage space
- No Preparation time
- User-friendly ready-to-use products
- Available in wide range of products that can be customized as per requirement

Product	Code	Packing	Price in ₹
HiPetriSlim™ Total Aerobic Count Recommended for the determination of total aerobic count in food, dairy, water and waste water samples.	HPS001-50PT HPS001-100PT	50plts 100plts	2410 4335

K158 Rapid HiUTI Kit

- Ready-to-use kit for detection of UTI pathogens
- Chromogenic technology imparts distinct colours making identification easier
- Enumeration and differentiation of UTI pathogens is easier

K156 HiVibri-O-Trap Kit

Salient features :

- Highly nutritious, supports the growth of desired microorganisms - *Vibrio* sp
- Chromogenic technology imparts distinct colours making identification easier
- Selective medium helps to inhibit the unwanted microbial flora
- Microbial Enumeration and differentiation steps are easier
- Disinfectant solution provided to ensure safe disposal

Product	Code	Packing	Price in ₹
HiVibri-O-Trap Kit recommended for the selective enumeration and differentiation of *Vibrio* species from water samples. Kit contents: 1.HiVibri-O-Trap Plate (RP001)- 10Nos 2.Container for Sample - 10Nos 3.Syringe - 10Nos 4.Disinfectant tablet - 10Nos 5.Round Sealing Tape for Petri plate - 10Nos	**K156-1KT**	**1kit**	**On Request**

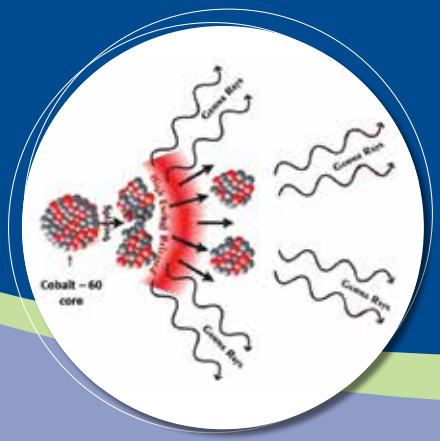
MiCroBiology®
Understanding Microbes

HiMedia's Gamma (γ) Irradiation sterilization facility



- 3 Million Curie Capacity Facility
- ISO 9001:2015 QMS
- WHO-GMP
- A.E.R.B. approved
- B.R.I.T. approved

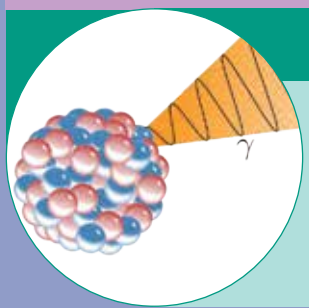
Unique selling proposition

HiMedia Gamma Irradiation Facility

- Processing data tracked through a Barcode System - from material receipt in the Facility till the dispatch of treated Material
- Dosimeter batch received verified at user end
- Dose Mapping study carried out challenging with B.I.'s
- Efficiency in dose calculation
- Maximum acceptable weight for processing- 50kg per box/drum
- Automated scissor lift for material movement

Product Segments

- Empty Swabs, Plastic tubes, Bottles, Petri plates
- Powders & Raw Material
- Plastic Packing, Plastic tubes, bottles, Petri plates
- Garments
- Silicon tubes
- Disinfectants
- Pharmaceutical / Cosmetic containers
  - Bottles, Syringes, Eyedroppers, Eyedropper Bottles
  - Surgical Products (disposable products)



Doses

- 6-12 kGy
- 13-20 kGy
- 25-35 kGy
- Above 25kGy (in multiples of 25)

Plot No. - N46, Additional Ambernath MIDC, Anand Nagar, Ambernath (East) 421506, Maharashtra, India

Andrade HiVeg® Peptone Water for usage & grams per litre refer M885	**MV885-100G** ◉	**100gm**	**1030**
Andrade Peptone Water as a basal medium, which with carbohydrate addition is used to study fermentation reactions. It is recommended by BIS Committee under the specifications IS:5887 (Part I and V): 1976, Reaffirmed 2005. g/L : **15.10** **6.62 Lit/100G**	**M885S-100G**	**100gm**	**1005**
Andrade Peptone Water w/ Meat Extract (Revised as Andrade Peptone Water w/HM Extract) as a basal medium for studying fermentation reactions, particularly of members of the *Enterobacteriaceae*. g/L : **18.10** **27.62 Lit/500G**	**M909-500G**	**500gm**	**4820**
Andrade Peptone Water w/ HiVeg® Extract No. 1 for usage & grams per litre refer M909	**MV909-500G** ◉	**500gm**	**5070**
Andrade Peptone Water, Modified for carbohydrate fermentation studies of particularly Enterobacteriaceae members in accordance with FDA BAM, 1998. g/L : **23.02** **21.72 Lit/500G**	**M909F-500G**	**500gm**	**5290**
Antibiotic Assay Medium B for microbiological assay of colistumethate sodium using *Bordetella bronchiseptica* ATCC 4617 & *E.Coli* ATCC 10536. g/L : **45.00 +** **11.11 Lit/500G** **10 gm/lt polysorbate 80** ◀	**M1346-500G**	**500gm**	**5775**
Antibiotic Assay Medium B for microbiological assay of colistumethate sodium using *Bordetella bronchiseptica* ATCC 4617 & *E.Coli* ATCC 10536 in accordance with EP/BP g/L : **44.77+** **11.16 Lit/500G** **10 gm/lt polysorbate 80** ◀	**MAP1346-500G**	**500gm**	**6035**
Antibiotic Assay Medium C as the broth medium in tubidimetric assay of a wide variety of antibiotics. g/L : **20.00** **25 Lit/500G**	**M555-500G**	**500gm**	**5490**
Antibiotic Assay Medium C as the broth medium in turbidimetric assay of a wide variety of antibiotics in accordance with EP/BP. g/L : **19.90** **25.13 Lit/500G**	**MAP555-500G**	**500gm**	**5925**

Product	Code	Packing	Price in ₹
Antibiotic Assay Medium D for microbiological assay of Erythromycin using *Klebsiella pneumoniae*. g/L : **19.40** **25.77 Lit/500G**	**M556-500G**	**500gm**	**5490**
Antibiotic Assay Medium D for the microbiological assay of Erythromycin and Neomycin using *Klebsiella pneumoniae* as a test organism in accordance with EP/BP. g/L : **19.40** **25.77 Lit/500G**	**MAP556-500G**	**500gm**	**5925**
Antibiotic Assay Medium E for microbiological assay of Neomycin sulphate and Framycetin sulphate using *Bacillus subtilis* and *Bacillus pumilus*. g/L : **28.67** **17.44 Lit/500G**	**M1347-500G**	**500gm**	**5515**
Antibiotic Assay Medium E for microbiological assay of Neomycin sulphate and Framycetin sulphate using *Bacillus subtilis* and *Bacillus pumilus* in accordance with EP/BP. g/L : **28.67** **17.44 Lit/500G**	**MAP1347-500G**	**500gm**	**5730**
Antibiotic Assay Medium F for microbiological assay of Amphotericin B and Nystatin using *Saccharomyces cerevisiae* & Candida tropicalis respectively. g/L : **60.00** **8.33 Lit/500G**	**M923-500G**	**500gm**	**5730**
Antibiotic Assay Medium F for microbiological assay of Amphotericin B and Nystatin using *Saccharomyces cerevisiae* & Candida tropicalis in accordance with EP/BP. g/L : **59.09** **8.46 Lit/500G**	**MAP923-500G**	**500gm**	**5955**
Antibiotic Assay Medium G for microbiological assay of Bleomycin sulphate using *Mycobacterium smegmatis*, as a test organism. g/L : **38.00 +** **13.15 Lit/50** **10 gm/lt glycerol**	**M553-500G**	**500gm**	**5715**
Antibiotic Assay Medium G for the microbiological assay of Bleomycin using *Mycobacterium smegmatis*, as a test organism in accordance with EP/BP. g/L : **38.00 +** **13.15 Lit/500G** **10 gm/lt glycerol**	**MAP553-500G**	**500gm**	**5955**
Antibiotic Assay Medium H for turbidimetric assay of Apramycin using *Salmonella Cholerasuis* as a test organism. g/L : **18.00** **27.78 Lit/500G**	**M1665-500G**	**500gm**	**5715**
Antibiotic Assay Medium H for turbidimetric assay of Teicoplanin using *Bacillus subtilis* as a test organism in accordance with EP. g/L : **23.00** **21.74 Lit/500G**	**ME1665-500G**	**500gm**	**5715**
Antibiotic Assay Medium H for the microbiological assay of Teicoplanin using *Bacillus subtilis* ATCC 6633 as a test organism in accordance with BP. g/L : **23.00** **21.74 Lit/500G**	**M1863B-500G**	**500gm**	**6170**
Antibiotic Assay Medium I for the microbiological turbidimetric assay of Apramycin using *Salmonella cholerasuis* as a test organism in accordance with BP 2016. g/L : **18.00** **27.78 Lit/500G**	**M1847B-500G**	**500gm**	**5885**

* On receipt store between 2 - 8°C.
△ Approx. number of vials required per 500gm of powder / granulated medium. ◀ To be added but not provided.
◉ The Animal based peptones in this medium have been fully replaced by TSE/BSE and GMO free Vegetable peptones.

Product	Code	Packing	Price in ₹
Antibiotic Assay Medium L- AOAC for microbiological assay of Monensin using *Bacillus subtilis* ATCC 6633 as test organism. g/L : **28.64** **17.46 Lit/500G**	M991-500G	500gm	5715
Antibiotic Assay Medium M- AOAC for microbiological assay of Lasalocid using *Bacillus subtilis* as test organism. g/L : **33.64** **14.86 Lit/500G**	M992-500G	500gm	5715
Antibiotic Assay Medium No.1 (Seed Agar) for microbiological assay of ß-lactam and other antibiotics. g/L : **30.50** **16.39 Lit/500G**	M003-100G M003-500G	100gm 500gm	1240 4965

Bile Esculin Azide Agar, Granulated for usage & grams per litre refer M493I	GM493I-500G	500gm	11815
Bile Esculin Azide Agar, Modified for rapid, selective detection and enumeration of Enterococci and Group D Streptococci. g/L : **56.25** **8.89 Lit/500G**	M1798-500G MZ	500gm	10595
Bile Esculin Azide Broth, Modified used to differentiate between Enterococci and Group D Streptococci g/L : **42.75** **11.7 Lit/500G**	M1799-500G	500gm	10400
Bile Peptone Transport Medium for safe collection, transport and presentation of cholera organisms. g/L : **25.00** **20 Lit/500G**	M481-500G	500gm	5600
Bile Salt Agar for isolation and enumeration of bile tolerant enteric bacilli from clinical and non-clinical samples. g/L : **43.00** **11.63 Lit/500G**	M739-100G M739-500G	100gm 500gm	1265 5685
Bile Salts Agar for isolation and enumeration of bile tolerant enteric bacteria responsible for food poisoning. It is recommended by BIS committee under the specifications IS:5887(Part V)-1976 Reaffirmed 2005. g/L : **40.00** **12.5 Lit/500G**	M739S-100G M739S-500G	100gm 500gm	1265 5685
Bile Salts Brilliant Green Starch Agar for selective isolation and identification of *Aeromonas hydrophila* from food and environmental specimens. g/L : **45.00** **11.11 Lit/500G**	M1157-500G	500gm	5685
Bile Salts MICRO for use in Bacteriological culture media as selective inhibitory agent.	RM008-500G	500gm	10080
Bile Salts, Certified MICRO a specially manufactured extract of bile salts, recommended as a selective inhibitory agent in microbiological culture media.	CR008-500G	500gm	11160
Bile Salts Mixture MICRO equivalent to Bile Salt No.3 for use in Bacteriological culture media as selective inhibitory agent.	RM009-100G	100gm	4750
Bile Salts Mixture, Certified MICRO for use in microbiological culture media for selective isolation and cultivation of bile tolerant enteric bacteria.	CR009-100G	100gm	8560
Bio Peptone MICRO mixture of Casein & Meat Peptones employed in media used for cultivation of micro organisms.	RM021-500G	500gm	3215
HiVeg® Peptone No. 5 MICRO growth performance at par with Bio peptone employed in media used for cultivation of microorganisms.	RM021V-500G ⦿	500gm	3475
Bio Peptone, Certified MICRO provides a broad spectrum of peptides and amino acids which supports better microbiological growth characteristics to a large variety of organisms.	CR021-500G	500gm	4785

Dehydrated Culture Media, Bases & Media Supplements

MiCroBiology® Understanding Microbes

Product	Code	Packing	Price in ₹
Bird Seed Agar (Staib's Medium) for selective isolation and differentiation of *Cryptococcus neoformans* from other *Cryptococcus* and other yeasts. g/L : **100.83** **0.99 Lit/100G**	**M675-100G**	**100gm**	**2860**
***Diphenyl Supplement** No. of Vials : **01 vial** △	**FD356-5VL**	**5vl**	**715**
Bismuth Sulphite Agar for selective isolation of Salmonellae from faeces, urine, sewage and other materials. g/L : **52.33** **9.55 Lit/500G**	**M027-100G** **M027-500G**	**100gm** **500gm**	**1175** **4995**
Bismuth Sulphite Agar, Granulated for usage & grams per litre refer M027	**GM027-500G**	**500gm**	**5830**

Ready Water Testing Kits

A HiMedia innovation for the speed and accuracy in detection of drinking water microorganisms.

User Profile

- Water Treatment Plants
- Rivers & Streams
- Office Complexes
- Rural Water Supply Tanks
- Housing Societies
- Swimming Pools
- Lakes & Wells
- Hotels & Hospitals
- Bottling Plants etc.

HiSelective™ H_2S Medium Kit (Powder Form) (1 Kit contains 10 bottles) simultaneous detection of *Salmonella*, *Vibrio*, *Citrobacter* and *Escherichia coli* from water samples. No. of tests per KT : **10 tests/KT**	**K022-1KT**	**1kit**	**680**
HiWater Test Kit simultaneous detection of *Salmonella*, *Vibrio* species and *Escherichia coli* from water samples. kit contains (i) Part A Medium Powder (ii) Part B Medium Powder (iii) 2 sterile bottles. No. of tests per KT : **10 tests/10KT**	**K015-10KT**	**10kits**	**2180**
***Rapid HiColiform® Test Kit** rapid detection and confirmation of *Escherichia coli* and coliforms from water samples on the basis of enzyme substrate reaction. No. of tests per KT : **1 test/KT** ◆	**K016-1KT**	**1kit**	**375**
***Rapid HiEnterococci® Test Kit** rapid and easy identification and differentiation of Enterococci from water samples. No. of tests per KT : **1 test/KT** ◆	**K017-1KT**	**1kit**	**395**
***HiSelective™ E. coli Test Kit** for rapid detection and confirmation of *Escherichia coli* from water samples based on enzyme substrate reaction. No. of tests per KT : **1 test/KT** ◆	**K023-1KT**	**1kit**	**680**
H_2S Test Medium (1 pack contains 10 bottles) for detection of *Salmonella* and *Citrobacter* species from water samples. No. of tests per PK : **10 tests/PK**	**K019-1PK**	**1pk**	**680**
⅄ Hi E.Coli Test Kit (1PK contains 10 bottles) Compartment Bag Test for detection and enumeration of *E.coli* from water samples. (replaces MPN tube method) No. of tests per PK **10 tests/PK**	**K092-1PK**	**1pk**	**4230**

* On receipt store between 2 - 8°C. ◆ Each kit contains 1 sterile bottle and 1 powder medium sufficient for single test.
△ Approx. number of vials required per 500gm of powder / granulated medium. ⅄ On receipt store between 15-25°C
◉ The Animal based peptones in this medium have been fully replaced by TSE/BSE and GMO free Vegetable peptones. ➤ If required use

Linden Grain Medium - Reliable Media fill process simulation in beverage bottling

MiCroBiology®
Understanding Microbes

- M1916
- GM1916

Linden Grain Medium is designed for simulating the media fill process in beverage bottling, specifically to test for low-acid beverages.

Key Features:

Optimized Growth Promotion:
Specially formulated to support microbial detection in low-acid beverages with precision.

Granulated Format:
Minimize contamination risk while ensuring easy handling and preparation.

Multiple Packaging Options:
Available in 100g, 500g, 2.5kg, 5kg, 10kg and 25kg sizes to support both small- and large-scale production.

Ensure the highest quality in beverage bottling – Try Linden Grain Medium today!

AC Selective Supplement recommended for selective isolation of MDR strains of *Acinetobacter* One vial is sufficient for 1000 ml medium : M1839 / M1938	FD271-5VL	5 vl	2270
AC3F Selective Supplement is used for the detection of Extended Spectrum β-Lactamase-producing organisms. One vial is sufficient for 500 ml medium : M1829	FD278-5VL	5 vl	1970
ACC Selective Supplement recommended for the selective isolation of Methicillin Resistant *Staphylococcus aureus* One vial is sufficient for 1000 ml medium : M1974	FD319-5VL FD319-5X5VL	5 vl 5x5 vl	1910 5370
ACN Supplement for selective enrichment of *Listeria* species from food samples. One vial is sufficient for 1000 ml medium : M2048	FD342-5VL	5 vl	1675
ACV Selective Supplement recommended for the isolation of Enterohemorrhagic *E. coli* (EHEC). One vial is sufficient for 500 ml medium : M1851	FD284-5VL	5 vl	4855
AD Selective Supplement recommended for selective isolation and differentiation of *Aeromonas* species from water samples using membrane filter technique. One vial is sufficient for 1000 ml medium : M1262	FD107A-5VL FD107A-5X5VL	5 vl 5x5 vl	1440 4510
ANC Selective Supplement recommended for the selective cultivation of *Listeria* species. One vial is sufficient for 500 ml medium : M1578 / MV1578 / GM1578 / M889 / MV889 / GM889 / M1474	FD063I-5VL FD063I-5x5VL	5 vl 5x5 vl	1455 5100
APR Selective Supplement (100 X) (5 ml per vial) recommended for cultivation of *Borrelia burgdorferi*. One vial is sufficient for 500 ml medium : M1668	FD179-5VL	5 vl	1685
ASLA Enrichment Supplement a growth supplement for selective cultivation of *Propionibacteria*. One vial is sufficient for 500 ml medium : M904	FD097-5VL	5 vl	1185
Albumin Glucose Supplement recommended for rapid cultivation of *Mycobacterium tuberculosis*. One vial is sufficient for 200 ml medium : M067 / MV067	FD201-5VL	5 vl	1590

Product	Code	Packing	Price in ₹
AmCC Selective Supplement recommended for the selective isolation of Methicillin Resistant *Staphylococcus aureus* (MRSA) One vial is sufficient for 1000 ml medium : M2126	FD363-5VL	5 vl	1940
Amp Selective Supplement recommended for the selective isolation of *Aeromonas* species. One vial is sufficient for 500 ml medium : M884 / MV884 / MCD884	FD039-5VL	5 vl	1370
Anaero Supplement an enrichment Supplement recommended for the selective isolation or cultivation of nonsporing anaerobic bacteria. One vial is sufficient for 500 ml medium : M832 / MV832 / M863 / MV863	FD001-5VL	5 vl	1525
AntiF MDR Selective Supplement A selective supplement for the isolation of MDR C.auris. One vial is sufficient for 500 ml medium : M2114 / M2123	FD360-5VL	5vl	4660
AzCe Selective Supplement recommended to differentiate *Enterococcus faecium* from *Enterococcus faecalis*. One vial is sufficient for 500 ml medium : M1576 / M1580 / MV1580	FD226-5VL	5 vl	2360
BCSA Selective Supplement An antibiotic supplement recommended for isolation of Burkholderia cepacia from the respiratory secretions of patients with cystic fibrosis and other non-clinical specimens. MU2089	FD361-5VL	5vl	1895
BCYE Growth Supplement recommended for enhancing growth of *Legionella* species. One vial is sufficient for 440 ml medium : M809A / GM809A, If desired M1845	FD142-5VL	5 vl	2100
BCYE Growth Supplement A chemical enrichment supplement recommended for enhancing growth of Legionella species. One vial is sufficient for 100 ml medium : M809A / GM809A, If desired M1845	FD142X-5VL FD142X-5X5VL	5vl 5X5vl	410 1960
BL I Supplement (w/ 3300 IU of Penicillinase) A Beta lactamase enzyme recommended for inactivation of penicillin group of antibiotics. M290 / MV290 / GM290 / MCD290 / M449 / MV449 / GM449	FD267-1VL	1 vl	15245
BL II non sterile powder supplement for inactivation wide range of antibiotics like Penicillins, Cephalosporins of first, second, third & fourth generations and Penems. M290 / MV290 / GM290 / MCD290 / M449 / MV449 / GM449	FD316-1VL	1 vl	On Request

All the above products to be stored between 2 - 8°C.

Product	Code	Packing	Price in ₹
BLm Supplement w/ > 50IU of Cephalosporinase & > 500 IU of Penicillinase A mixture of Beta Lactamase enzymes recommended for inactivation of a wide range of antibiotics like Penicillins, Cephalosporins of first, second, third and fourth generations and Penems. M290 / MV290 / GM290 / MCD290 / M449 / MV449 / GM449	FD268-1VL	1 vl	8285
BLM Supplement w/ 2KIU of Cephalosporinase & 20 KIU of Penicillinase use and media as specified in FD268	FD289-1VL	1 vl	46220
BLm Supplement 50-500 (Sterile) w/ > 50IU of Cephalosporinase & > 500 IU of Penicillinase use and media as specified in FD268	FD268G-1VL	1 vl	9105
BMPA Selective Supplement recommended for selective isolation of *Legionella* species. One vial is sufficient for 450 ml medium : M809A / GM809A	FD144-5VL FD144-5X5VL	5 vl 5x5 vl	1620 4860
BP S Selective Supplement recommended for suppression of *Proteus* species growing on Baird Parker Agar Base. One vial is sufficient for 1000 ml medium : M043 / MV043 / GM043 / MCD043 / M043I	FD069-5VL	5 vl	1245
****BSK-H Supplement** selected for ability to support growth of *Borrelia burgdorferi*. One vial is sufficient for 100 ml medium : M1668	FD180-100ML	1x100 ml	3400
BT Selective Supplement used for the selective enrichment of *Yersinia enterocolitica*. One vial is sufficient for 1000 ml medium : M1861	FD286-5VL FD286-5x5VL	5 vl 5X5 vl	1545 4205
#Basic Fuchsin (0.17 gm per vial) recommended for preparation of Endo Agar which is used for confirmation of the presumptive test for the members of the coliform group. One vial is sufficient for 1000 ml medium : M1481	FD059A-5VL	5 vl	715
#Basic Fuchsin (6.0 gm per vial) recommended for preparation of Endo Agar which is used for confirmation of the presumptive test for the members of the coliform group. M1077 / MV1077	FD059-1VL	1 vl	740
Blaser-Wang Selective Supplement recommended for the selective isolation of *Campylobacter* species. One vial is sufficient for 500 ml medium : M834 / MV834 / MCD834 / M834A / MV834A / GM834A / M074 / MV074 / GM074 / M348 / MV348 / M908 / MV908 / M994 / MV994 / M943 / M144 / MV144 / GM144 / MCD144 / M144A / MV144A / MCD144A / M1268	FD006-5VL	5 vl	1455

Product	Code	Packing	Price in ₹
Bolton Selective Supplement recommended for selective isolation of *Campylobacter* species One vial is sufficient for 500 ml medium : M1592 / GM1592	FD231-5VL	5 vl	1805
Bos Selective Supplement recommended for the selective isolation of *Bordetella pertussis*. One vial is sufficient for 500ml or 1000 ml medium : M175 / M175A / MV175 / MV175A / M344 / MV344 / M1053 / MV1053	FD004-5VL	5 vl	1510
#Bromo Cresol Purple (15 mg per vial) a dye supplement recommended for identification of faecal *Streptococci*. One vial is sufficient for 1000 ml medium : M248 / MV248	FD093-5VL	5 vl	810
#Bromo Thymol Blue Supplement (20 mg per vial) a dye supplement which helps to differentiate microflora in urinary tract. One vial is sufficient for 1000 ml medium : M1146 / MV1146	FD091-5VL	5 vl	565
Butzler Selective Supplement an antibiotic supplement for the isolation of *Campylobacter* species. One vial is sufficient for 500 ml medium : M834 / MV834 / MCD834 / M834A / MV834A / GM834A / M074 / MV074 / GM074 / M348 / MV348 / M908 / MV908 / M994 / MV994 / M144 / MV144 / GM144 / MCD144 / M144A / MV144A / MCD144A / M1268	FD007-5VL FD007-5X5VL	5 vl 5x5 vl	1755 4930
Butzler VI Selective Supplement recommended by ISO for the selective isolation of thermotolarent *Campylobacter* species. One vial is sufficient for 470 ml medium : M144 / MV144 / GM144 / MCD144 / M144A / MV144A / MCD144A	FD106-5VL FD106-5X5VL	5 vl 5x5 vl	1875 4930
C.B.I. Supplement recommended for the selective isolation of *Clostridium botulinum*. One vial is sufficient for 450 ml medium : M911 / MV911	FD049-5VL	5 vl	1545
C3V Selective Supplement recommended for the selective isolation of *Legionella* species from mixed cultures. One vial is sufficient for 500 ml medium : M813 / M892 / MV892	FD037-5VL	5 vl	1835
CA Selective Supplement recommended for rapid and direct identification of *Listeria* species. One vial is sufficient for 500 ml medium : M1417 / M1417F / M1924	FD181-5VL	5 vl	1660
CAC Selective Supplement Recommended for improved detection of Methicillin Resistant *Staphylococcus aureus* (MRSA). One vial is sufficient for 500 ml medium : M1882	FD299-5VL FD299-5X5VL	5 vl 5x5 vl	2380 7155

Store between 10 - 30°C. **On receipt store at (-20°C).
All the above products to be stored between 2 - 8°C.

CAT Selective Supplement recommended for isolation of thermophilic *Campylobacter* species. One vial is sufficient for 500 ml medium : M887 / MV887 / GM887	FD145-5VL	5 vl	1775
CATC Supplement recommended for selective isolation and detection of *Enterococcus* faecalis by means of TTC reduction. One vial is sufficient for 500 ml medium : M1618	FD235-5VL	5 vl	1570
CC Selective Supplement I recommended for the selective isolation of *Clostridium difficile*. One vial is sufficient for 500 ml medium : M836 / MV836 / M1803	FD010-5VL FD010-5X5VL	5 vl 5x5 vl	1575 4130
CC Supplement recommended for the selective isolation of pathogenic fungi. One vial is sufficient for 500 ml medium : M286 / MV286 / GM286	FD035-5VL	5 vl	1455
CCDA Supplement An antibiotic supplement recommended for the selective cultivation of *Campylobacter* or *Arcobacter* species. One vial is sufficient for 500 ml medium : M1637 / M1318 / M887I	FD135-5VL	5 vl	1775
CCDA Supplement An antibiotic supplement recommended for the selective cultivation of *Campylobacter*. One vial is sufficient for 1000 ml medium : M887F	FD135F-5VL	5 vl	1875
CCG Selective Supplement recommended for the selective isolation of pathogenic dermatophytes. One vial is sufficient for 500 ml medium : M188 / GM188	FD015-5VL	5 vl	1575
CCV Supplement An antibiotic supplement recommended for selective isolation of *E. coli* O157:H7. One vial is sufficient for 1000 ml medium : M614 / MV614 / GM614 / MCD614 / M1286 / GM1286	FD247-5VL FD247-5X5VL	5 vl 5x5 vl	1685 4195
CF Selective Supplement recommended for selective isolation of *E. coli* O157:H7. One vial is sufficient for 500 ml medium : M1727	FD246-5VL	5 vl	760
CF Selective Supplement I recommended for the selective isolation of *Campylobacter* species. One vial is sufficient for 500 ml medium : M887 / MV887 / GM887	FD067-5VL	5 vl	1960

Product	Code	Packing	Price in ₹
CF Selective Supplement II recommended for selective isolation of Methicillin Resistant *Staphylococcus* aureus from clinical specimens. M1674 / MV1674 / M1594 / M1953	FD259-5VL	5 vl	1805
CFC Supplement recommended for the selective isolation of *Pseudomonas* species. One vial is sufficient for 500 ml medium : M085 / MV085 / GM085	FD036-5VL FD036-5X5VL	5 vl 5x5 vl	1580 4900
CG Selective Supplement An antimicrobial supplement recommended for the selective isolation of *Brettanomyces* species. One vial is sufficient for 1000 ml medium : M1585	FD228-5VL	5 vl	2340
CM Selective Supplement recommended for the isolation of *Listeria monocytogenes* from mixed flora. One vial is sufficient for 500 ml medium : M1145 / MV1145 / GM1145 / M1145F	FD126-5VL	5 vl	1885
CM Selective Supplement, Modified For use in isolation of *Listeria* species from food samples, in accordance with FDA BAM, 1998. One vial is sufficient for 500 ml medium : M1145F	FD126F-5VL	5 vl	2565
CMF Selective Supplement An antibiotic supplement recommended for selective isolation of *Clostridium perfringens* One vial is sufficient for 500 ml medium : M837 / MV837 / GM837 / MCD837 / M837I / M2046I	FD243-5VL	5 vl	4030
CNA Supplement recommended for selective isolation of anaerobic Gram-positive cocci. One vial is sufficient for 950 ml medium : M291 / MV291	FD115-5VL	5 vl	1805
CO Selective Supplement recommended for the selective isolation and cultivation of *Streptococci*. One vial is sufficient for 500 ml medium : M144A / MV144A / MCD144A / M144 / MV144 / GM144 / MCD144	FD119-5VL FD119-5X5VL	5 vl 5x5 vl	1685 4125
CP Selective Supplement for selective isolation of Listeria *monocytogenes* from food and environmental samples One vial is sufficient for 1000 ml medium : M1895	FD305-5VL	5 vl	1715
CPC Supplement recommended for selective isolation and enumeration of *Vibrio* species from foods One vial is sufficient for 500 ml medium : M1241 / MV1241	FD110-5VL	5 vl	2450
CQPS Selective Supplement for the selective isolation of *Trichoderma harzianum* One vial is sufficient for 1000 ml medium : M1836	FD276-5VL	5 vl	5040

CT Selective Supplement recommended for selective isolation of *Penicillium viridicatum* and related species from foods. One vial is sufficient for 1000 ml medium : M1292 / M1172 / M1584 / M1787	FD120-5VL	5 vl	1285
CT Selective Supplement For use, selective isolation of fungal cultures, in accordance with FDA BAM, 1998. One vial is sufficient for 1000 ml medium : M253F / M096F	FD120F-5VL	5 vl	1190
CTN Selective Supplement recommended for the selective isolation of *Yersinia enterocolitica*. One vial is sufficient for 500 ml medium: M843 / M843F / MV843	FD034-5VL FD034-5X5VL	5 vl 5x5 vl	1455 4385
CY50 Selective Supplement recommended for selective isolation of Lactobacilli from wine. One vial is sufficient for 500 ml medium : M829 / MV829	FD098-5VL FD098-5X5VL	5 vl 5x5 vl	1685 5340
CampyAb Selective Supplement recommended by FDA BAM for selective isolation of *Camplyobacter* species One vial is sufficient for 500 ml medium : M169F	FD294-5VL	5 vl	1915
Carba Selective Supplement for selective isolation of carbapenem resistant Enterobacteriaceae One vial is sufficient for 1000 ml medium : M2099	FD357-5VL	5 vl	2755
CarbK Selective Supplement for selective isolation and easy detection of *Klebsiella* species from water and other sources. One vial is sufficient for 500 ml medium : M1573 / MV1573 / M2052 / M051	FD225-5VL	5 vl	1575
Cef Selective Supplement recommended for selective isolation and enumeration of Campylobacter species. One vial is sufficient for 500 ml medium : M2143	FD365-5VL	5vl	2205
Cetrinix Supplement recommended for the selective isolation of *Pseudomonas* species. One vial is sufficient for 500 ml medium : M085 / MV085 / GM085 / M085I	FD029-5VL FD029-5X5VL	5 vl 5x5 vl	1745 4435
Ch250 Selective Supplement recommended for rapid and direct isolation and identification of Candida species from mixed cultures. One vial is sufficient for 500 ml medium : M1297AR	FD283R-5VL	5 vl	1235

Product	Code	Packing	Price in ₹
Chlor Selective Supplement recommended for the selective isolation of yeasts and moulds. One vial is sufficient for 500 ml medium : M1127 / M1000 / MV1000 / GM1000 / M842 / GM842 / M409 / MV409	FD033-5VL FD033-5X5VL	5 vl 5x5 vl	1235 3720
Chromogenic Supplement recommended for enumeration of faecal coliform by membrane filter technique. One vial is sufficient for 1000 ml medium : M1812	FD270-5VL	5 vl	2720
Cip selective supplement for selective isolation of *Lactobacillus* from a mixed culture. One vial is sufficient for 1000 ml medium : M2065	FD345-5VL	5 vl	1330
CipClin Selective Supplement for the selective cultivation of lactic acid bacteria from food. One vial is sufficient for 1000 ml medium : M2071	FD346-5VL	5 vl	2975
Coagulase Plasma (0.1gm per vial) recommended for studying coagulation reaction in diagnosis of Staphylococci.	FD248-5VL FD248-2X5VL	5 vl 2x5 vl	4000 7180
Coagulase Plasma w/EDTA recommended for studying coagulase reaction in diagnosis of Staphylococci	FD248A-5VL FD248A-2X5VL	5 vl 2x5 vl	4735 8550
Coagulase supplement recommended for enumeration of Coagulase positive Staphylococci 10 vials are sufficient for 1000 ml medium : M2126	FD362-5VL FD362-5x5VL	5 vl 5x5 vl	6510 21490
Col Selective Supplement For use in cultivation and identification of *Vibrio* species from food samples, in accordance with FDA BAM, 1998. One vial is sufficient for 1000 ml medium : M1241F	FD298-5VL	5 vl	2290
ColCef Selective Supplement Modified Listeria Oxford Selective Supplement One vial is sufficient for 1000 ml medium : M1897	FD306-5VL	5 vl	1840
ColRes Selective Supplement for selective isolation of colistin resistant gram negative bacteria. One vial is sufficient for 1000 ml medium : M2094	FD355-5VL	5 vl	2220
Diphenyl Supplement for selective isolation and differentiation of Cryptococcus neoformans. One vial is sufficient for 1000 ml medium : M675	FD356-5VL	5 vl	715

GNA Selective Supplement for selective isolation of *Gardnerella vaginalis*. One vial is sufficient for 500 ml medium : M144 / MV144 / GM144 / MCD144 / M144A / MV144A / MCD144A	**FD056-5VL**	**5 vl**	**1370**
GT Selective Supplement II recommended for rapid & direct isolation & identification of *Candida* species from mixed cultures. One vial is sufficient for 500 ml medium : M1456A / MV1456A	**FD192-5VL** **FD192-5X5VL**	**5 vl** **5x5 vl**	**1715** **4095**
GVPC Selective Supplement recommended for isolation of *Legionella* species. One vial is sufficient for 500 ml medium : M813I / M809A / GM809A, If desired M1845	**FD143-5VL** **FD143-5X5VL**	**5 vl** **5x5 vl**	**1515** **4540**
GVPN Selective Supplement An antibiotic supplement recommended for selective isolation of *Legionella* species. One vial is sufficient for 500 ml medium : M809A / GM809A / M1845	**FD242-5VL**	**5 vl**	**1805**
Gen Selective Supplement An antibiotic supplement used for detection of *Clostridium perfringens* from pharmaceutical products. One vial is sufficient for 1000 ml medium : MH144 / GMH144	**FD252-5VL**	**5 vl**	**1110**
Gen Selective Supplement I recommended for the selective isolation of *Bacteroides* species. One vial is sufficient for 500 ml medium : M805 / MV805	**FD062-5VL**	**5 vl**	**1235**
Genox Selective Supplement recommended for selective isolation and enumeration of yeasts and moulds from meat & meat products. One vial is sufficient for 500 ml medium : M639I / GM639I	**FD131-5VL** **FD131-5X5VL**	**5 vl** **5x5 vl**	**1575** **3775**
George Kimmig Selective Supplement for selective isolation and cultivation of fungi. One vial is sufficient for 500 ml medium : M1232 / MV1232 / GM1232	**FD112-5VL**	**5 vl**	**1525**
1% glacic Selective Supplement A selective supplement recommended for the selective isolation of *Bifidobacterium* species by colony count method from milk products. One vial is sufficient for 500 ml medium : M1734 / GM1734	**FD251-5VL**	**5 vl**	**715**
GroVitAm Enrichment Supplement A chemically defined growth supplement recommended for the isolation of *Ureaplasma urealyticum* and other *Ureaplasma* species. One vial is sufficient for 1000 ml medium M1739	**FD255-5VL** **FD255-5X5VL**	**5 vl** **5x5 vl**	**2315** **8575**

Product	Code	Packing	Price in ₹
Growth Supplement I for MSM recommended for the enrichment of *Salmonella* species. One vial is sufficient for 1000 ml medium : M1864	**FD287-5VL**	**5 vl**	**1230**
Growth Supplement II for MSM recommended for the enrichment of *Salmonella* species. One vial is sufficient for 1000 ml medium : M1864	**FD288-5VL**	**5 vl**	**3475**
Gruft Selective Supplement recommended for the selective cultivation of *Mycobacteria*. One vial is sufficient for 400 ml medium : M162	**FD053-5VL**	**5 vl**	**1440**
HPYT Enrichment Supplement recommended for the isolation of *Mycoplasma*. One vial is sufficient for 70 ml medium : M266 / MV266 / M268 / MV268 / M267 / MV267 / M1586	**FD075-5VL** **FD075-5X5VL**	**5 vl** **5x5 vl**	**4195** **15810**
HYTD Cultivation Supplement recommended for the isolation and cultivation of *Mycoplasma*. One vial is sufficient for 70 ml medium : M1498	**FD198-5VL**	**5 vl**	**6035**
Haematin Growth Supplement a growth supplement for cultivation of *Haemophilus influenzae*. One vial is sufficient for 500 ml medium : M1259 / M2128	**FD117-5VL**	**5 vl**	**1575**
Hayflick Supplement recommended for detection of *Mycoplasmas* in pharmaceutical products, vaccines, cell banks and virus cultures in accordance with European Pharmacopoeia. One vial is sufficient for 500 ml medium : ME1885 / ME1886	**FD300-5VL**	**5 vl**	**1525**
HiAmp Selective Supplement recommended for isolation of *Aeromonas hydrophila* from foods. One vial is sufficient for 1000 ml medium : M1284 / M1283 / M1177 / MV1177	**FD082-5VL**	**5 vl**	**1660**
HiANC Selective Supplement recommended for the selective cultivation of *Listeria* species. One vial is sufficient for 1000 ml medium : M889 / MV889 / GM889 / M1474	**FD063-5VL**	**5 vl**	**1435**
HiCO Selective Supplement for selective isolation of Group A *Streptococci* One vial is sufficient for 1000 ml medium : M1888	**FD302-5VL**	**5 vl**	**1330**

Middlebrook OADC Growth Supplement recommended for the isolation and cultivation of *Mycobacteria*. One vial is sufficient for 500 ml medium : M197 / M196 / M199 / M511 / MV511 / M511A	FD018-5VL	5 vl	3030
Minerals Growth Supplement recommended for the enhanced growth and aerotolerance of *Campylobacter fetus*. One vial is sufficient for 500 ml medium : M834 / MV834 / MCD834 / M834A / MV834A / GM834A / M074 / MV074 / GM074 / M074A / MV074A / M348 / MV348 / M144 / MV144 / GM144 / MCD144 / M144A / MV144A / MCD144A / M169F / M2187I	FD009-5VL	5 vl	1570
Modified C.F.C. Selective Supplement recommended for the selective isolation of *Pseudomonas* species. One vial is sufficient for 500 ml medium : M1848 / M1957	FD281-5VL	5 vl	1605
Modified C.P.C. Supplement For use in cultivation and identification of *Vibrio* species from food samples, in accordance with FDA BAM, 1998. One vial is sufficient for 1000 ml medium : M1241F	FD110F-5VL	5 vl	2565
Mon Selective Supplement A selective supplement recommended for the detection of coliform bacteria using membrane filtration technique. One vial is sufficient for 1000 ml medium : M1951	FD309-2VL FD309-2X5VL	2 vl 2x5 vl	2740 12315
MoxCol Selective Supplement recommended for selective isolation of *Listeria* species. One vial is sufficient for 500 ml medium : M1781	FD266-5VL	5 vl	1885
Mucasol for dilution and digestion of sputum.	FD118-5VL	5 vl	1835
Mup Selective Supplement A selective supplement recommended for the selective isolation of *Bifidobacterium* species by colony count method from milk products. One vial is sufficient for 500 ml medium : M1734 / GM1734	FD250-5VL	5 vl	2755
Mycoprep (for 10 tests) sputum liquefaction and decontamination mixture R032 / R033 / R034	FD173B-1KT	1 kit	6645
Mycoprep (for 2 tests) sputum liquefaction and decontamination mixture R032 / R033 / R034	FD173-1KT	1 kit	1670
NA Selective Supplement recommended for selective isolation of *Pseudomonas aeruginosa* from clinical specimens. One vial is sufficient for 1000 ml medium : M024 / MV024 / GM024 / MCD024 / M1742	FD130-5VL	5 vl	1235

Product	Code	Packing	Price in ₹
NA Selective Supplement II New recommended for the selective isolation, detection and enumeration of bacteriophages from water samples. One vial is sufficient for 1000 ml medium : M2173I	FD368-5VL	5 vl	1455
NAD Supplement recommended for preparation of Mueller Hinton Agar F medium as per EUCAST guidelines. One vial is sufficient for 1000 ml medium : M173 / M1084	FD327-5VL	5 vl	2425
NAMC Selective Supplement An antibiotic supplement recommended for the selective enrichment of Listeria species from food. One vial is sufficient for 1000 ml medium : M2045	FD341-5VL	5 vl	1415
NAT Selective Supplement New An antibiotic supplement recommended for enumeration of intestinal *Enterococci* from surface and waste water. One vial is sufficient for 500 ml medium : M1343	FD148-5VL	5 vl	1550
NC Selective Supplement recommended for the selective isolation of *Staphylococci* and *Streptococci*. One vial is sufficient for 500 ml medium : M144 / MV144 / GM144 / MCD144	FD030-5VL	5 vl	1635
NNP Selective Supplement recommended for the selective cultivation of *Streptococcus* species. One vial is sufficient for 500 ml medium : M834 / MV834 / MCD834 / M834A / MV834A / GM834A / M144 / MV144 / GM144 / MCD144 / M144A / MV144A / MCD144A	FD031-5VL FD031-5X5VL	5 vl 5x5 vl	1325 4130
NO 0.55 Selective Supplement recommended for the selective isolation of *Shigella* species. One vial is sufficient for 1000 ml medium : M1326 / MV1326	FD108-5VL	5 vl	1435
NO 12 Selective Supplement for selective isolation and differentiation of *Salmonella* species from coliforms by chromogenic method. One vial is sufficient for 1000 ml medium : M1843 / GM1843	FD275-5VL	5 vl	1970
NO 15 Selective Supplement recommended for the rapid presumptive detection of *Salmonella* species in foods and feed materials. One vial is sufficient for 1000 ml medium : M845 / MV845 / M1909	FD101-5VL	5 vl	1805
NO 20 Selective Supplement recommended for the detection of *Escherichia coli* 0157:H7 from food. One vial is sufficient for 1000 ml medium : M1286I / GM1286I / M1286 / MV1286 / M1282 Also recommended for the detection of motile Salmonella species from food, faeces and environmental specimens.	FD290-5VL	5 vl	3210

All the above products to be stored between 2 - 8°C.

Product	Code	Packing	Price in ₹
NO 5 Selective Supplement an antibiotic supplement for presumptive identification of *Aeromonas hydrophila*. One vial is sufficient for 250/1000 ml medium : M576 / MV576 / M1285 / GM1285 / M1282 / M1286 / M1286I / MV1286	**FD096-5VL** **FD096-5x5VL**	**5 vl** **5x5 vl**	**1665** **4130**
NoCef Selective Supplement for selective isolation & differentiation of *Salmonella* species from coliforms by chromogenic method. One vial is sufficient for 1000 ml medium : M1842 / MCD1842	**FD274-5VL** **FD274-5X5VL**	**5 vl** **5x5 vl**	**1490** **3980**
NP Selective Supplement recommended for selective isolation and easy detection of *E.coli* O157:H7 from food samples. One vial is sufficient for 1000 ml medium : M1575A / MV1575A / MCD1575A	**FD187-5VL**	**5 vl**	**1015**
NPBCVN Selective Supplement recommended for the selective isolation of *Brucella* species from milk. One vial is sufficient for 500 ml medium : M834 / MV834 / MCD834 / M834A / MV834A / GM834A / M074 / MV074 / GM074 / M348 / MV348 / M822 / M144 / MV144 / GM144 / MCD144 / M144A / MV144A / MCD144A	**FD005-5VL** **FD005-5x5VL**	**5 vl** **5x5 vl**	**1660** **4130**
NPt Selective Supplement recommended for isolation and easy detection of *Escherichia coli* O157:H7 from food and environmental samples. One vial is sufficient for 500 ml medium : M1598	**FD230-5VL**	**5 vl**	**1805**
NYC Supplement recommended for the isolation and cultivation of pathogenic *Neisseria* species. One vial is sufficient for 500 ml medium : M1348	**FD150-5VL**	**5 vl**	**1580**
Neo Enrichment Selective Supplement An antimicrobial supplement recommended for selective isolation of *Listeria* species from samples in 24 hours. One vial is sufficient for 500 ml medium : M1733	**FD249-5VL**	**5 vl**	**1750**
Neo Selective Supplement recommended for isolation and differentiation of *Candida* species. One vial is sufficient for 500 ml medium : M1390	**FD174-5VL**	**5 vl**	**1490**
Neo30 Selective Supplement recommended for selective isolation of *Streptococcus* species. One vial is sufficient for 940 ml medium : M1345	**FD149-5VL**	**5 vl**	**1185**
OA Selective Supplement A selective supplement recommended by ISO Committee for the isolation of *Listeria* species One vial is sufficient for 500 ml medium : M1540I, M1552	**FD212A-5VL**	**5 vl**	**2925**

Product	Code	Packing	Price in ₹
OADS Suplement recommended for the isolation and cultivation of *Mycobacteria*. One vial is sufficient for 500 ml medium : M197 / M196 / M199 / M511 / MV511 / M511A	**FD348-5VL** **FD348-5x5VL**	**5 vl** **5x5 vl**	**3030** **12430**
OFPBL Selective Supplement recommended for selective isolation of *Burkholderia cepacia* from clinical specimens as well as non-clinical samples. One vial is sufficient for 1000 ml medium : M1181	**FD269-5VL**	**5 vl**	**2095**
Oleic Albumin Supplement recommended for the cultivation of *Mycobacterium tuberculosis*. One vial is sufficient for 200 ml medium : M179 / MV179 / M839 / MV839	**FD020-5VL** **FD020-5X5VL**	**5 vl** **5x5 vl**	**1530** **5420**
Oxford Selective Supplement recommended for the selective isolation of *Listeria* species. One vial is sufficient for 500 ml medium : M1145 / MV1145 / GM1145 / M1781 / M1145F	**FD071-5VL**	**5 vl**	**1660**
OxyT Selective Supplement recommended for the selective isolation and cultivation of yeasts and moulds. One vial is sufficient for 500 ml medium : M1467 / M639 / GM639 / M639I / GM639I	**FD032-5VL** **FD032-5x5VL**	**5 vl** **5x5 vl**	**1110** **3655**
PAc Selective Supplement recommended for the selective isolation of *Bifidobacterium* species. One vial is sufficient for 1000 ml medium : M1858	**FD285-5VL**	**5 vl**	**530**
PACRT Selective Supplement a selective supplement for the isolation of *Campylobacter* species from food and environmental samples One vial is sufficient for 1000 ml medium : M1893	**FD303-5VL**	**5 vl**	**1850**
PALCAM Selective Supplement recommended for the selective isolation and identification of *Listeria monocytogenes*. One vial is sufficient for 500 ml medium : M1064 / MV1064 / GM1064 / M1090 / MV1090 / GM1090	**FD061-5VL** **FD061-5x5VL**	**5 vl** **5x5 vl**	**1415** **4815**
PAN Selective Supplement recommended for selective cultivation of *Mycoplasma* associated with urogenital infections. One vial is sufficient for 500 ml medium : M1374	**FD175-5VL** **FD175-5X5VL**	**5 vl** **5x5 vl**	**1805** **4195**
PANC Selective Supplement for selective isolation and differentiation of *Listeria monocytogenes* and other *Listeria* species based on PCPLC activity. One vial is sufficient for 500 ml medium : M2009	**FD333-5VL**	**5 vl**	**2250**

All the above products to be stored between 2 - 8°C.

PB Selective Supplement recommended for selective isolation of *Bacillus species* One vial is sufficient for 1000 ml medium : M1651 / MCD1651	FD324-5VL	5 vl	1805
PC Selective Supplement a liquid Potassium Chlorate Supplement for selective enrichment of *Yersinia enterocolitica*. One vial is sufficient for 1000 ml medium : M1220 / MV1220	FD103-5VL	5 vl	975
PCP Supplement for selective isolation and cultivation of Legionella species from cooling towers, clinical and other materials. The composition and performance criteria of this medium are as per the specifications laid down in ISO 11731-2 One vial is sufficient for 1000 ml medium : M813I	FD347-5VL	5 vl	1835
PDTY Selective Supplement selective supplement for the isolation of Mycoplasma. One vial is sufficient for 1000 ml medium : M2019	FD334-5VL	5 vl	3650
PEMBA Supplement recommended for selective cultivation of Bacillus cereus. One vial is sufficient for 90 ml medium : M1484	FD200-5VL FD200-5X5VL	5 vl 5x5 vl	1380 4225
PG Selective Supplement as selective supplement for isolation of *Ureaplasma urealyticum* and other *ureaplasma* species. One vial is sufficient for 1000 ml medium M1739	FD254-5VL FD254-5X5VL	5 vl 5x5 vl	1445 4005
PGT Selective Supplement recommended for selective isolation of *Burkholderia cepacia*. One vial is sufficient for 500 ml medium : M1640 / MCD1640	FD232-5VL	5 vl	1970
PGV Selective Supplement recommended for the selective isolation of *Legionella* species from mixed cultures. One vial is sufficient for 500 ml medium : M813 / M892 / MV892 / M813I	FD038-5VL	5 vl	1740
PL Selective Supplement recommended for the selective isolation of *Bacillus anthracis*. One vial is sufficient for 1000 ml medium : M1446 / M1451	FD185-5VL	5 vl	1285
PN Selective Supplement recommended for rapid detection of *Clostridium perfringens* from food. One vial is sufficient for 1000 ml medium : M1898	FD307-5VL	5 vl	1360

Product	Code	Packing	Price in ₹
PP Selective Supplement Selective supplement recommended for selective isolation of *Pseudomonas* species. One vial is sufficient for 500 ml medium : M1788	FD264-5VL	5 vl	1345
PP Selective Supplement II Selective supplement recommended for selective isolation of *Pseudomonas* species. One vial is sufficient for 500 ml medium : M1788	FD265-5VL	5 vl	1140
PRTC Selective Supplement recommended for the selective isolation of *Campylobacter* species. One vial is sufficient for 500 ml medium : M899 / MV899 / M939 / MV939 / M2187I	FD042-5VL	5 vl	1455
PS Selective Supplement I recommended for the selective isolation of *Clostridium perfringens*. One vial is sufficient for 500 ml medium : M579 / MV579	FD011-5VL FD011-4x5VL	5 vl 4x5 vl	1040 2920
PS Selective Supplement II recommended for the selective isolation of *Clostridium perfringens*. One vial is sufficient for 500 ml medium : M579 / MV579	FD012-5VL FD012-4x5VL	5 vl 4x5 vl	1435 3760
PTe 1% Selective Supplement (1 ml per vial) for selective isolation of Staphylococci and Corynebacteria. One vial is sufficient for 500 ml medium : MM043 / MU043 / ME043 / M043B / M1091 / GM1091 / M558 / MV558 / M881 / M734 / MV734 / M882 / MV882 / M584I / M259 / MV259 / M474 / M268 / MV268 / M402 / MV402 / M1260 / M448 / M1056 / M023 / MV023 / MCD023 / M023F / MM023 / MU023	FD052-5VL FD052-5x5VL	5 vl 5x5 vl	790 2780
PTe 3.5% Selective Supplement (1 ml per vial) for the selective isolation of Staphylococci and Corynebacteria. M043 / MV043 / GM043 / MCD043 / M043S / M1140 / M584 / GM584 / M015 / MV015	FD047-5VL	5 vl	855
Park and Sanders Selective Supplement I recommended for selective isolation and enumeration of thermotolarent *Campylobacter* species. One vial is sufficient for 950 ml medium : M1185 / MV1185 / M1185I	FD104-5VL	5 vl	1735
Park and Sanders Selective Supplement II recommended for selective isolation and enumeration of thermotolarent *Campylobacter* species. One vial is sufficient for 950 ml medium : M1267 / M1185 / MV1185 / M1185I	FD105-5VL	5 vl	2570
Penta Mix An antibiotic mixture recommended to add in media to reduce contamination of other organisms from suspected tuberculosis positive clinical samples prior to inoculation. If desired can be added to M198 (Middlebrook 7H9 Broth Base).	FD260-5VL	5 vl	1895

Product	Code	Packing	Price in ₹
Poctri Supplement An antimicrobial supplement recommended for selective isolation of *M.tuberculosis* from suspected clinical specimens. One vial is sufficient for 4 ml medium : LQ105	FD241-5VL	5 vl	625
PolyB Selective Supplement antibiotic supplement recommended for the selective isolation of various microorganisms. One vial is sufficient for 500 ml medium : M833 / MV833 / MCD833 / M1837 / M658 / MV658 / M636 / GM636 / MCD636 / M636F / M636S / MV636 / M1139 / MV1139 / M1139I / M1155 / MV1155 / M821 / MV821 / M821I / M011F	FD003-5VL FD003-5x5VL	5 vl 5x5 vl	1370 3955
PolyB Selective Supplement, Modified New recommended for selective enrichment of *Vibrio vulnificus* from seafood samples. One vial is sufficient for 500 ml medium : M2182	FD003A-5VL FD003A-5X5VL	5 vl 5x5 vl	730 2130
50% Potassium Lactate (10 ml per vial) recommended for isolation and enumeration of wild yeasts and in pitching yeasts. One vial is sufficient for 1000 ml medium : M642	FD123-5VL	5 vl	1620
Potassium Sorbate 10% (10 ml per vial) for the detection and isolation of acid resistant yeasts, *Zygosaccharomyces bailii* and *Zygosaccharomyces rouxii* in salads, sauces and dressings. M1291	FD124-5VL	5 vl	1360
RCP Selective Supplement recommended for the selective isolation of *Campylobacter* species. One vial is sufficient for 1000 ml medium : M1152 / MV1152	FD077-5VL	5 vl	1880
Rippey Cabelli Selective Supplement recommended for cultivation of *Aeromonas hydrophila*. One vial is sufficient for 500 ml medium : M859 / MV859	FD107-5VL	5 vl	1440
#Rosolic Acid (0.1 gm per vial) recommended for the selective isolation of coliform bacteria. One vial is sufficient for 1000 ml medium : M1122 / MV1122 / GM1122 / M1124 / MV1124 / M1111 / MV1111	FD058-5VL	5 vl	1685
S Selective Supplement recommended for selective isolation of *Salmonella* species. One vial is sufficient for 500 ml medium : M016 / MV016 / MCD016 / M016A / MV016A / GM016A / M971 / MV971 / GM971 / M971S	FD068-5VL	5 vl	1740
S.F.P. Selective Supplement recommended for the selective isolation of *Clostridium perfringens*. One vial is sufficient for 500 ml medium : M837 / MV837 / GM837 / MCD837 / M1005 / MV1005	FD013-5VL FD013-4x5VL	5 vl 4x5 vl	1185 3085

Product	Code	Packing	Price in ₹
SC Selective Supplement For use, in selective isolation and enumeration of *Yersinia enterocolitica* from food samples, in accordance with FDA BAM, 1998. One vial is sufficient for 500 ml medium : M843F	FD301-5VL	5 vl	215
SEC Selective Supplement A selective supplement for the isolation of Shiga toxin producing *Escherichia coli* . Two vial is sufficient for 1000 ml medium : M2092	FD354-5VL	5 vl	3185
SM Selective Supplement recommended for selective isolation and cultivation of *Pseudomonas solanacearum*. One vial is sufficient for 1000 ml medium : M1289	FD122-5VL	5 vl	1435
SP Selective Supplement - I for selective isolation of *Trichomonas* species from clinical specimens. One vial is sufficient for 500 ml medium : M305 / MV305	FD099-5VL	5 vl	1885
SP Selective Supplement - II recommended for selective isolation of *Trichomonas* species. One vial is sufficient for 500 ml medium : M665 / MV665	FD094-5VL	5 vl	1445
#SalEnrich Selective Supplement recommended for two-step enrichment of sublethally injured Salmonellae from foods and feeds. One vial is sufficient for 250 ml medium : M1685 / GM1685	FD238-5VL FD238-5X5VL	5 vl 5x5 vl	2510 9885
Selective Mix Supplement For detection of Gram-negative bacteria with a reduced susceptibility to carbapenem agents. One vial is sufficient for 500 ml medium : M1831	FD279-5VL	5 vl	1945
Skirrow Selective Supplement recommended for the isolation of *Campylobacter* species. One vial is sufficient for 500 ml medium : M834 / MV834 / MCD834 / M834A / MV834A / GM834A / M074 / MV074 / GM074 / M074A / MV074A / M348 / MV348 / M994 / MV994 / M144 / MV144 / GM144 / MCD144 / M144A / MV144A / MCD144A	FD008-5VL	5 vl	1570
Sodium Biselenite Bud (1 pack contains 50 buds) One bud is sufficient for 100 ml medium : M1536 / M025 / GM025 / MV025 / MU025 / MM025 / M1533I / M1534 / M1537 / M052 / GM052 / MM052 / M025S / M970 / M1079	DB001-1PK	1 pk	3575
Sorbic Acid Supplement recommended for cultivaion of *Lactobacillus* species. One vial is sufficient for 500 ml medium : M1626	FD236-5VL	5 vl	750

Sterile BL I Supplement (Ready to use) (Each vial contains 20ml solution. Activity : 2000 Levy units per ml per min which inactivates 1000,000 IU/ml/min of Penicillin-G) M290 / MV290 / GM290 / MCD290 / M449 / MV449 / GM449	FD314-6VL	6 vl	23110
Sterile BL I, Concentrate (Each vial contains 20 ml of 20,000 Levy units per ml of Penicillinase that can inactivate 10,000,000 IU/ml of Penicillin-G) media as specified in FD268	FD297A-5VL	5 vl	16920
Sterile BLM Liquid (Ready to use) (Each vial contains 10ml of >100IU of Cephalosporinase and >1 KIU of Penase.) media as specified in FD268	FD296-5VL	5 vl	77610
#Sterile Charcoal Supplement recommended for for growth of *Legionella* species. One vial is sufficient for 500 ml medium : M1845	FD280-5VL FD280-5X5VL	5 vl 5x5 vl	880 1920
T.S.C. Selective Supplement recommended for the selective isolation of *Clostridium perfringens*. One vial is sufficient for 500 ml medium : M837 / MV837 / GM837 / MCD837 / M837I / M1005F / M1279 / M1233 / MV1233 / M2046I	FD014-5VL FD014-4x5VL	5 vl 4x5 vl	1555 3860
TC Selective Supplement recommended for isolation of *Escherichia coli* O157:H7 One vial is sufficient for 500 ml medium : M1340 / M298I	FD147-5VL	5 vl	1415
TR Selective Supplement recommended for selective cultivation of yeasts and moulds. One vial is sufficient for 1000 ml medium : M1472 / M1472B / ME1472 / MM1472	FD196-5VL	5 vl	1435
TTC Solution 1% (10 ml per vial) recommended for the detection of microbial growth by means of TTC reduction. One vial is sufficient for 1000 ml medium : M1310 / MV1310 / M586 / MV586 / M248 / MV248 / M249 / MV249 / M1007 / GM1007 / M582 / MV582 / M1048 / M1113 / MV1113 / M1678 / M514 / M1343 / M1390 / M1289 / M616 / MV616 / M616I / GM616I / M1217 If desired M850 / MV850 / M851 / MV851	FD057-5VL FD057-5x5VL	5 vl 5x5 vl	1235 3825
TYCSB Supplement Recommended for selective isolation of *Streptococcus mutans* One vial is sufficient for 1000 ml medium : M1975	FD321-5VL	5 vl	885
Tic Selective Supplement used for the selective enrichment of *Yersinia enterocolitica*. One vial is sufficient for 1000 ml medium : M1220 / MV1220	FD102-5VL	5 vl	1620

Product	Code	Packing	Price in ₹
Tinsdale Selective Supplement (Part A & B) for isolation and presumptive identification of *Corynebacterium diphtheriae*. (1 Kit contains Part A : RM1239-100ML & Part B : FD073-1VL) One vial is sufficient for 1000 ml medium : M314 / MV314	FD073-1KT	1 kit	4830
#Toluidine Blue (0.1 gm per vial) recommended for detection of deoxyribonuclease activity. One vial is sufficient for 1000 ml medium : M482 / MV482 / GM482	FD051-5VL FD051-2X5VL	5 vl 2x5 vl	760 1285
Tribut (10 ml per vial) recommended for detection of lipolytic microorganisms. One vial is sufficient for 990 ml medium : M157 / MV157	FD081-5VL	5 vl	1980
U Solution (Filter Sterilized) recommended for isolation of Ureaplasma urealyticum and other ureaplasma species. One vial is sufficient for 1000 ml medium M1739	FD253-5VL FD253-5X5VL	5 vl 5x5 vl	675 3125
U5 Supplement recommended for selective cultivation of *Mycoplasma hominis* and *Ureaplasma urealyticum*. One vial is sufficient for 425 ml medium : M1374	FD157-5VL FD157-5X5VL	5 vl 5x5 vl	480 1945
U40 Supplement (5 ml per vial) recommended for detection of urease activity in following media : One vial is sufficient for 100 ml medium : M775 / M1076 / M112S / M112 / M112I / M111 / MV112 / M1221	FD048-5VL FD048-5x5VL	5 vl 5x5 vl	550 2205
UVM Selective Supplement I for selective isolation and cultivation of *Listeria monocytogenes*. One vial is sufficient for 500 ml medium : M890A / MV890A	FD136-5VL	5 vl	1245
UVM Selective Supplement II for selective isolation and cultivation of *Listeria monocytogenes* from clinical specimens. One vial is sufficient for 500 ml medium : M890A / MV890A	FD137-5VL	5 vl	1245
V.C.N. Supplement recommended for the selective isolation of *Neisseria gonorrhoeae* and *Neisseria meningitidis*. One vial is sufficient for 500 ml medium : M434 / MV434 / M413 / MV413	FD023-5VL FD023-5X5VL	5 vl 5x5 vl	2430 9015
V.C.N.T. Supplement recommended for the selective isolation of *Neisseria gonorrhoeae* and *Neisseria meningitidis*. One vial is sufficient for 500 ml medium : M434 / MV434 / M413 / MV413	FD024-5VL FD024-5X5VL	5 vl 5x5 vl	2430 9570

Product	Code	Packing	Price in ₹
VCAT Selective Supplement recommended for the selective isolation of *Legionella* species. One vial is sufficient for 500 ml medium : M813 / M809	FD017-5VL	5 vl	1370
VCC Selective Supplement For selective isolation of *Acinetobacter* species. One vial is sufficient for 1000 ml medium : M1839 / M1938	FD335-5VL	5 vl	2345
VF Selective Supplement recommended for selective isolation of Vancomycin Resistant Enterococci (VRE). One vial is sufficient for 500 ml medium : M1830 / M1925	FD277-5VL	5 vl	1875
VIA Supplement for the cultural isolation of *Stenotrophomonas maltophilia*. One vial is sufficient for 1000 ml medium : M1965	FD312-5VL	5 vl	2255
VP Supplement recommended for isolation of Legionella species One vial is sufficient for 1000 ml medium: M814	FD349-5VL	5 vl	1685
VTCA Selective Supplement recommended for the selective isolation of *Campylobacter* pylori. One vial is sufficient for 500 ml medium : M144 / MV144 / GM144 / MCD144 / M144A / MV144A / MCD144A	FD090-5VL	5 vl	1715
Van 3 Selective Supplement recommended for selective isolation of Vancomycin Resistant *Entercocci*. One vial is sufficient for 500 ml medium : M1763	FD261-5VL FD261-5x5VL	5 vl 5x5 vl	1915 4255
Van10 Selective Supplement recommended for isolation of *Cronobacter Sakazakii*. One vial is sufficient for 1000 ml medium : M1786 / M1786I / M1643	FD233-5VL	5 vl	2000
Van100 Selective supplement A selective supplement recommended for isolation of citrate-fermenting lactic acid bacteria. One vial is sufficient for 500 ml medium : M1712 / MV1712	FD245-5VL	5 vl	2205

Product	Code	Packing	Price in ₹
Vanclo T Supplement (V.C.A.T. Supplement) recommended for the selective isolation of *Neisseria* species. One vial is sufficient for 500 ml medium : M434 / MV434 / M2085	FD028-5VL FD028-5X5VL	5 vl 5x5 vl	2065 4975
Vitamin K1 Supplement a vitamin growth supplement for the isolation of anaerobic organisms. One vial is sufficient for 1000 ml medium : M975A, If desired M291 / MV291	FD114-5VL	5 vl	1245
Vitamino Growth Supplement (Twin Pack) recommended for the cultivation of a wide variety of microorganisms. One vial is sufficient for 500 ml medium : M103 / MV103 / M434 / MV434 / M1374 / M1260 / M413 / MV413	FD025-5VL FD025-5x5VL	5 vl 5x5 vl	2430 9570
Vitamino Growth Supplement, Modified (Twin Pack) for the cultural isolation of *Neisseria* and *Haemophilus* species from a variety of clinical specimens. One vial is sufficient for 500 ml medium : M1548 / MV1548	FD215-5VL	5 vl	1740
Willis and Hobb's Supplement recommended for isolation of *Clostridium perfringens* and *Clostridium botulinum* species from food. One vial is sufficient for 475 ml medium : M1375	FD156-5VL	5 vl	1660
XA Selective Supplement recommended for screening Oxacillin Resistant microorganisms. One vial is sufficient for 500 ml medium : M1454	FD191-5VL	5 vl	1380
XLT4 Supplement recommended for isolation of non-typhi *Salmonella*. One vial is sufficient for 1000 ml medium : M1147 / MV1147	FD152-1VL	1 vl	1775
Yeast Autolysate Supplement recommended for the cultivation of *Neisseria* species. One vial is sufficient for 500 ml medium : M103 / MV103 / M434 / MV434 / M1348	FD027-5VL FD027-5X5VL	5 vl 5x5 vl	1160 3720

MiGroBiology®
Understanding Microbes

CULTURE MEDIA BASES

Your perfect choice of media for utilizing raw materials as media ingredients for cultivation of bacteria in small scale and large scale. It is recommended for biomass cultivation required in fermentation studies in various applications; antibiotic manufacturing, enzyme manufacturing, vaccine manufacturing etc.

Product	Page
Culture Media Bases	**241-248**
• Peptones, Extracts, Hydrolysates, Infusions from Animal origin & Plant origin	
• Ingredients to suit Cell Culture Applications	
• Ingredients for Vaccine production, Antibiotic production etc.	
• Ingredients for Media Fill Trials	
• Range of Yeast Extracts	
• Range of Malt Extracts	
• Range of Soyapeptones	
• Equivalent Bacteriological ingredients of Plant origin	

Product	Page
• HiVeg® Peptones	
• HiVeg® Extracts	
• HiVeg® Infusions	
• HiVeg® Special Infusions

HiVeg® MEDIA

Reduce millions of tonnes of carbon footprint each year.

Over last two decades, rapid advances in Biotechnology research has given several quality choices to biologists in terms of resources. HiMedia being always a follower of cutting edge research products, it has successfully created a choice of using vegetable peptones over the animal based peptones for your manufacturing and research. We have substituted animal based peptones with HiVeg™ peptones in maximum range of dehydrated culture media. HiVeg® peptones are made from grains and no animal is slaughtered for its production. It is eco-friendly and costs the same as animal based peptones.

100% ANIMAL FREE MEDIA

- Minimizing carbon footprint
- Ecofriendly
- Free from TSE / BSE risks

OUR RANGE INCLUDES

- Standard Pack Size of 500G
- Bulk Packs of 5KG, 10KG, 25KG etc.

Product	Code	Packing	Price in ₹
Acicase® (Casein Acid Hydrolysate) recommended specially for Pertussis Vaccine production.	RM498-500G	500gm	9930
Acicase®, Certified (Casein Acid Hydrolysate, Certified) recommended for use in culture media where microbiological growth is measured optically, e.g. Antibiotic Assay Media.	CR013-500G	500gm	8785
Acicase®, Certified (Casein Acid Hydrolysate, Certified) Sodium chloride less than 3%.	RM189-500G	500gm	9965
Acicase®, Technical (Casein Acid Hydrolysate, Technical) used in antibiotic sensitivity test media, vaccine preparation media etc.	RM013-500G	500gm	5890
Acicase®, Vitamin Free (Casein Acid Hydrolysate, Vitamin Free) used in bacteriological assay of vitamins and antibiotic sensitivity.	RM190-500G	500gm	9090
Agar powder Applicable for Plant Tissue Culture research and commercial aspects.	PCT0901-500G PCT0901-1KG PCT0901-5KG PCT0901-25KG	500gm 1kg 5kg 25kg	☛ ☛ ☛ On request
Agar powder Specially purified under controlled conditions to be free from nucleases recommended for Molecular Biology.	MB053-100G MB053-500G MB053-1KG	100gm 500gm 1kg	☛ ☛ ☛
Agar powder, Bacteriological grade Bacterial Content as per IP. Recommended for routine bacteriological work and particularly useful in pharmaceutical preparation where it passes in Microbial limit tests for the presence of bacteria.	GRM026P-500G	500gm	☛
Agar powder, Bacteriological grade Recommended for routine bacteriological work where compatibility with other ingredients is not a critical criteria.Bacteriological, gelling temperature not more than 40°C.	GRM026-100G GRM026-500G GRM026-5KG	100gm 500gm 5kg	☛ ☛ ☛
Agar Powder, Certified Extensively processed to guarantee the absence of inhibition, allowing growth of even the most sensitive microorganisms. It can be used in electrophoretic studies, immunodiffusion assays and tissue culture procedures.	CR301-500G	500gm	☛
Agar Powder, Ultrapure Recommended for use in immuno-electrophoretic procedures, nutritional studies (Vitamin Assay Media) or sensitivity testing procedure. Gelling temperature not more than 35°C (Equivalent to Nobel Agar).	RM459-500G	500gm	☛
Agar Powder, Extra pure, Bacteriological Grade Recommended for culture media, disc diffusion susceptibility tests where low mineral/metal content is desirable. Gelling temperature not more than 38°C.	RM301-500G RM301-1KG	500gm 1kg	☛ On request
Agar Granulated, Bacteriological Grade Recommended for culture media disc diffusion susceptibility test where salts have been reduced to minimum Also it is suitable for electrophoretic and immunodiffusion assay including Vitamin assays and tissue cultue work.	RM10848-500G	500gm	☛

Product	Code	Packing	Price in ₹
Agar powder, Purified, Bacteriological Grade Free from all nitrogenous compounds, inorganic salts and vitamins and therefore ideal for culture media and bacteriological work. Gelling temperature not more than 38°C.	RM201-500G RM201-5KG RM201-25KG	500gm 5kg 25kg	☛ On request On request
Agar PT, Pure Purified Agar recommended for general plant tissue culture work and micropropogation.	RM7695-500G RM7695-1KG	500gm 1kg	☛ ☛
Agar PT Recommended for general plant tissue culture work.	RM7691-500G RM7691-1KG	500gm 1kg	☛ ☛
Agar Agar, Type I Recommended for preperation of culture media for microbiological analysis.	GRM666-100G GRM666-500G GRM666-5KG	100gm 500gm 5kg	☛ ☛ ☛
Bile, Dried, Purified used for general purpose.	RM010-500G	500gm	5390
Bile, Dried, Certified used in culture media as a selective inhibitory agent	CR010-500G	500gm	7010
Bile, Bacteriological used in various culture media as a selective inhibitory agent.	RM621-100G RM621-500G	100gm 500gm	1820 8925
Bile Salts for use in Bacteriological culture media as selective inhibitory agent.	RM008-500G	500gm	10080
Bile Salts, Certified a specially manufactured extract of bile salts, prepared from fresh ox bile, is recommended as a selective inhibitory agent in microbiological culture media.	CR008-500G	500gm	11160
Bile Salts Mixture equivalent to Bile Salt No.3 for use in Bacteriological culture media as selective inhibitory agent.	RM009-100G	100gm	4750
Bile Salts Mixture, Certified recommended for use in microbiological culture media for selective isolation and cultivation of bile tolerant enteric bacteria.	CR009-100G	100gm	8560
Bio Peptone mixture of Casein & Meat Peptones employed in media used for cultivation of micro organisms.	RM021-500G	500gm	3215
HiVeg® Peptone No. 5 growth performance at par with Bio peptone employed in media used for cultivation of microorganisms.	RM021V-500G ◉	500gm	3475
Bio Peptone, Certified provides a broad spectrum of peptides and amino acids which supports better microbiological growth characteristics to a large variety of organisms.	CR021-500G	500gm	4785
BHI Powder highly nutritious ingredient, used for cultivation of fastidious microorganisms.	RM188-500G	500gm	3635
HiVeg® Special Infusion growth performance at par with Brain Heart Infusion, highly nutritious ingredient, used for cultivation of fastidious microorganisms.	RM188V-500G ◉	500gm	3920
Casein Acid Hydrolysate, Certified (Acicase®, Certified) Sodium chloride less than 3%.	RM189-500G	500gm	9965

Product	Code	Packing	Price in ₹
Casein Acid Hydrolysate (Acicase®) recommended specially for Pertussis Vaccine production.	RM498-500G	500gm	9930
Casein Acid Hydrolysate, Technical (Acicase®, Technical) used in antibiotic sensitivity test media, vaccine preparation media etc.	RM013-500G	500gm	5890
HiVeg® Acid Hydrolysate growth performance at par with Casein Acid Hydrolysate, Technical, used in antibiotic sensitivity test media, vaccine preparation media etc.	RM013V-500G ⊙	500gm	6360
Casein Acid Hydrolysate, Certified (Acicase®, Certified) recommended for use in culture media where microbiological growth is measured optically, e.g. Antibiotic Assay Media.	CR013-500G	500gm	8785
Casein Acid Hydrolysate (Acicase®, Vitamin free) used in bacteriological assay of vitamins and antibiotic sensitivity.	RM190-500G	500gm	9090
♦Casitose, Type - I (Tryptone Type-1) tryptone, used in sterility testing, diagnostic media preparations.	RM014-500G RM014-2.5KG	500gm 2.5kg	3825 On request
HiVeg® Hydrolysate growth performance at par with Casein Enzyme Hydrolysate used in sterility testing and diagnostic media preparations. Recommended for bulk production of enzymes and antibiotics.	RM014V-500G ⊙	500gm	4135
♦Casitose, Certified (Tryptone, Certified) Tryptone, rich in tryptophan is used by a wide variety of microorganisms. Recommended in a number of media such as Sterility Testing media, Diagnostic media, media for biochemical characterization, etc.	CR014-500G	500gm	4560
♦Casitose, Type-II (Tryptone, Type II) equivalent to Casitone, used in Antibiotic Assay Media.	RM028-500G RM028-5KG	500gm 5kg	3280 On request
HiVeg® Hydrolysate No. 6 growth performance at par with Casein Enzyme hydrolysate Type-II, used in Antibiotic assay media.	RM028V-500G ⊙	500gm	3540
♦Casitose, Type-II, Certified (Tryptone, Type II, Certified) is a refined product providing high quality soluble source of amino acids,polypeptides and peptides. It is a very rich source of Amino Nitrogen. Recommended for Laboratory and fermentation media,for commercial production of antibiotics, toxins and enzymes.	CR028-500G	500gm	3710
♦Casitose, ES, (Tryptone, ES) recommended to be used as a microbial nutrient in laboratory media and fermentation. It is extra soluble as compared to other casein enzyme hydrolysates.	RM9111-500G	500gm	4255
♦Casitose (MB grade) (Tryptone, MB grade) suitable for recombinant strains growth and molecular biology work	RM7707-500G	500gm	4875
♦Casitose enzymic digest of milk protein.	RM714-500G RM714-2.5KG	500gm 2.5kg	3275 On request

Product	Code	Packing	Price in ₹
♦Casitose Soya Meat peptone (Revised as Casitose Soya HM peptone) a mixture of milk protein, soya and meat peptones that provides broad spectrum of peptides and amino acids that supports better microbiological growth characteristics.	RM4902-500G	500gm	7235
♦Casitose Yeast Peptone a mixture of casein and yeast peptones employed in media used for cultivation of wide variety microorganisms.	RM3875-500G	500gm	3275
Certified Peptone recommended as a source of organic nitrogen and growth factor for cultivation of wide variety of microorganisms.	CR031-500G	500gm	7330
Certified Heart Infusion (Revised as Certified HI) a rich nutritive component used in media for cultivation of fastidious microorganisms.	CR032-500G	500gm	7485
Cholic Acid, Sodium Salt see Sodium Cholate.	RM202-25G RM202-100G	25gm 100gm	1700 5995
Combipeptone (mixture of tryptone and yeast extract) it is a mixture of tryptone and yeast hydrolysate at a ratio of 65:35. The synergistic effect helps for the mass cultivation of microorganism and fermentation application.	RM10941-500G	500gm	3275
Fish Collagen, 95% A non-toxic protein from fish skin and scales as an alternative to animal collagen	RM10939-5KG RM10939-10KG	5kg 10kg	On request On request
Fish Peptone suitable for pharmaceutical and vaccine production to reduce Bovine Spongiform Encephalopathy (BSE) risk.	RM2580-500G	500gm	7505
Gelatin Peptone enzymic digest of gelatin used for antibiotic assay media and various fermentation media.	RM020-500G RM020-2.5KG	500gm 2.5kg	3485 On request
HiVeg® Peptone No. 2 growth performance at par with Gelatin Peptone, used in microbiological culture media, for antibiotic assay media and various fermentation media.	RM020V-500G ⊙	500gm	3765
Gluten Hydrolysate, Maize an enzymatic digest of corn protein using non-animal enzymes of microbial or plant origin. Recommended for use in microbial media or as fermentation nutrient.	RM6406-500G ⊙	500gm	3540
Heart Infusion Powder (Revised as HI Powder) a rich nutritive component used in media employed for cultivation of fastidious organisms and antibiotics sensitivity test.	RM191-500G	500gm	4380
HiVeg® Infusion growth performance at par with Heart Infusion, a rich nutritive component used in media employed for cultivation of fastidious organisms and antibiotic sensitivity test.	RM191V-500G ⊙	500gm	4730
HiVeg® Pea Hydrolysate ideal for industrial fermentations and excellent source as veg peptone for microbiological media.	RM9149-500G ⊙	500gm	5310

♦ Casitose word equivalent to casein hydrolysate / casein peptone

All the above products to be stored between 10-30° C. MICRO All the above products are Microbiology Tested

⊙ This product is purely of Vegetable origin free of TSE/BSE risks and free of GMO or allergens.

Product	Code	Packing	Price in ₹
HiVeg® Peptone F recommended for industrial fermentations which support excellent growth for *Streptomyces* species,specially *Actinomyces* species. Rich in nutritional value and is almost equivalent to cotton seed extract.	RM9150-500G	500gm	5315
HL Hydrolysate (Liver Hydrolysate) an ideal ingredient of culture media used for the cultivation of fastidious anaerobic bacteria.	RM023-500G	500gm	3170
HL Hydrolysate Neutralized (Liver Hydrolysate Neutralized) recommended for use in culture medium for cultivation of fastidious anaerobic bacteria.	RM6405-500G	500gm	4010
HL Extract Paste (Liver Extract Paste) used for cultivation of fastidious anaerobic bacteria and bulk production of vaccines, steroids, enzymes etc.	RM7710-500G	500gm	1400
HL Extract powder (Liver Extract Powder) for cultivation of fastidious anaerobic bacteria. Also for bulk production of vaccines, steroids, enzymes etc.	RM326-500G	500gm	3200
HL Infusion Powder (Liver Infusion Powder) suitable for vaccine manufacturing.	RM022-500G	500gm	3170
◗ **HM Peptone B, Paste (Meat Extract B Paste)** refined for use in microbial culture media.	RM274-500G RM274-2.5KG	500gm 2.5kg	1445 On request
◗ **HM Peptone B Powder (Meat Extract B Powder)** refined for use in microbial culture media.	RM002-500G RM002-2.5KG	500gm 2.5kg	2585 On request
◗ **HM Peptone B, Certified (Meat Extract B, Certified)** for the maximum recovery and growth of a wide variety of microorganisms. It is usually incorporated in a concentration of 0.3% to 0.5% when combined with suitable peptones.	CR002-500G	500gm	4600
◗ **HM Peptone B Powder, Type 1 (Meat Extract B Powder, Type 1)** used in media for routine cultivation and diagnostic purposes.	RM669-100G RM669-500G RM669-5KG	100gm 500gm 5kg	555 2645 On request
HM Extract Powder (Meat Extract Powder) used in general purpose and diagnostic media preparations.	RM003-500G	500gm	2980
HM Extract, Certified (Meat Extract, Certified) replaces the meat peptone which yields earlier and heavier growth of microorganisms. Used in bulk production of antibiotics, enzymes and other biological preparations.	CR003-500G	500gm	5340
HM Infusion Powder (Meat Infusion Powder) a highly nutritious ingredient, used in standard nutrient media and as an additive in vaccine preparation.	RM192-500G	500gm	3195
HM Peptone (Meat Peptone) for routine and mass scale cultivation of organisms for antibiotics, enzymes etc.	RM635-500G	500gm	3105
HM Peptone Type P (Meat Peptone Type P) peptone from meat (peptic) is obtained by proteolytic digest of meat with pepsin.	RM1049-500G	500gm	4200
HM Peptone Type T (Meat Peptone Type T) peptone from meat (tryptic) is obtained by proteolytic digest of meat with trypsin.	RM1050-500G	500gm	4375

Product	Code	Packing	Price in ₹
Lactalbumin Hydrolysate rich in essential amino acids and can be succesfully used to supplement microbial culture media for cultivation of Lactobacilli etc	RM012-500G	500gm	5935
HiVeg® Hydrolysate No. 4 rich in essential amino acids and can be succesfully used to supplement microbial culture media for cultivation of Lactobacilli etc	RM012V-500G ◉	500gm	6415
Lactalbumin Hydrolysate, Certified rich in essential amino acids and can be succesfully used to supplement microbial culture media for cultivation of Lactobacilli etc	CR012-500G	500gm	14010
Lactose monohydrate, Sterile (γ-irradiated sterile powder) suitable for use in media fill trials	RM565G-5KG RM565G-50KG	5kg 50kg	On request On request
Lactose Monohydrate, Sterile powder, γ irradiated, Triple pack Lactose Monohydrate, Sterile powder, γ irradiated, Triple pack suitable for use in media fill trials.	RM565GT-5KG	5kg	On request
Liver Extract Paste (Revised as HL Extract Paste) used for cultivation of fastidious anaerobic bacteria and bulk production of vaccines, steroids, enzymes etc.	RM7710-500G	500gm	1400
Liver Extract Powder (Revised as HL Extract powder) for cultivation of fastidious anaerobic bacteria. Also for bulk production of vaccines, steroids, enzymes etc.	RM326-500G	500gm	3200
HiVeg® Extract No. 2 growth performance at par with Liver Extract for cultivation of fastidious anaerobic bacteria. Also for bulk production of vaccines, steroids, enzymes etc.	RM326V-500G ◉	500gm	3455
Liver Hydrolysate (Revised as HL Hydrolysate) an ideal ingredient of culture media used for the cultivation of fastidious anaerobic bacteria.	RM023-500G	500gm	3170
HiVeg® Hydrolysate No. 2 growth performance at par with Liver Hydrolysate, an ideal ingredient of culture media used for the cultivation of fastidious anaerobic bacteria.	RM023V-500G ◉	500gm	3425
Liver Hydrolysate Neutralized (Revised as HL Hydrolysate Neutralized) recommended for use in culture medium for cultivation of fastidious anaerobic bacteria.	RM6405-500G	500gm	4010
Liver Infusion Powder (Revised as HL Infusion Powder) suitable for vaccine manufacturing.	RM022-500G	500gm	3170
HiVeg® Infusion No. 1 growth performance at par with Liver Infusion Powder, suitable for vaccine manufacturing and cultivation of fastidious organisms.	RM022V-500G ◉	500gm	3425
D(+) Maltose, monohydrate for bacteriological purpose.	RM018-100G RM018-500G	100gm 500gm	655 2820
D(+) Maltose, monohydrate, Extra pure NRC grade, for vaccine production.	RM569-100G RM569-500G	100gm 500gm	900 4095

D-Mannitol, A.R. sterile (γ-irradiated) suitable for use in media fill trials. For details refer Chemical section	RM570G-5KG RM570G-50KG	5kg 50kg	On request On request
◗ **Meat Extract B Paste (Revised as HM Peptone B, Paste)** refined for use in microbial culture media.	RM274-500G RM274-2.5KG	500gm 2.5kg	1445 On request
◗ **Meat Extract B Powder (Revised as HM Peptone B Powder)** refined for use in microbial culture media.	RM002-500G RM002-2.5KG	500gm 2.5kg	2585 On request
HiVeg® Extract growth performance at par with HM Peptone B refined for use in microbial culture media.	RM002V-500G	500gm	2795
◗ **Meat Extract B, Certified (Revised as HM Peptone B, Certified)** for the maximum recovery and growth of a wide variety of microorganisms. It is usually incorporated in a concentration of 0.3% to 0.5% when combined with suitable peptones.	CR002-500G	500gm	4600
◗ **Meat Extract B Powder, Type 1 (Revised as HM Peptone B Powder, Type 1)** used in media for routine cultivation and diagnostic purposes.	RM669-100G RM669-500G RM669-5KG	100gm 500gm 5kg	555 2645 On request
Malt Extract Powder ideally suitable for use in media for cultivation of fungi.	RM004-100G RM004-500G	100gm 500gm	690 3275
Malt Extract Powder, Refined purified under controlled condition which is ideally suitable for broth media.	RM004B-500G	500gm	5595
Malt Extract, Certified ideally suitable for use in media for cultivation of fungi.	CR004-500G	500gm	6065
Meat Extract Powder (Revised as HM Extract Powder) used in general purpose and diagnostic media preparations.	RM003-500G	500gm	2980
HiVeg® Extract No. 1 growth performance at par with Meat Extract used in general purpose and diagnostic media preparations, suitable for bulk production of steroid vaccines and enzymes.	RM003V-500G ⊙	500gm	3215
Meat Extract, Certified (Revised as HM Extract, Certified) replaces the meat peptone which yields earlier and heavier growth of microorganisms. Used in bulk production of antibiotics, enzymes and other biological preparations.	CR003-500G	500gm	5340
Meat Infusion Powder (Revised as HM Infusion Powder) a highly nutritious ingredient, used in standard nutrient media and as an additive in vaccine preparation.	RM192-500G	500gm	3195
HiVeg® Infusion No. 2 growth performance at par with HM Infusion Powder, highly nutritious ingredients, used in standard nutrient media and as an additive in vaccine preparation.	RM192V-500G ⊙	500gm	3450
Meat Peptone (Revised as HM Peptone) for routine and mass scale cultivation of organisms for antibiotics, enzymes etc.	RM635-500G	500gm	3105

Product	Code	Packing	Price in ₹
HiVeg® Peptone No. 1 growth performance at par with HM Peptone. Used for routine and large scale cultivation of organisms for production of antibiotics, enzymes etc.	RM635V-500G ⊙	500gm	3355
Meat Peptone Type P (Revised as HM Peptone Type P) peptone from meat (peptic) is obtained by proteolytic digest of meat with pepsin.	RM1049-500G	500gm	4200
Meat Peptone Type T (Revised as HM Peptone Type T) peptone from meat (tryptic) is obtained by proteolytic digest of meat with trypsin.	RM1050-500G	500gm	4375
Mycological Peptone see Peptone M.	RM006-500G	500gm	3745
HiVeg® Mycological Peptone see HiVeg Peptone No.4.	RM006V-500G ⊙	500gm	4050
Mycological Peptone, Certified nutritious source for the isolation, cultivation and identification of saprophytic and dermatophytic fungi-yeast and moulds.	CR006-500G	500gm	4675
Oat Meal Powder recommended for cultivation of fungi in microbiological culture media.	RM2565-500G	500gm	1530
Papaic Digest of Casein (Revised as Papaic Digest of M-protein) it is rich in proteases, peptides and free aminoacids. Recommended for bulk production of antibiotics, enzymes and biomolecules production.	RM9185-500G	500gm	3935
Peptone, Bacteriological contains high tryptophan content. Used as culture media ingredient in variety of media. Also useful for commercial production of enzymes, vaccines, antibiotics and other products.	RM001-500G RM001-1KG RM001-2.5KG	500gm 1kg 2.5kg	3085 5605 On request
HiVeg® Peptone growth performance at par with Peptone, contains high tryptophan content, used as culture media ingredient in variety of media. Also useful for commercial production of enzymes, vaccines, antibiotics and other products.	RM001V-500G ⊙	500gm	3330
HiVeg® Peptone Gamma irradiated Enzymic hydrolysate of vegetable proteins with comparable growth promoting properties as animal origin peptone. Recommended for commercial production of enzymes, vaccines, antibiotics and other products.	RM001VG-500G ⊙	500gm	3615
Peptone, Certified recommended as a source of organic nitrogen and growth factors in culture media, fermentation processes and biological preparations.	CR001-500G	500gm	5540
Peptone M equivalent to Mycological Peptone. Suitable for cultivation of yeasts and moulds.	RM006-500G	500gm	3745
HiVeg® Peptone No. 4 equivalent to Mycological Peptone. Suitable for cultivation of yeasts and moulds.	RM006V-500G ⊙	500gm	4050
Peptone Special equivalent to Neopeptone. An enzymatic protein digest especially adapted for the preparation of media for culturing fastidious bacteria.	RM015-500G	500gm	3615

◗ Equivalent to Beef extract

All the above products to be stored between 10-30° C. MICRO All the above products are Microbiology Tested

Product	Code	Packing	Price in ₹
HiVeg® Peptone Special equivalent to Neopeptone. An enzymatic protein digest especially adapted for the preparation of media for culturing fastidious bacteria.	RM015V-500G ◉	500gm	3900
Peptone Type I, Bacteriological used as culture media ingredient.	RM667-100G RM667-500G RM667-5KG	100gm 500gm 5kg	475 2270 On request
Peptone Type I, Bacteriological granulated Granulated form of Peptone Type I. Mixed enzymic hydrolysate of lean meat tissues. Recommended for general routine bacteriological work including mass cultivation.	RMG667-500G RMG667-5KG	500gm 5kg	2860 On request
Peptone Type III, Bacteriological recommended for general bacteriological work including mass cultivation	RM7709-500G	500gm	1615
Peptone Granulated Granulated form of peptone recommended for general bacteriological work including mass cultivation.	RMG7709-500G	500gm	1785
Peptonized SM Powder suitable for Lactobacilli, yeasts and moulds.	RM275-500G	500gm	3520
HiVeg® Hydrolysate No. 3 growth performance at par with Peptonized Milk, suitable for Lactobacilli, yeasts and moulds.	RM275V-500G ◉	500gm	3800
Proteose Peptone a highly nutritious ingredient employed in media used for bulk production of antibiotics, enzymes, bacterial toxins etc.	RM005-500G RM005-2.5KG	500gm 2.5kg	3710 On request
HiVeg® Peptone No. 3 growth performance at par with Proteose Peptone, a highly nutritious ingredient employed in media used for bulk production of antibiotics, enzymes, bacterial toxins etc.	RM005V-500G ◉	500gm	4005
Proteose Peptone, Certified a highly nutritious ingredient employed in media used for bulk production of antibiotics, enzymes, bacterial toxins etc.	CR005-500G	500gm	7185
Proteose Peptone A enzymic hydrolysate of protein, rich in proteoses, peptide and free amino-acids. Recommended for cultivation of fastidious pathogens and bulk production of antibiotics, enzymes,veterinary preparations and bacterial toxins, specially diphtheria toxin.	RM6394-500G	500gm	3785
HiVeg® Proteose Peptone A growth performance at par with Proteose Peptone A. Rich in protein, proteoses, peptide and free amino acids. Recommended for cultivation of fastidious pathogens and particularly for bulk production of antibiotics, enzymes, veterinary preparations and bacterial toxins, specially diphtheria toxin.	RM6394V-500G ◉	500gm	4085
Proteose Peptone B enzymic hydrolysate of protein, rich in proteoses, peptide and free amino-acids. Provides superior nutrition for fastidious organisms including pyogenic cocci.	RM6392-500G RM6392-2.5KG	500gm 2.5kg	3690 On request
HiVeg® Peptone B growth performance at par with Proteose Peptone B. Rich in proteoses, peptides and free amino acids. Provide superior nutrition for fastidious organisms including pyogenic cocci.	RM6392V-500G ◉	500gm	3985

Product	Code	Packing	Price in ₹
Protose enzymic digest of mixed proteins, recommended for fermentation & vaccine industries	RM280-500G	500gm	3285
Sodium Cholate Cholic acid, sodium salt as a selective inhibitory agent for bacteriological culture media.	RM202-25G RM202-100G	25gm 100gm	1700 5995
Sodium Deoxycholate as a selective inhibitory agent for bacteriological culture media.	RM131-25G RM131-100G	25gm 100gm	5320 18630
Sodium Taurocholate as a selective inhibitory agent for bacteriological culture media.	RM011-500G	500gm	8800
Sodium Taurocholate, Certified a purified component of Ox bile (free from bile acid) is recommended as a selective agent in microbiological culture media.	CR011-500G	500gm	16035
Sodium Tauroglycocholate as Selective inhibitory agent Bacteriological grade.	RM708-500G	500gm	8800
Soya Peptone papaic digest of soyabean meal, plant peptone.	RM007-500G RM007-5KG	500gm 5kg	3190 On request
Soya Peptone, Certified recommended in media that are required to support a short lag phase and smaller generation time to allow rapid luxuriant growth.	CR007-500G	500gm	5375
Soya Peptone Type I plant peptone, is a soluble end product of the enzymic digestion of soyabean meal by papain.	RM7714-500G RM7714-5KG	500gm 5kg	1880 On request
Special Peptone see Peptone Special.	RM015-500G	500gm	3615
HiVeg® Special Peptone growth performance at par with Peptone Special, equivalent to Neopeptone. An enzymatic protein digest especially adapted for the preparation of media for culturing fastidious bacteria.	RM015V-500G ◉	500gm	3900
Special Peptone, Certified specifically designed to maximize the growth of fastidious microorganisms.	CR015-500G	500gm	5915
Tryptone Type-1 see Casitose Type-1	RM014-500G RM014-2.5KG	500gm 2.5kg	3825 On request
HiVeg® Hydrolysate growth performance at par with Casein Enzyme Hydrolysate used in sterility testing and diagnostic media preparations. Recommended for bulk production of enzymes and antibiotics.	RM014V-500G ◉	500gm	4135
Tryptone, Certified (Casitose, Certified)♦ tryptone, recommended in a number of media such as Sterility Testing media, Diagnostic media and media for biochemical characterization, etc.	CR014-500G	500gm	4560
Tryptone-D, Type IV Tryptic digest of casein, recommended for vaccine production.	RM193-500G	500gm	4720
Tryptone, ES (Casitose, ES)♦ recommended to be used as a microbial nutrient in laboratory media and fermentation. It is extra soluble as compared to other casein enzyme hydrolysates.	RM9111-500G	500gm	4255
Tryptone T, Type-III for tetanus toxin, culture media ingredient.	RM029-500G	500gm	4620

CMB

♦ Casitose word equivalent to casein hydrolysate / casein peptone

Product	Code	Packing	Price in ₹
Tryptose bacteriological grade, enzymatic hydrolysate of protein that can replace meat infusion.	RM030-500G RM030-2.5KG	500gm 2.5kg	4200 On request
HiVeg® Hydrolysate No. 1 growth performance at par with Tryptose. Enzymatic hydrolysate of protein that can replace tryptose.	RM030V-500G ◉	500gm	4535
Tryptose, Certified designed to promote luxuriant growth of highly fastidious microorganisms.	CR030-500G	500gm	6855
Tryptone, (MB grade) (Casitose, MB grade)♦ suitable for recombinant strains growth and molecular biology work	RM7707-500G	500gm	4875
Tryptone, Type-II (Casitose, Type II)♦ equivalent to Casitone, used in Antibiotic Assay Media.	RM028-500G RM028-5KG	500gm 5kg	3280 On request
Tryptone, Type II, Certified (Casitose, Type-II, Certified)♦ is a refined product providing high quality soluble source of amino acids,polypeptides and peptides. It is a very rich source of Amino Nitrogen. Recommended for Laboratory and fermentation media,for commercial production of antibiotics, toxins and enzymes.	CR028-500G	500gm	3710
Yeast Autolysate extract from autolysing yeast cells (Saccharomyces) specially cultivated to obtain yeast autolysate.	RM194-500G	500gm	3090
Yeast Extract (Paste) Suitable for Culture Media	RM025-500G	500gm	1795
Yeast Extract Powder Yeast extract is manufactured from selected strains of *Saccharomyces cerevisiae* under control conditions by retaining all the nutritive values, amino acids, vitamins, especially B group and growth factors. It contains low salt and is recommended for microbiological media and for mass cultivation of various microorganisms.	RM027-500G RM027-2.5KG	500gm 2.5kg	2365 On request
Yeast extract Granulated Granulated form of peptone Yeast extract is manufactured from selected strains of Saccharomyces cerevisiae under control conditions by retaining all the nutritive values, amino acids, vitamins, especially B group and growth factors. It contains low salt and is recommended for microbiological media and for mass cultivation of various microorganisms.	RMG027-500G	500gm	2535
Yeast Extract Powder recommended for use in microbial culture media fermentation and other biological products.	RM027F-500G RM027F-2.5KG	500gm 2.5kg	2140 On request
Yeast Extract Powder, Certified rich in vitamins, especially those belonging to B-complex and used particularly for cultivation of microorganisms encountered in milk or other dairy products.	CR027-500G	500gm	3645
Yeast Extract Powder, Type I specially developed for routine bacteriological work.	RM668-100G RM668-500G RM668-5KG	100gm 500gm 5kg	550 2620 On request

Understanding Microbes

ANTIMICROBIAL SUSCEPTIBILITY TESTING SYSTEMS

Your perfect choice of AST for in-vitro determination of antibiograms and minimum inhibitory concentration (MIC) of antibiotics against microbes.

It includes Sensitivity Discs, which are available as Single Discs and Multi Discs (combination of antibiotics) - Hexa, Octo, Dodeca and Icosa Discs.

HiMIC™ Plate Kit, HiComb™ MIC Strips, HiComb™ MIC Strips, Modified and Ezy MIC™ Strips to determine MIC of single, dual or multiple antibiotics using simplest technologies detection of microorganisms.

Product	Prefix	Page
• HiMIC™ Plate Kit	MPK	251-253
• Ezy MIC™ Strips	EM	254-272
» Antibacterial Ezy MIC™ Strips (Single)		254-268
» ESBL Detection Multi Ezy MIC™ Strips		268-269
» AmpC Detection Multi Ezy MIC™ Strips		269
» MBL - ESBL - AmpC Detection Ezy MIC™ Strips		269
» MBL - Detection Dual Ezy MIC™ Strips		270
» KPC Detection Ezy MIC™ Strips		270
» Dual Ezy MIC™ Strips		270
» Antifungal Ezy MIC™ Strips (Single)		270-272
• HiComb™ MIC Strip, Modified	MDM	273-274
• HiComb™ MIC Test (Antibacterial & Antifungal)	MD	275-279
• Antimicrobial Sensitivity Discs	SD	
» Discs as per CLSI and EUCAST standards (Antibacterial & Antifungal agents)		280-284
» Discs only as per EUCAST standard		285
» Non CLSI & Non EUCAST Discs		286-291

Product	Prefix	Page
• Hexa Discs™	HX	292-295
• Octo Discs™	OD	296-301
• Dodeca Discs™	DE	302-306
• Icosa Discs™	IC	307-308
• Zone Size Interpretative Chart (As per CLSI & EUCAST Standards)		309-320
• Quality Control Limits (For Concentration not as per CLSI & EUCAST)		321-323
• MIC Interpretation Chart (For Ezy MIC™ Strips & HiCromb™ MIC Test)		324-340

Factors affecting the performance of Sensitivity Discs

Effects of medium components

The quality of the medium plays major role in antimicrobial susceptibility system. Free electrolyte present in the medium can affect sensitivity of few antimicrobial agents. Hence, Mueller Hinton Agar should be monitored to make sure that it contains acceptable concentrations of divalent cations such as Ca^{++} and Mg^{++} as the increased concentration of Ca^{++} and Mg^{++} results in decreased activity of Aminoglycosides and Tetracyclines whereas the decreased concentration of Ca^{++} and Mg^{++} will have the opposite effect.

If Mueller Hinton Agar contains excessive amounts of thymine or thymidine content, they will reversibly inhibit the action of certain antimicrobial agents such as Sulfonamides, Trimethoprim, Trimethoprim-Sulphomethoxazole etc. which gives smaller or less distinct or even no zones and will be misinterpreted as resistant antibiotics. If zone of inhibition of Sulfonamides, Trimethoprim, Trimethoprim-Sulphomethoxazole will be ≤ 20 mm for *E. faecalis* ATCC 29212 can interpret as medium contains high thymine or thymidine content. Mueller Hinton Agar is low in thymine and thymidine content and it can be used successfully to study the susceptibility of antibiotics.

pH of medium

The pH of the prepared medium is one of the important parameter of disc diffusion method. The pH of prepared medium should fall within acceptable range which is 7.2 to 7.4 as per CLSI. If the pH is outside the stated parameters the zone sizes will be altered, with the degree of alteration determined by the antibiotic group.

For e.g. an increase in pH will results in a decrease in Penicillins and Tetracyclines zones and increase in quinolones, macrolids and aminoglycosides zone; conversely, decrease in pH will results in increase in Penicillins and Tetracyclines zones and decrease in quinolones, macrolids and aminoglycosides zone; pH should perform as a part of the routine quality control tests for each batch of medium prepared.

Depth of agar medium in petri plates

For antimicrobial activity, growth rate of the test organism affects the rate of diffusion of the antimicrobial agent. Hence it is advisable to pour the plates on uniform bench to achieve depth of 4 to 5 mm (Usually 70 ml medium for 150 mm Petri plate, 25 to 30 ml medium for 100 mm Petri plate and 20 to 25 ml medium for 90 mm Petri plate). Variation in depth of medium will affect the zone of inhibition which can give false positive or negative results.

For e.g. If the depth of agar is too thin,larger zones will appear as the antimicrobial compound will diffuse further than it should. If the depth of agar is too thick, smaller zones will appear as the diffusion of antimicrobial agent will be restricted.

Inoculum level

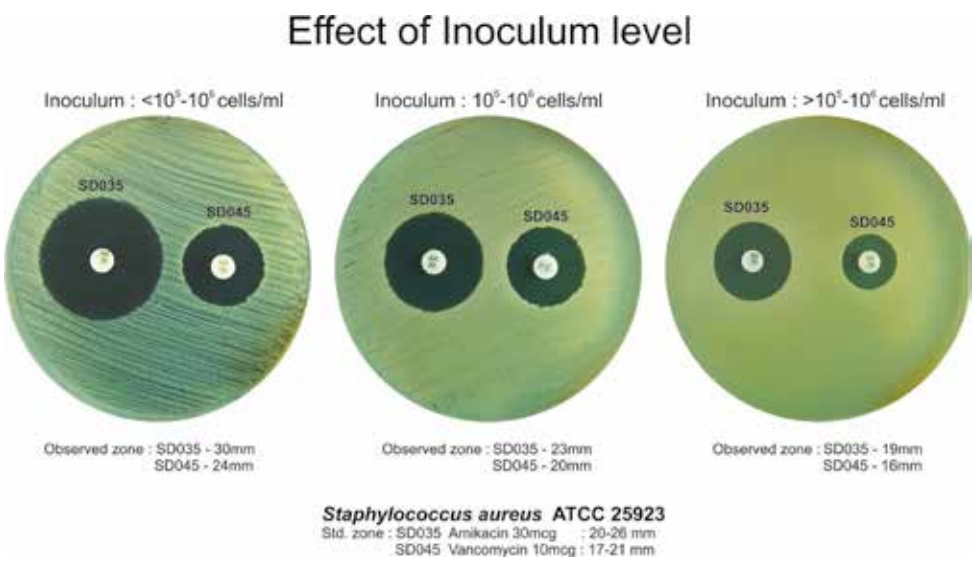
The inoculum level is also one of the most important, and variable factors in susceptibility testing, and will have a profound effect on the zone size obtained. The zone edge is determined when the critical mass is achieved. If the inoculum is heavy, then the critical mass will be achieved in a shorter time and the zone will be smaller. If the inoculum is light, the critical mass takes longer to develop, the antibiotic diffuses further and a larger zone is achieved. It is advisable to use a technique which yields a uniform suspension of correct number of organisms i.e. 10^5-10^6 cells/ml. Even if the density of culture is adjusted due to improper inoculation false results could be obtained. Inoculation method includes correct & even swabbing of plates & correct placement of discs.

Incubation

Incubation for correct time and correct temperature is also very important parameter. Incubation at temperature above 35°C may fail to detect Methicillin Resistant Staphylococci. At temperatures lower than 35°C, the rate of growth of most bacteria is prolonged; also antimicrobial agents diffuse more slowely. Increased CO_2 atmosphere results in decreased pH, which affects the activity of some antimicrobial agents. The plates should therefore be incubated in ambient air atmosphere unless CO_2 is necessary for the growth of the organisms. Hence, calibration of instruments is a must at all stages.

Disc Storage

The antibiotic discs must be stored according to manufacturer's instructions i.e. between -20°C and +8°C in a sealed, desiccated environment. Cartridges not in use should be stored unopened in their original packaging in order to prevent moisture ingress. This is extremely important since it is well known that moisture is a major cause of antibiotic degradation. Opened cartridges must be refrigerated and sealed in the disc dispenser or other suitable container when not in use. Opened cartridges should not be stored for more than one week; cartridges containing ß-lactamase inhibitors (e.g. clavulanic acid, tazobactam and sulbactam) are particularly susceptible to moisture which may results in degradation of antibiotics.



HiMIC™ Plate Kit

Hassle free Broth Micro dilution Method

Innovation

- Wells are coated with the growth medium
- Wells are deposited with exact gradient of antibiotic
- Accurate evaluation of MIC using indicator based system

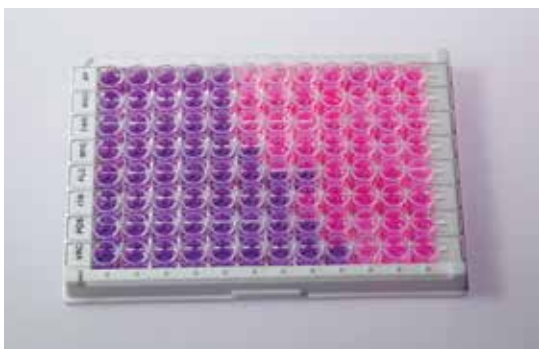
Key Features

- A breakthrough in the evaluation of MIC with ease and accuracy
- Easy breakpoint based visual evaluation
- No instrumentation required
- Interpretation for Sensitive, Intermediate and Resistance as per CLSI & EUCAST guidelines
- 7 concentrations in a single strip covering breakpoint scale
- 12 tests per kit with detachable strips inclusive of diluent, HiMIC™ reading card & separate incubation tray

Multi HiMIC™ Plate Kit

Key Features

- A single plate to determine antibacterial/ antifungal profile.
- **Dodecafungi** : Twelve antibacterial/antifungal agents in a single plate with 7 concentrations.
  Octofungi: Eight antifungal agents with 11 concentrations in a single plate.
- User friendly substitute of traditional broth micro dilution method.
- As per CLSI & EUCAST guidelines.
- Recommended for Bacteria, Yeast and Fungi.



Octofungi 1 HiMIC™ Plate Kit - MPK901

Ceftazidime/Avibactam

(Last line drug for treatment of Carbapenem Resistant Enterobacterales (CRE)

Available in all the format

1. **EM153 :** Ceftazidime/ Avibactam Ezy MIC™ Strip
2. **MDM153 :** Ceftazidime/ Avibactam HiComb™ MIC Strip, Modified
3. **MPK153 :** Ceftazidime/ Avibactam HiMIC™ Plate Kit
4. **SD309 :** Ceftazidime/ Avibactam Susceptibility Disc (30/20 mcg) (As per CLSI)
5. **SD312E :** Ceftazidime/ Avibactam Susceptibility Disc (10/4 mcg) (As per EUCAST)

Customer specific ranges of antibiotic other than the ones available can be designed as per the requirements.

On receipt all the other products to be stored between -20°C to 8°C. For prolonged use, store at or below -20°C.

Ezy MIC™ Strips

MIC DETERMINATION STRIPS

Ezy MIC™ Strip is a thin, inert and porous paper strip coated with antibiotic. Both sides of the strip are likewise printed with the MIC reading scale in mcg/ml and the two or three-letter symbol printed on the top of the strip helps in easy identification of the antibiotic. A predefined exponential gradient of antibiotic, dried and stabilized, is immobilized on either sides of the strip with the concentration maximum at one end and minimum at the other. The gradient covers a continuous concentration range across 15 two-fold dilutions of a conventional MIC method.

- Determines the MIC of fastidious, slow-growing or nutritionally deficient micro-organisms, or for a specific type of patient or infection.
- Confirms/ detects a specific resistant phenotype e.g. ESBL, MBL, VISA/ hVISA. AmpC, MRSA, HLAR.
- Detects low levels of resistance.
- Provides high medical value to critical care cases to, refine or guide treatment decisions. Also helps in determining the choice and dosage of antimicrobials in patients with sterile site infections (e.g. endocarditic), severe nosocomial infections, chronic infections (e.g. cystic fibrosis) and immuno suppressed patients.
- Promotes antibiotic stewardship.

Ezy MIC™ Strips Now Available in Individual Packing

- Recommended for determination of Minimum Inhibitory Concentration
- Individual packing helps in easy handling
- Reduces storage space
- CLSI and EUCAST Compliance

Tigecycline	**TGC**	**EM089-10ST**	**10ST**	**2050**
Range in µg : **0.016 - 256 mcg/ml**		**EM089-30ST**	**30ST**	**5560**
A unique MIC determination paper strip which is coated with Tigecycline on a single strip in a concentration gradient manner, capable of showing MIC's in the range of predefined gradient.		**EM089-60ST**	**60ST**	**10110**
		EM089-90ST	**90ST**	**13780**
		EM089-120ST	**120ST**	**16845**
		EM089-150ST	**150ST**	**18185**
		EM089I-10ST	**10ST**	**2460**
		EM089I-30ST	**30ST**	**6670**
		EM089I-60ST	**60ST**	**12135**
		EM089I-90ST	**90ST**	**16545**
		EM089I-120ST	**120ST**	**20225**
		EM089I-150ST	**150ST**	**21825**
Tobramycin	**TOB**	**EM058-10ST**	**10ST**	**1910**
Range in µg : **0.016 - 256 mcg/ml**		**EM058-30ST**	**30ST**	**5190**
A unique MIC determination paper strip which is coated with Tobramycin on a single strip in a concentration gradient manner, capable of showing MIC's in the range of predefined gradient.		**EM058-60ST**	**60ST**	**9445**
		EM058-90ST	**90ST**	**12880**
		EM058-120ST	**120ST**	**15750**
		EM058-150ST	**150ST**	**17000**
		EM058I-10ST	**10ST**	**2290**
		EM058I-30ST	**30ST**	**6230**
		EM058I-60ST	**60ST**	**11340**
		EM058I-90ST	**90ST**	**15460**
		EM058I-120ST	**120ST**	**18900**
		EM058I-150ST	**150ST**	**20400**
Tobramycin New	**TOB**	**EM167-10ST**	**10ST**	**1970**
Range in µg : **0.064 - 1024 mcg/ml**		**EM167-30ST**	**30ST**	**5345**
A unique MIC determination paper strip which is coated with Tobramycin on a single strip in a concentration gradient manner, capable of showing MIC's in the range of predefined gradient		**EM167-60ST**	**60ST**	**9735**
		EM167-90ST	**90ST**	**13275**
		EM167-120ST	**120ST**	**16215**
		EM167-150ST	**150ST**	**17510**
		EM167I-10ST	**10ST**	**2370**
		EM167I-30ST	**30ST**	**6420**
		EM167I-60ST	**60ST**	**11680**
		EM167I-90ST	**90ST**	**15930**
		EM167I-120ST	**120ST**	**19460**
		EM167I-150ST	**150ST**	**21015**

Product	Symbol	Code	Packing	Price in ₹
Trimethoprim	**TMP**	**EM059-10ST**	**10ST**	**1910**
Range in µg : **0.002 - 32 mcg/ml**		**EM059-30ST**	**30ST**	**5190**
A unique MIC determination paper strip which is coated with Trimethoprim on a single strip in a concentration gradient manner, capable of showing MIC's in the range of predefined gradient.		**EM059-60ST**	**60ST**	**9445**
		EM059-90ST	**90ST**	**12880**
		EM059-120ST	**120ST**	**15750**

ESBL Detection Multi Ezy MIC™ Strips

***Cefepime / Cefepime + Clavulanic acid**	**CPM+/ CPM**	**EM116-10ST**	**10ST**	**2190**
Range : **CPM+ :** Cefepime with Clavulanic acid : 0.064 - 4 **CPM :** Cefepime : 0.25 - 16		**EM116-30ST**	**30ST**	**5975**
For ESBL detection : A unique phenotypic detection strip which is coated with Cefepime + Clavulanic acid on upper half with highest concentration tapering downward whereas lower half is coated with cefepime in a reverse direction.		**EM116-60ST**	**60ST**	**10870**
		EM116-90ST	**90ST**	**14820**
		EM116-120ST	**120ST**	**18120**
		EM116-150ST	**150ST**	**19545**
		EM116I-10ST	**10ST**	**2635**
		EM116I-30ST	**30ST**	**7165**
		EM116I-60ST	**60ST**	**13040**
		EM116I-90ST	**90ST**	**17785**
		EM116I-120ST	**120ST**	**21730**
		EM116I-150ST	**150ST**	**23460**
***Cefotaxime / Cefotaxime + Clavulanic acid**	**CTX + / CTX**	**EM099-10ST**	**10ST**	**2190**
Range : **CTX+ :** Cefotaxime with Clavulanic acid: 0.016 - 1 **CTX :** Cefotaxime : 0.25-16		**EM099-30ST**	**30ST**	**5975**
For ESBL detection : A unique phenotypic detection strip which is coated with Cefotaxime + Clavulanic acid on upper half with highest concentration tapering downward whereas lower half is coated with Cefotaxime in a reverse direction.		**EM099-60ST**	**60ST**	**10870**
		EM099-90ST	**90ST**	**14820**

MBL Detection Dual Ezy MIC™ Strips

Product	Symbol	Code	Packing	Price in ₹
#Imipenem with & without EDTA	**IPM+EDTA / IPM**	EM078-10ST	10ST	2190
		EM078-30ST	30ST	5975
		EM078-60ST	60ST	10870
		EM078-90ST	90ST	14820
		EM078-120ST	120ST	18120
		EM078-150ST	150ST	19545
		EM078I-10ST	10ST	2635
		EM078I-30ST	30ST	7165
		EM078I-60ST	60ST	13040
		EM078I-90ST	90ST	17785
		EM078I-120ST	120ST	21730
		EM078I-150ST	150ST	23460

Range : **Imipenem+EDTA : 1 - 64**
Imipenem: 4 - 256

For MBL detection : A unique phenotypic detection strip which is coated with Imipenem + EDTA on upper half with highest concentration tapering downward whereas lower half is coated with Imipenem in a reverse direction.

***Meropenem with & without EDTA**	**MRP+EDTA / MRP**	EM092-10ST	10ST	2190
		EM092-30ST	30ST	5975
		EM092-60ST	60ST	10870
		EM092-90ST	90ST	14820
		EM092-120ST	120ST	18120

		EM092I-120ST	120ST	21730
		EM092I-150ST	150ST	23460

Range : **Meropenem+EDTA : 1 - 64**
Meropenem: 4 - 256

For MBL detection : A unique phenotypic detection strip which is coated with Meropenem + EDTA on upper half with highest concentration tapering downward whereas lower half is coated with Meropenem in a reverse direction.

KPC Detection Ezy MIC™ Strip

***Ertapenem/ Ertapenem + Boronic acid**	**ETP+/ ETP**	EM141-10ST	10ST	2190
		EM141-30ST	30ST	5975
		EM141-60ST	60ST	10870
		EM141-90ST	90ST	14820
		EM141-120ST	120ST	18120
		EM141-150ST	150ST	19545
		EM141I-10ST	10ST	2635
		EM141I-30ST	30ST	7165
		EM141I-60ST	60ST	13040
		EM141I-90ST	90ST	17785
		EM141I-120ST	120ST	21730
		EM141I-150ST	150ST	23460

Range : **ETP+:** Ertapenem + Boronic acid : 0.032-2
ETP: Ertapenem : 0.125 - 8

For KPC Detection : A unique phenotypic detection strip which is coated with Ertapenem + Boronic acid on upper half with highest concentration tapering downward whereas lower half is coated with Ertapenem in a reverse direction.

Dual Ezy MIC™ Strips

***Oxacillin - Vancomycin**	**OXA / VAN**	EM063-10ST	10ST	2050
		EM063-30ST	30ST	5560
		EM063-60ST	60ST	10110
		EM063-90ST	90ST	13780
		EM063-120ST	120ST	16845
		EM063-150ST	150ST	18185
		EM063I-10ST	10ST	2460
		EM063I-30ST	30ST	6670
		EM063I-60ST	60ST	12135
		EM063I-90ST	90ST	16545
		EM063I-120ST	120ST	20225
		EM063I-150ST	150ST	21825

Range : **Oxacillin : 0.064 - 8 mcg/ml**
Vancomycin : 0.19 - 16 mcg/ml

For MRSA detection : MIC strip which is coated with two different antibiotics on a single strip in a concentration gradient manner. The upper half has Oxacillin with a highest concentration tapering downwards, whereas lower half is similarly coated with Vancomycin concentration gradient in reverse direction.

***Vancomycin - Cefoxitin**	**VAN / CX**	EM077-10ST	10ST	2050
		EM077-30ST	30ST	5560
		EM077-60ST	60ST	10110

		EM077I-120ST	120ST	20225
		EM077I-150ST	150ST	21825

Range : **Cefoxitin: 0.5 - 64 mcg/ml**
Vancomycin : 0.19 -16 mcg/ml

For MRSA detection : MIC strip which is coated with two different antibiotics on a single strip in a concentration gradient manner. The upper half has Vancomycin with a highest concentration tapering downwards, whereas lower half is similarly coated with Cefoxitin concentration gradient.

Vancomycin - Teicoplanin	**VAN / TEI**	EM111-10ST	10ST	2050
		EM111-30ST	30ST	5560
		EM111-60ST	60ST	10110
		EM111-90ST	90ST	13780
		EM111-120ST	120ST	16845
		EM111-150ST	150ST	18185
		EM111I-10ST	10ST	2460
		EM111I-30ST	30ST	6670
		EM111I-60ST	60ST	12135
		EM111I-90ST	90ST	16545
		EM111I-120ST	120ST	20225
		EM111I-150ST	150ST	21825

Range : **Vancomycin : 0.5 - 32 mcg/ml**
Teicoplanin : 0.5 - 32 mcg/ml

For GRD detection : MIC strip which is coated with two different antibiotics on a single strip in a concentration gradient manner. The upper half has Vancomycin with a highest concentration tapering downwards, whereas lower half is similarly coated with Teicoplanin concentration gradient in reverse direction.

Antifungal Ezy MIC™ Strips

Amphotericin B	**AP**	EM071-10ST	10ST	1910

HiComb™ MIC Strip, Modified

Gradient based 15 two fold dilutions in a single strip

Effortless & Precise Minimum Inhibitory Concentration (MIC) Determination

- The strip is made up of inert material with 15 extensions that carry porous material at the edges, resembling tooth of comb.
- It covers 15 two-fold dilutions in a single strip having highest concentration at the top and lowest concentration at the bottom.
- Towards the stem of the strip, MIC reading scale in mcg/ml is given along with HiMedia code.
- The gradient remains stable after diffusion, and the zone of inhibition created takes the form of ellipse.
- Quantitative analysis as per EUCAST and CLSI guidelines.

Antimicrobial Susceptibility Testing - HiComb MIC™ Strips, Modified

MiCroBiology® Understanding Microbes

Product	Symbol	Code	Packing	Price in ₹
Ciprofloxacin Range in µg/ml 0.002 - 32	CIP	MDM017-1PK	1pk	1575
Colistin Range in µg/ml 0.016 - 256	CL	MDM020-1PK	1pk	1810
Co-Trimoxazole (1:19) (Trimethoprim/ Sulfamethoxazole) Range in µg/ml 0.002 - 32	COT	MDM021-1PK	1pk	1575
Daptomycin (Supplemented with Calcium ions) Range in µg/ml 0.016 - 256	DAP	MDM088-1PK	1pk	1875
Doxycycline Range in µg/ml 0.016 - 256	DOX	MDM103-1PK	1pk	1700
***Ertapenem** Range in µg/ml 0.002 - 32	ETP	MDM085-1PK	1pk	1700
Erythromycin Range in µg/ml 0.016 - 256	ERY	MDM022-1PK	1pk	1575
Fosfomycin (supplemented with Glucose-6-phosphate) Range in µg/ml 0.064 - 1024	FOS	MDM108-1PK	1pk	1875
Gentamicin Range in µg/ml 0.016 - 256	GEN	MDM025-1PK	1pk	1575
Kanamycin Range in µg/ml 0.016 - 256	KAN	MDM026-1PK	1pk	1575
Levofloxacin Range in µg/ml 0.002 - 32	LEV	MDM027-1PK	1pk	1575
***Meropenem** Range in µg/ml 0.002 - 32	MRP	MDM080-1PK	1pk	1700
Minocycline Range in µg/ml 0.016 - 256	MIN	MDM032-1PK	1pk	1700
Moxifloxacin Range in µg/ml 0.002 - 32	MXF	MDM033-1PK	1pk	1575
Norfloxacin Range in µg/ml 0.016 - 256	NOR	MDM038-1PK	1pk	1575
Ofloxacin Range in µg/ml 0.002 - 32	OFX	MDM039-1PK	1pk	1575

Product	Symbol	Code	Packing	Price in ₹
***Oxacillin** Range in µg/ml 0.016 - 256	OXA	MDM065-1PK	1pk	1755
***Penicillin** Range in µg/ml 0.002 - 32	PEN	MDM084-1PK	1pk	1575
***Piperacillin** Range in µg/ml 0.016 - 256	PIP	MDM041-1PK	1pk	1575
***Piperacillin/Tazobactam** Range in µg/ml 0.016 - 256	PTZ	MDM042-1PK	1pk	1700
Polymyxin B Range in µg/ml 0.016 - 256	PB	MDM043-1PK	1pk	1700
Teicoplanin Range in µg/ml 0.016 - 256	TEI	MDM055-1PK	1pk	1700
Tetracycline Range in µg/ml 0.016 - 256	TET	MDM056-1PK	1pk	1575
Tigecycline Range in µg/ml 0.016 - 256	TGC	MDM089-1PK	1pk	1810
Tobramycin Range in µg/ml 0.016 - 256	TOB	MDM058-1PK	1pk	1575
Trimethoprim Range in µg/ml 0.002 - 32	TMP	MDM059-1PK	1pk	1575
Vancomycin Range in µg/ml 0.016 - 256	VAN	MDM060-1PK	1pk	1575
Antifungal Agents				
Amphotericin B Range in µg/ml 0.002 - 32	AP	MDM071-1PK	1pk	1750
Fluconazole Range in µg/ml 0.016 - 256	FLC	MDM072-1PK	1pk	1750
Itraconazole Range in µg/ml 0.002 - 32	ITR	MDM073-1PK	1pk	1750
Ketoconazole Range in µg/ml 0.002 - 32	KET	MDM074-1PK	1pk	1750
Voriconazole Range in µg/ml 0.002 - 32	VRC	MDM086-1PK	1pk	1750
Dual HiComb™ MIC Strip, Modified				
Vancomycin/Teicoplanin Range in µg/ml 0.5-32 / 0.5-32 Vancomycin : 0.5-32 Teicoplanin : 0.5-32	VAN/ TEI	MDM111-1PK	1pk	1750

Customer specific ranges of antibiotic other than the ones available can be designed as per the requirements.

HIMEDIA®

HiComb™ MIC Test

Study 16 concentrations of an antibiotic at one time.

HiComb™ Strip

Easy, Accurate & Fast

Convenient and the most economical test for the assessment of minimum inhibitory concentration (MIC) of antimicrobial agent.

- *HiComb consists of a strip made of an inert material, with 8 extensions that carry the discs of 4 mm, resembling the `tooth` of a comb.*
- *Towards the stem of the strip, MIC reading scale in mcg/ml is given along with the HiMedia code.*
- *A defined concentration of antibiotic is loaded on each of the disc so as to form a gradient when placed on agar plate.*
- *When applied to the agar surface, the antibiotic instantaneously diffuses into the surrounding medium in high to low amounts from one end of the strip to the other.*
- *The gradient remains stable after diffusion, and the zone of inhibition created takes the form of ellipse.*

Antibacterial Agents

Product	Symbol	Code	Packing (10 strips A + 10 strips B)	Price in ₹
Amikacin Range in µg A : 256-0.1 B : 4-0.001 Levels in µg A : 256, 128, 64, 32, 16, 8, 4, 0.1 B : 4, 2, 1, 0.5, 0.1, 0.05, 0.01, 0.001	AK	MD001-1PK	1pk	1345

Antibacterial Agents

Concentration of Antibiotics as per CLSI (formerly NCCLS) & EUCAST standards

Now HiMedia AST product range also offers Sensitivity discs as per EUCAST standard (The European Committee on Antimicrobial Susceptibility Testing). For more convenience of user we have separated the list of antibiotic discs as per CLSI, EUCAST & non CLSI & non EUCAST items. The following packaging are our standard packs for Antimicrobial Susceptibility Testing products.

1PK contains 5 cartriges = 5x50 discs in plastic container alongwith applicator.

1VL = 100 discs in vial

5VL = 5x100 discs in vial

5CT = 5x50 discs in blister pack alongwith applicator.

ESBL Identification Test Kit

Kit V for ESBL Identification (As per EUCAST) Kit contains : 1 Vial (100 discs) each of Cefotaxime (SD040), Cefotaxime/ Clavulanic acid (SD724), Ceftazidime (SD062), Ceftazidime/Clavulanic acid (SD207), Cefepime (SD219), Cefepime+Clavulanic acid (SD234)	SD304-1KT	1kit	1480

KPC+MBL Detection Test Kit

KPC+MBL Detection Kit (As per EUCAST) Kit contains : 1 Vial (100 discs) each of Meropenem (SD727), Meropenem + Phenylboronic acid (SD299), Meropenem/ Cloxacillin (SD300), Meropenem/EDTA (SD860)	SD308-1KT	1kit	4070

▲ Packing : 1PK contains 5ct = 5x50 discs in plastic container,
1VL = contains 100 discs in vial,
5VL = 5x100 discs in vial,
5x50DS = 5 vials of 50 discs each,
5CT = contains 5x50 discs in blister pack.

* : On receipt, store at -20°C.
On receipt all the other products to be stored between -20°C to 8°C.
For prolonged use, store at or below -20°C.

Antibacterial Agents

Concentration of Antibiotics not as per CLSI (formerly NCCLS) & not as per EUCAST standards

These codes do not have concentration of Antibiotics as per CLSI (formerly NCCLS) & EUCAST standards, However HiMedia provides these concentrations as required by our users. Although zone interpretative criteria for these codes can not be provided, Quality control limits of standard organisms can be made available.

AST

▲Packing : 1PK contains 5ct = 5x50 discs in plastic container,
1VL = contains 100 discs in vial,
5VL = 5x100 discs in vial,
5x50DS = 5 vials of 50 discs each,
5CT = contains 5x50 discs in blister pack.

* : On receipt, store at -20°C.
On receipt all the other products to be stored between -20°C to 8°C.
For prolonged use, store at or below -20°C.

Antimicrobial Susceptibility Testing - Hexa Discs

HiMedia 6-in-one ready antibiotic combination modules
[To be used on 90 mm plates (PW008) or 100 mm plates (PW060)]

MiCroBiology® Understanding Microbes

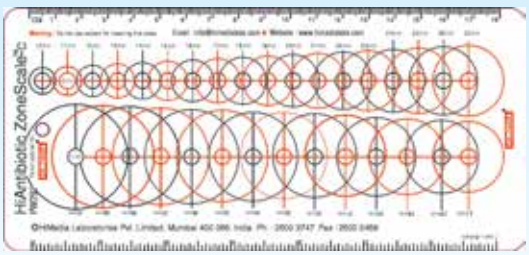
HEXA DISCS

Test 6 different antibiotics at once.

HX082 – Hexa G-plus 16

- *HiMedia`s Hexa discs are enhanced extensions of Single Discs. These series of discs gives the privilege to study 6 antibiotics on a single plate.*
- *These are flat circular rings, made of inert material w/ 6 equidistant arms on the outer periphery w/ a 6 mm filter paper disc at the end.*
- *These discs placed at a distance of 24 mm apart from each other are impregnated with 6 different antibiotics, w/ corresponding symbols & concentrations printed on the ring. The antibiotic impregnated discs function as individual antibiotic susceptibility discs, generating precise circular zones of inhibition for measurement of the zone diameter with minimal merging.*
- *The unique inert material used for making the rings allows faster absorption of the rings and hence a uniform diffusion of the antibiotics on to the medium.*
- *The discs are available in various pre-selected combinations of 6 antibiotics. However rings can be made as per individual customized specification.*
- *These discs are to be used on 100 mm plates like PW060/ 90mm plates like PW001/8. Also available are ready prepared media plates of Mueller Hinton Agar (90 mm) (MP173/MP1084) and Mueller Hinton Agar (100 mm) (MP173C) .*

For accurate measurement of Zone



PW297 – Antibiotic Zone Scale

Note: In product description column **Symbol** & **Quantity** are given in bracket after the Antibiotics name.

Antimicrobial Susceptibility Testing - Hexa Discs

HiMedia 6-in-one ready antibiotic combination modules
[To be used on 90 mm plates (PW008) or 100 mm plates (PW060)]

Product	Code	Packing 1pk= 10 rings	Price in ₹
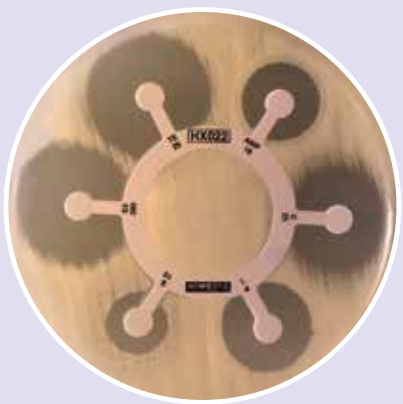
***Hexa UTI 11** Amikacin (AK - 30 mcg), Amoxyclav (AMC - 30 mcg), Ceftriaxone (CTR - 30 mcg), Fosfomycin (FO - 200 mcg), Gentamicin (GEN - 10 mcg), Nitrofurantoin (NIT - 300 mcg)	HX079-1PK	1pk	255
Haemophilus			
***Hexa Haemophilus 6** Amoxyclav (AMC - 30 mcg), Ampicillin (AMP - 10 mcg), Cefotaxime (CTX - 30 mcg), Chloramphenicol (C - 30 mcg), Co-Trimoxazole (COT - 25 mcg), Tetracycline (TE - 30 mcg)	HX086-1PK	1pk	255
Pneumococci			
***Hexa Pneumococci 2** Vancomycin (VA - 30 mcg), Cefuroxime (CXM - 30 mcg), Levofloxacin (LE - 5 mcg), Gentamicin (GEN - 10 mcg), Ampicillin/Sulbactam (A/S - 10/10 mcg) Co-Trimoxazole (COT - 25 mcg)	HX020-1PK	1pk	255
***Hexa Pneumococci-4** Oxacillin (OX - 1 mcg), Co-Trimoxazole (COT - 25 mcg), Erythromycin (E - 15 mcg), Levofloxacin (LE - 5 mcg), Lincomycin (L - 15 mcg), Tetracycline (TE - 30 mcg)	HX042-1PK	1pk	290
***Hexa Pneumococci-8** Chloramphenicol (C - 30 mcg), Co-Trimoxazole (COT - 25 mcg), Levofloxacin (LE - 5 mcg), Oxacillin (OX - 1 mcg), Rifampicin (RIF - 5 mcg), Vancomycin (VA - 30 mcg)	HX046-1PK	1pk	290
Anaerobic Bacteria			
***Hexa Anaerobic 1** Penicillin-G (P - 10 units), Tetracycline (TE - 30 mcg), Lincomycin (L - 2 mcg), Gentamicin (GEN - 10 mcg), Cefotaxime (CTX - 30 mcg), Cefoxitin (CX - 30 mcg)	HX021-1PK	1pk	255

Product	Code	Packing 1pk= 10 rings	Price in ₹
General Purpose			
***Hexa Universal - 1** Bacitracin (B - 10 units), Chloramphenicol (C - 30 mcg), Penicillin-G (P - 10 units), Polymyxin B (PB - 300 mcg), Gentamicin (GEN - 10 mcg), Neomycin (N - 30 mcg)	HX032-1PK	1pk	255
***Hexa Universal-2** Cefotaxime (CTX - 30 mcg), Augmentin (AMC - 30 mcg), Erythromycin (E - 10 mcg), Chloramphenicol (C - 30 mcg),Ofloxacin (OF - 5 mcg), Co-Trimoxazole (COT - 25 mcg)	HX038-1PK	1pk	255
***Hexa Universal - 4** Ampicillin (AMP - 10 mcg), Ampicillin/Sulbactum (A/S - 10/10 mcg), Penicillin-G (P - 10 units), Erythromycin (E - 15 mcg), Gentamicin (HLG - 120 mcg), Ceftriaxone (CTR - 30 mcg)	HX715-1PK	1pk	250
Hexa Universal - 5 Ciprofloxacin (CIP - 5 mcg), Levofloxacin (LE - 5mcg), Clindamycin (CD - 2 mcg), Teicoplanin (TEI - 30 mcg), Vancomycin (VA - 30 mcg), Linezolid (LZ - 30 mcg)	HX716-1PK	1pk	250
Antifungal			
Hexa Antimyco-01 Amphotericin-B (AP - 100 units), Clotrimazole (CC - 10 mcg), Fluconazole (FLC - 25 mcg), Itraconazole (IT - 10 mcg), Ketoconazole (KT - 10 mcg), Nystatin (NS - 100 units)	HX104-1PK	1pk	290



Hexa G-plus 6 – HX022
Tested with *Escherichia coli* ATCC 25922

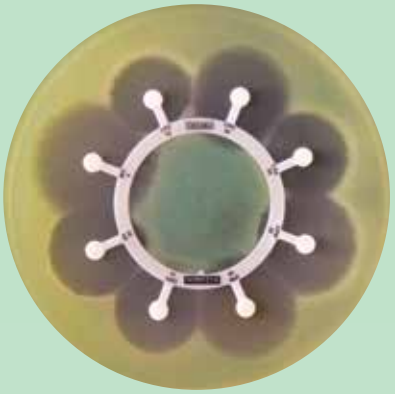
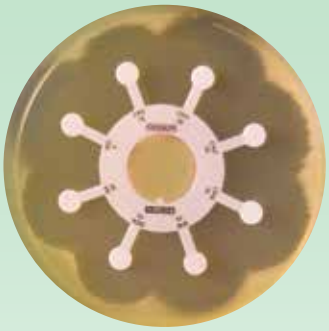
OCTO DISCS

Test 8 different antibiotics in one shot

- *Available in two different sizes, HiMedia`s Octo Discs will help in testing 8 different antibiotics in one shot.*
- *These are flat circular rings, made of inert material w/ 8 equidistant arms on the outer periphery w/ a 6 mm filter paper disc at the end Available in 2 sizes, the smaller size can be used on 90 mm plates, whereas the bigger sizes are to be used on 120 mm plates.*
- *For the bigger size rings, the discs placed at a distance of 24 mm apart from each other are impregnated w/ 8 different antibiotics, w/ corresponding symbols & concentrations printed on the ring. The antibiotic impregnated discs function as individual antibiotic susceptibility discs, generating precise circular zones of inhibition for measurement of the zone diameter with minimal merging.*
- *However for smaller rings, the distance between the two discs is lesser than 24 mm which might lead to merging of zones.*
- *The unique inert material used for making the rings allows faster absorption of the rings and hence a uniform diffusion of the antibiotics on to the medium.*
- *The discs are available in various pre-selected combinations of 8 antibiotics. Also rings can be made as per individual customized specification.*
- *The smaller size rings are to be used on 100 mm plates like PW060 or on 90mm plates like PW001, PW008. Also available are ready prepared media plates of Mueller Hinton Agar (90 mm) (MP173/MP1084) and Mueller Hinton Agar (100 mm) (MP173C).*
- *For the bigger size rings, 120 mm plates like PW1146 are to be used. Also available are ready prepared media plates of Mueller Hinton Agar (120 mm) (MP173M).*



OD282 when tested with *Pseudomonas aeruginosa* ATCC 27853 gives clear unmerged zones.



OD282R when tested with *Pseudomonas aeruginosa* ATCC 27853 gives clear but merged zones.

Note: In product description column **Symbol** & **Quantity** are given in bracket after the Antibiotics name.

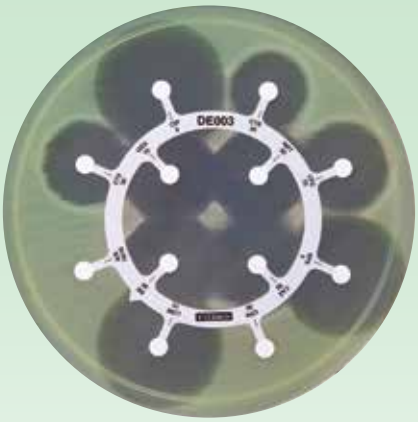
Antimicrobial Susceptibility Testing - Dodeca Discs

HiMedia 12-in-one ready antibiotic combination modules
[To be used on 150 mm plates (PW011)]

DODECA DISCS

12 different antibiotics, for testing on a single 150 mm plate

- *HiMedia`s Dodeca discs are enhanced extensions of Single Discs. These series of discs gives the privilege to study 12 antibiotics on a single plate.*
- *These are flat circular rings, made of inert material w/ 8 & 4 equidistant arms on the outer & inner periphery respectively w/ a 6 mm filter paper disc at the end.*
- *These discs are placed at a distance of 24 mm from each other.*
- *These discs are impregnated w/ 12 different antibiotics, w/ corresponding symbols & concentrations printed on the ring. The antibiotic impregnated discs function as individual antibiotic susceptibility discs, generating precise circular zones of inhibition for measurement of the zone diameter with minimal merging.*
- *The unique inert material used for making the rings aids in quicker absorption of the rings and hence a proper diffusion of the antibiotics on to the medium.*
- *The discs are available in various pre-selected combinations of 12 antibiotics. However rings can also be made as per individual customized specification.*
- *These discs are to be used on 150 mm plates like PW011. Also available are ready prepared media plates of Mueller Hinton Agar (150 mm) (MP173L).*



Dodeca G-I-Minus – DE003
Tested with *Pseudomonas aeruginosa* ATCC 27853

Note: In product description column **Symbol** & **Quantity** are given in bracket after the Antibiotics name.

Product	Code	Packing 1pk= 10 rings	Price in ₹
General purpose			
***Dodeca Universal-I** Cefpodoxime (CPD - 10 mcg), Chloramphenicol (C - 30 mcg), Vancomycin (VA - 30 mcg), Streptomycin (S - 10 mcg), Rifampicin (RIF - 5 mcg), Levofloxacin (LE - 5 mcg), Ceftriaxone (CTR - 30 mcg), Clindamycin (CD - 2 mcg), Augmentin (AMC - 30 mcg), Amikacin (AK - 30 mcg), Cefixime (CFM - 5 mcg), Tetracycline (TE - 30 mcg)	DE001-1PK	1pk	425
***Dodeca Universal-II** Amikacin (AK - 30 mcg), Co-Trimoxazole (COT - 25 mcg), Colistin (CL - 10 mcg), Augmentin (AMC - 30 mcg), Netillin (NET - 30 mcg), Norfloxacin (NX - 10 mcg), Ceftriaxone (CTR - 10 mcg), Ciprofloxacin (CIP - 5 mcg), Cefotaxime (CTX - 30 mcg), Gentamicin (GEN - 10 mcg), Furazolidone (FR - 50 mcg), Amoxicillin (AMX - 10 mcg)	DE007-1PK	1pk	445

Product	Code	Packing 1pk= 10 rings	Price in ₹
***Dodeca Universal-III** Ampicillin (AMP - 10 mcg), Cefuroxime (CXM - 30 mcg), Cefadroxil (CFR - 30 mcg), Augmentin (AMC - 30 mcg), Penicillin-G (P - 10 units), Cefotaxime (CTX - 30 mcg), Cefaclor (CF - 30 mcg) Azithromycin (AZM - 15 mcg), Erythromycin (E - 15 mcg), Cefoperazone (CPZ - 75 mcg), Clarithromycin (CLR - 15 mcg), Ciprofloxacin (CIP - 5 mcg)	DE008-1PK	1pk	425
***Dodeca Universal-IV** Cefuroxime (CXM - 30 mcg), Cefaclor (CF - 30 mcg), Ceftriaxone (CTR - 30 mcg), Cefalexin (CN - 30 mcg), Ceftazidime (CAZ - 30 mcg), Ceftizoxime (CZX - 30 mcg), Cefadroxil (CFR - 30 mcg), Ampicillin/Cloxacillin (AX - 30 mcg), Cefoperazone (CPZ - 75 mcg), Cefotaxime (CTX - 30 mcg), Cefixime (CFM - 5 mcg), Cefazolin (CZ - 30 mcg)	DE012-1PK	1pk	425

* : On receipt, store at -20°C.
On receipt all the other products to be stored between -20°C to 8°C. For prolonged use, store at or below -20°C.
The Code nos. indicated in red have the concentration of antibiotics as per CLSI (formerly NCCLS) Standards.

Antimicrobial Susceptibility Testing - Dodeca Discs

HiMedia 12-in-one ready antibiotic combination modules
[To be used on 150 mm plates (PW011)]

Product	Code	Packing 1pk= 10 rings	Price in ₹
***Dodeca Universal-XIV** Imipenem (IPM - 10 mcg), Amoxyclav (AMC - 30 mcg), Cefotaxime (CTX - 30 mcg), Cefuroxime (CXM - 30 mcg), Levofloxacin (LE - 5 mcg), Norfloxacin (NX - 10 mcg), Co-Trimoxazole (COT - 25 mcg), Doxycycline Hydrochloride (DO - 30 mcg), Chloramphenicol (C - 30 mcg), Gentamicin (GEN - 10 mcg), Amikacin (AK - 30 mcg), Cefoxitin (CX - 30 mcg)	DE035-1PK	1pk	475
***Dodeca Universal-XV** Augmentin (AMC - 30 mcg), Amikacin (AK - 30 mcg), Gatifloxacin (GAT - 5 mcg), Cefepime (CPM - 30 mcg), Meropenem (MRP - 10 mcg), Ceftazidime (CAZ - 30 mcg), Chloramphenicol (C - 30 mcg), Cefuroxime (CXM - 30 mcg), Ceftriaxone (CTR - 30 mcg), Ciprofloxacin (CIP - 5 mcg), Cefoperazone/Sulbactam (CFS - 75/30 mcg), Imipenem (IPM - 10 mcg)	DE042-1PK	1pk	530
Gram-positive Organisms			
***Dodeca G-I-Plus** Azithromycin (AZM - 15 mcg), Amikacin (AK - 30 mcg), Gentamicin (GEN - 10 mcg), Ciprofloxacin (CIP - 5 mcg), Cefadroxil (CFR - 30 mcg), Cefuroxime (CXM - 30 mcg), Roxithromycin (RO - 30 mcg), Ampicillin / Cloxacillin (AX - 10 mcg), Cefotaxime (CTX - 30 mcg), Cefoperazone (CPZ - 75 mcg), Clarithromycin (CLR - 15 mcg), Sparfloxacin (SPX - 5 mcg)	DE002-1PK	1pk	425
***Dodeca G-II-Plus** Cefotaxime (CTX - 30 mcg), Augmentin (AMC - 30 mcg), Cefuroxime (CXM - 30 mcg), Ceftriaxone (CTR - 30 mcg), Amoxicillin (AMX - 10 mcg), Erythromycin (E - 15 mcg), Clindamycin (CD - 2 mcg), Gentamicin (GEN - 10 mcg), Ofloxacin (OF - 5 mcg), Lincomycin (L - 2 mcg), Ciprofloxacin (CIP - 5 mcg), Tobramycin (TOB - 10 mcg)	DE009-1PK	1pk	425
***Dodeca G-III-Plus** Penicillin-G (P - 10 units), Oxacillin (OX - 1 mcg), Erythromycin (E - 15 mcg), Clindamycin (CD - 2 mcg), Linezolid (LZ - 30 mcg), Co-Trimoxazole (COT - 25 mcg), Vancomycin (VA - 30 mcg), Ciprofloxacin (CIP - 5 mcg), Tetracycline (TE - 30 mcg), Cefotaxime (CTX - 30 mcg), Chloramphenicol (C - 30 mcg), Gentamicin (GEN - 10 mcg)	DE018-1PK	1pk	425
***Dodeca G-IV-Plus** Amikacin (AK - 30 mcg), Amoxicillin (AMX - 25 mcg), Cefalexin (CN - 30 mcg), Cefazolin (CZ - 30 mcg), Co-Trimoxazole (COT - 25 mcg), Gentamicin (GEN - 10 mcg), Streptomycin (S - 10 mcg), Amoxyclav (AMC - 30 mcg), Tetracycline (TE - 30 mcg), Ciprofloxacin (CIP - 5 mcg), Teicoplanin (TEI - 30 mcg), Erythromycin (E - 15 mcg)	DE023-1PK	1pk	460

Product	Code	Packing 1pk= 10 rings	Price in ₹
***Dodeca G-V-Plus** Penicillin-G (P - 10 units), Amoxicillin (AMX - 10 mcg), Carbenicillin (CB - 100 mcg), Methicillin (MET - 5 mcg), Azithromycin (AZM - 15 mcg), Clindamycin (CD - 2 mcg), Roxithromycin (RO - 15 mcg), Lincomycin (L - 2 mcg), Vancomycin (VA - 30 mcg), Rifampicin (RIF - 5 mcg), Teicoplanin (TEI - 30 mcg), Linezolid (LZ - 30 mcg)	DE032-1PK	1pk	460
***Dodeca G-VI-Plus** Penicillin-G (P - 10 units), Cloxacillin (COX - 10 mcg), Oxacillin (OX - 1 mcg), Cefazolin (CZ - 30 mcg), Azithromycin (AZM - 15 mcg), Clindamycin (CD - 2 mcg), Vancomycin (VA - 30 mcg), Linezolid (LZ - 30 mcg), Teicoplanin (TEI - 30 mcg), Novobiocin (NV - 5 mcg), Minocycline (MI - 30 mcg), Piperacillin/Tazobactam (PIT - 100/10 mcg)	DE036-1PK	1pk	460
***Dodeca G-VII-Plus** Amoxyclav (AMC - 10 mcg), Co-Trimoxazole (COT - 25 mcg), Tetracycline (TE - 30 mcg), Erythromycin (E - 15 mcg), Cefoperazone (CPZ - 75 mcg), Cefepime (CPM - 30 mcg), Cloxacillin (COX - 5 mcg), Gentamicin (GEN - 10 mcg), Ciprofloxacin (CIP - 5 mcg), Clindamycin (CD - 2 mcg), Linezolid (LZ - 30 mcg), Vancomycin (VA - 30 mcg)	DE038-1PK	1pk	425
***Dodeca G-IX-plus** Penicillin-G (P - 10 units), Cefoxitin (CX - 30 mcg), Cefazolin (CZ - 30 mcg), Cefuroxime (CXM - 30 mcg), Teicoplanin (TEI - 30 mcg), Linezolid (LZ - 30 mcg), Vancomycin (VA - 30 mcg), Amoxyclav (AMC - 30 mcg), Ciprofloxacin (CIP - 5 mcg), Levofloxacin (LE - 5 mcg), Erythromycin (E - 15 mcg), Co-Trimoxazole (COT - 25 mcg)	DE047-1PK	1pk	460
***Dodeca G-Plus 15** Amoxyclav (AMC - 20/10 mcg), Penicillin-G (P - 10 Units), Roxithromycin (RO - 15 mcg), Azithromycin (AZM - 15 mcg), Cefuroxime (CXM - 30 mcg), Cefazolin (CZ - 30 mcg), Cefoxitin (CXM - 30 mcg), Clindamycin (CD - 2 mcg), Tetracycline (TE - 30 mcg), Co-Trimoxazole (COT - 25 mcg), Ciprofloxacin (CIP - 5 mcg), Gentamicin (GEN -10 mcg)	DE736-1PK	1pk	470
***Dodeca G - Plus 17** Cefuroxime (CXM - 30 mcg), Cefoxitin (CX - 30 mcg), Penicillin G (P - 10 Units), Amoxyclave (AMC 20/10 mcg), Ciprofloxacin (CIP - 5 mcg), Levofloxacin (LE - 5mcg), Co-Trimoxazole (COT - 25 mcg), Vancomycin (VA - 30 mcg), Teicoplanin (TEI - 30 mcg), Linezolid (LZ - 30 mcg), Clindamycin (CD - 2 mcg), Azithromycin (AZM - 15 mcg)	DE746-1PK	1pk	485

The Code nos. indicated in red have the concentration of antibiotics as per CLSI (formerly NCCLS) Standards.

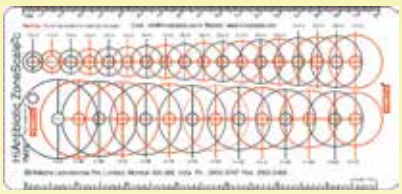
ICOSA DISCS

Test 20 different antibiotics in one shot - efficiently, easily and rapidly.

- *HiMedia`s Icosa discs are enhanced extensions of Single Discs. These series of discs gives the privilege to study 20 antibiotics at one time.*
- *These are flat circular rings, made of inert material w/ 12 & 8 equidistant arms on the outer & inner periphery respectively w/ a 6 mm filter paper disc at the end.*
- *These discs are impregnated w/ different antibiotics, w/ corresponding symbols & concentrations printed on the ring The antibiotic impregnated discs function as individual antibiotic susceptibility discs, generating precise circular zones of inhibition for measurement of the zone diameter.*
- *Moreover the discs are designed in such a way that each antibiotic disc on a single ring is atleast 24 mm apart from the others, thus reducing the merging of zones.*
- *The unique inert material used for making the rings enhances the absorption of the ring and hence a proper diffusion of the antibiotics on to the medium.*
- *The discs are available in various pre-selected combinations of 20 antibiotics. But rings can be made as per individual customized specification.*
- *These discs are to be used on 200 mm plates like PW010. Also available are ready prepared media plates of Mueller Hinton Agar (200 mm) (MP173XL).*



Antibiotic Zone Scale – PW297

Note: In product description column **Symbol** & **Quantity** are given in bracket after the Antibiotics name.

The Code nos. indicated in red have the concentration of antibiotics as per CLSI (formerly NCCLS) Standards.

Antimicrobial Susceptibility Testing - Icosa Discs

HiMedia 20-in-one ready antibiotic combination modules
[To be used on 200 mm plates (PW010)]

Product	Code	Packing 1pk= 10 rings	Price in ₹
Gram-positive Organisms			
***Icosa G-I-Plus** Cephalothin (CEP - 30 mcg), Clindamycin (CD - 2 mcg), Co-Trimoxazole (COT - 25 mcg), Erythromycin (E - 15 mcg), Gentamicin (GEN - 10 mcg), Ofloxacin (OF - 5 mcg), Penicillin-G (P - 10 units), Vancomycin (VA - 30 mcg), Ampicillin (AMP - 10 mcg), Chloramphenicol (C - 30 mcg), Oxacillin (OX - 1 mcg), Linezolid (LZ - 30 mcg), Azithromycin (AZM - 15 mcg), Amikacin (AK - 30 mcg), Clarithromycin (CLR - 15 mcg), Teicoplanin (TEI - 10 mcg), Methicillin (MET - 5 mcg), Amoxyclav (AMC - 30 mcg), Novobiocin (NV - 5 mcg), Tetracycline (TE - 30 mcg)	IC002-1PK	1pk	1010
Gram - negative Organisms			
***Icosa G-I-Minus** Imipenem (IPM - 10 mcg), Ciprofloxacin (CIP - 5 mcg), Tobramycin (TOB - 10 mcg), Moxifloxacin (MO - 5 mcg), Ofloxacin (OF - 5 mcg), Sparfloxacin (SPX - 5 mcg), Levofloxacin (LE - 5 mcg), Norfloxacin (NX - 10 mcg), Co-Trimoxazole (COT - 25 mcg), Colistin (CL - 10 mcg), Nalidixic acid (NA - 30 mcg), Augmentin (AMC - 30 mcg), Kanamycin (K - 30 mcg), Gatifloxacin (GAT - 5 mcg), Gentamicin (GEN - 10 mcg), Amikacin (AK - 30 mcg), Streptomycin (S - 25 mcg), Ceftriaxone (CTR - 30 mcg), Cefpodoxime (CPD - 10 mcg), Ticarcillin (TI - 75 mcg)	IC003-1PK	1pk	1095
***Icosa G-II-Minus** Imipenem (IPM - 10 mcg), Ciprofloxacin (CIP - 5 mcg), Tobramycin (TOB - 10 mcg), Moxifloxacin (MO - 5 mcg), Ofloxacin (OF - 5 mcg), Ceftazidime (CAZ - 30 mcg), Levofloxacin (LE - 5 mcg), Norfloxacin (NX - 10 mcg), Co-Trimoxazole (COT - 25 mcg), Colistin (CL - 10 mcg), Nalidixic acid (NA - 30 mcg), Augmentin (AMC - 30 mcg), Cefoxitin (CX - 30 mcg), Gatifloxacin (GAT - 5 mcg), Gentamicin (GEN - 10 mcg), Amikacin (AK - 30 mcg), Aztreonam (AT - 30 mcg), Ceftriaxone (CTR - 30 mcg), Cefpodoxime (CPD - 10 mcg), Nitrofurantoin (NIT - 300 mcg)	IC008-1PK	1pk	1095

Icosa G-I-Minus – IC003
Tested with *Escherichia coli* ATCC 25922

Product	Code	Packing 1pk= 10 rings	Price in ₹
UTI Pathogenic Organisms			
***Icosa UTI - 1** Ampicillin (AMP - 10 mcg), Cefotaxime (CTX - 30 mcg), Cephalothin (CEP - 30 mcg), Co-Trimoxazole (COT - 25 mcg), Gentamicin (GEN - 10 mcg), Nitrofurantoin (NIT - 300 mcg), Norfloxacin (NX - 10 mcg), Cefoperazone (CPZ - 75 mcg), Amikacin (AK - 30 mcg), Piperacillin /Tazobactam (PIT - 100/10 mcg), Cefepime (CPM - 30 mcg), Ciprofloxacin (CIP - 5 mcg), Cefazolin (CZ - 30 mcg), Streptomycin (S - 10 mcg), Doxycycline Hydrochloride (DO - 30 mcg), Moxifloxacin (MO - 5 mcg), Carbenicillin (CB - 100 mcg), Gatifloxacin (GAT - 5 mcg), Tetracycline (TE - 30 mcg), Ampicillin/Sulbactam (A/S - 10/10 mcg)	IC004-1PK	1pk	1010
Pseudomonas			
***Icosa Pseudo - 1** Amikacin (AK - 30 mcg), Gentamicin (GEN - 10 mcg), Imipenem (IPM - 10 mcg), Carbenicillin (CB - 100 mcg), Piperacillin (PI - 100 mcg), Aztreonam (AT - 30 mcg), Tobramycin (TOB - 10 mcg), Norfloxacin (NX - 10 mcg), Ciprofloxacin (CIP - 5 mcg), Ticarcillin/Clavulanic acid (TCC - 75/10 mcg), Cefoperazone (CPZ - 75 mcg), Azlocillin (AZ - 75 mcg), Levofloxacin (LE - 5 mcg), Ticarcillin (TI - 75 mcg), Ofloxacin (OF - 5 mcg), Mezlocillin (MZ - 75 mcg), Gatifloxacin (GAT - 5 mcg), Piperacillin/Tazobactam (PIT - 100 / 10 mcg) Ceftriaxone (CTR - 30 mcg), Netillin (NET - 30 mcg)	IC005-1PK	1pk	1095
***Icosa Pseudo - 2** Amikacin (AK - 30 mcg), Gentamicin (GEN - 10 mcg), Imipenem (IPM - 10 mcg), Carbenicillin (CB - 100 mcg), Piperacillin (PI - 100 mcg), Aztreonam (AT - 30 mcg), Tobramycin (TOB - 10 mcg), Polymyxin-B (PB - 300 mcg), Ciprofloxacin (CIP - 5 mcg), Ticarcillin/Clavulanic acid (TCC - 75/10 mcg), Cefoperazone (CPZ - 75 mcg), Cefoperazone/Sulbactam (CFS - 75/10 mcg), Levofloxacin (LE - 5 mcg), Ticarcillin (TI - 75 mcg), Colistin (CL - 10 mcg), Cefepime (CPM - 30 mcg), Ampicillin/Sulbactam (A/S - 10/10 mcg), Piperacillin/Tazobactam (PIT - 100/10 mcg), Ceftriaxone (CTR - 30 mcg), Netillin (NET - 30 mcg)	IC007-1PK	1pk	1095

▼ : In accordance to Performance Standards for Antimicrobial Disk Susceptibility Tests, CLSI & EUCAST.

◆ : Interpretative criteria not as per CLSI 2025

□ : Zone size interpretative criteria is as per **CLSI** standard. □ : Zone size interpretative criteria is as per **EUCAST** standard. Resistant criteria is below the given zone diameter.

* : Not included in CLSI chart; FDA approved performance standards for Antimicrobial Discs obtained from drug manufacturers.

For *E. coli, S. aureus, P. aeruginosa* : Mueller Hinton Agar (MHA). For *Haemophilus spp.* : Haemophilus Test Medium;

For *S. pneumoniae* : Mueller Hinton Agar with 5% sheep blood; For *N. gonorrhoeae* : GC Agar Base with 1% defined growth supplement.

AST

▼ : In accordance to Performance Standards for Antimicrobial Disk Susceptibility Tests, CLSI & EUCAST.

□ : Zone size interpretative criteria is as per **CLSI** standard. □ : Zone size interpretative criteria is as per **EUCAST** standard. Resistant criteria is below the given zone diameter.

For *E. coli, S. aureus, P. aeruginosa* : Mueller Hinton Agar (MHA). For *Haemophilus spp.* : Haemophilus Test Medium;

For *S. pneumoniae* : Mueller Hinton Agar with 5% sheep blood; For *N. gonorrhoeae* : GC Agar Base with 1% defined growth supplement.

θ : Deterioration in Oxacillin disc content is best assessed with QC Organism *S. aureus* ATCC 25923, with an acceptable zone diameter of 18-24 mm.

* : Not included in CLSI chart; FDA approved performance standards for Antimicrobial Discs obtained from drug manufacturers.

◆ : Interpretative criteria not as per CLSI 2025

Advanced Antimicrobial Susceptibility Testing (AST) Services

Precision | Innovation | Excellence

We specialize in providing comprehensive and reliable AST solutions to support healthcare, pharmaceutical, and research institutions. Our expertise ensures accurate antimicrobial susceptibility testing, guiding better treatment strategies.

Our Expertise

- ✓ **Kirby-Bauer Method (Disc Diffusion) :** Rapid and standardized.
- ✓ **Broth Microdilution :** Precise MIC determination.
- ✓ **Broth Macrodilution :** Quantitative analysis of antimicrobial agents.
- ✓ **Agar Cup Method :** Reliable testing for various antibiotics.

Our Specialized Services

- ✓ **Method Validation :** Ensuring accuracy and compliance.
- ✓ **Product Development for New Molecules:**
  - Susceptibility Discs : Tailored for novel antimicrobials.
  - Ezy MIC™ Strips : Easy-to-use MIC determination.
  - HIMIC™ Plate Kit : High-throughput susceptibility analysis.

Why Choose Us

- ✓ Cutting-edge expertise in AST methodologies.
- ✓ High precision & reliability in testing.
- ✓ Customized solutions for research and industry.
- ✓ Empowering the fight against antimicrobial resistance.

Innovating AST Solutions - Precision, Reliability and Expertise You Can Trust!

AST

* Not included in CLSI chart.

: Isolates of *C.krusei* are assumed to be intrinsically resistant to Fluconazole. The results of Fluconazole susceptibility testing should not be interpreted using this criterion for this species.

: For Itraconazole, the data are based entirely on experience with mucosal infections, and data supporting breakpoints for invasive infections due to Candida spp. is not available.

b : For Flucytosine, RPMI 1640 agar w/ MOPS & 2% Glucose w/o Sodium Bicarbonate is to be recommended.

** : *C. krusei* ATCC 6258 is now known as *Issatchenkia orientalis* ATCC 6258.

a : Limits may not match with CLSI guidelines.

Stains play an important role in morphological determination of micro organisms which is a preliminary step used by microbiologist to identify pathogens.

HiMedia offers vast array and valuable cost effective, ready-to-use stains and staining kits for microbiological/ pathological laboratories, hospitals, research settings and educational institutes. These stains augment tissue morphology, demonstrate important cellular components, aid in the evaluation of diseases, and identifies pathogenic organisms. Thus it is an important tool used by pathologists to often guide patient's treatment.

HiDtect™ Rapid Identification Disc

HiMedia has always been in frontline in finding solutions to the existing challenges in the field of microbiology and this urge has helped in the development of a wide range of products.

Latest and economical range of diagnostic product HiDtect™ Rapid Identification Disc has been developed which helps in direct identification of microorganisms from clinical samples, water samples, food samples, environment etc.

HiMedias new range of HiDtect™ Rapid Identification Discs is simple to perform. It eliminates the use of Selective Medias and further study elaborate biochemical tests.

Around twenty such unique discs are developed (DT001 to DT020) which finds application in various sectors of Food & Dairy industry, Water industry, Pharmaceuticals Laboratory Testing, Cosmetics industry, Environmental & Sanitary Testing, Clinical Diagnosis etc.

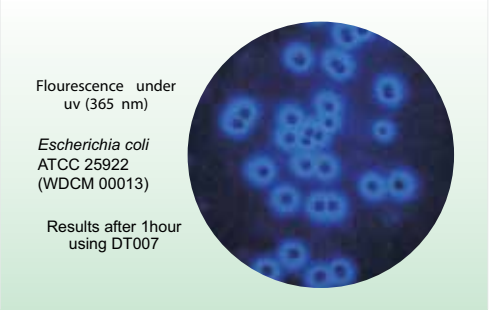
In either fields it involves the use of Enriched and Selective medias. The isolate is often presumptively identified morphologically by special staining methods and plated out on diagnostic medias. Further elaborate biochemical tests are done for confirmation of isolate recovered. Overall the whole procedure is time consuming, expensive and laborious. Hence there is continuous search for a technology that could aid in rapid, reliable, simple and economical diagnosis worldwide.

HiDtect™ Rapid Identification Discs have been developed which enables rapid and reliable detection of microorganisms.

It can detect metabolic activity as DNase activity of bacteria; useful for identification of pathogenic Staphylococci (DT004), identify pathogens causing UTI (DT001), study esculin hydrolysis and identify Group D Streptococci from food and pharmaceutical products (DT014). Discs identifying bacterias as *Salmonella* (DT002), *Pseudomonas* (DT003), *Bacillus* (DT011) *E.coli* and total coliforms (DT012 and DT013) also form part of HiDtect™ Rapid Identification Discs. On basis of Lactose Fermentation and Non lactose fermentation DT009 Discs detects *Enterobacteriaceae* and gram negative bacteria.

Ability to ferment sugars as Glucose (DT016), Lactose (DT017), Mannitol (DT018), Xylose (DT019), Sucrose (DT020) and characteristion of organisms can be studied within 1-4 hours using these discs. Besides these the organisms can be detected from environment (DT015), pathogens detected from foods (DT010) and microbial limit test organisms detected in pharmaceutical preparations using Universal Test Disc (DT005).

Detection of *E.coli* from water and food samples can be done using DT006, DT007, DT008 discs. HiDtect™ UTI identification Disc (DT001) helps identifying causing urinary tract infections, HiDtect™ Bacillus Identification disc (DT011) is also available for differentiation and identification of *Bacillus* from mixed cultures.



A method of detecting target organisms comprises following steps:

Step I Inoculation, Isolation and Incubation

Step II Replication and Identification

Testing method

It involves routine inoculating and isolation technique followed by replication and direct identification

Step I

Inoculate the organisms from sample on any of general purpose media, Nutrient Agar, Soyabean Casein Digest Agar, Plate Count Agar etc.

Adopt any of surface plating methods as; Spread Plate Method, Quadrant (four or five) streak pattern or T streak method so as to obtain isolated colonies from inoculums. Incubate at 35-37°C for 18-24 hours.

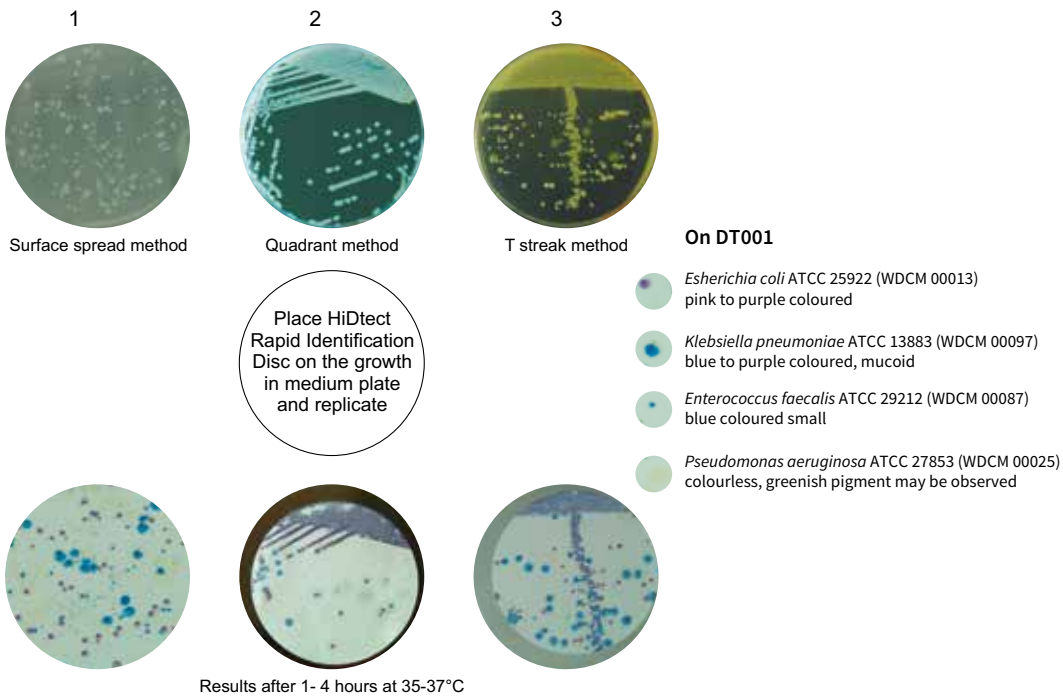
Check for bacterial growth

Step II

Place the HiDtect™ Rapid Identification disc of choice (suspected organisms) on the surface of Agar plate. Perform this step for maximum of 30 seconds. Mark the corresponding orientation of paper. This is replication technique.

Incubate the replicated identification disc in empty sterile petridish at 35-37°C for 1-4 hours. Alternately the disc may be kept for incubation on growth media at 35-37°C for 1-4 hours.

Observe for development of colour and interpret results.



HiDtect™ Rapid Identification Disc

- Economical, Convenient, Rapid and Reliable test for confirmation of bacteria
- Beneficial to Clinical, Food & Meat industry, Dairy, Water, Pharmaceutical, Environmental and Cosmetic industry
- Direct application without any preparations, Results in just 1-4 hours.

Product	Code	Packing	Price in ₹
HiDtect™ UTI Identification Disc For rapid detection and confirmation of microorganisms mainly causing urinary tract infection, for eg. *E.coli, Proteus, Klebsiella, Pseudomonas, S.aureus* & *Enterococcus* species. 1)*Pseudomonas aeruginosa* ATCC 27853 (WDCM 00025) 2)*Klebsiella pneumoniae* ATCC 13883 (WDCM 00097) 3)*Esherichia coli* ATCC 25922 (WDCM 00013) 4)*Enterococcus faecalis* ATCC 29212 (WDCM 00087) 	DT001-10DS DT001-25DS DT001-50DS	10discs 25discs 50discs	2480 4385 7440

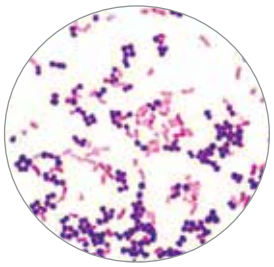
Biochemical Identification Test Kits	
HiIMViC™ Biochemical Test Kit a combination of 12 tests for differentiation of *Enterobacteriaceae* species.	**KB001**
HiAssorted® Biochemical Test Kit a combination of 12 tests for identification of Gram-negative rods.	**KB002**
Hi25™ Enterobacteriaceae Identification Kit a combination of 25 tests for identification of *Enterobacteriaceae* species.	**KB003**
HiStaph™ Identification Kit a combination of 12 tests for identification of *Staphylococcus* species.	**KB004**
HiStrep® Identification Kit a combination of 12 tests for identification of *Streptococcus* species.	**KB005A**
HiCandida® Identification Kit a combination of 12 tests for identification of *Candida* species.	**KB006**
HiVibrio® Identification Kit a combination of 12 tests for identification of *Vibrio* species.	**KB007**
HiNeisseria® Identification Kit a combination of 12 tests for identification of *Neisseria* species.	**KB008**
HiCarbo™ Kit a combination of 36 tests for utilization of carbohydrate tests. Kit contains Part A, Part B & Part C	**KB009**
HiCarbo™ Kit- Part A	**KB009A**
HiCarbo™ Kit- Part B	**KB009B1**
HiCarbo™ Kit- Part C Note : KB009 is available as a total kit and also individually as Part A, Part B & Part C	**KB009C**
HiE.coli® Identification Kit a combination of 12 tests for identification of *E. coli.*	**KB010**
HiSalmonella® Identification Kit a combination of 12 tests for identification of Salmonella species.	**KB011**
HiListeria® Identification Kit a combination of 12 tests for identification of *Listeria* species.	**KB012A**
HiBacillus™ Identification Kit a combination of 12 tests for identification of *Bacillus* species.	**KB013**
HiAcinetobacter™ Identification Kit a combination of 12 tests for identification of *Acinetobacter* species.	**KB014**
Motility Biochemical Test Kits	
HiMotility™ Biochemical Kit for E.coli a combination of 12 tests for confirmation of *E.coli* based on motility and other biochemical tests.	**KBM001**
HiMotility™ Biochemical Kit for Salmonella a combination of 12 tests for confirmation of *Salmonella* based on motility and other biochemical tests.	**KBM002**
HiMotility™ Biochemical Kit for Listeria a combination of 12 tests for confirmation of *Listeria* based on motility and other biochemical tests.	**KBM003A**

Readymade Stains

Stains for Gram Staining ▲

Product	Code	Packing	Price in ₹
Gram Stains - Kit (contains S012, S032, S013 and S027 or S038)	**K001-1KT**	**1kt**	**1520**
Gram's Crystal Violet	S012-125ML	125ml	230
Gram's Decolourizer	S032-2x125ML	2x125ml	985
Gram's Iodine	S013-125ML	125ml	255
Safranin, 0.5% w/v (Gram's Counterstain)	S027-125ML	125ml	250
Basic Fuchsin 0.1% w/v (Gram's counterstain)	S038-125ML	125ml	250
Gram Stains - Kit (contains S012, S032, S013 and S027 or S038)	**K001L-1KT**	**1kt**	**5325**
Gram's Crystal Violet	S012-500ML	500ml	805
Gram's Decolourizer	S032-2x500ML	2x500ml	3430
Gram's Iodine	S013-500ML	500ml	885
Safranin, 0.5% w/v (Gram's Counterstain)	S027-500ML	500ml	865
Basic Fuchsin 0.1% w/v (Gram's counterstain)	S038-500ML	500ml	865



Gram Stains Kit (K001)
Gram - positive : violet coloured
Gram - negative : pinkish red coloured

Stains for Metachromatic Staining ▲

Product	Code	Packing	Price in ₹
Methylene Blue (Loeffler's)	S022-125ML S022-500ML	125ml 500ml	255 890

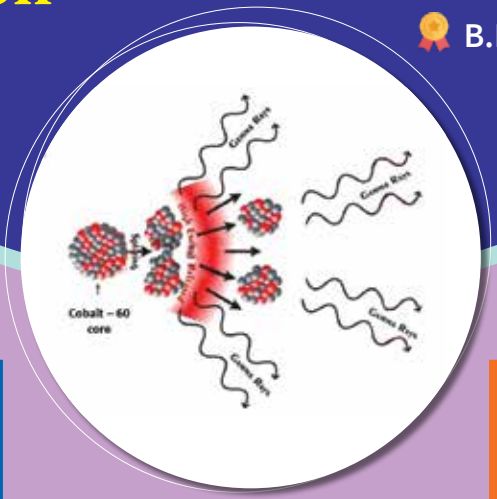
MiCroBiology™
Understanding Microbes

Service Provider

HiMedia's Gamma (γ) Irradiation sterilization facility

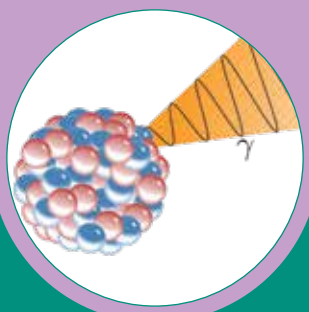
- 3 Million Curie Capacity
- ISO 9001:2015 QMS
- WHO-GMP - Quality Austria
- A.E.R.B. approved
- B.R.I.T. approved



Unique selling proposition

HiMedia Gamma Irradiation Facility

- Processing data tracked through a Barcode System - from material receipt in the Facility till the dispatch of treated Material
- Dosimeter batch received verified at user end
- Dose Mapping study carried out challenging with B.I.'s
- Efficiency in dose calculation
- Maximum acceptable weight for processing- 50kg per box/drum
- Automated scissor lift for material movement



Irradiation Doses

- 6-12 kGy
- 13-20 kGy
- 25-35 kGy
- Above 25 kGy (in multiples of 25)

Product Segments

- Empty Swabs, Plastic tubes, Bottles, Petri plates
- Powders & Raw Material
- Plastic Packing, Plastic tubes, bottles, Petri plates
- Garments
- Silicon tubes
- Disinfectants
- Pharmaceutical / Cosmetic containers
  - Bottles, Syringes, Eyedroppers, Eyedropper Bottles
  - Surgical Products (disposable products)

Plot No. - N46, Additional Ambernath MIDC, Anand Nagar, Ambernath East, Ambernath 421506, Maharashtra, India

HIMEDIA®

ATCC Microbiology and allied products, services and standards

Products

Collections : ATCC's collections include a wide range of biological materials for research, including cell lines, molecular genomics tools, microorganisms, and bioproducts.

Focus area : ATCC offers a wide assortment of cell cultures, microbial strains, and molecular tools to support your research in a variety of focus areas, such as disease mechanisms, quality control testing, product development, and environmental research.

Disease / Model : ATCC offers a wide assortment of cell cultures and microbial strains to support disease-based research in several key areas, such as cancer research and infectious disease.

Microbial Panels : ATCC Microbial Panels enable faster, more intelligent choices when selecting cultures for microbial-based disease research. Each panel is comprised of ATCC Genuine Cultures grouped together based on their utility in research related to infectious disease, antibiotic-resistance mechanisms, food and environmental testing, and population studies. Cultures included in each panel are further characterized by ATCC for relevant strain traits.

Ready to use : ATCC Minis - QC Strains

Bacteria : Cultures from the ATCC Bacteriology Collection are useful in a variety of research and industrial applications, and include methicillin-resistant/sensitive research materials, quality control organisms for commercial identification systems, a wide selection of extremophile strains from a variety of environmental sources, and genomic DNA from well-characterized microbial strains suitable for amplification by PCR.

Fungi and Yeast : ATCC is a trusted resource center housing a diverse assortment of filamentous fungi and yeasts, representing over 7,600 species. The collection offers over 32,000 yeast genetic strains, including the historic Yeast Genetic Stock Center (YGSC) strains, the open reading frame (ORF) deletion strains of the *Saccharomyces cerevisiae* Genome Deletion Project (SGDP), and a collection of *Cryptococcus neoformans* ORF deletion strains.

Drug Resistant Bacteria: ATCC provides an expanding collection of clinically relevant, antimicrobial-resistant strains. Each multidrug-resistant strain delivers expanded levels of source metadata and genomic characterization, creating essential tools for all stages of the discovery and development process for novel antimicrobials and therapeutics, molecular-based detection assays, and updated sterility protocols.

ATCC Licensing Information : ATCC page provides FAQ's related to Material Transfer Agreements at ATCC along with the ability to request a transfer, report a transfer or submit a new inquiry to our Licensing team.

Commercial Use : The licensing program for commercial use of ATCC products and use of the MTA for ATCC products in research both help protect the ability of ATCC to supply reference standards for the benefit of the scientific community.

Research Use : The ATCC Material Transfer Agreement (MTA) explains the rights and responsibilities of end users' use of ATCC materials. For your convenience, we have provided answers to FAQs in our database and these can also be found through the general site search.

Search FAQs with QR code : If you find that your question regarding the MTA is not answered, please contact us at contacts@atcc.org with your specific inquiry.

MicroQuant™

Precision in Every Pellet, Trust in Every Test

Features of MicroQuant™

MicroQuant™ by ATCC is a new product line of precisely quantitated microbial reference materials used to streamline microbial quality control (QC) testing in pharmaceutical manufacturing. **Sourced directly from ATCC**, this innovative solution delivers precision and reliability you can trust, without the complexity of traditional microbial QC testing.

- **Precisely quantitated:** Available in low-titer (100-1000 CFU/pellet) and high-titer (10^7-10^8 CFU/pellet) formats.
- **Single-use format:** Highly convenient ready-to-use format enables fast assay set up while minimizing handling.
- **Immediate rehydration at room temperature:** With a processing time of ~1 minute, you can reduce your hands-on time while improving efficiency.
- **Convenient storage at 2-8°C:** Refrigerator-stable for up to 6 months, making them easy to store and ready to use anytime—no need to thaw.
- **Reliable:** Manufactured by ATCC under an ISO 17034–accredited process, so you can trust that you are receiving high-quality, original source material.

Streamlined for Success

Leveraging an innovative cryopreservation technology, MicroQuant™ products come in the form of stable, rapidly rehydrating pellets that deliver consistent quantitation and accurate, reproducible results—addressing the key challenges faced by microbial testing laboratories. This novel product suite enables simplified workflows and quick turnaround times while adhering to strict quality standards.

With MicroQuant™, you can execute accurate and reproducible microbial QC testing in a fraction of the time, saving resources and streamlining workflows.

The MicroQuant™ Workflow (takes only minutes to complete)

MicroQuant™

Precision in Every Pellet, Trust in Every Test

The accuracy of any microbial quality control test is dependent on the quality of the reference materials used. MicroQuant™ provides best-in-class, original source strains from ATCC in a ready-to-use, rapidly rehydrating format that delivers consistent quantitation to support USP chapters including USP <51> and USP <61>.

ATCC® No.	Description
10231-LQ-PACK™	MicroQuant™ *Candida albicans*, low CFU
10231-HQ-PACK™	MicroQuant™ *Candida albicans*, high CFU
9027-LQ-PACK™	MicroQuant™ *Pseudomonas paraeruginosa*, low CFU
9027-HQ-PACK™	MicroQuant™ *Pseudomonas paraeruginosa*, high CFU
6538-LQ-PACK™	MicroQuant™ *Staphylococcus aureus* subsp. *aureus*, low CFU
6538-HQ-PACK™	MicroQuant™ *Staphylococcus aureus* subsp. *aureus*, high CFU
16404-LQ-PACK™	MicroQuant™ *Aspergillus brasiliensis*, low CFU
16404-HQ-PACK™	MicroQuant™ *Aspergillus brasiliensis*, high CFU
8739-LQ-PACK™	MicroQuant™ *Escherichia coli*, low CFU
8739-HQ-PACK™	MicroQuant™ *Escherichia coli*, high CFU
6633-LQ-PACK™	MicroQuant™ *Bacillus spizizenii*, low CFU
6633-HQ-PACK™	MicroQuant™ *Bacillus spizizenii*, high CFU

ATCC

HIMEDIA®

Quality Control Solutions for Food Testing

ATCC® offers an expanding portfolio of quality control products to ensure the accuracy and reliability of your food safety programs. Through the development of customer-driven products, ATCC is making it easier for food manufacturers, processors, and contract testing laboratories to ensure the safety of consumable goods in accordance with FDA, the Food Safety Modernization Act, and food testing accreditation. Choose from among a variety of ATCC Quality Control Solutions, including:

- ATCC Reference Strains – including those cited in published laboratory methods
- ATCC Genuine Nucleics supporting the development and validation of rapid microbial methods
- ATCC Reporter-labeled Strains – including the USDA-cited GFP-labeled *Escherichia coli* O157

Trust ATCC Quality Control Solutions for accuracy, reliability, and the reproducibility needed to maintain outstanding food safety programs!

ATCC Food Testing Reference Strains

The validity of any microbial-based assay is dependent upon minimally passaged, fully characterized control organisms. One of our top priorities at ATCC is to provide high-quality reference strains for use in the routine testing of food products. Each ATCC reference strain is backed by meticulous laboratory procedures that ensure viability, identity, functionality, and purity, not only for our master seed stocks, but also for every distribution lot that we ship to your lab.

ATCC reference strains are frequently cited in published laboratory methods used by industry (see page 6 for details), and include a variety of cultures frequently associated with foodborne illness, such as:

- *Campylobacter* spp.
- *Escherichia coli*
- *Listeria monocytogenes*
- *Chronobacter sakazakii*
- *Bacillus* spp.
- *Salmonella enterica*
- *Shigella* spp.
- And more!

Salmonella is one of the leading causes of foodborne illness in the United States

Don't take chances on the quality of your cultures. Insist on products that meet ATCC's world-renowned standards for high quality and safety. Visit our Food Testing page at www.atcc.org/Food to learn more!

ATCC® Minis – making it easy for you to ensure the accuracy of your assays

ATCC Minis are the same ATCC Genuine Cultures you've come to trust for your quality control assays, now offered in a convenient, single-use, "mini" format that allows you to get your assays moving faster.

- Put an end to do-it-yourself banking with each six-pack of ready-to-use quality control strains in glycerol stock
- Enjoy using the same ATCC strains you've come to trust with easy-to-open screw-cap tubes
- Make recordkeeping a snap with peel-off labels you can stick directly into your lab notebook
- Conveniently store your strains up to one year at -20°C*

It's easy to ensure the quality of your products with ATCC Minis – just open, plate, and go! Visit us online at www.atcc.org/minis to learn more.

*Some fastidious strains are not stable at -20°C. Please refer to the product sheet for an item's appropriate storage temperature.

ATCC microbial panels – taking the guesswork out of validation studies

ATCC Microbial panels enable faster, more intelligent choices when selecting cultures for microbial-based disease research, including the development of novel detection methods for *Salmonella enterica*, Big-six non-O157 Shiga toxin-producing *Escherichia coli* (STEC), and enteric protozoa. Find your ATCC Microbial Panel for food testing online at www.atcc.org/mp.

ATCC®	Description	Application
MP-4™	*Clostridioides difficile* Panel	Building and testing new methods to detect *Clostridioides difficile* toxinotypes
MP-9™	Big-Six *Escherichia coli* Strains Panel	Quality control assays for non-O157 Shiga toxin-producing *Escherichia coli* (STEC)
MP-10™	Big-Six *Escherichia coli* Genomic DNA Panel	Quality control assays for non-O157 Shiga toxin-producing *Escherichia coli* (STEC)
MP-14™	*Enteric Protozoa* Genomic DNA Panel	Development of molecular-based assays used to diagnose intestinal disease caused by clinically relevant protozoa
MP-15™	*Salmonella enterica* Panel	Quality control assays for *Salmonella enterica* subsp. enterica serovars commonly associated with contaminated food or water
MP-20™	Big-Six Non-Toxigenic *Escherichia coli* Strains Panel	Non-toxigenic quality control strains for research on the Big-Six non-O157 serogroups
MP-26™	Non-pathogenic *Escherichia coli* Surrogates Indicators Panel	Validation applications include beef carcass intervention, beef processing, and selected antimicrobial treatments for *E. coli* O157:H7 or *Salmonella enterica*

ATCC reference strains used in the quality control of media

ATCC is dedicated to the continual improvement and diversification of our collection of food testing reference materials. To this end, we are constantly improving the technology used to characterize and authenticate the materials in our portfolio. Only ATCC delivers high quality microorganisms for food testing applications that are authenticated through a polyphasic approach incorporating genotypic, phenotypic, proteotypic, and functional analyses, including:

- Antibiotic susceptibility testing
- Biochemical analyses
- ELISA
- Immunofluorescence
- Morphological analyses
- Sterility testing
- Phenotypic microarray
- Sequencing
- Serotyping
- Toxinotyping
- Viability testing
- VITEK® MS

The high quality nature of our products makes them ideal for use as QC organisms for ensuring the quality and functionality of culture media frequently used in food testing assays, including:

Organism	Selective Media	Quality Control Strains
Bacillus cereus	Mannitol-Egg Yolk-Polymyxin (MYP) Agar	*Bacillus cereus* (ATCC® 11778™), *B. cereus* (ATCC® 14579™), *B. megaterium* (ATCC® 14581™), *B. circulans* (ATCC® 61™), *B. subtilis* (ATCC® 6633™)
Campylobacter	Campylobacter Blood-free Selective Medium (CCDA)	*Campylobacter jejuni* (ATCC® 33291™), *C. jejuni* (ATCC® 33292™), *C. coli* (ATCC® 43478™), *Escherichia coli* (ATCC® 25922™)
Escherichia coli O157:H7	CHROMagar™ O157	*Escherichia coli* O157:H7 (ATCC® 43888™), *E. coli* (ATCC® 25922™), *E. coli* (ATCC® 13047™), *Enterococcus faecalis* (ATCC® 29212™)
Listeria	PALCAM Agar	*Escherichia coli* (ATCC® 25922™), *Enterococcus faecalis* (ATCC® 29212™) *Listeria monocytogenes* (ATCC® 7644™), *L. monocytogenes* (ATCC® 19114™), *L. monocytogenes* (ATCC® 19116™), *Staphylococcus aureus* subsp. *aureus* (ATCC® 25923™)
Salmonella	Salmonella-Shigella (SS) Agar Bismuth Sulfite (BS) Agar	*Salmonella enterica* (ATCC® 14028™), *Shigella flexneri* (ATCC® 12022™), *Escherichia coli* (ATCC® 25922™), *Enterococcus faecalis* (ATCC® 29212™)
Staphylococcus aureus	Baird Parker Agar	*Staphylococcus aureus* subsp. *aureus* (ATCC® 25923™), *S. aureus* subsp. *aureus* (ATCC® 29213™), *S. epidermidis* (ATCC® 12228™)
Vibrio	Thiosulfate Citrate Bile Salts Sucrose (TCBS) Agar	*Vibrio parahaemolyticus* (ATCC® 17802™), *Escherichia coli* (ATCC® 25922™), *Proteus mirabilis* (ATCC® 12453™)

Microbiome Research

Optimize your research with the right controls

The complexities associated with microbiome research have made assay standardization challenging. ATCC has the solution: microbiome standards. Throughout each stage of your workflow, ATCC® Microbiome Standards enable you to optimize your diverse research applications with confidence and improve the consistency and reproducibility of your data run after run. These standards support a broad array of applications ranging from method optimization to data interpretation, and they serve as superior controls for microbial community testing and assay development on any platform.

ATCC Resources and Services

Culture Guides

Culturing biological materials can be challenging at times even for the expert culturist. With nearly a century of expertise with cell and microbial cultures, ATCC has acquired and developed a vast body of best practices to aid researchers at all levels of proficiency to maximize the return on their biomaterials investment. The guides below deliver that knowledge and insight to the end user in a portable, easy-to-follow format.

https://www.atcc.org/resources/culture-guides

ATCC Genome Portal

The ATCC Genome Portal makes it easy to find the high-quality whole-genome sequencing data needed for your research. With a free account, you can easily search, download, and analyze hundreds of high quality genomes.

https://genomes.atcc.org/?_ga=2.231870175.198900398.1676951861-650617004.1676951861

Webinars

Collaboration and knowledge sharing are key components in accelerating scientific discoveries and advancing global health. Explore our expanding collection of webinars to learn more about the innovative research and development being performed by t hought leaders in science.

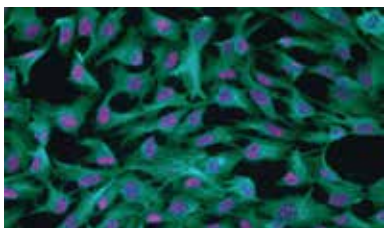
cGMP Cell Banking and Biorepository



For nearly a century, ATCC has been regarded as a pioneer in cell banking and storage, using the most reliable and standardized procedures and equipment to manufacture and preserve your critical biomaterials. ATCC supports multiple stages of the cell banking process, from initial development to master/working cell bank production runs in efforts to streamline and expedite your timelines. In tandem, our cGMP biorepository experts can characterize, package, store, and distribute your biological materials to ensure the security and integrity of your cell banks.

Packing Information

Individual Lyophilized Microorganisms

LYFO DISK® Vials
A vial of 6 lyophilized pellets.
Order by the catalog number with the suffix "L".

KWIK-STIK™ Duopaks
Duopaks include 2 KWIK-STIKS™
Order by the catalog number with the suffix "P".

Other Products

EZ-CFU™
Available in kits containing: 20 lyophilized pellets of a single quantitative QC microorganism, 10 vials of hydrating fluid (2 ml in each vial), Delivering 10-100 cfu per 0.1 ml inoculum, following 1:10 dilution step.

EZ-CFU™ One Step
Available in kits containing: 20 lyophilized pellets of a single quantitative QC microorganism, 10 vials of hydrating fluid (2 ml in each vial), Designed to deliver 10-100 cfu per 0.1 ml inoculum.

EZ-PEC™
Available in kits containing: 20 lyophilized pellets of a single enumerated QC microorganism, 10 vials of hydrating fluid (2 ml in each vial), instructions for use

EZ-Accu Shot™
Available in kits containing: 5 vials of a single quantitated microorganism (1 lyophilized pellet per vial); 5 vials of hydrating fluid (1.2 mL in each vial); Illustrated instructions for use; upto 50 tests per kit

EZ-Accu Shot™ Select
Available in kits containing: 6 vial each of 6 different microorganism (1 lyophilized pellet per vial); 6 vials of hydrating fluid (1.2 mL in each vial); Illustrated instructions for use, upto 60 tests per kit

KWIK-STIK™ Plus
Available in canisters of 5 KWIK-STIK units and a Certificate of Analysis.

Lab-Elite™ CRM
Available in kits containing: One self-contained device including a lyophilized microorganism pellet, ampoule of hydrating fluid and inoculating swab (KWIK-STIK™ format.); Certificate of Analysis

Microbiology QC Slides
Available in boxes of 10 slides.

Helix Elite™ molecular standard
Available in kit containing : 1 vial of dried, stabilized RNA or DNA (approximately 100 reactions), 1 vial of molecular standard water for rehydration
Instructions for Use, Certificate of Analysis

E Power™ / E Power™ CRM
Kit contains : Vial of 10 quantitated lyophilized microorganism pellets, Certificate of analysis, Instructions for use

UV-Bio TAG™
Kit contains : UV- Bio TAG Swab :- 6 all-in-one devices including lyophilized microorganism pellet, ampoule of hydration fluid and inoculating swab, UV-Bio TAG Vial :- 6 lyophilized microorganism pellets in glass vials, Instruction for Use

Parasite Suspensions
Kit contains : Vial containing 1ml suspension of parasite species, Certificate of performance

Microbiology QC Sets and Panels
Kit contains : KWIK-STIK™ 2 Pack (2 STIKs of each microorganism), Synthetic DNA/RNA QC Sets and Panels, Inactivated Microorganism QC Sets and Panels

EZ SPORE™
Kit contains : Vial of 10 lyophilized pellets, Illustrated Instructions for use

Cultures are available to actual users only.
Products included in this section are free from Excise duty.

* ATCC Licensed Derivative™ The ATCC Licenced Derivative Emblem, the ATCC Licensed Derivative word mark, and the ATCC catalog marks are trademarks of ATCC. MicroBioLogics, Inc. is licensed to use these trademarks and to sell products derived from ATCC® cultures.

Lab-Elite™

Lab-Elite™ CRM
CERTIFIED REFERENCE MATERIAL

Kit Includes:

- One self-contained device including a lyophilized microorganism pellet, ampoule of hydrating fluid and inoculating swab (KWIK-STIK™ format.)
- Certificate of Analysis

Lab-Elite™ Applications:

- For use in ISO 17025 accredited labs
- Qualitative QC microorganism one passage from the reference strains for ultimate authenticity
- For validation verification of processes and instruments

Following microorganism preparation is *First passage* from the reference culture

KWIK-STIK™ Plus

KWIK-STIK™ Plus - (5 Pack)

KWIK-STIK™ Plus
Limited Passage Microorganisms
KWIK-STIK™ Plus microorganisms are designed to meet the needs of laboratories requiring QC microorganisms that are fewer passages from the reference culture. Each KWIK-STIK™ Plus QC microorganism preparation is just two passages from the reference culture, allowing for more subcultures. Conveniently packaged in a KWIK-STIK™ device featuring a lyophilized QC microorganism pellet, inoculating swab and ampoule of hydrating fluid, KWIK-STIK™ Plus is ready to use and affordable. For added convenience, a peel-off identification label on each stick is included for quality control documentation. KWIK-STIK™ Plus includes five STIKS of a single strain.

Following microorganism preparation is *two passages* from the reference culture

Microbiology QC Sets and Panels

QC sets and panels offer a wide range of bundled QC sets and Panels for the most commonly used technologies and standards. Each set or Panel contains the manufacturer recommended quality control strains for a particular instrument or test method in a simple, ready to use format. Each set or Panel also contains the regulation specific (eg. CLSI or EUCAST) recommended quality control strains.

Kit contains :

Live Culture QC Sets and Panels

- KWIK-STIK™ 2 Pack (2 STIKs of each microorganism)

Helix Elite Molecular Standards QC Sets and Panels

- Synthetic DNA/RNA QC Sets and Panels
- Inactivated Microorganism QC Sets and Panels

Carbapenem - resistant Enterobacteriaceae (CRE) Control Panel (Inactivated Swab)	8187	2 sticks	On Request
Charles River Axcess Filamentous Fungi Qualification Panel	5259P	2 sticks	On Request
Enteric Pathogens Control Panel (Inactivated Pellet)	8184	2 sticks	On Request
Human Papillomavirus (HPV) Control Panel	8214	2 sticks	On Request
Human Papillomavirus (HPV) Verification Panel	8216	2 sticks	On Request

Multi - Strain Human Papillomavirus (HPV) Control Panel (Inactivated Pellet)	8234	2 sticks	On Request
Multi - Strain Human Papillomavirus (HPV) Verification Panel (Inactivated Pellet)	8235	2 sticks	On Request
Respiratory Control Panel (22 Targets)	8247	2 sticks	On Request
Rifampicin - Resistant Mycobacterium tuberculosis Positive Control Panel (Inactivated Pellet)	8206	2 sticks	On Request
SA Organism Set (Live Culture)	8178	2 sticks	On Request

* ATCC Licensed Derivative™ The ATCC Licenced Derivative Emblem, the ATCC Licensed Derivative word mark, and the ATCC catalog marks are trademarks of ATCC. MicroBioLogics, Inc. is licensed to use these trademarks and to sell products derived from ATCC® cultures.
Each lyophilized microorganism preparation is two passages from the reference culture.

Individual Lyophilized Microorganisms

Individual Lyophilized Microorganisms
LYFO DISK® and KWIK-STIK™

Authentic and Traceable Reference Stock Cultures

Each lyophilized microorganism preparation is not more than Three passages from the reference culture, *requires no pre-incubation, and comes with a shelf-life of 6-24 months in refrigerated storage.*

LYFO DISK®: A vial containing 6 qualitative lyophilized pellets of an individual microorganism strain. This is the most economical reference stock culture option.

KWIK-STIK™: Self-contained units, each includes a lyophilized microorganisms pellet, reservoir of hydrating fluid, and inoculating swab. This is the most convenient and easy-to-use option. Available in a DuoPak of 2 units or 6

Following microorganism preparation is not more than *Three passages* from the reference culture

EZ-CFU™ One Step

EZ-CFU™ One Step
QC Microorganisms For Growth Promotion Tesing

The Growth Promotion Test (GPT) is an important function in the United States (USP), European (Ph. Eur.) and Japanese (JP) Pharmacopoeias. EZ-CFU™ One Step quantitative QC microorganism preparations are used to perform Growth Promotion Tests of culture media with ease. No dilutions are required. EZ-CFU™ One Step is designed to deliver 10-100 CFU with each 0.1 ml inoculum. Each 2 ml vial of hydrated suspension offers 19 inocula. EZ-CFU™ One Step can be used for up to eight hours after hydration if the suspension is refrigerated between uses. Online Certificate of Analysis provides detailed strain information.

EZ-CFU™ One Step kits include:
- *20 quantitative lyophilized microorganism pellet*
- *10 vials of hydrating fluid (2 ml in each vial)*
- *Illustrated instruction for use*

Following microorganism preparation is not more than *Three passages* from the reference culture

EZ-Accu Shot™

For Growth Promotion Testing

EZ-Accu Shot™ is a quantitative microorganism preparation designed for performing Growth Promotion Tests of culture media with ease. Each EZ-Accu Shot™ lyophilized microorganism preparation is designed to deliver 10-100 CFU per 0.1mL of hydrated suspension as recommended by the USP/JP/Ph. Eur. With little to no preparation time required and up to eight hours of stability, Each 1.2 mL vial of hydrated suspension offers 10 inocula. Applicable in methods requiring low cfu concentrations. EZ-Accu Shot™ adds efficiency and flexibility to QC laboratories' busy schedules.

EZ-Accu Shot™ kits include:

- 5 vials of a single quantitated microorganism (1 lyophilized pellet per vial)
- 5 vials of hydrating fluid (1.2 mL in each vial)
- Upto 50 tests per kit
- Illustrated instructions

Following microorganism preparation is of *three passages* or *less* from the reference culture

EZ-Accu Shot™ Select

For Growth Promotion Testing

EZ-Accu Shot™ Select boasts all the same features and benefits as the original EZ-Accu Shot™, but includes 6 compendial microorganism strains for Growth Promotion Testing in one convenient package. EZ-Accu Shot™ Select lyophilized microorganism preparations are designed to deliver 10 - 100 CFU per 0.1mL of hydrated suspension as recommended by the USP/JP/Ph. Eur. With little to no preparation time required and up to eight hours of stability after rehydration, EZ-Accu Shot™ Select adds efficiency and flexibility to QC laboratories' busy schedules. Each 1.2 mL vial of hydrated suspension offers 10 inocula. For added convenience, individual peel-off informational labels are included for each strain.

EZ-Accu Shot™ Select kit includes:

- 6 vials of 6 quantitated microorganisms strain (1 lyophilized pellet per vial)
- 6 vials of hydrating fluid (1.2 mL in each vial)
- Illustrated instruction for use

Licensed, traceable strains:

Aspergillus brasiliensis ATCC® 16404™*
Bacillus subtilis subsp. *spizizenii* ATCC® 6633™*
Candida albicans ATCC® 10231™*
Escherichia coli ATCC® 8739™*

EZ-CFU™

EZ-CFU™
Microorganisms for Growth Promotion Challenges

EZ-CFU™ is used to perform Growth Promotion Tests of culture media with ease. EZ-CFU™ lyophilized QC microorganism preparations deliver 10-100 CFU per 0.1 ml inoculum, following a simple 1:10 dilution in pH 7.2 phosphate buffer. Following the dilution step, EZ-CFU™ provides over 90 inocula using the same suspension. EZ-CFU™ are less than or equal to three passage from the reference strains.

EZ-CFU™ kits include:

- *20 lyophilized pellets of a single quantitative QC microorganism*
- *10 vials of hydrating fluid (2 ml in each vial)*
- *Illustrated instruction for use*

EZ-PEC™

EZ-PEC™

QC Microorganisms For Antimicrobial Effectiveness and Preservative Efficacy Testing

Ready-to-use EZ-PEC™ quantitative QC microorganism preparations are designed to provide the required microorganism challenge concentrations for Antimicrobial Effectiveness Tests and Preservative Efficacy Tests. When processed as directed, EZ-PEC™ delivers a final concentration of $1.0x10^5$ to $1.0x10^6$ CFU per ml of the product being tested. Strains are less than or equal to 3 passages from reference cultures.

EZ-PEC™ kits include:

- 20 lyophilized pellets of a single enumerated QC microorganism
- 10 vials of hydrating fluid (2 ml in each vial)
- Illustrated instruction for use

E Power™

Epower™ product provides all of your QC needs – from media QC and presence/absence testing to enumeration testing, water testing, and disinfectant testing. Each quantitative microorganism pellet delivers a specific range of CFU. Epower™ can be manipulated to deliver virtually any concentration. It is available in concentrations ranging from 10^2 and 10^8 CFU per pellet. It can be combined for a mixed microorganism population.

Kit contains :

- Vial of 10 quantitated lyophilized pellets
- Illustrated instructions

Following microorganism preparation is less than or equal to *Three passage* from the reference culture

E Power™ CRM

E Power™ CRM quantitative quality control microorganisms are just one passage from reference strain. Each microorganism pellet has a pre-determined range of CFUs. Available in concentrations ranging from 10^2 and 10^7 cfu per pellet. Can be combined for a mixed microorganism population. For ISO 17025 accredited lab, E Power™ CRM helps to meet the requirements of section 5.6.2(b), regarding reference materials.

Kit contains :

- Vial of 10 quantitated lyophilized microorganism pellets
- Certificate of analysis
- Instructions for use

Following microorganism preparation is not more than *One passage* from the reference culture

EZ SPORE™

EZ Spore™ provides quantitative microorganism preparation for validating their spoilage detection methods or for disinfectant qualification studies and daily food process controls. EZ Spore™ preparations provide a concentration of 10^4 cfu per pellet, making microbiological challenge testing for spore formers quicker and easier.

Kit contains :

- Vial of 10 lyophilized pellets
- Illustrated Instructions for use

Following microorganism preparation is not more than *Three passage* from the reference culture

Geobacillus stearothermophilus ATCC® 7953™*	0871SPR	1kit	On Request

UV-BioTAG™

UV- Bio TAG, line of reference strains containing green fluorescent Protein (GFP) markers, make it easy to distinguish standard microorganism strain from laboratory control strains. Optimized for highly visible fluorescence, UV- Bio TAG strains provide better stability because the GFP marker is integrated into the chromosome rather than plasmid.

Benefits :

- Fluoresces under UV light to distinguish QC strains from other possible contaminants
- Instant dissolve pellet reduces preparation time
- Ready-to-use format saves time and money
- Refrigerated storage is easy and economical

Kit contains :

- UV- Bio TAG Swab :- 6 all-in-one devices including lyophilized microorganism pellet, ampoule of hydration fluid and inoculating swab
- UV-Bio TAG Vial :- 6 lyophilized microorganism pellets in glass vials
- Instruction for Use

Helix Elite™ Molecular Standard

Helix Elite™ Molecular Standards are used as controls for developing, validating, and monitoring molecular instruments and assays. It comes in 3 distinct formats: Inactivated, Synthetic Nucleic acids and Genomic Extracts. Each format has been designed for efficiency and usability.

Benefits of Helix Elite™ products provide:

- Non-hazardous materials for safe handling
- Ideal for pathogens which are difficult to grow
- Optimized for time and labor savings
- Independent external controls provide accurate, reliable results
- Convenient room temperature storage

Synthetic Helix Elite™ Molecular standard kit contains :
1 vial of dried, stabilized RNA or DNA (approximately 100 reactions)
1 vial of molecular standard water for rehydration

Parasite Suspensions

Parasite Suspensions is versatile to help labs QC their parasitology diagnostic kits and methods, microscopic examinations, staining procedures, and proficiency programs. Designed to mimic a patient sample for simple control processing, these economical and easy-to-use Parasite Suspensions outperform similar products on the market. They are packaged in a vial containing a 1 ml suspension of a specific parasitic population with known characteristics, formalin and fecal matter. Parasite Suspensions are CE Marked as an In-Vitro Diagnostic (IVD) Medical Device and include a Certificate of Performance which provides detailed information about the parasite.

Benefits :

- Convenient test ready format saves you time and money
- Designed to mimic a patient sample for simple control processing (For QC of diagnostic test kits and methods, Microscopic examinations, Proficiency tests, Educational purposes)
- Includes a Certificate of Performance that provides a detailed description of the specimen
- CE Marked as an In-Vitro Diagnostic (IVD) Medical Device
- 2 year shelf life
- Room temperature storage

Kit contains :

- Vial containing 1ml suspension of parasite species
- Certificate of performance

EZ-Rapid Shot Kit

EZ-Rapid Shot - Simplify your Growth Promotion Testing

- Easy to disperse lyophilized culture makes preparation faster.
- Isotonic rehydration fluid maintains the viability of organisms.
- Avoid cumbersome serial dilution and extensive culture maintenance activities.
- Both cultures & rehydration fluid are supplied together in a kit format and can be stored at 2-8°C.

For Growth Promotion Testing

EZ-Rapid Shot is a quantitative microorganism preparation designed for performing Growth Promotion Tests of culture media and delivers 10-100 CFU per 0.1mL of hydrated suspension as recommended by the USP/JP/Ph. Eur.

With little to no preparation time required and up to eight hours of stability, Each 1.2 mL vial of hydrated suspension offers 10 inocula.

EZ-Rapid Shot kit include below mentioned based on the pack size :

- 10 or 20 vials of a single quantitated microorganism (1 lyophilized pellet per vial)
- 10 or 20 vials of hydrating fluid (1.2 mL in each vial)

AccuBET™

ENDOTOXIN ASSAY KITS (BET)

Your perfect choice of premium quality, cost-effective reagents for Bacterial Endotoxin Assay

ADVANTAGES

- Single-test ampoule format, popular across 15 countries, available for all lysate sensitivities
- High-stability Control Standard Endotoxin (CSE) provided with the kit
- Cost effective premium quality reagents
- Ampoule packing eliminates the need for reconstitution of the lysate thereby saving endotoxin free water
- Ampoule packing also reduces need for pyrogen free tubes.
- Simplified protocol - add sample/ CSE dilution, mix and incubate!

INTENDED USE

- Qualitative and semi quantitative detection of endotoxin in pharmaceuticals, biological products, radioactive medicine and medical devices, hemodialysis solution, dialysis water and ACD solution
- Pyrogen control or endotoxin detection during production processes of above products as well as of associated raw materials

POTENTIAL USER SEGMENTS

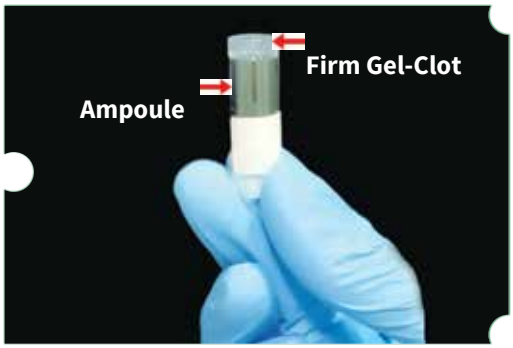
- Bio-pharmaceuticals
- Hospitals & Diagnostic labs
- Pharmaceuticals
- Medical device manufacturers

Gel-Clot Endotoxin Limit Method for Qualitative and Semi Quantitative Detection of Bacterial endotoxin

The Gel-clot range of bacterial endotoxin testing products comes equipped with assorted kits, reagents and accessories to help you perform the qualitative gel-clot bacterial endotoxin assay with ease. **Our assorted kits provide you with all the reagents required for the assay namely the Tachypleus Horseshoe Crab Amoebocyte Lysate (TAL), Control Standard Endotoxin (CSE) and Bacterial Endotoxin Testing (BET) Water.** The reagents are separately available for refilling as per your requirement thus imparting great flexibility to your assay performance. You can choose the Ampoule format thereby ensuring maximal utilization and minimal wastage of the assay reagents.

Gel-Clot Endotoxin Assay Principle

- Presence of the endotoxin activates factor C in the horseshoe crab amoebocyte lysate
- Activated factor C further activates factor B
- Pre-clotting enzyme (inactive) is cleaved by activated factor B into clotting enzyme (active)
- Active enzyme reduces Coagulogen into Coagulin thereby leading to clot formation



Gel-clot formation - Ampoule format

Gel-clot Endotoxin Assay Kits & Reagents

Bacterial Endotoxin Test (BET) Kits

Product	Code	Packing	Price in ₹
Endotoxin Assay Kit (gel-clot) TAL(0.5 EU/mL) 0.2 mL×44 pcs; BET water 2 mL×5 pcs Control Standard Endotoxin ×1 pcs; 44 tests/kit (Ampoule Packing)	THG10-0500	1kit	On Request
Endotoxin Assay Kit (gel-clot) TAL(0.25 EU/mL) 0.2 mL×44 pcs; BET water 2 mL×5 pcs Control Standard Endotoxin ×1 pcs; 44 tests/kit (Ampoule Packing)	THG10-0250	1kit	On Request
Endotoxin Assay Kit (gel-clot) TAL(0.125 EU/mL) 0.2 mL×44 pcs; BET water 2 mL×5 pcs; Control Standard Endotoxin ×1 pcs; 44 tests/kit (Ampoule Packing)	THG10-0125	1kit	On Request
Endotoxin Assay Kit (gel-clot) TAL(0.06 EU/mL) 0.2 mL×44 pcs; BET water 2 mL×5 pcs Control Standard Endotoxin ×1 pcs; 44 tests/kit (Ampoule Packing)	THG10-0060	1kit	On Request
Endotoxin Assay Kit (gel-clot) TAL(0.03 EU/mL) 0.2 mL×44 pcs; BET water 2 mL×5 pcs Control Standard Endotoxin ×1 pcs; 44 tests/kit (Ampoule Packing)	THG10-0030	1kit	On Request

Product	Code	Packing	Price in ₹
Horseshoe Crab Amoebocyte Lysate			
TAL(gel-clot) 0.5 EU/mL, 0.2 mL×50 pcs/pack Ampoule Packing	HG020500	1pk	On Request
TAL(gel-clot) 0.25 EU/mL, 0.2 mL×50 pcs/pack Ampoule Packing	HG020250	1pk	On Request
TAL(gel-clot) 0.125 EU/mL, 0.2 mL×50 pcs/pack Ampoule Packing	HG020125	1pk	On Request
TAL(gel-clot) 0.06 EU/mL, 0.2 mL×50 pcs/pack Ampoule Packing	HG020060	1pk	On Request
TAL(gel-clot) 0.03 EU/mL, 0.2 mL×50 pcs/pack Ampoule Packing	HG020030	1pk	On Request
Gel-Clot Endotoxin Assay Accessories			
Accessories			
Control Standard Endotoxin 10-50 EU, 50 pcs/pack Ampoule Packing	ET-20	1pk	On Request
Control Standard Endotoxin 51-200 EU, 50 pcs/pack Ampoule Packing	ET-120	1pk	On Request
Endotoxin indicator 2000 EU-5000 EU,18 pcs/pack Ampoule Packing	DCV-2000	1pk	On Request
Endotoxin indicator 2000 EU-5000 EU,50 pcs/pack Ampoule Packing	DCV50-2000	1pk	On Request
Endotoxin indicator 4000 EU,18 pcs/pack Ampoule Packing	DCV-4000	1pk	On Request
Endotoxin indicator 4000 EU, 50 pcs/pack Ampoule Packing	DCV50-4000	1pk	On Request
Endotoxin indicator 10000EU, 18pcs/box Ampoule packing	DCV-10k	1pk	On Request
Endotoxin indicator 10000EU, 50pcs/box Ampoule packing	DCV50-10k	1pk	On Request

Product	Code	Packing	Price in ₹
BET water 2 mL×50 pcs/pack, endotoxin free(<0.001 EU/mL) Ampoule Packing	WP-02	1pk	On Request
BET water 5 mL×10 pcs/pack, endotoxin free(<0.001 EU/mL) Ampoule Packing	WP-05	1pk	On Request
BET water 50 mL×20 pcs/pack, endotoxin free(<0.001 EU/mL) Vulcanized Glass Bottle Packing	WP-50	1pk	On Request
BET water 100 mL×20 pcs/pack, endotoxin free (<0.001 EU/mL) Vulcanized Glass Bottle Packing	WP-100	1pk	On Request
pH buffer (acidity) 2 mL×50 pcs/pack, endotoxin free Ampoule Packing	PH-S-2	1pk	On Request
pH buffer (alkaline) 2 mL×50 pcs/pack, endotoxin free Ampoule Packing	PH-J-2	1pk	On Request
Pyrogen-free Ampoules 2 mL×50 pcs/pack, endotoxin free, glucan free	WP-SG-2	1pk	On Request
Pyrogen-free Ampoules 5 mL×10 pcs/pack, endotoxin free, glucan free	WP-SG-5	1pk	On Request
Pyrogen-free pipette tips 250 uL×200 pcs/pack, plastic, endotoxin free, glucan free	WP-XZ-025	1pk	On Request
Pyrogen-free pipette tips 1000 uL×100 pcs/pack, plastic, endotoxin free, glucan free	WP-XZ-100	1pk	On Request
Borosilicate glass tubes 10 x 85mm, 40 pcs/pack endotoxin free, glucan free	GT-1285	1pk	On Request
AntiEnhance 2 mL×10 pcs/pack, endotoxin free Ampoule Packing	AE-A-2	1pk	On Request

HIMEDIA®
For Life is Precious

ATCC®

Authorized Distributor of ATCC

Cell lines and Cell line related services

ATCC offers a complex array of human, animal, insect, fish and stem cells to choose from.

Dear Patrons,

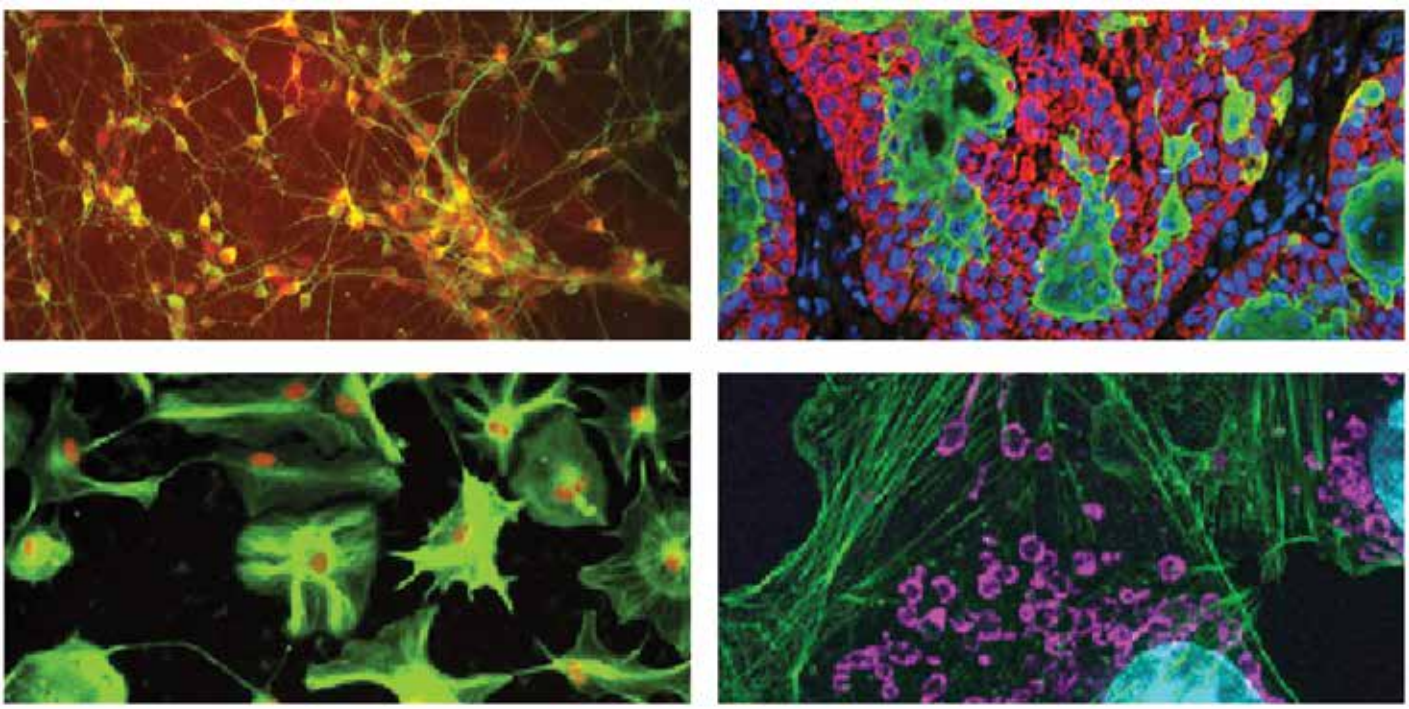
HiMedia is here to serve you as an Authorized Distributor of all ATCC products and services in India.

We are thankful for your continued trust in our service.

For additional product information, contact us at **atcc.sales@himedialabs.com**

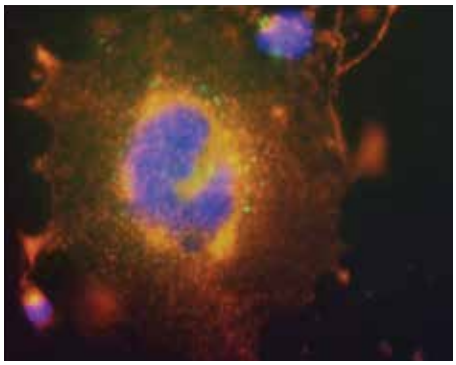
For exclusive CellBio products, contact us at **atcc-cellbio@himedialabs.com**

For detailed information about the ATCC portfolio, visit the ATCC website online at **www.atcc.org**



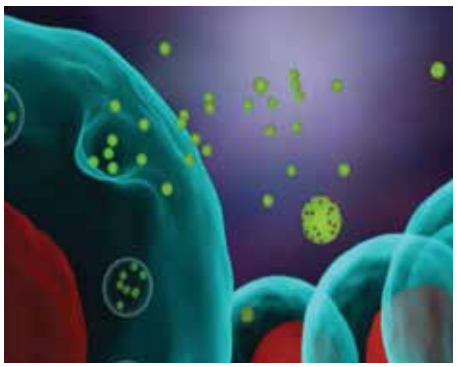
HUMAN CELLS

HepatoXcell™ Primary Human Hepatocytes
Discover how HepatoXcell™ provides a solution for your predictive drug development and toxicity testing.

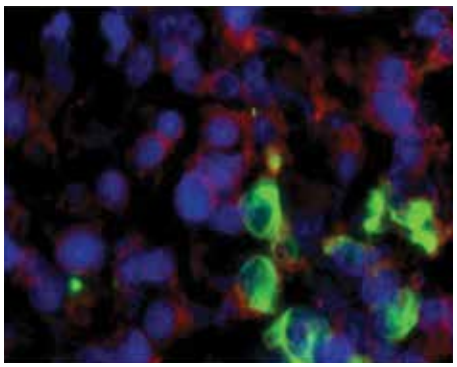


Cancer Panels
ATCC cancer panels consist of tumor cell lines from tissue of tumor origin and are annotated to become powerful cancer tool.

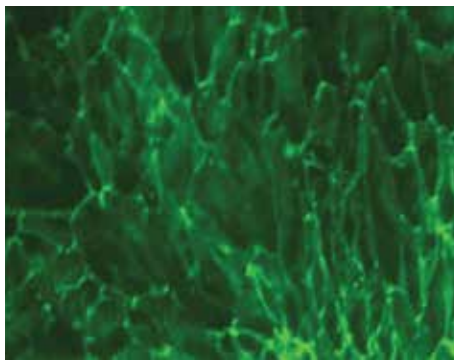
Certified Reference Materials
ATCC Certified Reference Material (CRM) helps you establish sensitivity, linearity, and specificity during assay validation.



Exosomes
Exosomes are extracellular vesicles that are released from cells. Exosomes are important in cell-to-cell communication.

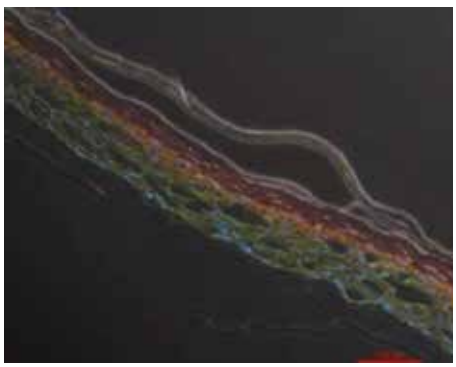


Genetic Mutants
Tumor cell lines become powerful research models and drug discovery tools when the genetic mutant or abnormalities that drive their phenotype are known.

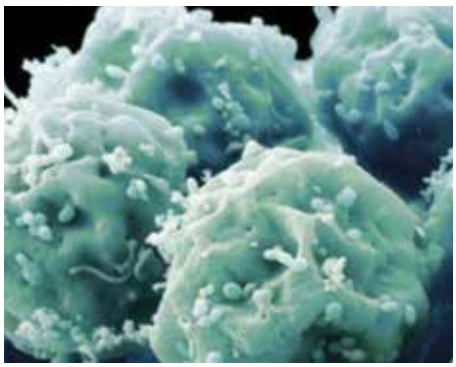


hTERT-immortalized Cells
Human telomerase reverse transcriptase (hTERT) immortalized primary cells represent a breakthrough in cell biology research that combines the in vivo nature of primary cells with the traditional cell line's ability to survive continuously in vitro.

Nucleic Acids
We provide ready-to-use nucleic acids from clinically relevant cell lines, allowing you to focus on your research.

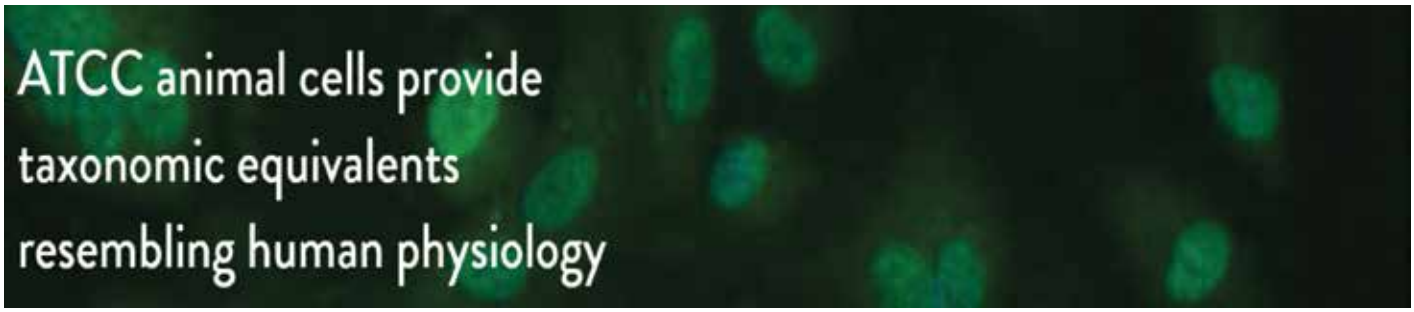


Primary Cells
Traditional attention to quality, research, and science makes ATCC your most reliable source for primary cells.



Stem Cells
ATCC has a vast portfolio of cultures to choose from, including mouse embryonic stem cells, human mesenchymal stem cells.

ANIMAL CELLS



ATCC offers comprehensive list of animal cell lines from a range of animals, including:

- Bovine from a variety of tissue types such as endometrium and cornea
- Canine from range of diseases including osteosarcoma and histiocytosis
- Fish from a variety of tissue sources such as trunk, gill, fin, and ovary
- Hamster cell lines from a wide selection of tissues such as lung, ovary, and kidney
- Monkey cell lines from several species and an assortment of tissue types such as lung and kidney
- Murine cell lines from a wide range of normal and disease states
- Rabbit cell lines representing an array of tissue types including epidermis and kidney
- Rat cell lines from a range of disease states including hepatoma and glioma
- Cell lines from an assortment of other species, including insects such as Drosophila melanogaster and Spodoptera frugiperda, frog species such as Xenopus laevis, and bird species such as Gallus gallus

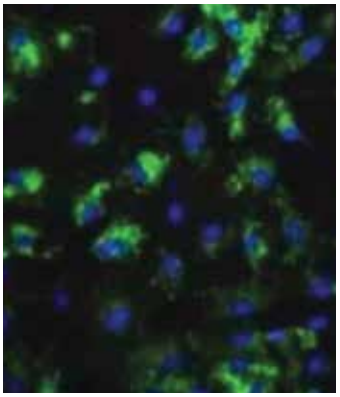
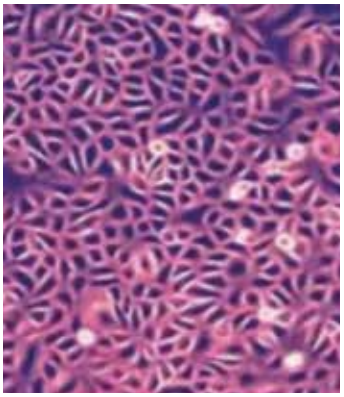
PRIMARY CELLS

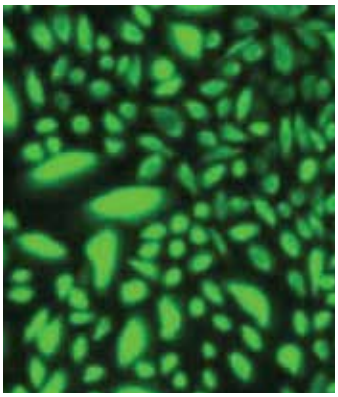


Endothelial cells
Primary endothelial cells are useful tools in studying cancer therapy, wound healing, high-throughput and high-content screening projects, cell signaling studies, and toxicology screening.

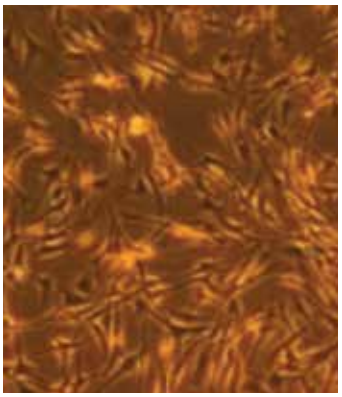


Keratinocytes
From the epidermis of human adult skin or human neonatal foreskin, keratinocytes are significant in the study of diseases such as skin cancer and psoriasis.

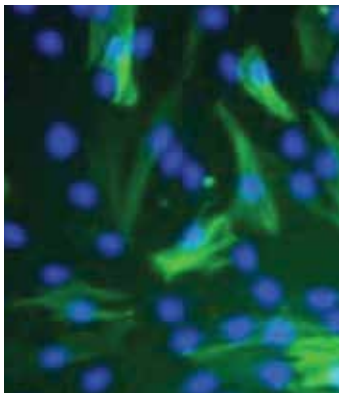
Epithelial cells
Primary epithelial cells are valuable tools for modeling the barriers between the inside and outside of the body and used in a variety of applications from cancer research to toxicology.



Melanocytes
Specialized skin cells that produce the pigment melanin, melanocytes are useful as models for wound healing, toxicity, melanoma, dermal response to ultraviolet (UV) radiation, skin diseases, and cosmetic research.

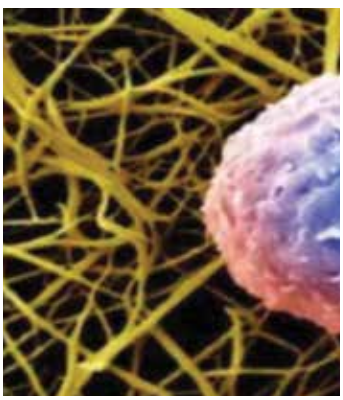


Fibroblasts
Primary fibroblasts are used in studies related to wound healing, tissue engineering and regeneration applications, and inducing pluripotent stem (iPS) cells.

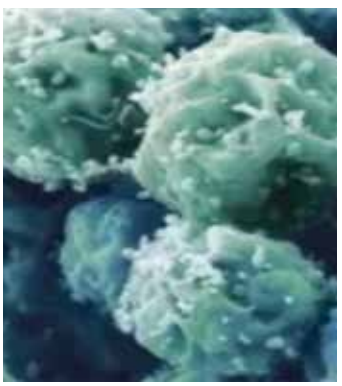


Smooth muscle cells
Primary smooth muscle cells (SMCs) line the insides of hollow organs and mediate their contractility. SMCs can be used to model hypertension fibrosis as well as cancer and other diseases.

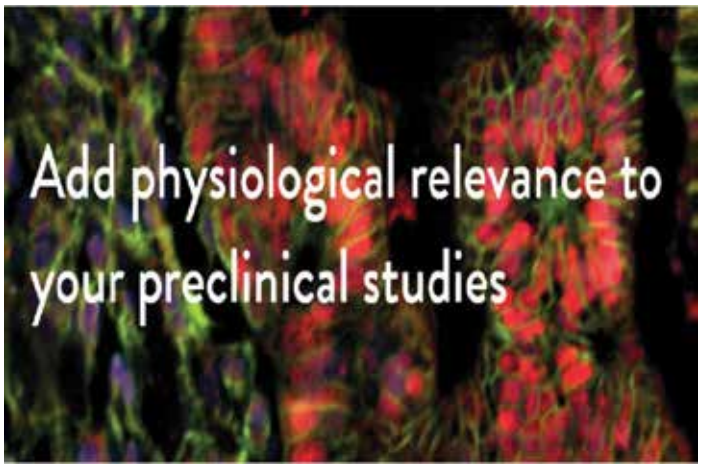
Immune cells
Primary immune cells, including peripheral blood mononuclear cells (PBMCs), are valuable tools for designing and testing cell-based assays and treatments.



Stem cells
Stem cells develop into many different cell types in the body. Because of their differentiative capacity, they offer new potentials for modeling disease states.



Organoids



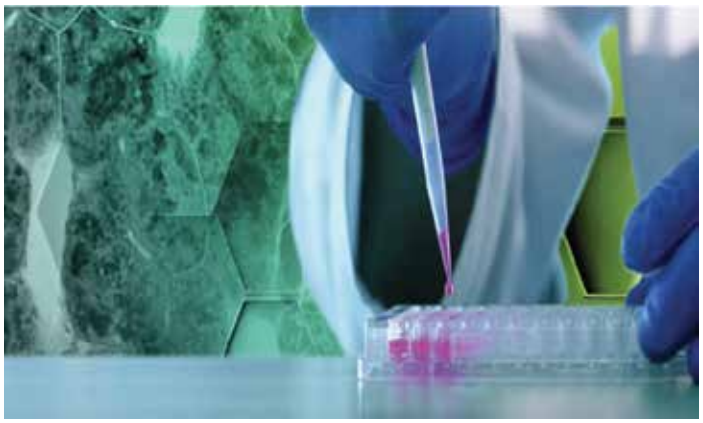
3-D models with biological relevance

Organoids are invaluable preclinical models for studying cancer and offer many advantages over existing human or non-human animal cancer models. These complex, self-organizing microtissues are grown embedded within 3-D extracellular matrix, enabling the formation of complex structures that closely resemble the architecture and physiological functions of organs or tissues. Because they simulate the interactions seen between cells and their surrounding matrix, organoids serve as relevant models for cancer research and drug discovery.

Patient-derived organoids from ATCC

In collaboration with the Human Cancer Models Initiative (HCMI), ATCC offers scientists a wide variety of next-generation 3-D patient-derived organoids. Our portfolio comprises authenticated, fully characterized organoids derived from healthy and cancerous tissues representing a variety of physiological systems. To help you get the most from these models, we also provide organoid growth kits and comprehensive protocols and tutorials to facilitate organoid growth and maintenance.

HepatoXcell™ Primary Human Hepatocytes



The Solution for Your Predictive Drug Development and Toxicity Testing

Primary human hepatocytes are considered the gold standard for in vitro liver models due to their high predictive value in drug metabolism and toxicity studies. They can provide early insights into how a drug will behave in the human body, potentially reducing the risk of adverse effects in clinical trials. ATCC hepatocytes are meticulously isolated and characterized to ensure the highest quality and performance for your drug development needs.

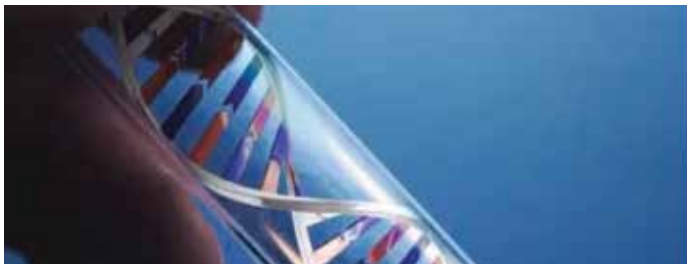
High viability and functionality: Our hepatocytes exhibit excellent viability and retain key liver functions, making them ideal for drug metabolism, toxicity studies, and liver disease research.

Comprehensive characterization: Each batch undergoes rigorous testing to ensure consistency and reliability, including assessments of enzyme activity, protein expression, and metabolic function.

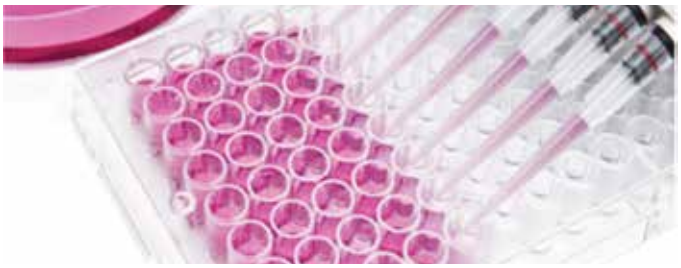
Genetic diversity: These cells can be sourced from multiple donors, reflecting the genetic variability found in the human population. This diversity allows for more comprehensive studies on how different genetic backgrounds can influence liver function and drug response.

Product Name	ATCC® No.	Format	Amount
HepatoXcell™ Eco	PCS-450-012™	Suspension	1 vial, ≥ 4 x 106 cells/vial
HepatoXcell™ Plus	PCS-450-010™	3-Day Plateable	1 vial, ≥ 4 x 106 cells/vial
HepatoXcell™ Pro	PCS-450-011™	7-Day Plateable	1 vial, ≥ 4 x 106 cells/vial
HepatoXcell™ Thawing Medium	PCS-450-032™	1 bottle	250 mL
HepatoXcell™ Maintenance Medium	PCS-450-034™	1 bottle	500 mL
HepatoXcell™ Plating Medium	PCS-450-038™	1 bottle	100 mL

SERVICES



Cell Authentication
Cell authentication is essential. Skipping the authentication step can lead to lost time, money, and publications owing to cross-contamination and misidentification. ATCC can quickly confirm the identity of almost any cell line by using analytical techniques such as sterility testing, CO1, STR profiling for human or mouse cells, and mycoplasma testing so you have confidence in your research materials.



Cell Bank Production
ATCC has been the authority on cell and microbial banking for nearly 100 years. We have the facilities and the expertise to expand cell lines to create master and working cell banks for your assay needs. The cell lines can be supplied by you, or from the ATCC catalog, or from primary cells that are sourced and derived to your specifications. We can support all your Master Cell Bank and Working Cell Bank needs.

Depositing with ATCC
With nearly a century of experience in biomaterials management, we have the expertise needed to authenticate, store, maintain, and globally distribute biological samples. Materials are securely managed through a temperature-controlled supply chain, 24/7 equipment monitoring, and on-call after-hours personnel. Our deposit services include General Collection Deposit, Patent Deposit, Type Strain Deposit, and National Park Service Deposit.

cGMP Services Webinar
For nearly a century, ATCC has been regarded as a pioneer in cell banking and storage, using the most reliable and standardized procedures and equipment to manufacture and preserve your critical biomaterials. In this webinar our scientists discuss ATCC's new cGMP services, highlighting how you can avoid time and labor intensive in-house production and eliminate associated risks and costs.

Bio Pharma Services		418-423

Our Biopharma Capabilities,

Services

1. Gene synthesis and cloning.
2. Cell line development for Biosimilar.
3. Single cell cloning

Product:

- SFM for variety of mammalian cell lines.
- Supplements and reagents for cell culture
- Multiwell plates and shake flask

Cell line Development Offering

1

2

Upstream Process Development Scale Up

Services

1. Media customization
2. Media optimization
3. Process scaleup across scales.
4. Non GMP material generation.

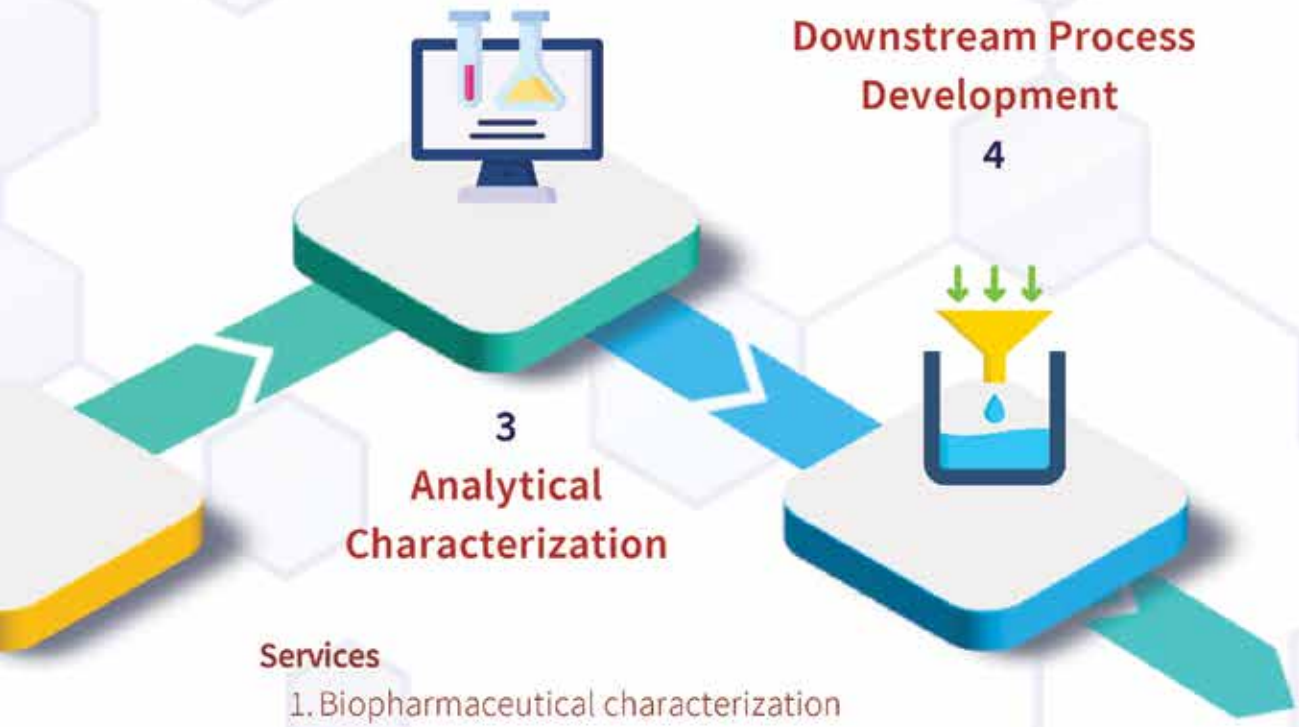
Products and Services

Services

1. Chromatography development and optimization.
2. Reagent grade protein purification (eg. Enzymes)
3. Non GMP material generation.
4. Support scaleup and tech transfer.

Product:

- Filtration solution & Assembly
- Vacuum-driven filters
- Media Filtration
- Vacuum Pump
- Syringe driven Filters
- Filter Membrane



Services

1. Biopharmaceutical characterization services.
2. Method development validation and sample analysis.
3. Product linked impurity and modification analysis.

Product:

- Buffers and reagents

Bio Process Platform

Developing biosimilars is crucial for making life-saving biologic therapies more affordable and accessible to millions. With a growing burden of chronic diseases like cancer, diabetes, and autoimmune disorders, biosimilars offer a cost-effective alternative to expensive biologics, reducing healthcare costs while ensuring high-quality treatment.

With many blockbuster biologics losing patent protection, biosimilar approvals and market entries are accelerating worldwide, creating significant opportunities for biopharma companies.

Successful biosimilar development requires optimized cell culture media, high-purity chemicals, and robust bioprocesses to ensure comparability with reference biologics. Our comprehensive contract R&D services—including custom media development, cell line optimization, upstream and downstream process development, and analytical characterization—empower companies to achieve higher yields, enhanced quality, and regulatory compliance. By leveraging our expertise, biopharma companies can accelerate biosimilar development, streamline pipeline priorities, and bring cost-effective therapies to market faster.

HT Medium Suplement 50X, Liquid w/ 680.5 mg per litre Hypoxanthine and 193.8 mg/litre Thymidine in Phosphate Buffered Saline 10ml HT supplement is sufficient for 500ml medium Store at -30°C to -10°C	TCL073-10ML TCL073-100ML	5x10ml 10x10ml 100ml	9595 16020 14055
ITS Supplement 100X, Liquid w/ 1 mg per ml Insulin from bovine pancreas, 0.55 mg per ml Human Transferrin and 0.5 µg per ml Sodium Selenite in Earle's Balanced Salt Solution w/o Phenol red Store at -30°C to -10°C	TCL064-10ML	10ml	3760
ITS-X Supplement 100X, Liquid w/ 1 mg per ml Insulin, 0.55mg/ml Human transferrin, 0.67ug/ml Sodium selenite and 0.2mg/ml Ethanolamine in Earle's Balanced Salt Solution w/o Phenol red Store at -30°C to -10°C	TCL281-10ML	10ml	4415
ITS-E Supplement 100X, Liquid w/ 1 mg per ml Insulin from bovine pancreas, 0.55 mg per ml Human Transferrin, 0.5 µg per ml Sodium Selenite and 0.2 mg per ml Ethanolamine in Earle's Balanced Salt Solution w/o Phenol red Store at -30°C to -10°C	TCL065-10ML	10ml	2900
ITS-P Supplement 100X, Liquid w/ 1 mg per ml Insulin from bovine pancreas, 0.55 mg per ml Human Transferrin, 0.5 µg per ml Sodium Selenite and 12 mg per ml Sodium pyruvate in Earle's Balanced Salt Solution w/o Phenol red Store at -30°C to -10°C	TCL066-10ML	10ml	11610
ITS-B Supplement 100X, Liquid w/ 1 mg per ml Insulin from bovine pancreas, 0.55 mg per ml Human Transferrin, 0.5 µg per ml Sodium Selenite and 50 mg per ml Bovine serum albumin in Earle's Balanced Salt Solution w/o Phenol red Store at -30°C to -10°C	TCL067-10ML	10ml	3045
ITS-L1 Supplement 100X Liquid w/ 1 mg per ml Insulin from bovine pancreas, 0.55 mg per ml Human Transferrin, 0.5 µg per ml Sodium Selenite, 50 mg per ml Bovine serum albumin, 470 µg per ml Linoleic acid and 470 µg per ml Oleic acid in Earle's Balanced Salt Solution w/o Phenol red Store at -30°C to -10°C	TCL097-10ML	10ml	12880
ITS-D Supplement 100X Liquid w/ 1 mg per ml insulin, 0.55 mg per ml Transformin, 0.67 µg per ml Sodium Selenite and 4 µg per ml Dexamethasone in Earle's Balanced Salt Solution w/o Phenol red Store at -30°C to -10°C	TCL124-10ML	10ml	7730
Trace element concentrate 1, 1000X	TCL282-100ML	100ml	7985
Trace element concentrate 2, 1000X	TCL283-100ML	100ml	5510
Trace element concentrate 3, 1000X	TCL284-100ML	100ml	2935

Ammonium chloride Meets USP-NF, EP and BP and IP testing specifications ClH_4N MW : 53.49 CAS : 12125-02-9 Store below 30°C	TC092M-100G TC092M-500G	100gm 500gm	1910 5735
L-Arginine (From non-animal source) Meets USP -NF , EP , JP , BP and IP testing specifications $C_6H_{14}N_4O_2$ MW : 174.2 CAS : 74-79-3 Store below 30°C	TC052M-25G TC052M-100G TC052M-500G TC052M-1KG	25gm 100gm 500gm 1kg	2420 5985 15670 30445
L-Arginine monohydrochloride (From non-animal source) Meets USP-NF, EP , JP and BP testing specifications $C_6H_{14}N_4O_2 \cdot HCl$ MW : 210.66 CAS : 1119-34-2 Store below 30°C	TC053M-25G TC053M-100G TC053M-500G TC053M-1KG	25gm 100gm 500gm 1kg	2555 6480 19110 29175
L-Asparagine monohydrate (From non-animal source) Meets USP-NF, EP and BP testing specifications $C_4H_8N_2O_3.H_2O$ MW : 150.13 CAS : 5794-13-8 Store below 30°C	TC057M-25G TC057M-100G TC057M-500G TC057M-1KG	25gm 100gm 500gm 1kg	3185 9555 28030 42040
L-Aspartic acid (From non-animal source) Meets USP-NF, EP, JP and BP testing specifications $C_4H_7NO_4$ MW : 133.11 CAS : 56-84-8 Store below 30°C	TC059M-25G TC059M-100G TC059M-500G	25gm 100gm 500gm	1275 3820 17840
D-Biotin Meets USP-NF,EP,BP and JP testing specifications $C_{10}H_{16}N_2O_3S$ MW : 244.31 CAS : 58-85-5 Store at 2-8°C	TC096M-5G TC096M-25G	5gm 25gm	28315 113250
Citric acid anhydrous Meets USP-NF, EP, JP, BP and IP testing specifications $C_6H_8O_7$ MW : 192.12 CAS : 77-92-9 Store below 30°C	TC105M-100G TC105M-500G	100gm 500gm	2420 7645
Cupric sulphate pentahydrate See: Copper (II) sulphate pentahydrate Meets USP -NF, EP and BP testing specifications $CuSO_4.5H_2O$ MW : 249.69 CAS : 7758-99-8 Store below 30°C	TC003M-500G TC003M-1KG	500gm 1kg	3185 5865
Cyanocobalamin (See: Vitamin B12) Meets USP-NF, EP, JP, BP and IP testing specifications $C_{63}H_{88}CoN_{14}O_{14}P$ MW : 1355.37 CAS : 68-19-9 Store at 2-8°C	TC183M-100MG TC183M-250MG TC183M-1G TC183M-5G	100mg 250mg 1gm 5gm	3185 4075 6820 25480
L-Cysteine hydrochloride monohydrate (From non-animal source) Meets USP-NF,EP,JP and BP testing specifications $HSCH_2CH(NH_2)COOH \cdot HCl \cdot H_2O$ MW : 175.63 CAS : 7048-04-6 Store below 30°C	TC058M-25G TC058M-100G TC058M-500G TC058M-1KG	25gm 100gm 500gm 1kg	1700 4840 21655 32490
Edetic acid (See: EDTA free acid, anhydrous Diaminoethane-tetraacetic acid, Meets USP-NF, EP and BP testing specifications $C_{10}H_{16}N_2O_8$ MW : 292.24 CAS : 60-00-4 Store below 30°C	TC115M-100G TC115M-500G	100gm 500gm	4160 12955
EDTA disodium salt dihydrate EDTA disodium salt Meets USP-NF, EP, BP and IP testing specifications $C_{10}H_{14}N_2O_8Na_2.2H_2O$ MW : 372.24 CAS : 6381-92-6 Store below 30°C	TC038M-100G TC038M-500G	100gm 500gm	3885 13760
Ferrous sulphate heptahydrate Iron(II) sulfate heptahydrate Meets USP-NF, EP, JP, BP and IP testing specifications $FeSO_4..7H_2O$ MW : 278.01 CAS : 7782-63-0 Store below 30°C	TC119M-500G TC119M-1KG	500gm 1kg	2080 3285
D-(+)-Galactose anhydrous Meets USP-NF, EP and BP testing specifications $C_6H_{12}O_6$ MW : 180.16 CAS : 59-23-4 Store below 30°C	TC127M-100G TC127M-500G TC127M-1KG	100gm 500gm 1kg	5070 22825 34240
D-(+)-Glucose anhydrous Dextrose Meets USP-NF, EP, JP, BP and IP testing specifications $C_6H_{12}O_6$ MW : 180.16 CAS : 50-99-7 Store below 30°C	TC130M-100G TC130M-1KG	100gm 1kg	685 3960

Unless indicated all the above products to be stored below 30°C.

Product	Code	Packing	Price in ₹
L-Glutamic acid (From non-animal source) Meets USP-NF, EP, JP and BP testing specifications $C_5H_9NO_4$ MW : 147.13 CAS : 56-86-0 Store below 30°C	**TC074M-25G** **TC074M-100G** **TC074M-500G** **TC074M-1KG**	**25gm** **100gm** **500gm** **1kg**	**1275** **3820** **15290** **25480**
L-Glutamine (From non-animal source) Meets USP-NF and JP testing specifications $C_5H_{10}N_2O_3$ MW : 146.14 CAS : 56-85-9 Store below 30°C	**TC243M-10G** **TC243M-25G** **TC243M-100G** **TC243M-1KG**	**10gm** **25gm** **100gm** **1kg**	**1910** **3070** **10190** **56055**
Glycerol Glycerin Meets USP-NF, EP, JP, BP and IP testing specifications $HOCH_2CH(OH)CH_2OH$ MW : 92.09 CAS : 56-81-5 Store below 30°C	**TC503M-500ML** **TC503M-1L**	**500ml** **1lt**	**4075** **7900**
Glycine 2-Aminoacetic acid Meets USP-NF, EP, JP, BP and IP testing specifications NH_2CH_2COOH MW : 75.07 CAS : 56-40-6 Store below 30°C	**TC075M-100G** **TC075M-1KG**	**100gm** **1kg**	**6120** **21405**
L-Histidine (From non-animal source) Meets USP-NF, EP, JP and BP testing specifications $C_6H_9N_3O_2$ MW : 155.15 CAS : 71-00-1 Store below 30°C	**TC076M-100G** **TC076M-500G** **TC076M-1KG**	**100gm** **500gm** **1kg**	**7645** **25480** **45865**
L-Histidine monohydrochloride monohydrate (From non-animal source) Meets EP, JP and BP testing specifications $C_6H_9N_3O_2.HCl.H_2O$ MW : 209.63 CAS : 5934-29-2 Store below 30°C	**TC077M-25G** **TC077M-100G** **TC077M-1KG**	**25gm** **100gm** **1kg**	**3055** **8410** **45865**
Hydrochloric acid Meets USP-NF, EP , JP, BP and IP testing specifications HCl MW : 36.46 CAS : 7647-01-0 Store below 30°C	**TC536M-2.5L**	**2.5lt**	**6890**
L-Isoleucine (From non-animal source) Meets USP-NF, EP , JP and BP testing specifications $C_6H_{13}NO_2$ MW : 131.18 CAS : 73-32-5 Store below 30°C	**TC049M-10G** **TC049M-25G** **TC049M-100G** **TC049M-1KG**	**10gm** **25gm** **100gm** **1kg**	**2250** **4395** **15160** **90965**
Lactose monohydrate Meets USP-NF, EP, BP, JP and IP testing specifications $C_{12}H_{22}O_{11}H_2O$ MW : 360.31 CAS : 64044-51-5 Store below 30°C	**TC144M-1KG**	**1kg**	**5310**

Product	Code	Packing	Price in ₹
L-Leucine (From non-animal source) Meets USP-NF, EP, JP and BP testing specifications $C_6H_{13}NO_2$ MW : 131.17 CAS : 61-90-5 Store below 30°C	**TC078M-10G** **TC078M-25G** **TC078M-100G** **TC078M-1KG**	**10gm** **25gm** **100gm** **1kg**	**1910** **3565** **11855** **63705**
L-Lysine monohydrochloride L-Lysine hydrochloride (From non-animal source) Meets USP-NF, EP, JP and BP testing specifications $C_6H_{14}N_2O_2.HCl$ MW : 182.65 CAS : 657-27-2 Store below 30°C	**TC079M-25G** **TC079M-100G** **TC079M-1KG**	**25gm** **100gm** **1kg**	**2295** **4455** **19110**
Magnesium sulfate heptahydrate Meets USP-NF, EP, JP, BP and IP testing specifications $H_{14}MgO_{11}S$ MW : 246.466 CAS : 10034-99-8 Store below 30°C	**TC577M-100G** **TC577M-1KG**	**100gm** **1kg**	**3105** **5170**
D-Mannitol Meets USP-NF, EP, JP, BP and IP testing specifications $C_6H_{14}O_6$ MW : 182.172 CAS : 69-65-8 Store below 30°C	**TC513M-25G** **TC513M-100G**	**25gm** **100gm**	**2545** **7645**
L-Methionine (From non-animal source) Meets USP-NF, EP, JP and BP testing specifications $C_5H_{11}NO_2S$ MW : 149.21 CAS : 63-68-3 Store below 30°C	**TC080M-25G** **TC080M-100G** **TC080M-1KG**	**25gm** **100gm** **1kg**	**3695** **10580** **57330**
Nicotinamide Niacinamide Meets USP-NF, EP, JP, BP and IP testing specifications $C_6H_6N_2O$ MW : 122.12 CAS : 98-92-0 Store below 30°C	**TC154M-100G** **TC154M-500G**	**100gm** **500gm**	**1910** **5095**
Orthophosphoric acid Phosphoric acid Meets USP-NF, EP, BP and IP testing specifications H_3PO_4 MW : 98 CAS : 7664-38-2 Store below 30°C	**TC533M-100G** **TC533M-500G**	**100gm** **500gm**	**5095** **15290**
L-Phenylalanine (From non-animal source) Meets USP-NF, EP, JP and BP testing specifications $C_9H_{11}NO_2$ MW : 165.19 CAS : 63-91-2 Store below 30°C	**TC098M-10G** **TC098M-25G** **TC098M-100G** **TC098M-1KG**	**10gm** **25gm** **100gm** **1kg**	**1910** **3820** **10830** **70075**
Poloxamer 188 (See: Pluronic® F-68) Meets USP-NF, EP, BP and IP testing specifications $(C_3H_6O.C_2H_4O)x$ MW : 7680 - 9510 CAS : 9003-11-6 Store below 30°C	**TC222M-100G** **TC222M-1KG**	**100gm** **1kg**	**2170** **19110**

Biopharma Services

HiMedia Labs is your end-to-to-development partner for biologics development

Transforming Science into Biopharma Success

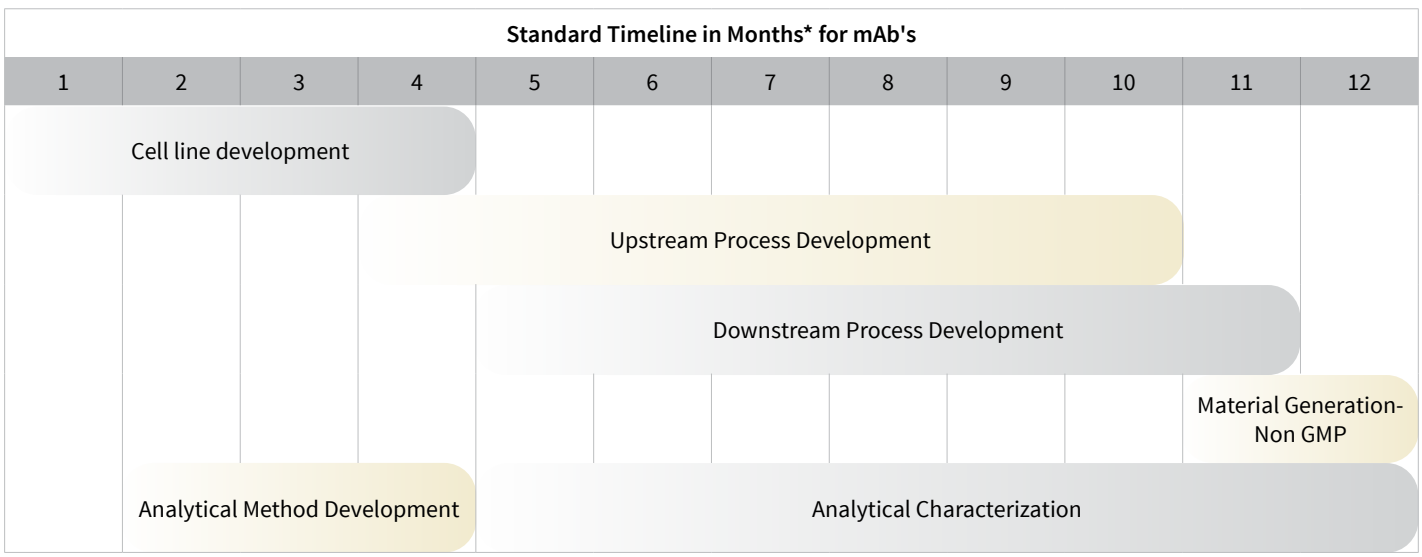
HiMedia Labs provides integrated development services for your biologic molecule from cell line development, upstream process development, downstream purification with analytical testing & characterization services at every stage. We will manage your project with flexibility and agility to lead you toward your goals.

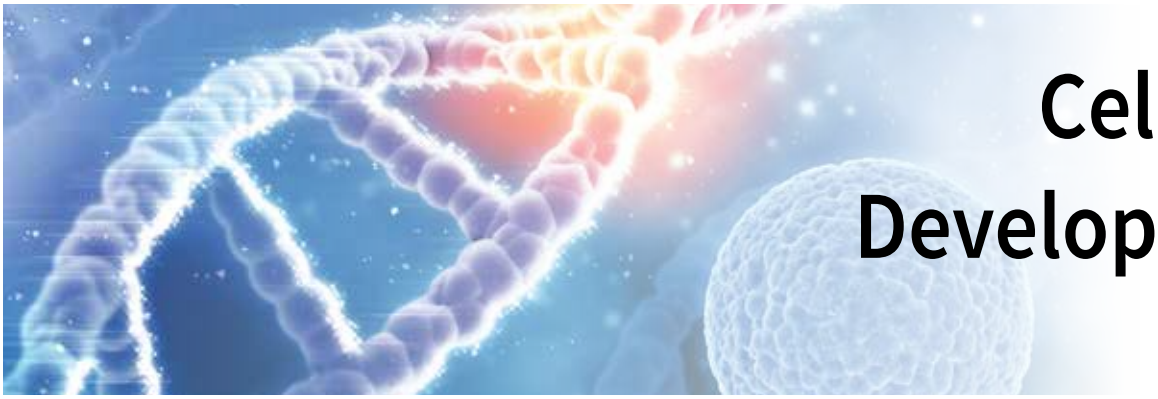
Cell Line Development

Upstream Process Development

Downstream Process Development

Analytical Method Development





Cell Line Development

HiMedia's cell line development protocols leverage more than four decades of experience of its expert team involved in developing recombinant clones for regulated markets.

Cell line development workflow is designed to reduce the time to obtain clones with established monoclonality and thus speed up the time to reach process development and subsequent process scale up. All the steps in the cell line development workflow are well documented and meets the stringent regulatory expectations at the time of BLA filing.

Services within cell line development

- Gene synthesis and vector construction
- Transfection grade DNA preparation
- Transient expression for developability assessment
- Recombinant biologic product cell lines supplied with regulatory compliance report, assured monoclonality, established genetic stability
- Single cell cloning with regulatory compliance report

Upstream Process Development

HiMedia has the expertise to develop robust, reproducible, and seamlessly scalable processes that can allow the customers to reach process scale-up for clinical development quickly. There is a combined experience of more than three decades of process development at HiMedia.

Upstream process development would involve use of chemically defined media and feeds with no animal origin products to provide highly consistent results and complete regulatory compliance.

Development of upstream cell culture process would be aimed at improving the productivity of the clones as well as assessing product quality eg. glycosylation and charge variants. Typical upstream process development can be carried out at different scales – 1 L, 5 L, 10 L and 50 L to demonstrate robustness as well as cater to customer needs.

Services within upstream process development

- Non-gmp material production
- Media customization around customer cell line using high-throughput methods
- Media optimization in bioreactor tubes and shake-flasks
- Process scale-up across different scales with analytical testing
- Process optimization with analytical testing and characterization
- Perform process validation

Downstream Process Development

HiMedia possesses the expertise to develop robust, reproducible, and scalable downstream processes that enable customers to rapidly transition to clinical-scale manufacturing. With a combined experience of over three decades in process development, HiMedia offers comprehensive solutions for purifying biopharmaceuticals.

Downstream process development focuses on efficient isolation and purification of the target protein from the cell culture supernatant. This involves a multi-step approach, including Clarification, Capture, Intermediate, Polishing Chromatography and Formulation. We utilize a flexible approach to optimize critical process parameters for maximum yield and purity.

The downstream process development would be aimed at achieving the quality specifications in terms of Purity, Safety and Efficacy. We can cater to purification up to the scale of 5L. The processes are designed to be scaled to manufacturing scales.

Services within downstream process development

- Non-GMP material generation for Tox and Animal studies
- Chromatography development and optimization
- Formulation: Filtration (TFF) development and sizing
- Scale-Up & Tech Transfer: Support seamless scale-up processes from lab to pilot and manufacturing scales

Reagent grade protein purifications like enzymes from natural and recombinant sources

Analytical Method Development

HiMedia Laboratories offers a comprehensive range of biopharmaceutical characterization services, specifically designed to support the development of novel biologics and biosimilars at all stages of development. Our mission is to assist biopharmaceutical developers in meeting regulatory compliance through an extensive and thorough comparability analysis. We provide a data-driven approach, ensuring that the totality of analytical evidence supports a seamless regulatory submission process. Our services are designed to meet the high standards required in the biopharmaceutical industry, ensuring that our clients can confidently advance their biologics programs.

Biopharmaceutical Characterization Services

HiMedia provides detailed structural insights into proteins using the following techniques:

- Intact Mass Analysis
- Peptide Mapping Analysis
- Amino Acid Composition Analysis
- N- and C-Terminal Sequencing
- Disulfide Bridge Analysis
- Protein titer Estimation

Method Development, Validation & Sample Analysis

HiMedia collaborates closely with clients to define and agree upon a plan for method qualification/validation and sample analysis. The analysis is performed based on the developed and validated method. The final deliverables include:

- Method Development, Qualification/Validation Report
- Test Results with Basic Interpretation

Product-Linked Impurity and Modifications Analysis

To ensure the quality and stability of biologics and biosimilars, we offer specialized impurity and modification analysis services, including:

- Free Thiol Content Analysis
- Glycosylation Analysis
- Aggregation Analysis
- Charge Variant Analysis
- Oxidation Analysis
- Deamidation Analysis
- Host Cell Protein (HCP) Analysis

Custom Media Development

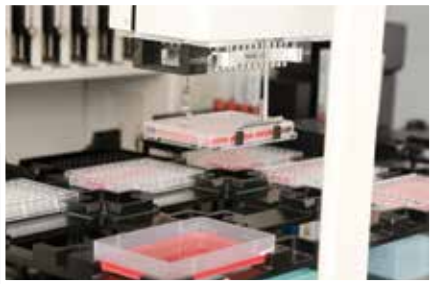
Media Development is our core expertise, and we combine this with our depth in analytical characterization, we can deliver custom media to drive optimal results.

Nutrient consumption pattern over time provides critical understanding of what the cells are using and what do they require throughout culture period. This supports rational fine-tuning of specific nutrient requirements to improve cell viability, peak culture density and longevity, finally resulting in highest productivity and quality of output.

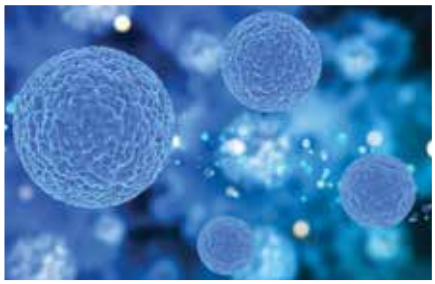
Spent medium analysis is therefore a major tool to analyse CMAs, CPPs and CQAs in critical processes such as

- Media screening and development
- Clone screening and selection
- Process development
- Optimization of feeding strategy

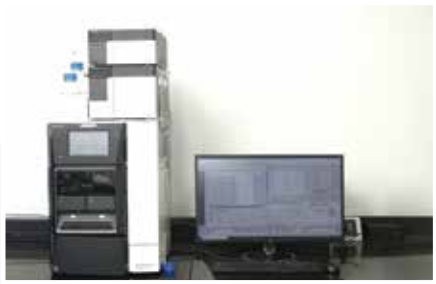
Spent Media Analytical Service offers you a complete set of tests required to analyse nutrient profile of your spent media. Using a complete regime of advanced analytical instruments, our team of experience scientists has optimized and validated methods for analysis of cell culture supernatants.



Our years of experience in **Media Development** with state-of-the-art infrastructure for media screening from microliter volume to bioreactors



We have built **Cell Culture R & D** for handling variety of mammalian cell lines like biopharma and cultivated meat as an example



Breadth and Depth of Analytical capabilities

1) Trace elements, Metals and major ions analysis
2) Nucleotide Analysis
3) Biochemicals Analysis
4) Vitamin analysis
5) Protein/proteome characterisation
6) Aminoacid analysis

CELLBIO

Our Offerings for Phar

Drug Discovery, Screening & Development

A)Research and Development
1) ATCC Cells- **Pg.no. 399 - 404**
2) Media & Reagents- **Pg.no. 463 - 482**
2) Detection Kits- **CCK023, CCK028**
3) Mycoplasma Kits- **CCK009**

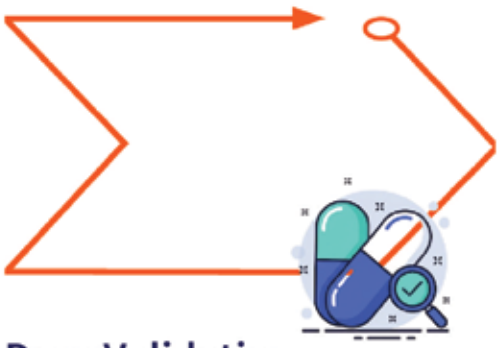
B)Salts, Buffer, Chemicals, Solvents (Multicompendial Grade)- **Pg.no. 574 - 582**

C)Filtration
1) Filtration Systems- **SF85A1**
2) Syringe Filters- **SF172, SF175, SF9 (Pg.no. 613 - 615)**
3) Filtration Membrane- **Pg.no. 610 - 612**
4) Filtration Funnel- SF190 Series **(Pg.no. 630 - 631)**

D) Plasticware & Consumables
1) PET & PETG- **TCP271, TCP318, TCP334**
2) Pipettes, Flask, Plates- **Pg.no. 584- 594**
3) Roller Bottle- **TCG10, TCG16, TCG18**

E) Services
1) Cell Viability and Cytotoxicity Services
2) *In-vitro* Assays-
3) Cell Preservation (Cell Banking/Bio banking)
4) Mycoplasma Detection Services

F)Instrumentation
1)CO2 Incubator- **AI005, AI006**
2) Microscope- **AI003, AI004**
3) Ice Flaking Machine- **AI0038**



Drug Validation

A) Analytical Services
1) Structure Analysis
2) Impurity Profiling
3) Charge Variant analysis
4) Method development
5) Mass Analysis
6) Detection of Lambda Max
7) Elemental Impurities Analysis

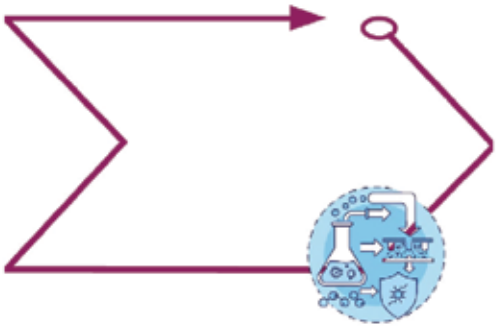
B)Salts, Buffer, Chemicals, Solvents (Multicompendial Grade)- **TC596, TC011M, TC146U, TC046M**

C) *In-vitro* Analysis
1) Drug Metabolic & Pharmacokinetic Studies using Caco-2 Model (Mono & Co-Culturing)- **ATCC HTB-37**
2) Proliferation Assays/cytotoxicity Assays- **CCK032, CCK070, CCK031**
3) Bioassays

D) Filtration Solutions- Pg.no. 606- 638

E) Plasticware & Consumables
1) PET & PETG-**TCP271, TCP318, TCP334**
2) Pipettes, Flask, Plates,Well Plates- **Pg.no. 584-594**
3) Roller Bottle- **TCG10, TCG16, TCG18**
4) Erlenmeyer Flask- **Pg.no. 590 - 591**
5) CRG- **Pg.no. 659- 662**

maceutical Industry



Pilot Scaleup(1-5L), Purification & Stability

A) Salts, Buffer, Chemicals, Solvents (Multicompendial Grade) **Pg.no. 574 - 582**

B) Filtration Solutions

1) Filter Holders & Manifold System -**SF76, SF78, SF82A1, SF85A1**

2) Filter Assembly- **SF198A, SF202A, SF86A1A**

3) Filtration Cups- **SF190 Series (Pg.no. 630 - 631)**

4) Filtration Pump- **AI0014**

C) Services

1) Scale-up Platform Shake Flask to to 50L

2) Process Optimization

3) Quality by Design

Clinical Trials (Phase I, II, III)

Analytical Services

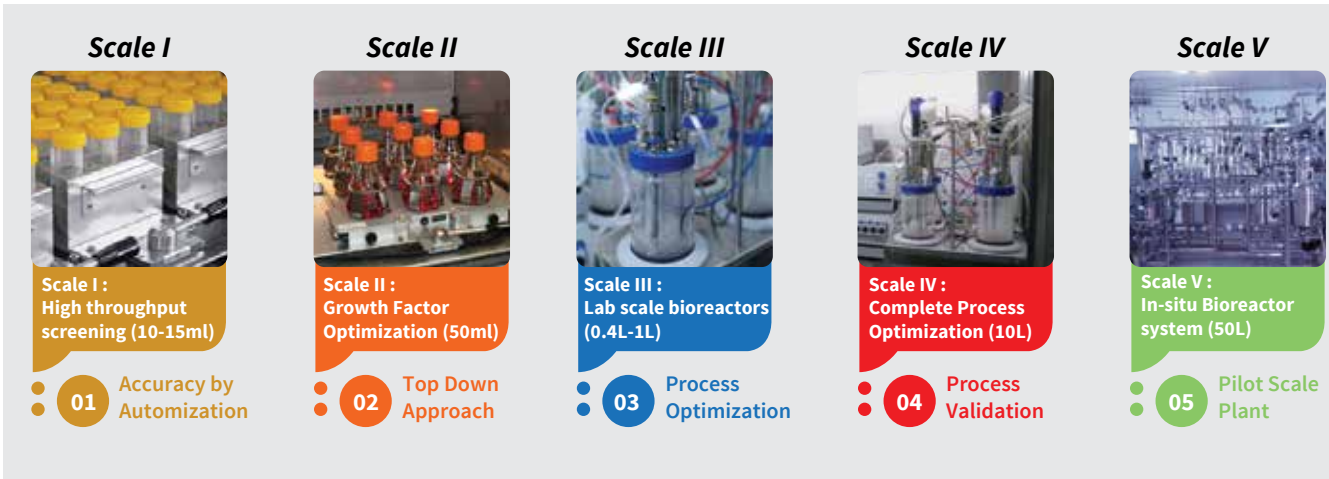
Regulatory Review

Documentation Support

Media Optimization Service

Scale up validation service is specially designed for laboratories that may have limited time, personnel, lab space and resources. And also for the laboratories which require third party validation.

Systematic Scale Up Approach



www.himedialabs.com

Advanced Analytical Services

HiMedia's Advanced Analytical Services provide precise characterization, rigorous quality testing and comphrehensive analytical solutions for research and biopharma applications.

Method Validations

- Cleaning Validation by UV
- Cleaning Validation by HPLC, run time up to 40 mins
- Cleaning Validation by HPLC, run time up to 60 mins
- Related Substances (RS) by HPLC, run time up to 40 mins
- RS by HPLC, run time up to 60 mins
- Elemental Impurities Validation by ICP-MS, less than 5 elements
- Elemental Impurities Validation by ICP-MS, up to 10 elements
- Method Validation by ICP-MS, more than 10 elements
- Method Validation by LCMS-MS, full validation for 2 impurities
- Partial Validation by LCMS-MS up to 2 impurities
- Method Validation by GC HS/MS
- Method Validation by HPLC
- Method Validation for Extractable & Leachable
- Method Validation for Nitrosamines Impurities

Method Development

- RS by HPLC, run time up to 40 mins
- RS by HPLC, run time up to 60 mins
- Elemental Impurities by ICP-MS, less than 5 elements
- Elemental Impurities by ICP-MS, up to 10 elements
- RS Method Development by LCMS-MS
- RS Method Development by LCMS-MS, limits in ppb level
- Method Development by GC-MS
- Assay Method Development by HPLC
- Method Development for Extractable & Leachable
- Method Development Nitrosamines Impurities
- Method Validation by GC HS/MS
- Method Validation by HPLC
- Method Validation for Extractable & Leachable
- Method Validation for Nitrosamines Impurities

Introducing Advanced Analytical Lab of Cell Biology at HiMedia offers services to Pharma, Biopharma, and Bioscience Companies with our high technological analytical instruments.

Venture into the world of accuracy and creativity with HiMedia's CellBio. We are excited to present our Advanced Analytical Services, which will use modern technology to strengthen your efforts in biotechnology, biopharmaceutical, pharmaceutical, and scientific fields. Our offerings have been carefully developed to assist your business conducting scientific research by providing unparalleled insights through powerful data analytics. We offer complete support with a persistent commitment to excel for your requirements in quality assurance and research & development. Discover the limitless possibilities that our modern analytical services allow to enhance productivity, stimulate innovation, and guarantee success in the constantly evolving fields of pharma, biopharma, bioscience, and biotechnology.

FEATURES

- **Advanced Instrumentation:**
  - Utilize advanced analytical instruments for precise and sensitive measurements.
- **Thorough Biomolecule Analysis:**
  - Analyze a wide range of biomolecules, including proteins, nucleic acids, lipids, and metabolites.
- **High-throughput Screening:**
  - Accelerate research with efficient high-throughput screening for large sample sets.
- **Customized Assay Development:**
  - Custom assays to specific project needs, ensuring relevance and accuracy.
- **Sensitive Detection Methods:**
  - Employ advanced detection methods for trace-level analysis and increased sensitivity.
- **Quantitative Analysis:**
  - Provide accurate and reliable quantitative measurements for precise data interpretation.
- **Proteomics and Metabolomics Solutions:**
  - Offer services for in-depth proteomics and metabolomics profiling.
- **Regulatory Compliance:**
  - Ensure adherence to regulatory standards, providing reliable data for submissions.
- **Data Interpretation and Reporting:**
  - Deliver comprehensive data interpretation and detailed reports for informed decision-making

HRMS Analytical Services

Biopharmaceutical Characterization Services by HiMedia Laboratories

HiMedia Laboratories offers a comprehensive range of biopharmaceutical characterization services, specifically designed to support the development of novel biologics and biosimilars at all stages of development. Our mission is to assist biopharmaceutical developers in meeting regulatory compliance through an extensive and thorough comparability analysis. We provide a data-driven approach, ensuring that the totality of analytical evidence supports a seamless regulatory submission process.

Biosimilarity Assessment Characterization

HiMedia Laboratories is entrusted with delivering a complete data package for assessing Biosimilarity between test and reference products. Each test result is meticulously examined, and any deviations are carefully analyzed to ensure accuracy and reliability. The final deliverable includes a detailed **Technical Report** that evaluates Biosimilarity, leveraging comprehensive analytical evidence to ensure regulatory standards are met.

Comparative Assessment for Biosimilars and Abbreviated New Drug Applications (ANDA)

During the manufacturing of biosimilars and products under Abbreviated New Drug Applications (ANDA), comparative assessment studies are crucial to ensure that any changes in the manufacturing process do not adversely affect the quality, safety, or efficacy of the biologic product. These studies are also essential for providing analytical confirmation that the drug product or substance maintains similar quality attributes before and after any changes in the manufacturing process.

Post-Translational Modifications (PTMs)

For biologic drug substances produced through bioprocessing, post-translational modifications (PTMs) and variants are common occurrences. PTMs can introduce structural heterogeneity, which can influence the structure, stability, and interactions of proteins. Determining PTMs is essential but can be challenging due to the need for a complex array of detailed analytics to confirm the identity of the protein and ensure a consistent manufacturing process. Incorrect modifications can lead to potentially harmful immune responses, making precise and thorough analysis critical.

Proteomics and Protein Analysis Services

As a trusted expert in protein analysis, HiMedia utilizes state-of-the-art Mass Spectrometry and Spectroscopy techniques to deliver cutting-edge solutions for life sciences researchers worldwide. We engage in close collaboration with our clients, assisting them at every step right from understanding their challenges to designing experiments and executing them within a mutually agreed-upon technical scope.

High Resolution Mass Spectrometry Analysis of Peptides and Proteins

The analysis of proteins is central to drug development, particularly in the realm of biopharmaceuticals. Proteins play a crucial role in all biomedical systems, making their accurate identification, quantification, and quality assessment essential. This requires instruments that are highly sensitive, accurate, and capable of offering a broad dynamic range. Mass spectrometry (MS) is a powerful technique that provides highly accurate information on the molecular weight of intact molecules, making it invaluable for protein identification, characterization, and quantification. The speed, sensitivity, and versatility of MS make it an indispensable tool in the analysis of proteins and peptides.

Key Features of High Resolution Mass Spectrometry for Protein Analysis

1. High Accuracy and Sensitivity:
   - Our HRMS offers high sensitivity, allowing for the detection of proteins and peptides at very low concentrations.
   - The high accuracy of MS ensures precise molecular weight measurements, which are crucial for identifying and characterizing proteins.
2. Broad Dynamic Range:
   - HRMS can analyze a wide range of protein concentrations, from picomolar to micromolar levels, making it suitable for both high-abundance and low-abundance proteins.
3. Versatility:
   - HRMS can be used for various applications, including protein identification, quantification, post-translational modification (PTM) analysis, and structural characterization.
4. Structural Characterization:
   - High Resolution Mass Spectrometry (HRMS) is particularly useful for detailed structural analysis of protein therapeutics, including synthetic and recombinant peptides. HRMS provides highly accurate data on the molecular structure, which is essential for assessing the quality attributes of protein therapeutics.

Applications at Himedia

At Himedia, we offer High Resolution Mass Spectrometry (HRMS) services for the structural characterization of protein therapeutics. Our HRMS capabilities include:

1. Protein Identification:
   - Accurate identification of proteins and peptides, ensuring that the correct molecules are being analyzed.
2. Characterization:
   - Detailed analysis of protein structure, including the identification of post-translational modifications (PTMs) such as glycosylation, phosphorylation, and oxidation.
3. Quantification:
   - Precise quantification of protein and peptide concentrations, which is essential for ensuring consistent quality in biopharmaceutical production.
4. Quality Assessment:
   - Comprehensive assessment of quality attributes, including purity, stability, and structural integrity, to ensure that protein therapeutics meet regulatory standards.

By leveraging the advanced capabilities of HRMS, Himedia provides highly accurate and reliable analysis, supporting the development and quality control of protein therapeutics. Our services are designed to meet the high standards required in the biopharmaceutical industry, ensuring that our clients can confidently advance their drug development programs.

HRMS-Based Biopharmaceutical Characterization Services

Structural Characterization Services

HiMedia provides detailed structural insights into proteins using the following techniques:

- Intact Mass Analysis
- Peptide Mapping Analysis
- Amino Acid Composition Analysis
- N- and C-Terminal Sequencing
- Disulfide Bridge Analysis
- Protein titer Analysis

Product-Linked Impurity and Modifications Analysis

To ensure the quality and stability of biologics and biosimilars, we offer specialized impurity and modification analysis services, including:

- Free Thiol Content Analysis
- Glycosylation Analysis
- Aggregation Analysis
- Charge Variant Analysis
- Oxidation Analysis
- Deamidation Analysis
- Host Cell Protein (HCP) Analysis

Method Development, Validation, and Sample Analysis

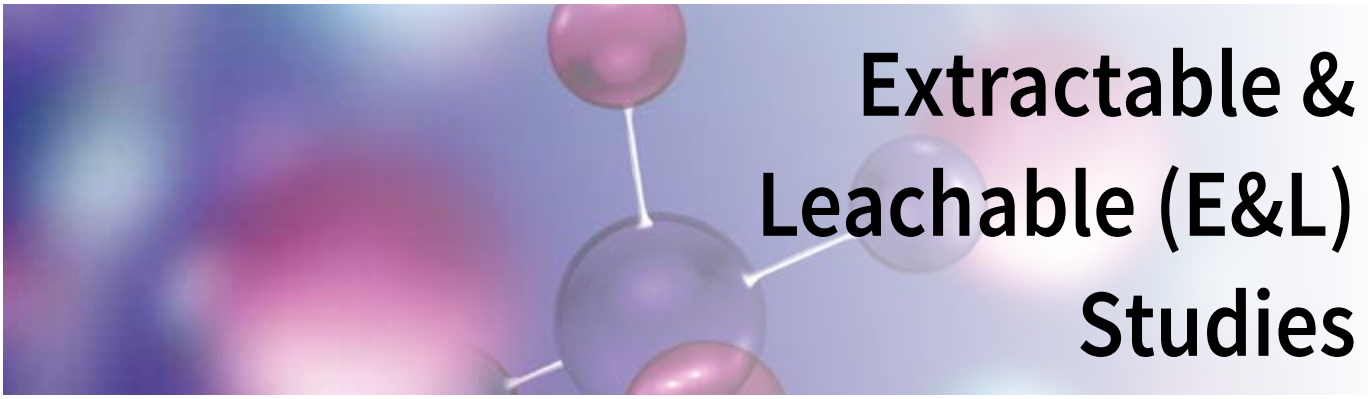
HiMedia collaborates closely with clients to define and agree upon a plan for method qualification/validation and sample analysis. The analysis is performed based on the developed and validated method. The final deliverables include:

- Method Development , Qualification/Validation Report
- Test Results with Basic Interpretation

Test Analysis Analytical Services

HiMedia also offers flexible analytical services, where tests are conducted using pre-developed methods and advanced techniques. The deliverables include the Test Results, while interpretation and Biosimilarity assessment are to be carried out by the client. This approach ensures efficiency for clients who have internal capabilities to analyze the results further.

At HiMedia Laboratories, our biopharmaceutical characterization services are backed by robust scientific expertise and cutting edge technology, ensuring reliable, high-quality solutions to advance biologics and biosimilar development.



Extractable & Leachable (E&L) Studies

Extractable and leachable (E&L) compounds can originate from pharmaceutical container closure systems, process equipment, and medical device packaging, potentially contaminating drug products. Comprehensive E&L studies are critical to ensure product safety, quality, and compliance with regulatory standards.

Key Services Offered:

- **Container Closure System (CCS) Selection:** Tailored for various dosage forms and medical devices.
- **Customized E&L Studies:** Designed and executed per regulatory guidelines such as USFDA (USP <1663> and <1664>), EMA, PQRI, ICH, or specific customer requirements.

Tests Offered:

- Hydrolytic Resistance
- Glass Grains & Surface Glass Tests
- Surface Etching
- Chemical & Physicochemical Tests
- Ink/Gum Migration

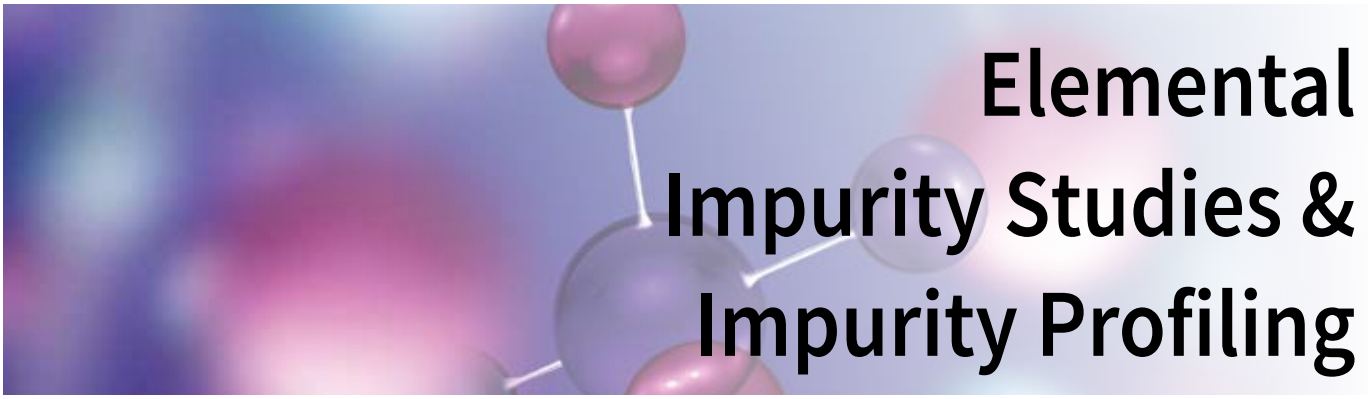
Techniques Utilized:

- Advanced analytical tools and methods, including:
  GC-MS/MS, LC-MS/MS, IC, ICP-MS

We conduct E&L testing on:

- **Containers & Packaging Materials:** HDPE, LDPE, PP containers, rubber stoppers, glass vials, syringes, injectable bags, blister packs, laminated tubes, tubing, and filters.
- **Auxiliary Articles & Manufacturing Aids:** Resins, gaskets, O-rings, implants, films, and more.
- **Drug Product Compatibility:** Testing for solids, parenterals, ointments, syrups, gels, inhalations, creams, emulsions, transdermal patches, and suspensions.

By partnering with us for E&L studies, you ensure regulatory compliance, protect patient safety, and maintain the integrity of your pharmaceutical products.



Elemental Impurity Studies & Impurity Profiling

During the manufacturing process, medications may contain elemental impurities from a variety of sources. These contaminants can be added purposefully, like with catalysts, or accidentally, through the use of drugs, water, excipients, manufacturing equipment, or leaching from container closure mechanisms.

At CellBio HiMedia, we recognize how crucial it is to assess elemental impurities in raw materials, pharmaceutical products, and active pharmaceutical ingredients (APIs). To guarantee the safety and quality of drug ingredients and completed drug products, adherence to industry standards such as the International Council for Harmonization (ICH) and the United States Pharmacopeia (USP) is essential.

Impurity Profiling and Excipient Analysis

Excipients are essential components in the manufacturing of pharmaceutical formulations, including biologics and biosimilars, serving various functions such as solubilization, stabilization, and delivery. It is imperative to assess excipients for biological safety and ensure they meet full monograph specifications. The formulation must also be tested for potentially toxic impurities to enhance safety and rule out any harmful effects. This includes:

1. Impurity Profiling: Identifying and quantifying impurities in the drug substance and product to ensure they are within acceptable limits and do not pose a risk to patient safety.
2. Excipient Analysis: Ensuring that all excipients are of high quality and free from contaminants that could affect the safety or efficacy of the final product.

At CellBio Himedia, our elemental impurity testing and validation services are designed to meet the highest regulatory standards.

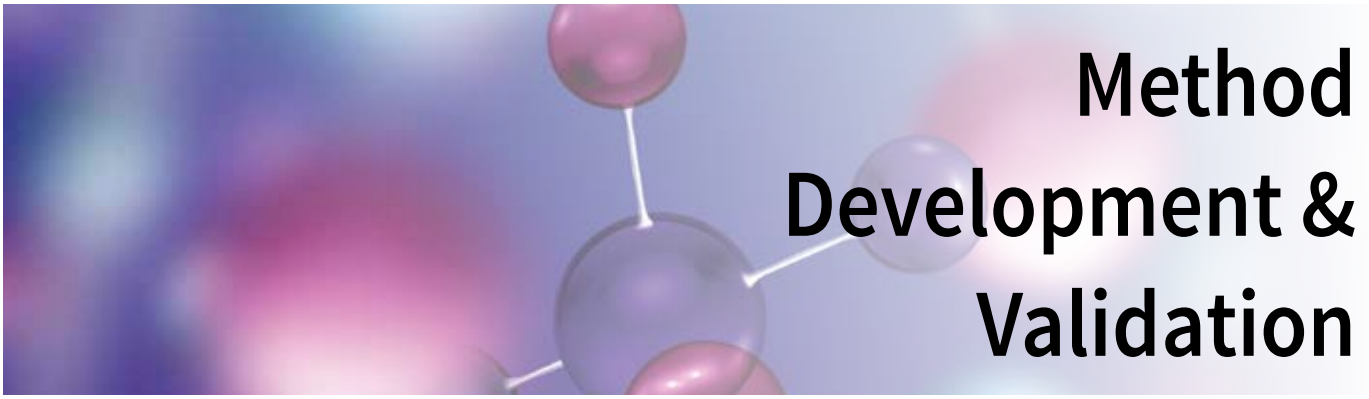
We specialize in:

- Regulatory Compliance Testing: Adhering to USP General Chapters <232> and <233>, ICH Q3D, EMA guidelines, and tailored client-specific requirements.
- Advanced Analytical Techniques: Utilizing ICP-MS with sample preparation carried out through conventional or microwave digestion methods for precision and reliability.

Our comprehensive testing services cover:

- Active Pharmaceutical Ingredients (APIs) / Drug Substances
- Drug Products: Including tablets, capsules, ointments, lotions, syrups, suspensions, gels, inhalations, creams, emulsions, and transdermal patches.
- Raw Materials and Intermediates
- Excipients

Choose CellBio Himedia to ensure your pharmaceutical / bio-pharmaceutical products achieve the highest levels of safety, quality and compliance with global regulatory standards.



Method Development & Validation

Analytical method development and validation are critical components of pharmaceutical development, ensuring precise qualitative and quantitative estimations, establishing product specifications, and determining shelf life.

Validated methods confirm process robustness, ensuring consistent results despite operator or laboratory variations.

Our Services

We adhere to **ICH Q2, USP <1225>**, method verifications under **<1226>**, and/or specific customer requirements.

Analytical Services:

- Identification and Assay
- Related Substances and Residual Solvents
- Dissolution and Content Uniformity
- Polymorphic Quantification and Particle Size Distribution
- Elemental Impurities (Q3D) and Genotoxic Impurities

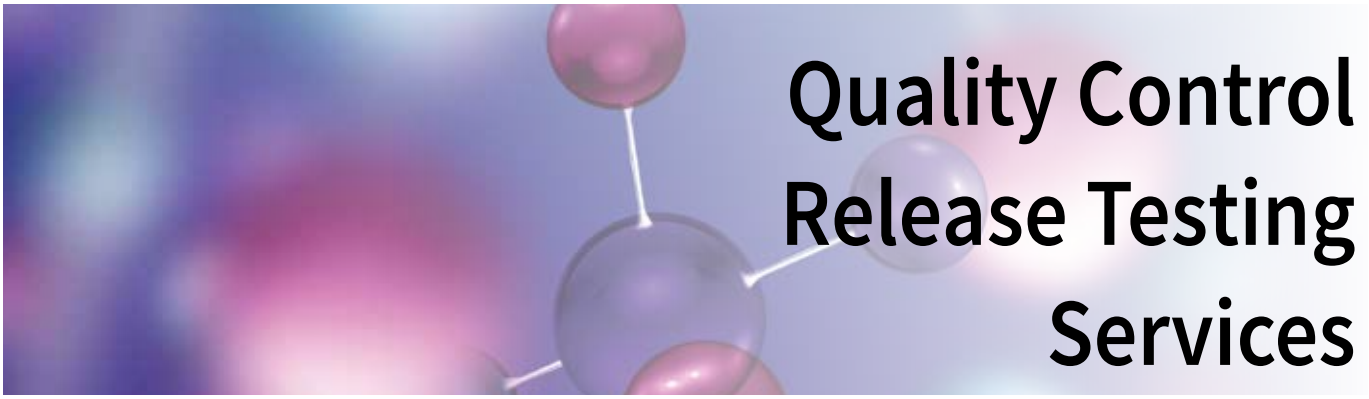
Techniques Utilized:

We employ advanced analytical techniques including chromatography (HPLC: UV, RI, FLD, PDA; UPLC; GC-HS: FID, ECD), mass spectrometry (GC-MS/MS, LC-MS/MS) and spectroscopy (ICPMS), Amino acid analyzer ensuring precise and reliable results for diverse pharmaceutical applications.

Testing Capabilities:

- Active Pharmaceutical Ingredients (APIs) / Drug Substances
- Drug Products: Tablets, Capsules, Ointments, Lotions, Syrups, Gels, Transdermal Patches, and more
- Raw Materials and Key Starting Materials (KSMs)
- Intermediates

Our expert solutions ensure reliable, compliant, and high-quality results tailored to your pharmaceutical needs.



Quality Control Release Testing Services

Quality control (QC) release testing ensures the safety, efficacy, and consistency of pharmaceutical products before they reach the market. Advanced analytical techniques help detect impurities, confirm composition, and ensure compliance with regulatory standards.

Key Analytical Techniques for QC Release Testing

Chromatographic Analysis (HPLC & GC):

- **High-Performance Liquid Chromatography (HPLC):** Used for precise separation and quantification of active pharmaceutical ingredients (APIs), impurities, and degradation products in various formulations.
- **Gas Chromatography (GC):** Ideal for analyzing volatile compounds, residual solvents, and impurities in drug substances and formulations.

Spectroscopic Analysis:

- **Ultraviolet (UV) Spectroscopy:** Used for qualitative and quantitative analysis of APIs and excipients based on their absorbance at specific wavelengths.
- **Mass Spectrometry (MS):** Helps in molecular identification, structure elucidation, and impurity profiling.

Analytical Testing for Various Dosage Forms:

- **Syrups:** Viscosity, pH, API concentration, and microbial contamination testing.
- **Gels & Creams:** Rheological properties, homogeneity, and stability assessments.
- **Patches:** Adhesion, drug content uniformity, and permeation testing.
- **Solid Orals (Tablets, Capsules):** Disintegration, dissolution, hardness, and uniformity evaluations.

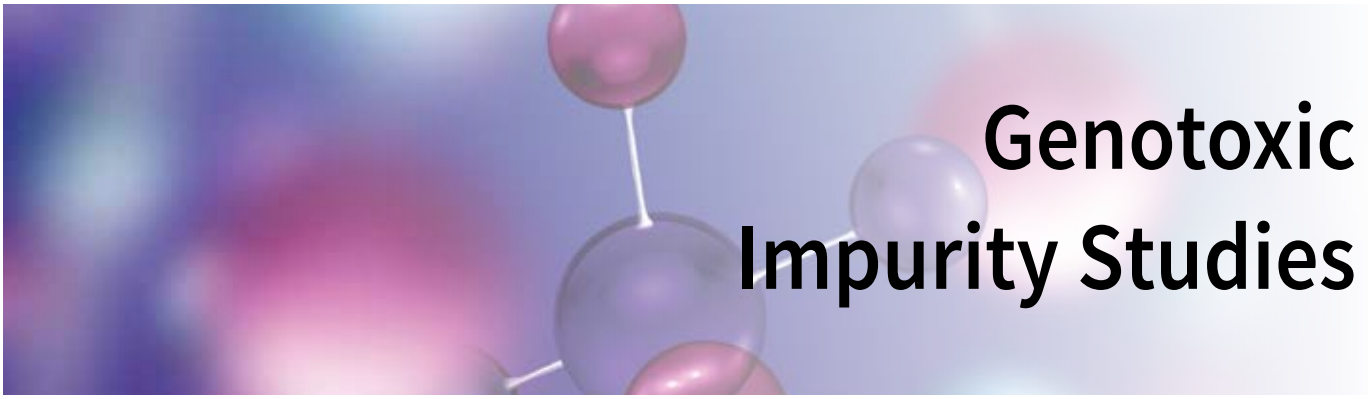
Trace Metal Analysis (ICP-MS):

- **Inductively Coupled Plasma Mass Spectrometry (ICP-MS):** Detects and quantifies trace levels of heavy metals (e.g., arsenic, cadmium, lead, mercury) to ensure compliance with ICH Q3D guidelines.

Genotoxic Impurities Determination:

- **LC-MS/MS (Liquid Chromatography-Mass Spectrometry):** Highly sensitive for detecting genotoxic impurities at trace levels, ensuring drug safety.
- **GC-MS/MS (Gas Chromatography-Mass Spectrometry):** Used for volatile and semi-volatile genotoxic impurity analysis, crucial for regulatory acceptance.

These advanced analytical methodologies play a vital role in pharmaceutical quality control, ensuring compliance with regulatory standards and delivering safe, effective medications to patients.



Genotoxic Impurity Studies

The synthesis of drug substances involves the use of various reactive chemicals, solvents, catalysts, and other processing aids. During chemical synthesis or subsequent degradation, impurities may be introduced into drug substances and their formulations.

Genotoxic impurities (GTIs) are DNA-reactive substances with the potential to induce genetic mutations, potentially leading to cancer, even at low levels. Therefore, regulatory authorities mandate strict testing and control of these impurities to ensure drug safety.

Our Genotoxic Impurity Study Services Include:

- Identification and quantification of genotoxic impurities as per **ICH M7 (R2), USFDA, EMA**, and specific customer requirements.
- Development, validation, and analysis of genotoxic impurities based on the allowable **maximum daily exposure (MDE) limits.**
- Advanced analytical techniques including: **GC-MS/MS, HS-GC-MS, LC-MS/MS, ICP-MS, HPLC, GC, and IC**

Testing Scope:

We conduct comprehensive genotoxic impurity studies for:

- **Active Pharmaceutical Ingredients (APIs) / Drug Substances**
- **Drug Products,** including but not limited to :
  - Tablets, Capsules
  - Ointments, Lotions, Creams
  - Syrups, Suspensions, Gels
  - Inhalations, Emulsions
  - Transdermal Patches

*Ensure compliance and safety with our **expert genotoxic impurity analysis**—tailored to meet regulatory standards and your specific needs*

CUSTOM SERVICE PLATFORM

Your experiments… Our expertise…

Cell culture experiments are time consuming, require premium quality resources and triplicate repetitions for obtaining statistically significant results. Seek our services for faster and accurate results.

Our Custom Testing Services provide you with a complete solution to make your experiments easier and faster, assuring you the accuracy and authenticity of results.

With more than a decade of experience in Animal Cell Culture, we possess a comprehensive array of premium quality media, reagents and kits. A team of competent scientists at our lab have optimized and validated numerous cell culture techniques. Equipped with high throughput automated instruments complying with the latest technology, we also have advanced analytical tools for statistical analysis of the experimental data. From a wide variety of cancerous cell lines, stem cells and primary cells, you can select the cell line of your choice depending on your experimental requirement!

Save your precious time… Depend on us…

FEATURES

- Validated method of analysis
- Save your time and resources
- Detailed statistical analysis and comprehensive report
- Accuracy of results assured by the use of high throughput, automated instruments

Cell Based Custom Services

Endotoxin Testing Services

Ensuring Product Safety & Regulatory Compliance Across Industries

At HiMedia Laboratories, we offer comprehensive endotoxin testing solutions to meet the highest industry standards, ensuring the safety and efficacy of pharmaceutical, bioprocessing, medical, and research products. Our highly sensitive and regulatory-compliant assays provide precise detection of bacterial endotoxins, protecting human health and product integrity.

Our Endotoxin Testing Applications

We provide endotoxin testing services for various industries, ensuring product safety and quality. Our expertise spans multiple sectors, including:

- **Pharmaceutical & Biologics** – Detection of endotoxins in injectable drugs, vaccines, and biologics.
- **Medical Devices** – Sterility validation for implantable devices, surgical tools, and dialysis equipment.
- **Bioprocessing & Cell Therapy** – Endotoxin Testing for cell culture media, growth factors, and biologics.
- **Water & Parenteral Solutions** – Routine testing of Water for Injection (WFI), dialysis fluids, IV fluids, ophthalmic solutions, and infusion therapies.
- **Research & Diagnostics** – Ensures endotoxin Testing for reagents, buffers, and diagnostic kits, enhancing accuracy in molecular biology, immunoassays, and experimental studies.
- **Food & Beverage Safety** – Endotoxin testing for probiotics, dietary supplements, fermentation-based products, dairy, and infant nutrition.

Cell Banking Services

- Cells and Cell line Banking Services
- Customer Specific Cells and Cell Product Banking Services
- Project Specific Cell Line Expansion Services
- Customer Specific Raw Material Testing Services
- Clone Development and Characterisation Services
- Spent Media Analysis

Cell Cytotoxicity Assay Services

High throughput cell proliferation and cell cytotoxicity analysis with cell assay kits like **MTT, XTT, MTS, WST-1, WST-8, EZBlue**

Mycoplasma Testing Services

- Direct testing by culture method
- Indirect testing by Hoechst staining
- PCR testing (16s rRNA sequence)
- PCR testing (16s - 23s rRNA space region)

Cell Authentication Services

- STR profiling (service provided by ATCC)
- Marker analysis (flow cytometry)

If you don't find the assay you want, contact us with your project requirements at atc@himedialabs.com

Virus Purification Chemicals	TC	445

Product	Prefix	Page
Virus Precipitation Chemicals	TC	445
Vaccine Stabilzers & Adjuvants	TC	445-446

Our Offerings for th

Classical Media: **Pg no.463**

- DMEM, RPMI 1640, MEM, F-12 Nutrient Mixture, Basal Media

Serum-free Media: **Pg no.407**

- HEKin1™, CELLin1™, BHKin1™, PrimaVac™ (for HEK293, VERO, and BHK-21 cells)

Consumables: **Pg no.584**

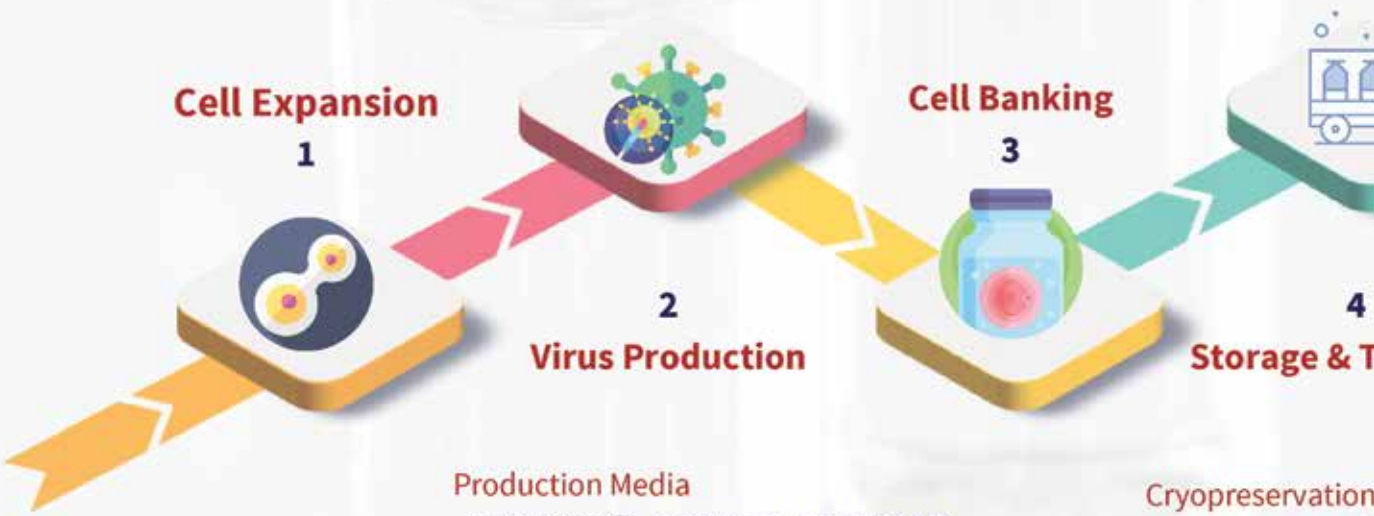
- Bioreactor Tubes - **TCP229**
- Roller Bottles for scalable cell cultures

Additives & Supplements: **Pg no.476**

- Balanced Salts, Glucose Solution, Pluronic F-68 for optimal cell growth

Cryopreservation

- Cryoprotectants- **TC450M,TC503**
- Serum-free cell freezing media - **TCL285, TCL098**
- Cryovials-**TCP076, TCP216, TCP212**



Production Media

- CELLin1™ - **SFM036L, SFM036AP**
- BHKin1™ - **SFM006L, SFM006AP**
- HEKin1™ (optimized for high viral titers) - **SFM038AP, SFM046L, SFM036AP**

Consumables: **Pg no. 584**

- HiFactory, Roller Bottles, Multiwell Plates, Tissue Culture Flasks - **TCG16, TCG18**

Cryopreservation

- Freezing Med vaccine stabi **TCL098**

Packaging

- Sterile PET B

ne Vaccine Industry

Stabilizers & Adjuvants

- Aluminium Hydroxide Gel - **TC550M**
- Aluminium Phosphate Gel - **TC551M**
- Polysorbate 80 - **TC543**
- Thimerosal - **TC470M**
- ß-Propiolactone - **TC223**
- Span 80 - **TC599**
- Mineral Oil - **TC600**

Antibiotics:

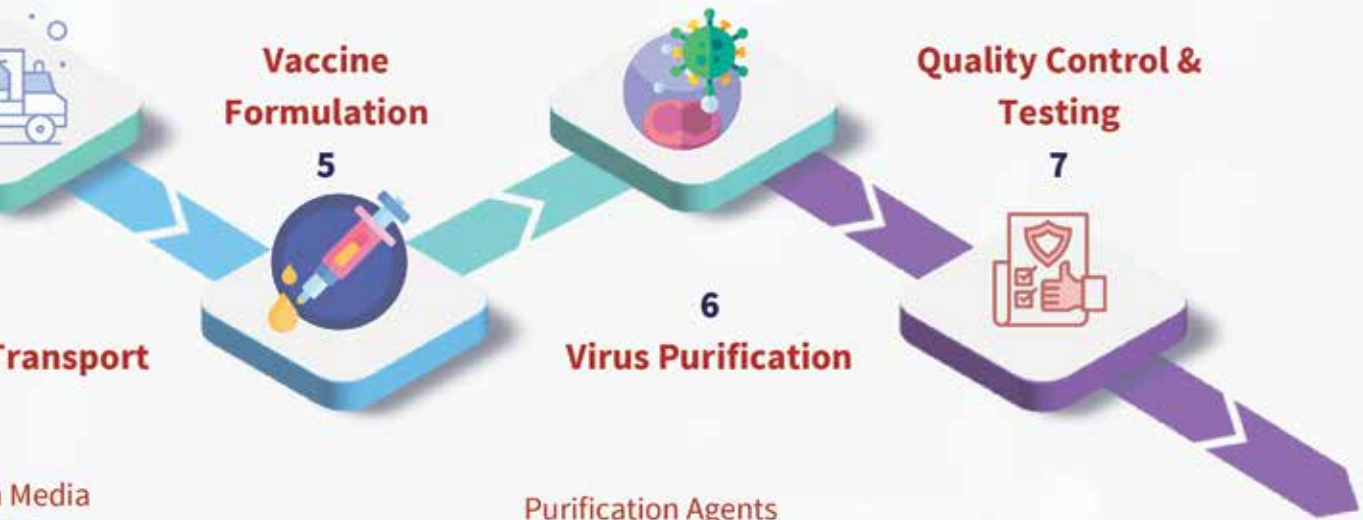
- Gentamycin Sulphate - **TC026**
- Neomycin Sulphate - **TC031U**
- Polymyxin B Sulphate - **TC033**

Diagnostic Tools

- Mycoplasma Detection Kits - **CCK009,CCK022, CCK007, CCK008**

Analytical services **Pg no. 428**

- HPLC, UV Spectroscopy, LC-MS for quality and impurity testing



Media
lia for maintaining
lity - **TCL285,**

ottles: **Pg no. 597**

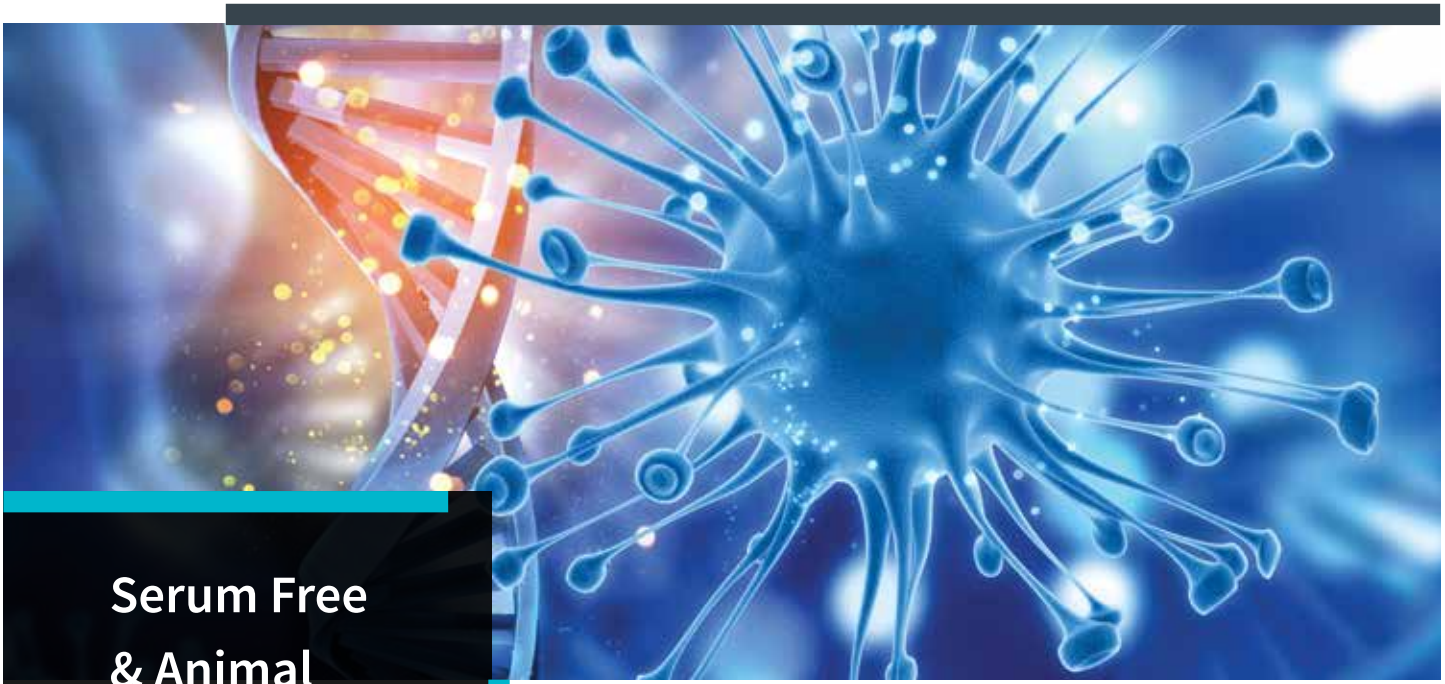
Purification Agents

- Multicompendial Chemicals - **Pg.no - 573**
- Sucrose - **TC048M**
- Sorbitol -**TC170M**
- Glycerol for viral concentration and purification -**TC170M**

CELLBIO®

HEKin1™
CELLin1™ VERO SFM

Media for Viral Vaccine Production



CELL BIOLOGY

Serum Free & Animal Component Free Media Designed for Growth of HEK293 & VERO Cells

HEKin1™ for Recombinant COVID-19 Vaccine Production

HEK-based vaccine manufacturing processes require a highly efficient and productive medium at each step starting from cell banking, till cell expansion and virus production in bioreactor.

Try out our **HEKin1™**, a fully optimized medium for production of HEK-based recombinant COVID-19 vaccine.

CELLin1™ VERO SFM for Inactivated COVID-19 Vaccine Production

Vero is a potential host cell line used for SARS-CoV-2 virus replication & manufacturing of inactivated COVID-19 viral vaccine.

Try out our **CELLin1™ VERO SFM**, to achieve high viral titers using Vero cells in 2D and 3D cultures.

- Scalability for use in shake flasks & bioreactors
- Save time with simplified purification and downstream processing
- Supports high cell density, culture longevity and increased yield

HIMEDIA®

Media for FMD & other Human Vaccine Production

BHKin1™ PrimaVac™

Chemically defined Animal free, Serum free media designed for growth of BHK-21 & Chick embryo primary fibroblasts

Assisting you at every step of Viral Vaccine Production

Step1 : Cell Banking

Step 2 : Upstream Processing - Virus Production

Step 3 : Downstream Processing - Virus harvest

Step 4 : Vaccine Formulation

Vaccine Production Platform

Vaccine Production

HEKin1™

Product	Code	Packing	Price in ₹
HEK Pro (A) Medium **Serum-Free, Chemically Defined Medium, Medium for HEK293 suspension culture** Without L-Glutamine, Sodium Bicarbonate and Phenol Red Store at 2 - 8°C	**SFM050AP-10L** **SFM050AP-50L**	**10lt** **50lt**	**75045** **294485**
HEKin1™ **Medium for HEK293 adherent culture** w/o Sodium bicarbonate, Phenol red and L-Glutamine Contains basal medium in powder form Part A: Basal Media Part B: Serum free growth supplement Store at -30°C to -10°C	**SFM038AP-10L** **SFM038AP-50L**	**10lt** **50lt**	**71475** **285905**
HEKin1™ **Medium for HEK293T adherent culture** w/ Sodium bicarbonate w/o Phenol red and L-Glutamine Contains basal medium in liquid form Part A: HEKin1™ Basal Medium Part B: HEKin1™ Growth supplement for HEK293T adherent culture Store at -30°C to -10°C Part C: HEKin1™ Attachment factor for HEK293T Store at -30°C to -10°C	**SFM046L-500ML** **SFM046L-1000ML**	**500ml** **1000ml**	**11550** **23100**
HEKin1™ **Medium for HEK293T adherent culture** Without Sodium bicarbonate, Phenol red and L-Glutamine Contains basal medium in powder form Part A: HEKin1™ Basal Medium Part B: HEKin1™ Growth supplement for HEK293T adherent culture Store at -30°C to -10°C Part C: HEKin1™ Attachment factor for HEK293T adherent culture Store at -30°C to -10°C	**SFM046AP-1L**	**1lt**	**21000**

CELLin1™ VERO SFM

CELLin1™ VERO SFM **Chemically defined, Animal Component Free Virus Production medium** w/ Sodium bicarbonate w/o L-Glutamine and Phenol red Contains basal medium in liquid form Part A - Basal Medium (liquid) Part B - Serum-free growth supplement Store at -30°C to -10°C	**SFM036L-1000ML**	**1000ml**	**6315**
CELLin1™ VERO SFM **Chemically defined, Animal Component Free Virus Production medium** w/o L-Glutamine, Sodium bicarbonate and Phenol red Contains basal medium in powder form Part A - Basal Medium (powder) Part B - Serum-free Growth Supplement Store at -30°C to -10°C	**SFM036AP-1L** **SFM036AP-10L**	**1lt** **10lt**	**4920** **39375**

All the above products to be stored at 2-8°C unless indicated

Product	Code	Packing	Price in ₹
BHKin1™			
BHKin1™ **Serum Free BHK Medium, Animal Component Free, Chemically Defined** w/ Sodium bicarbonate and Pluronic F68 w/o L-Glutamine 1X Liquid Serum Free Cell Culture Medium Part A - Basal Medium (liquid) Part B - Serum-free growth supplement Store at -30°C to -10°C	SFM006L-1000ML	1000ml	6420
BHKin1™ **Chemically defined, Animal component free, Serum free BHK-21 Virus Production Medium** w/ Pluronic F68 w/o L-Glutamine and Sodium bicarbonate Part A - Basal Medium (powder) Part B - Serum-free Growth Supplement Store at -30°C to -10°C	SFM006AP-1L SFM006AP-10L	1lt 10lt	4920 39375
BHK-210 Pro (AD)			
BHK-210 Pro (AD) New **Medium Serum-free, Chemically Defined, Animal Component Free Serum-free BHK-21 production medium** With L-Glutamine Without Sodium bicarbonate	SFM047P-1L SFM047P-10L	1lt 10lt	5165 41345
Tryptose Phosphate Broth			
Tryptose Phosphate Broth Cell Culture Grade Store at 15-30°C	AT811-100G AT811-500G	100gm 500gm	2225 7700
PrimaVac™			
Chick Embryo Fibroblast Medium w/ L-Glutamine w/o Sodium bicarbonate	AT168-10X1L AT168-20L AT168-50L	10x1lt 20lt 50lt	4735 7770 12880
Chick Embryo Fibroblast Medium w/ L-Glutamine and Sodium bicarbonate	AL168A-500ML	500ml 2x500ml 6x500ml 20x500ml	4665 7070 19085 47455
Virus Purification			
Sucrose D-(+)-Saccharose, Sugar Meets USP-NF, EP, JP, BP and IP testing specifications $C_{12}H_{22}O_{11}$ MW : 342.30 CAS : 57-50-1 Store below 30°C	TC048M-500G TC048M-1KG TC048M-5KG	500gm 1kg 5kg	4455 10190 40770

Product	Code	Packing	Price in ₹
D-(-)-Sorbitol Polyhydric alcohol; D- Glucitol; Meets USP-NF, EP, JP, BP and IP testing specifications $C_6H_{14}O_6$ MW : 182.17 CAS : 50-70-4 Store below 30°C	TC170M-500G TC170M-1KG TC170M-5KG	500gm 1kg 5kg	1865 2785 11450
Glycerol Glycerin Meets USP-NF, EP, JP, BP and IP testing specifications $HOCH_2CH(OH)CH_2OH$ MW : 92.09 CAS : 56-81-5 Store below 30°C	TC503M-500ML TC503M-1L	500ml 1lt	4075 7900
Virus Precipitation			
Polysorbate 80 (See: Tween® 80) Polyoxyethylene 20 sorbitan monooleate Meets USP-NF, EP, JP, BP and IP testing specifications CAS : 9005-65-6 Store below 30°C	TC543M-100ML TC543M-500ML	100ml 500ml	1755 3925
Polysorbate 20 (See:Tween® 20) Meets USP-NF, EP and BP testing specifications CAS : 9005-64-5 Store below 30°C	TC287M-100ML TC287M-5x100ML	100ml 5x100ml	2935 8790
Sodium chloride Meets USP-NF, EP, JP, BP and IP testing specifications NaCl MW : 58.44 CAS : 7647-14-5 Store below 30°C	TC046M-500G TC046M-1KG TC046M-5KG TC046M-10KG	500gm 1kg 5kg 10kg	3185 5735 17200 25480
Tween®80 (See: Polysorbate 80) Polyoxyethylene 20 sorbitan monooleate Meets USP-NF, EP, JP, BP and IP testing specifications CAS : 9005-65-6 Store below 30°C	TC543M-100ML TC543M-500ML	100ml 500ml	1755 3925
Vaccine Stabilizers and Adjuvant			
Aluminium hydroxide, dried gel Meets USP-NF, EP, JP, BP and IP testing specifications MW : 78 CAS : 21645-51-2 Store below 30°C	TC550M-500G TC550M-1KG TC550M-5KG	500gm 1kg 5kg	4645 8370 33395
Aluminium phosphate gel Meets EP and BP testing specifications AlO_4P MW : 121.95 CAS : 7784-30-7 Store below 30°C	TC551M-100ML TC551M-500ML	100ml 500ml	On Request On Request
Aluminium phosphate gel Meets USP-NF testing specifications AlO_4P MW : 121.95 CAS : 7784-30-7 Store below 30°C	TC551U-100ML TC551U-500ML	100ml 500ml	On Request On Request

CELLBIO®

Product	Code	Packing	Price in ₹
Aluminium potassium sulphate dodecahydrate (See: Potassium alum dodecahydrate) Meets USP-NF, EP, JP and BP testing specifications $KAl(SO_4)_2.12H_2O$ MW : 474.39 CAS : 7784-24-9 Store below 30°C	TC552M-500G TC552M-1KG	500gm 1kg	14445 16130
Ammonium sulphate Diammonium sulphate Meets USP-NF testing specifications $(NH_4)_2SO_4$ MW : 132.14 CAS : 7783-20-2 Store below 30°C	TC553U-500G TC553U-1KG TC553U-5KG	500gm 1kg 5kg	4960 7800 31190
Benzethonium chloride Meets USP-NF, EP, JP and BP testing specifications $C_{27}H_{42}ClNO_2$ MW : 448.09 CAS : 121-54-0 Store below 30°C	TC554M-100G TC554M-250G	100gm 250gm	7095 14190
Bromoethyl amine hydrobromide 2-Aminoethyl bromide hydrobromide $BrCH_2CH_2NH_2 \cdot HBr$ MW : 204.89 CAS : 2576-47-8 Assay : ≥96% Store below 30°C	TC516-100G TC516-1KG TC516-5KG	100gm 1kg 5kg	1505 5835 21825
Cetyl trimethyl ammonium bromide Cetrimonium bromide; Hexadecyltrimethylammonium bromide Meets USP-NF testing specifications MW : 364.45 CAS : 57-09-0 Assay : ≥96% Store below 30°C	TC555U-25G TC555U-100G TC555U-500G	25gm 100gm 500gm	5450 13235 26860
Formaldehyde solution, 35% Meets USP-NF, EP, JP and BP testing specifications CH_2O MW : 30.03 CAS : 50-00-0 Store below 30°C	TC557M-500ML	500ml	1910
Glutaraldehyde, 50% Glutaral Meets USP-NF, BP and IP testing specifications MW : 100.12 CAS : 111-30-8 Store at 2 - 8°C	TC558M-100ML	100ml	18475
Hemin MW : 652 CAS : 16009-13-5 Assay : ≥95% Store at 2 - 8°C	TC559-1G TC559-5G	1gm 5gm	4455 19110
Magnesium stearate Meets USP-NF, EP, JP, BP and IP testing specifications $C_{36}H_{70}MgO_4$ MW : 591.27 CAS : 557-04-0 Store below 30°C	TC560M-500G TC560M-1KG	500gm 1kg	2355 3535

Product	Code	Packing	Price in ₹
Mineral oil White Mineral oil C_2H_6OS MW : 78.13 CAS : 8042-47-5 Store below 30°C	TC600-100ML TC600-500ML	100ml 500ml	1165 3635
Monosodium glutamate Meets USP-NF testing specifications $C_5H_8NNaO_4.H_2O$ MW : 187.13 CAS : 6106-04-3 Assay : ≥99% Store below 30°C	TC561U-100G TC561U-500G	100gm 500gm	2545 10190
2-Phenoxyethanol Phenoxyethanol, 2-Phenoxyethyl alcohol Meets USP-NF, EP, BP and IP testing specifications $C_8H_{10}O_2$ MW : 138.16 CAS : 122-99-6 Store below 30°C	TC549M-500ML	500ml	6065
Povidone, K-value ≤15 Plasdone C; PVP; 1-Vinyl-2-pyrrolidinone polymer Meets USP-NF, EP, JP, BP and IP testing specifications $(C_6H_9NO)n$ CAS : 9003-39-8 Store below 30°C	TC601M-10G TC601M-50G TC601M-100G TC601M-500G	10gm 50gm 100gm 500gm	On Request On Request On Request On Request
Povidone, K-value > 15 Plasdone C; PVP; 1-Vinyl-2-pyrrolidinone polymer Meets USP-NF, EP, JP, BP and IP testing specifications $(C_6H_9NO)n$ CAS : 9003-39-8 Store below 30°C	TC562M-10G TC562M-50G TC562M-100G TC562M-500G	10gm 50gm 100gm 500gm	On Request On Request On Request On Request
